

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XV.---NO. 1.

NEW YORK, JANUARY 3, 1884.

WHOLE NO. 445.

Correspondence.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, December 31, 1883.

Holiday trade is over. The stationers and their "help" are glad of it. The clerks and salesmen all look jaded. Their holiday season is to come. Some croakers are predicting a season of dullness after the holidays, as if that has not always been, as it were, a law of business from time immemorial. Employers are tired, too. The holiday work was hard, but it brought in money. J. R. Hawley was so unfortunate as to lose about \$600 in damage to fine stationery by a leak in his roof, of which the thaw that came just before Christmas took a mean advantage.

New Years card this time are exceedingly plain. The manufacturing stationers have done a good business in this line, but not so much as last year. Not because times are hard, however, but because the practice of making New Year calls is in a measure falling into neglect. The proper card is a plain pretty white one, with the name engraved in script letters, shaded at the bottom.

There are fresh peculiarities every year about the purchases of holiday goods in Cincinnati. Some years at the holiday season only plainly bound cheap books find sale. In others, finely illustrated works have a great run. Again, juveniles take the lead, and still again there is a sale of all sorts in which it is hard to tell which is foremost in the sales. This year there has been a good call for standard literature. Novels and poetry went off well and people wanted good type, good paper and good binding. Those who wanted cheap books on mean paper, meanly bound, went to the dry-goods stores. In poetry, Will Carleton went off well. Finely illustrated editions of celebrated poems sold freely—Poe's "Raven" and Coleridge's "Ancient Mariner," for instance. In novels, standard works sold admirably. There seemed to be a very decided taste, too, for good historical works and Prescott, Motley and Bancroft went off well. American books had a most decidedly good sale, and a cheering sign was the increased call for Washington Irving's works. There was a notably large sale of works on art, especially finely illustrated editions. This is to be expected in Cincinnati, where art enthusiasm runs so high.

Among the trade visitors who have been here this week—yes, this week—were W. L. Marks, J. B. Chadwick and H. B. Handy, of the Mor-

gan Envelope Company, Springfield, Mass.; J. B. Burr, of the Burr Index Company, Hartford, Conn., and Mr. Classon, of the Plimpton Manufacturing Company, Hartford, Conn.

Nearly everybody now is taking account of stock and arranging plans of business for next year. Most of men say their aggregate sales for the year were quite equal to those of last year, but everybody says margins are very, very small. Some shake their heads and stop with saying that—others go farther and say, "A man's goods cost him something, and it costs him something to run his business; now, if he doesn't make his margin wide enough to cover these two somethings and leave him a fair profit, he had better shut up shop."

There are no trade incidents at this moment to relate. What may happen before I mail this letter no man knows. If anything occurs worth while, depend upon me to append a record of it.

PRINCE WILLIAM.

BOSTON BITS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., Boston, January 2, 1884.

Be careful how you date your letters and bills, this is '84, you know. Of course it will come a little hard at first, and the eraser will be frequently used with a few cuss words, but as the days roll by the new year will become more familiar, and one's pen will forget its long intimacy with 1883. Now that the new year is come, what are the prospects? is a question to be frequently asked. But stationers do not, as a rule here, take stock until February, and so this month goes in with the old year. Trade for the past twelve months has been very satisfactory, though a few complain a little, and these are prepared to hear of failures in any section. Boston has a number of business men who are very conservative and hold on to old ideas too long, and they seem to think that the innovations which the progress of this age has introduced into business can produce only a financial crash. They are waiting for the crash.

Winkley, Thorp & Dresser may rightly be classed among the progressive houses of the stationery trade. There is a good deal of young blood in the firm and its business policy is of the aggressive kind, forcing trade out into new fields, and the house believes in presenting a line of goods that will command attention from the trade. What cannot be found in its extensive lines of selected stock, it is useless to seek for. Just examine this firm's illustrated catalogue issued recently for the trade only. Have you

seen it? No! Well, just write the firm for a copy, and see what is being offered to the trade this year. It is a book of 200 pages, profusely illustrated, clearly printed on heavy white paper, and gives the general stationer an idea of what ought to be in stock, where to get the goods, and the prices for the same. It is a catalogue that will do to keep, and the trade will profit by having a copy handy for reference.

Charles H. Whiting is another of the progressive kind, and he reports that his trade for the past year has been greater than for previous years, with fair prospects of its continuance. Together with his jobbing trade in general stationery supplies, Mr. Whiting makes a specialty of blank-books, manufacturing them in large numbers. His order book for January delivery shows an immense business in this line.

The Dennison Manufacturing Company produces a line of goods that is known to every stationer in the country, and the world is a large consumer of its varied products. With this concern last year's trade has been very satisfactory. After taking account of stock, at which it is now engaged, something new in its line will be presented.

The Forbes Company was found busily working over the year's figures, and I was kindly handed a very beautiful catalogue with the injunction, "Take that, and come in again next week." From the catalogue I see that the house is prepared for the valentine and Easter trade, and presents some very artistic productions of Raphael Tuck & Sons. These cards are gems of art, for which the Forbes Company is sole agent for America and Canada.

After a legal contest of three years, the Davidson Rubber Company has at last been sustained in its rights to manufacture the "Davidson Velvet Rubber." This final decision was made about a month ago, and the company announces that, as it only has the sole right to manufacture and sell this erasive rubber, it will hold all future infringers to legal account. As the trade knows, this rubber takes the lead because of its merits, and the Davidson Rubber Company is prepared to furnish it as demanded.

The demand for school supplies has been very good for the past year, and C. W. Clark, successor to the N. E. School Furniture Company, has been kept quite busy in supplying this demand. The profits of the business will be revealed—to himself—after this week's work with the stock is over.

Our manufacturers have by legislation secured for themselves what is known as protection, and it seems a little strange that, having secured this protection for themselves, these

manufacturers do not offer a little protection to their patrons who so largely handle their goods. Among booksellers I hear of much complaint on this score. An instance is cited where a large publishing house presented to the trade its customary holiday book. The work gave promise of being very popular, and the trade stocked up quite heavily at 67 cents per copy, the lowest price offered by the publishers. Imagine the surprise of the trade when it was learned that a large edition of the same work had been placed by the publishers with a dry-goods house at such figures as would permit of their being *retailed* at 45 cents a copy. Such a business stroke is hardly fair to the trade. It is perfectly legal, no doubt, but not right in a business sense. Another case is mentioned of a publishing house whose books being listed at \$1.75 were *retailed* over its own counter at \$1. Should not the retail trade receive a little protection?

A. L. D.

WATER-MARKS IN OLD BOOKS.

It is interesting and curious, even if it be not occasionally important and useful, to know something about the old water-marks which formed such a distinguishing feature of all kinds of paper made before the present century. Wove paper was introduced by Baskerville, and it has no water-mark whatever; all other papers formerly bore these devices.

The water-mark, it may be here stated, is made in the paper while it is in a soft, pulpy condition, by the pressure of a wire pattern. In hand-made paper this pattern is formed in the wire mold and applied previous to "couching;" in machine-made paper it is formed in the "dandy-roll."

Comparatively few descriptions of paper manufactured at the present time display any water-mark, except the name of the manufacturer or some trade term distinguishing the quality. The following are some of the marks most frequently found in the paper used by the early printers, and in old books generally.

The Globe, Surmounted by a Cross.—Believed to be the earliest known water-mark. Found in an account book at the Hague, bearing the date of 1301. This mark is very similar to the devices of John of Cologne, Jenson and Scot, when printing in Venice, and may prove the Italian origin of the paper.

The Tower.—This is found at the Hague in a manuscript dated 1354. It is doubtless the tower of Antwerp, used also as an emblem by Gerard Leen. The tower appears frequently in German and Italian manuscripts of the fourteenth and fifteenth centuries.

The Cross.—Many undated Italian manuscripts of an early date contain a cross as a water-mark.

The Bull's Head appears in the earliest specimens of paper extant, and a favorite symbol with paper makers of the fourteenth and fifteenth centuries. There are numerous varieties of it. One, three inches in length, appears as the water-mark of an account dated in the year 1310, which might also be of Italian origin, as a similar device was used as the arms of Pope Calixtus in 1456. This work appears in the Gutenberg Bible, in Fust and Schaeffer's Bible of 1462, and in the publication of Ulric Zel at Cologne.

The Hand, surmounted by the Fleur-de-lis.—The peculiar badge of the House of Burgundy. A hand is also displayed upon Leen's emblem. The latter water-mark was common in the early Dutch block books.

The *Fleur-de-lis*, the *Paschal Lamb* and the

Peter's Cock are all found in the public account books at the Hague, bearing respectively the dates of 1366, 1356 and 1380. The fleur-de-lis probably refers to Philip of Burgundy, who bore it on his arms, and the lamb was the insignia of Rouen, and also of other bishoprics.

The Postman's Horn.—This rude outline is copied from the mark upon a letter dated in 1421; the mark itself, afterward very common, is supposed to have given the name to "Post paper."

A Fool's Cap, with feather and bells, is supposed to have given the name to "foolscap" paper.

The Unicorn.—A symbol of power, adapted by Philip the Good, who chose two unicorns as supporters of his coat-of-arms.

The Letter P.—Probably the initial of Philip the Good. Paper bearing the P had, however, been made in the reign of Philip the Hardy. Its varieties are very numerous.

The Letter Y.—Supposed by Sotheby to be the initial of Ysabel, third wife of Philip the Good, married in 1429. The Y first appears in an account dated 1431.

The Dolphin and Anchor.—These appear to have originated in some maritime country. Both were used by Aldus Manutius at Venice, but they are equally applicable to the chief cities of the Low Countries. The dolphin appears first at Haarlem, in a manuscript dated 1418, also at the Hague in 1423, and in a letter to the Bishop of Durham, dated at Melun in 1420. The anchor, afterward in common use, appears first at the Hague, in a writing dated 1396.

A Pot or Jug.—A favorite early mark, first known with the date 1352, and giving its name to "pot" paper.

Modern paper marks are either modifications of the above, or are new designs, introduced for the purpose of distinguishing the products of various mills.—*British and Colonial Printer and Stationer.*

ART IN PAPER DECORATIONS.

The announcement in a newspaper of "100,000 rolls of wall-paper" for sale, would seem to indicate that there is either an under-consumption of that article or a great demand for it. There are now nearly thirty American factories engaged in the manufacture of wall-paper, and all of them, according to advices, find it necessary to run the year around to keep up with the demand. The improvements in machinery and in the process of manufacture, together with the advance in the art of coloring and designing, have fairly driven the imported papers from our markets. The several establishments in Boston where paper hangings are sold in large stock attest the increasing popularity of paper hangings, and it is now acknowledged that the American patterns are among the most artistic in the world. As much skill is required in wall-paper designs as is demanded in new designs for textile goods.

Perhaps the fact is not generally known, or at least not appreciated, that the invention of the Fourdrinier paper machine made paper-hangings possible, and has wonderfully influenced the use of this elegant and inexpensive substitute for the costly and elaborate arras and tapestries of former times. In the first settlement of our own country, the use of wall-paper met with great opposition, as did also the use of paint, which was regarded as a useless luxury. The walls, however, were covered with all sorts of drawings and pictures, in small frames. On each side of the chimney they usually had a sort of alcove, and the wall under the windows was

wainscotted. The alcoves were painted. An innovating cooper in Boston "set a good example," having "laid one of his rooms in oil." Soon after this, the use of wall-paper became common. The importations of the article were very large from England and France. The manufacturers of stained paper in Boston were at one time sufficient not only to supply the State, but other States.

Within the past ten years, and particularly during the past two years, there has been a marked improvement in the manufacture of wall-paper, and the uses to which it is put are now more numerous than ever before in the history of the industry. For instance, more paper is used to decorate walls and ceilings now than ever before, and ceilings are rarely frescoed. The artistic quality of the expensive wall-papers now attract special attention, and it would seem as though one of the "lost arts" had been recovered in this respect. Some kinds of roll paper cost as high as \$50, and \$30 per roll is not an uncommon price. The extreme difficulty of identifying mediæval colors, and even those of the Renaissance period, has perplexed many historical painters, but, however, some, if not all of them, appear to be reproduced in so common an article of domestic use as wall-paper.

Shades of color in the making of wall-paper is as jealously regarded as it is in the manufacture of cloths; and in this connection the difficulties of future antiquaries will be as great as ours if they try to discover what shades of color were known by such names as magenta, Alexandra blue, azurine, and a hundred others—shades of color that are worked into wall-paper as well as into the finest and most fashionable fabrics. The classics used the term purple for the sea, for a maiden's blush, for a cucumber, for something bright and shining, for something dark and gloomy. And the same rule or fancy pertains to use of colors in wall-paper. Hence in the introduction of "pressed" papers, the artistic work of which is done by hand, colors are introduced that afterward get confused with each other as regards names.

Probably the costliest papers in use are the "pressed," produced by a roller, then colored and figures painted by hand. When put on this gives the effect of wood carving or bronze relief work. A new and solid decoration known as "Lincrusta-Walton," is used on walls. It comes in lengths like wall-paper, but is quite bulky. It is very expensive, yet in the end economical, as it can be taken down and replaced without much trouble. Japanese pictures are used for a frieze, and with bamboo moldings and a plain field with Japanese panels, the effect is striking and neat but not gaudy. Some of the most expensive private residences in Boston and vicinity have been entirely treated with elegant paper hangings, frescoing and painting being dispensed with altogether. Paper hangings of the cheapest kind are often used on a new house until the walls are settled.—*Commercial Bulletin, Boston.*

The following method is given for gilding leather: It is first moistened with a sponge, then stretched and tacked on a board. When dry it receives a thick coat of isinglass solution, then one of white of egg that has been beaten and allowed to settle. Upon this is laid lightly with a brush sheets of silver foil, which are then pressed down with a wad of cotton wool. When this is dry it is painted over with yellow leather varnish, which gives it a beautiful golden appearance. A varnish for bronze boots and slippers is made by dissolving aniline red in shellac or other varnish.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SUPERB VALENTINES FOR 1884.

PURE and chaste in sentiment, the combined work of our best American artistic and literary talent, our line of Valentines for 1884 cannot fail to receive the support of the most refined class of buyers.

We have been guided in their preparation by the success in former years, and by the expressed wants of the trade.

The following artists, among others, are represented:

MISS L. B. HUMPHREY,
MRS. O. E. WHITNEY,
MISS ROSINA EMMET,
MISS L. B. COMINS,
MISS ALICE W. ADAMS,

F. S. CHURCH,
HARRY BEARD,
C. Y. TURNER,
H. GIACOMELLI, of Paris.
F. SCHUYLER MATHEWS.

A varied assortment of Valentines by the above-named artists is offered in plain form, and single and double silk fringed.

ENVELOPES furnished with almost all our Valentines, without extra charge.

BACKS.—We again beg to call attention to the elegantly-designed backs, which are a special feature in our cards.

SATIN PRINTS.

Besides a number of FLORAL DESIGNS mounted in a variety of novel styles, special attention is called to our finest production in this line,

THE "LION IN LOVE" VALENTINE.

This is a rich satin print, on an elegant fancy plush mount. The design is after F. S. CHURCH's important work of above name. The poetry is by J. V. CHENEY. The picture is of the greatest artistic merit, and, on its elegant mount, forms, what we think, one of the most unique, artistic and sumptuous St. Valentine Souvenirs ever offered to the public.

Retail Price, in a neat suitable box, \$10.00.

DESCRIPTIVE PRICE LISTS OF OUR VALENTINES ARE NOW READY.

Besides our Valentines, we call attention to our NEW BIRTHDAY CARDS, including SATIN ART PRINTS, NEW SCRIPTURE TEXT CARDS, NEW COPIES FOR PAINTING, &c.

Our line of EASTER CARDS and EASTER NOVELTIES will shortly be announced.

ENGLISH HAND-MADE PAPERS

ORIGINAL EYNSFORD MILLS, **FELLOWS**, KENT, ENGLAND.

WATER-MARK:

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable. The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: **JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.**

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 288,065. Combined Paper-Weight, Calendar and Pen-Rack.—Josias R. King, St. Paul, Minn., assignor of one-half to Richard W. Johnson and Nathan Myrick, same place.

No. 288,081. Device for Stippling, Shading, or Tinting Printing Stones or Plates.—Charles C. Macbrair, Cincinnati, Ohio.

In a device for shading or tinting figures on printing stones or plates, the combination, with a frame and an inking-roll and transfer-roll, of a detachable sleeve to the transfer-roll composed of a yielding material, such as glue or gelatine and glycerine, having the design in relief on its external surface.

No. 288,116. Paper-Bag and Twine Holder.—Abbott M. Reeves, Mansfield, Ill., assignor to himself and William W. Beatty, same place.

No. 288,145. Portable Blackboard.—Kendall W. Whittemore and Levy J. Couch, Providence, R. I.

A portable school-blackboard having wire-cloth embedded in a slab of plaster, both sides of which are dressed.

No. 288,156. Pencil-Pointer.—William N. Bartholomew, Newton, Mass.

A pencil-pointer consisting of a box sliding within a protecting case, and provided with dust-receiver, two overlapping plates, the lower of which has an erosive surface, and cleansing-compartment.

No. 288,172. Box-Pasting Machine.—George W. Glazier, assignor of one-half to John B. Rollins, Lynn, Mass.

No. 288,223. Educational Device.—Silvanus F. Enos, Etta, Ill.

No. 288,662. Doll Carriage.—William S. Reed, Leominster, Mass.

No. 288,663. Toy Vehicle.—William S. Reed, Leominster, Mass.

No. 288,664. Combination Toy.—William S. Reed, Leominster, Mass.

No. 288,673. Envelope Machine.—William D. Slater, Springfield, Mass., assignor to the Morgan Envelope Company, same place.

No. 288,698. School Slate.—John D. Emack, Baldwin, N. Y.

No. 288,714. Money-Changing Cabinet.—Jeremiah Lockwood and Charles McIntire, Sullivan, Ind.

No. 288,766. Base-Ball.—Almanzor W. Boynton, Bridgeport, assignor to Henry I. Hoyt, Norwalk, Conn.

No. 288,853. Bag and Twine Holder.—Walter R. Poage, Shelbyville, Mo., assignor to William Lacey Willard, same place.

No. 288,872. Cushioning Apparatus for Printing-Presses.—Walter Scott, Plainfield, N. J.

No. 288,935. Fireproof Compound and Sheet.—Nathaniel C. Fowler, Boston, Mass., assignor, by mesne assignments, to the Indestructible Safe and Fireproof Company, of West Virginia.

No. 288,942. Automatic Money-Changer.—Cabel B. Hopkins, Payne's Depot, Ky.

In a money-changing apparatus, in combination with the tubes adapted to hold coins of various denominations and provided with discharging-slides, a suitable actuating device connected with and adapted to move two or more of such slides at a time, to cause the simultaneous delivery of several coins to make up a desired amount of change.

LABELS.

No. 3,690. Title: "High School Index." (For a

periodical publication.)—Charles H. J. Douglas, Ann Harbor, Mich.

No. 3,693. Title: "Waterproof Drawing Ink."—Charles M. Higgins, Brooklyn, N. Y.

No. 3,699. Title: "Sentence-Builder or Dissected Cards."—J. Russell Webb, St. Joseph, Mo.

No. 3,700. Title: "Whiting's Ink."—Frederick A. Whiting, Wellesley, Mass.

TRADE-MARKS.

No. 10,650. Writing-Paper and Envelopes of all Kinds.—Z. Crane, Jr., & Brother, Dalton, Mass. "The representation of a deer above a shield."

DESIGNS.

No. 14,389. Font of Printing Type.—James M. Conner, New York, N. Y. Term of patent, 14 years.

No. 14,390. Type.—Charles J. Cary, Baltimore, Md. Term of patent, 3½ years.

No. 14,403. Type.—Theodore H. Winchester, Baltimore, Md., assignor to Charles J. Cary, same place. Term of patent, 3½ years.

No. 14,425. Inkstand.—Adrian Cooke, Charles W. Schrieber, and Joseph S. Morgan, Dubuque, Iowa. Term of patent 3½ years.

IMPROVED PROCESS OF ORNAMENTING CHINA, GLASS, &c.

An improved method of ornamenting glass, china, tiles, metals, &c., by copying and multiplying works of art, has been patented in England by R. E. Frank, the process being a communication from L. Micciullo, of Rossano, Italy. The surface to be ornamented is covered with a sensitive varnish, and the picture, pattern or design, being made transparent, is laid on the varnish, and the light allowed to act on the sensitive film through the picture. After sufficient exposure, the picture is removed, and colors are applied in the following manner: The finely pulverized colors or enamel are taken up (in a dry state) by a brush, applied to the parts where they are required, which can be clearly distinguished in the layer of varnish on the article to be ornamented. The colors, enamels or metallic oxides adhere more or less according to the degree to which the adhesiveness of the varnish has been affected; that is to say, according to lights and shades in the picture, design, &c., to be reproduced, or according to whether the varnish has hardened more or less. The varnish may be composed of yellow gelatine, gum tragacanth, and quince seeds mixed with rain-water and chrome salts, such as bichromate of potash, added to sensitize it. The composition of the varnish may greatly vary, and has to be adapted to the weather, to the state of the atmosphere, and similar conditions. For normal conditions it may be made by mixing the said ingredients in the following proportion:

Filtered water.....	500
Gelatine.....	1
Gum tragacanth.....	10
Quince seeds.....	3
Chrome salt (in crystals).....	40

If the atmosphere is very dry, the quince seed may be replaced by sugar, glucose, or honey; or these latter substances may be used in the proportion of, say, thirteen parts. It may here be repeated that these proportions are merely approximate, as no absolute rule can be laid down as to the exact preparation of the varnish, which will have to be varied as directed by experience, according to the conditions of the light, the degree of dryness of the air and other conditions; but practice will readily suggest what is requisite to those skilled in kindred processes. When the oxides have been applied, they are protected by a coat of thick turpentine, such as is known in France as "terreben-thine grasse," attenuated, if required, by common turpentine, and the other superfluous parts

of the varnish removed by immersion for twenty-fours (more or less) in water acidulated with vinegar or other acid, say pure acetic acid, or hydrochloric acid. The strength of the bath (viz., the proportion of acids therein), may be varied within reasonable limits, and determine the length of time which the immersion has to last. The more acid in the bath the shorter the immersion; the weaker the bath the longer the immersion has to be. The object under treatment is then dried, touched up, and further colored with metallic oxides, if desired, and fired in a kiln.

Copies of works of art and the like, such as portraits on glass (whether seen by transparency or by reflection), and either fired or not, whether they are drawn from nature or a copy of photographs, or of other design, are with advantage produced by making two or more fac-simile copies as above described, the copies being fitted one over the other. Two copies, whereof one at least is transparent, are sufficient in most cases. Upon one of these the enamels, metallic oxides or other suitable colors may be applied, or it may be touched up after the colors are fired; the second copy is placed over the colored one, so that all details and contours register exactly in both pictures, and consequently appear as a single image to the eye. The two copies are united either by joints, by leads, or framing; or they may be cemented together, or especially, if a glass, fired with a flux applied at the edges, so that the two, being fused together, form a single piece; this may, also, when practicable, be affected by the firing which fixes the colors. The manner of uniting the plates by the interposition and fusion of a flux is the one which is preferable. Where a simple ornamental design, or ornamented surface without figures, &c., is desired, it can be obtained upon glass and other articles by applying a varnish composed of asphaltum, pitch, or an equivalent material dissolved in spirits of turpentine, to which sulphuric ether is added. The plate is then dried, and the design applied; the plate, &c., is then treated with fluorine acid and water, mixed in suitable proportions, then washed in water, and the varnish removed, as will be readily understood. This manner of proceeding produces plates, &c., which have a "frosted" or "crackled" appearance—that is to say, they appear as if covered by numerous vein-like grooves or marks. The varnish for this purpose may consist of:

Asphaltum.....	100 parts.
Spirits of turpentine.....	50 "
Sulphuric ether.....	50 "

These proportions may, however, vary considerably, and according to their variation will produce a different design. The sulphuric ether may be replaced by light naphtha or by benzoline. The component parts of the varnish do not enter into chemical combination, but merely become mechanically mixed. The mixture is applied to the article by means of a brush or a pad similarly to "stippling." By this means the non-volatile fatty component parts of the varnish adhere in flakes or patches to the article and protect it, and the fluorine acid attacks only the parts not so protected, and thereby the design is produced.

John L. McMillan, who is making a type-setting machine in Ilion, N. Y., with which he expects to set 5,000 ems an hour, says that \$500,000 was spent on the Alden type-setting and distributing machine before it was given up as impracticable, and that \$1,000,000 was wasted on the Page machine, whose patent right was subsequently sold for \$10,000.

NOTICE.

-NEW YORK, December, 1883.

To the Trade :

GENTLEMEN : About five years ago we laid our claims before you as manufacturers of *Pads* and *Tablets*. Our facilities at first were small, and our lines few ; but as the demand grew, we increased our machinery and extended our lines, until we now claim to be the largest house of this *specialty* in the country, producing the enormous number of 6,000,000 to 8,000,000 Pads and Tablets annually.

About a year ago, we introduced our "*Perfect Pencil Tablet*," which has met with unprecedented success, the sale already reaching nearly 2,000,000, and rapidly increasing.

With the coming New Year we shall illustrate many of our goods with entirely new designs, printed and lithographed, thus making them, we believe, the handsomest and most saleable line of Tablets in the market.

Our large experience and superior facilities enable us to handle large contracts with despatch, guaranteeing satisfaction for neatness and cheapness.

We are prepared to furnish *Pads*, *Tablets* and *Blotter Tablets*, in all grades of paper, from cheap News to the finest quality of *Tub-Sized*, *Loft Dried*, White, Cream Linen and Quadrille papers.

Thanking you for the liberal support in the past, and soliciting a continuance of your trade for the future, we are,

Very truly,

ACME STATIONERY & PAPER CO.,

117 Fulton Street, New York.

E. P. DONNELL & CO., Chicago, Ill.,
Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages :

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

A NEW THING UNDER AN OLD NAME!

The Rubber-Finished Slateograph and Transfer Ink.

THE RUBBER-FINISHED SLATEOGRAPH is the most economical and rapid Dry Copying Process in the market.

For Simplicity and Durability it has No Equal.

IT CHALLENGES COMPARISON, DISTANCES COMPETITION and SURPASSES EXPECTATIONS.

It cleans easily, copies splendidly, and avoids the annoyance of remelting, as by the old method. Sold by all Stationers. Send for Circular Price List to the manufacturers,

SUNDERLIN, TABER & CO.
WATKINS, N. Y.

SILICATE BOOK SLATES, BLACK DIAMOND SLATING, REVOLVING BLACKBOARDS, LAPILINUM (Slated Cloth).

THESE GOODS are in constant use by the BOARD OF EDUCATION of the City of New York (in every Public School), and have been for the past twelve years, which is a sufficient guarantee as to their durability and perfection. They are also in use by a large number of the BOARDS OF EDUCATION, Colleges and Schools throughout the country. The Private Schools have also adapted our Book Slates in preference to slate or paper pads—finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance, and finely finished. The BLACKBOARDS are well seasoned, and will last for years, slated on both sides with the celebrated BLACK DIAMOND SLATING. For sale by all the leading Houses throughout the United States and Canada. SEND FOR CATALOGUE. Patented and manufactured only by the

NEW YORK SILICATE BOOK SLATE CO., 191 Fulton Street, New York City.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Allen & Gates, stationers, Ware, Mass., have assigned.

Charles H. Spaulding, dealer in novelties, Boston, Mass., has failed.

J. D. Kellogg, photographer, Red Wing, Minn., has been burned out.

C. H. Savage, dealer in toys, &c., Kansas City, Mo., has failed and assigned.

The *Rambler*, a weekly paper of Passaic, N. J., has been consolidated with the *Passaic Daily Times*.

The Portland Paper Box Company, Portland, Me., was burned out January 1. Loss, \$8,000; insurance, \$7,000.

Attention is invited to the advertisement of a gentleman looking for a position as manufacturing clerk or salesman.

Lowenthal & Morganstern, paper stock commission merchants, New York city, have dissolved partnership. A new firm has been formed under the same style.

The firm of Harry S. Baker & Co., dealers in books, stationery, &c., 451 West Madison street, Chicago, Ill., has been dissolved. John A. Baker will continue the business at the old stand.

The IXL letter-file is the latest and cheapest production in the way of files. It is made by the Globe Files Company, and can be had of C. M. Ward, at the New York agency of the company, 28 Bond street.

Tobias New's felt and roofing paper manufactory, at 543 East Nineteenth street and No. 540 East Twentieth street, New York, caught fire early on Monday morning, December 31. The damage to the building was \$700, and the loss on stock and machinery, mainly by water, was from \$2,500 to \$3,000. Some women who were picking rags on the second floor were much frightened because the elevator was out of order, but they were shown how to reach the street by men who are employed in the building.

A fire occurred on Sunday evening, December 30, in the large building Nos. 119 and 121 Monroe street, Chicago, causing a loss of \$200,000. The front portion of the building was 24 by 80 feet, and the rear portion was 112 feet square. It was filled with printing, lithographing and kindred establishments. The approximate losses and insurance is as follows: Bradner Smith & Co., stationers and bookbinders, loss \$40,000, insurance, \$80,000; National Printing Company, managed by J. H. McConnell, one of the largest show printing houses in the country, loss \$50,000, insurance, \$60,000 (cuts valued at \$65,000 are in the vault and are believed to be safe); Shober & Carqueville Lithographing Company, loss \$75,000, insurance, \$80,000 to \$90,000; E. B. Myers, law-book publisher, loss \$12,000 to \$14,000, fully insured; J. B. Jeffry, whose large show printing establishment was recently destroyed in the *Evening Journal* fire, losses from \$3,000 to \$5,000 worth of cuts which were in the National Printing Company's office, and the Dennett Harvester Company sustains a similar loss. The building, which is owned by Samuel A. Crozer, of Philadelphia, was damaged to the extent of \$25,000, insurance, \$40,000.

John R. Edwards, Baltimore, Md., is making a new line of half-bound books in paper and green cloth sides, which are taking so well with the trade that his facilities are hardly adequate to meet the demand. Mr. Edwards will erect a new factory during next summer in order to extend his capacity for blank-book manufacturing, &c. Besides the manufacture of blank-books, Mr. Edwards is the manufacturer of several grades of writing tablet, as well as of Edwards' patent perforated tablet, which is having a large sale. He has also taken up a line of stationers' specialties, including fine writing paper, papeteries, envelopes, plain cards, visiting cards, and will also do a general jobbing stationery business.

The firm of Farley, Paul & Baker, publishers, wholesale booksellers and stationers, Philadelphia, was dissolved on January 1, A. C. Farley retiring. Messrs. Paul & Baker have associated with them John E. Bossert, whose connection for twenty years with the old house of Sower, Potts & Co., has made him favorably known to the entire trade as an experienced, energetic man. The style of the new house will be Paul, Baker & Bossert. A. C. Farley will continue the publishing business of the late firm.

Charles J. Cohen, Philadelphia, announces that the stock account of the establishment has been completed and that all is in readiness for the spring trade. New goods are in store in all of the leading staples, and the attention of the trade is invited to the advertisement of the house which appears in another column of this issue.

B. J. Kopperl, of Austin, Tex., whose failure was announced a week or two ago, is at present in New York, trying to effect a compromise with his creditors here. As soon as some definite arrangement can be made, a meeting will be held at the Stationers' Board of Trade to take action regarding the final adjustment of affairs.

C. Wright Kirby, of the Whitmore Nickel Plate Company, returned on Saturday last by the steamship Baltic from Europe, where he has been in quest of novelties for his firm. These, he asserts, when announced will create a sensation in trade circles.

The Pittsfield, Mass., *Daily Evening Journal*, recently suspended, was issued last week under the new proprietorship of Joseph E. See. Frank D. Mills, one of the former owners, takes the position of local editor.

Charles J. Cave & Co., manufacturers of paper, New York city, have dissolved partnership. A new firm has been formed which will do business under the same style.

W. H. Parsons, Jr., has been admitted as a member of the firm of W. H. Parsons & Co., paper dealers, 66 and 68 Duane street, New York.

Shorb & Boland, wholesale booksellers and stationers, St. Louis, Mo., have dissolved partnership. J. L. Boland will continue the business.

Muehsam & Siemers, booksellers, &c., Baltimore, Md., have dissolved. H. F. Siemers continues the business under the old style.

M. O'Keefe & Son, paper-stock dealers, Boston, Mass., have gone into insolvency.

A receiver has been appointed for W. T. Ryan, paper hanger, &c., Detroit, Mich.

E. E. Urann, dealer in toys, &c., Kansas City, Mo., is closing out his business.

Benziger Brothers, booksellers, &c., St. Louis, Mo., have been damaged by fire.

James Clendenin, printer, Baltimore, Md., has sold out to Hiram Straus.

Hager & Co., publishers, St. Thomas, Dak., have dissolved partnership.

John Biggs, stationer, Rockfield, Ind., has sold out to Robinson & Wells.

An assignment has been made by James R. Pigman, stationer, La Fayette, Ind.

A fire has destroyed the publishing establishment of P. B. Towle, Hammond, Ind.

M. Champaign, stationer, Hammond, Ind., has been burned out; insured for \$500.

H. W. Grant, publisher of the *News*, Whiting, Kan., has admitted W. C. Brown to partnership.

The *Western Indiana Tribune*, Hammond, Ind., was burned out last week. Insured for \$1,000.

W. S. Snyder, formerly of the *Lakewood Times*, has become proprietor of the *Plainfield Bulletin*, Plainfield, N. J.

A dissolution has taken place in the firm of S. A. Rudolph's Sons & Co., wholesale paper dealers, Philadelphia, Pa.

Rudolph Wolff & Co., manufacturers of bags and pocketbooks, New York city, have dissolved partnership. Style unchanged.

Sandy & Co., manufacturers of tags, Philadelphia, Pa., have been damaged by water and smoke \$400 to \$500; partly insured.

Brown, Heston & Co., manufacturers of paper boxes, Philadelphia, Pa., have admitted Edward L. Bailey as a member of the firm.

James Arnold, bookbinder, Philadelphia, Pa., is offering to compromise old accounts with his creditors at twenty-five cents on the dollar.

A dissolution has taken place in the firm of Kerbaugh Brothers, dealers in paper-hangings, &c., Philadelphia, Pa. The business is continued by M. C. Kerbaugh.

N. Baker, dealer in paper and paper stock, Baltimore, Md., has admitted his son, John M. Baker, to partnership. The style of the new firm is N. Baker & Son.

M. M. Kayser, Herbert D. Allman and Samuel Kayser have formed a copartnership at Philadelphia, Pa., under the style of M. M. Kayser & Co., and will do a paper-hanging business.

Judgments amounting to \$39,533 have been secured against Henry L. Nagle and others of the firm of Nagle & Co., blank-book manufacturers, Philadelphia, Pa., and execution has been issued.

Pryor A. Simon, manager of the New England business of Samuel L. Hall, fine art publisher and importer at 757 Broadway, New York, is charged with robbing Hall of \$8,000 or \$10,000. Simon left Boston with his wife about two weeks ago, ostensibly to visit a brother at Huntington, and his whereabouts are at present unknown. Failing to return when he should, grave suspicions of his honesty were aroused, and inquiry being made at the Maverick bank, where he deposited, it was learned that he had overdrawn the firm's account to a large amount just previous to his departure. The affairs of the house were found in the most chaotic condition. It appeared that certain sums credited on the books as due the firm had actually been paid to Simon, who, it is alleged, pocketed the money. The exact amount of Simon's speculations cannot be stated. Simon has recently been living in fine style, yet Mr. Hall placed the utmost confidence in him, and says he would have trusted him with any amount of money. It is believed that he has left the country. The New York house has a substantial backing, and will as

soon as possible rearrange its New England business under a new manager.

Samuel Ebert, stationer, &c., Zanesville, Ohio is dead.

E. N. Jenkins, stationer, Denver, Col., has sold out.

An assignment has been made by Mary L. Trautwein, stationer, Baltimore, Md.

R. J. Curry, bookseller and stationer, Connersville, Ind., has sold out to J. B. Young.

W. B. Dawson has succeeded to the business of Lyons & Dawson, booksellers, &c., Kingston, N. M.

A dissolution has taken place in the firm of Marshall & Hough, publishers, Hillsboro, Ohio. Hough & Dilley succeed to the business.

Chas. Beck, Philadelphia, is sending his New Year compliments around on a handsome palette which is conceived and executed in admirable taste.

Winkley, Thorp & Dresser, Boston, have issued a new illustrated catalogue of foreign and domestic stationery. It is handsomely got up, and is a valuable trade assistant.

Allen & Gates, Ware, Mass., dealers in stationery, &c., surrendered their stock to Charles E. Woodward, mortgagee, last week, and have made an assignment for the benefit of creditors.

THE STATIONER returns thanks to W. B. Mumford, Adrian, Mich.; J. L. Shoemaker & Co., Philadelphia; F. G. Tilton & Co., Greenfield, Mass., and to Winkley, Thorp & Dresser, and Thomas Groom & Co., Boston, Mass., for calendars received.

Edward Todd & Co. have on exhibition in their window on Fourteenth street an eagle's feather, twenty-five inches long. The plumage is very even, and presents a beautiful appearance; it is dyed cardinal, shaded with black, and is mounted with a triangular holder of gold, with an Edward Todd & Co.'s pen.

The American Paper Company, of Nashville, Tenn., is about to move from its old place, 94 and 96 Church street, into a new three-story brick building, 125x33 feet, a few doors below its present location. The company retailed its own Christmas cards this year, for the first time, with highly satisfactory results. One of its latest novelties is a magnolia leaf, with appropriate sentiments painted thereon in gold and mounted on an elegant plush background.

Walter E. Kidder, the traveling salesman accused of bigamy at Peru, Ind., was released at Jefferson Market Police Court on Sunday last, as the sheriff of Miami County had not procured the necessary evidence. Kidder told Justice Duffy that he hadn't committed bigamy, and would go to Indiana without a requisition willingly if he thought there was a chance of his being tried before being lynched. His wife's family is numerous and determined, however, besides being very popular in the county, and as the people of that part of Indiana are given to lynching, he felt no obligation to return if he could help it.

The New Year number—January—of "Our Little Ones" has been received. It opens the year well, and has for a frontispiece a picture of "Santa Claus at Sea." It is as attractive as ever, and the Russell Publishing Company is to be complimented for the excellence which it displays.

Augustine Smith & Co. succeed Campbell & Smith, paper manufacturers and dealers, New York. The firm consists of Augustine Smith, Robert H. Tillson, Charles L. Tallman, and Edgar S. Ryder.

Cornell & Co., wholesale paper dealers, New York city, have dissolved partnership, and have been succeeded by an incorporated company under the style of Cornell, Bingham & Co.

Albert D. Peltz, manufacturer of rubber stamps, Philadelphia, Pa., has been burned out. Loss, from \$1,500 to \$2,000; insured for \$1,100.

Joseph J. Kirkpatrick & Co., bookbinders, Philadelphia, Pa., have dissolved partnership. Samuel R. Moore succeeds to the business.

The Spring Garden Art Pottery concern, Philadelphia, Pa., has dissolved. John Smethurst will settle up the business.

A. McKee (Mrs. T. M.), dealer in fancy goods, toys, &c., Memphis, Tenn., has assigned to W. S. Smith.

Robert Lyne, bookseller and stationer, &c., Belton, Tex., has sold out to H. C. Denny & Co. J. M. Osborne, printer, Freemont, Ohio, has sold out.

C. R. Wright, publisher, Bagley, Ia., is dead.

B. F. Colley, newspaper publisher, Leesburg, Fla., is dead.

An assignment has been made by Leopold, Haas, toy dealer, Chicago, Ill.

Stearns D. Rich, publisher, Racine, Wis., is reported to have left town.

Winslow & Dollard, stationers, New York city, have dissolved partnership.

F. S. Van Vleck, representing John R. Edwards, Baltimore, will soon be among the Western trade. His visit is announced on one of the handsome steel-engraved folders of the W. H. Brett Engraving Company.

H. N. Cotton, of Cotton & Gould, Boston, has got a new thing in the form of a "Diary and Cash Account." It is a good vest-pocket memorandum book and will be found to be very convenient. Everyone who uses it will find that it is made expressly for him.

Thomas S. Renard, proprietor of two notion and toy stores, Cincinnati, Ohio, has executed a bill of sale to Knost Brothers & Co., Strobel & Wilken, and seven other Cincinnati firms, covering the entire stock, valued at \$17,000. The Eastern creditors are ignored.

The stockholders of the Fargo (Dak.) Paper Mill Company met on December 22, and elected as directors for the ensuing year: J. O. Gregg, W. F. Ball, E. B. Eddy, E. S. Tyler, G. J. Keeney, H. F. Miller and Franklin Paine. The directors chose J. O. Gregg as president and F. Paine as secretary. The work of completing the mill is to be vigorously pressed.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; R. H. Lowry, Pres. Nat'l Bank of the Republic; F. D. Tappan, Pres. Gallatin Nat'l Bank; C. F. Timpson, Cashier Continental Bank; I. G. Ogden, Cashier New York Co. Nat'l Bank; Chas. Dennis, Vice-Pres. PHOTOGLYPHTIC.

We published some weeks ago a description of the process of typographic etching as practised at the establishment of Messrs. Dawson at Chiswick. A correspondent sends us the following notice of a kindred art for the reproduction of photographs which he has written after a visit to the atelier of Messrs. Goupil, at the village of Asnières, near Paris. Any one who has seen the marvelous reproduction of Curtois' oil painting of a young lady with flowing hair and a gauze scarf leaning against a Moorish lattice, which is now for sale in Bond street, will be interested to learn how so wonderful a result is produced.

"Messrs. Goupil's establishment at Asnières is close to the station, and consists of two villas thrown together, shut off from the street by a high white wall and with gardens, formerly, no doubt, tidy and productive, but now given over to chemistry, which intervenes between the houses and the River Seine. Many processes are here carried on, some of them in the profoundest secrecy. Of what I saw, as a very unskilled observer, that which most appealed to my imagination, was the process of 'photoglyptic,' the object of which is to multiply photographs with cheapness and rapidity, and to render the impressions not only true and delicate, but also permanent. The subject that was being treated at the time of my visit was one of those substantial ladies whose smiling faces and décolleté costumes adorn the windows of the Rue de Rivoli, probably a singer or an actress. Her portrait, which was of the usual cabinet size, had been previously treated by some photographic method, which had resulted in the formation of a thin 'pellicle,' as it is technically called, of pure and transparent gelatine, not much thicker than a piece of note-paper, and of the exact size of the original photograph. Figured upon this delicate transparency (when held to the light it reminded me of the picture which is sometimes seen in glass lamp shades) was the exact image of the original picture. This 'pellicle' was next laid upon a slab of lead about half an inch thick, and subjected to heavy pressure in a hydraulic press. When one looked at the leaden slab and considered the enormous pressure, amounting to one thousand pounds to a quarter of an inch, to which it was subjected, it might have been reasonably imagined that the frail 'pellicle' of transparent gelatine would have been crushed out of existence. But no; it is, on the contrary, the lead which gives way, and the result is that on the pressure being removed it is found that the plate of lead has received on its compressed and hardened surface an image of the décolleté lady precisely similar to that which had been originally transferred from the photograph to the 'pellicle.' The rest of the process is in appearance simple enough. The leaden plates (it is possible to obtain several from one 'pellicle') are smeared with a thick ink, and copies are printed off half a dozen at a time, which are subsequently mounted, and sold at prices far more moderate than could be allowed by any process of ordinary photography."—*London Paper*.

To put a high polish on ebony, one that will be durable, give the work two coats of fine copal varnish, and rub this down; when quite dry, smooth with fine pumice-stone; put on a third coat of the same, and rub down with rotten-stone; clean and put on a flowing coat of best spirit copal varnish, and when this has become quite dry, polish with chamois skin and the palm of the hand.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JANUARY 3, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any Information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

We had intended before this to make some remarks anent recent developments of an association of grocery clerks for defrauding their employers. The facts are probably very generally known to our readers from the statements of the daily papers and the reports by telegraph which have given them circulation throughout the country. That such an organization could exist indicates a very lax system of business management which may or may not be prevalent in other lines of trade. The parental care which employers, at one time, were wont to exercise over their clerks and apprentices no longer obtains, and the strict relation of master and servant does not exist. The clerk of to-day is independent of restraint and has a liberty of action which, however well adapted to those who will not abuse it, is certainly injurious to those who need direction and counsel rather than perfect independence. The truth is that the tradesman of to-day really cares little or nothing of what becomes of his help, or what course of conduct his clerks may pursue, as long as they are regular and efficient in their attention to their duties. We confess that we do not like to see clerks playing pool or taking alcoholic drinks during the intermission from duty allowed for lunch. Yet we have seen some of them do it. It must not be inferred that we mean to say that such weaknesses are general, but only that they occur. Not long ago there was much talk about young men from business houses dropping into pool rooms and buying tickets on races. Some are even said to take half an hour to "buck against the tiger." If this is an era of reform let it be in civil life as in "civil service." Employers should supervise their clerks, and it wouldn't be a bad thing if clerks sometimes kept an eye on their employers.

A BILL has been introduced by Senator Sherman in the United States Senate for the purpose of giving the President authority to invite the governments of Mexico, Brazil, and of the republics of Central and South America, to send delegates to a conference to be held at Washington, for the purpose of consulting upon the best methods for establishing, upon a firm and lasting basis, peaceful and reciprocal commercial relations and for adopting measures designed to promote the construction of an international railway which shall unite all of the countries named with the United States under a system of quick and profitable inter-communication. It is proposed to appropriate the sum of \$50,000 for the expenses of the conference. The project of a line of railway communication which shall unite the extremes of the American continent, north and south, is not new. It was broached several years ago, and forms part of a scheme of international development started, we believe, by John A. Lynch in 1877. It will be a great undertaking, fraught, perhaps, with more difficulties than may be apparent in an early

consideration of the work and its practicability; but we have been taught to believe that there is nothing which is impossible in America, and so we shall continue to think that it can be accomplished. The construction of such a railway, with branches extending to the coast lines of the Atlantic and Pacific oceans, will be a powerful auxiliary to the commerce, national advancement, and intelligent intercourse of all of the countries which it may traverse, and the advantages which would accrue can scarcely be estimated. We believe that the attention of the American people being directed to this enterprise, it will secure that sympathy and support which will enable it to overcome opposition and surmount all obstacles. The "whole boundless continent is ours," and when we say "ours," we mean not only the people of the United States, but those of every government in the New World, and these people will benefit by a greater interchange of their natural and manufactured products, accelerated by those facilities which an international railway system will supply.

ROUNABOUTS.

BY THE TRADE LOUNGER.

New Year's day was lovely, wasn't it? The shapes of fashion and models of form, wearing store clothes, and all of the other accessories supposed to be *de haut ton*, and who are wont to shine resplendent on January 1, were obscured. Jupiter Pluvius was not auspicious, and the day was "nawsty."

The old-fashioned way of doing up New Year's day has lost its cheeriness. In its stead there has come in a frigid formalism with set ceremonial—a matter of show and not of heart, of misuse rather than sentiment. 'Tis the way of the world. It is said that the custom of New Year calling is going out. It might well. Diedrich Knickerbocker couldn't identify it now.

Let us moralize in another direction. Something has already been said about the heart, and this leads up to business courtesy. True politeness is spontaneous and unselfish. Narrow minds and mean souls will wear the glaze of courtesy, which is sure to show through. Cultivate the heart and you have the noblest, purest kind of culture, no matter what the surroundings may be. Let the young men of America bear this in mind.

It pays to be polite and courteous in business matters. There have been several incidents lately where courteous treatment of seemingly unpromising customers proved to be exceedingly profitable to dealers. In one case, a plainly dressed lady went into a wholesale store, but was not noticed by the clerks. The proprietor, however, stepped forward and asked her what she would have, as politely as he would have asked the same question of the wife of any of our richest millionaires, though not expecting to find a customer. "I would like to look at some goods," replied the lady. "These are all samples, and we don't do a retail business," said the merchant, blandly. "I am aware of that, sir; I am not a retail buyer." The result was a good bill of goods, for which the cash was promptly paid.

Said a dealer recently: "A man came into my place a few days ago who looked like a backwoodsman. He wore a great fur hat and a coat of a very antiquated pattern, and his general demeanor was that of a man who had strayed into the wrong place. I make it a business to treat all visitors with equal courtesy, and I see that my clerks do the same. You can imagine my surprise on this occasion when I tell you that the visitor proved to be a most intelligent tradesman from the West. He bought freely and paid the cash, and I shall be glad to always retain that man's trade."

Observations among the trade, and the opinions expressed by various dealers induce the opinion that novelties in plush goods are bound to have a run still another season. "I cannot conceive," said a dealer, "of any more desirable article with which to make up fancy goods. Figured antique leathers and stamped leathers will undoubtedly be in demand by a fashionable class of customers, but for the general trade there is nothing that for beauty and general elegance can ever take the place of plush." What is the drift of opinion on this point?

Already trade novelties are beginning to show up for the next season. An article that is bound to be an attraction during the coming season is a chatelaine key chain of polished nickel. Chains of this description are said to be extensively worn in Europe. It is intended solely for gentlemen's use. By an ingenious arrangement, the chain is attached to the suspender button of the trousers and can be detached by a spring at will. On the end of the chain are fastened keys, cigar cutter, match safe and many other little articles intended for a gentleman's use. The chain takes up no room and the articles at the end rest in the pocket as though they were not secured by this device.

A New Year's gift, designed to show the general appreciation by the paper trade of the worth of the late Charles O. Chapin was made on Tuesday. The testimonial took a substantial form and was handed to Mrs. Chapin by D. P. Crocker, the secretary and treasurer of the American Paper Manufacturers' Association. It consisted of a certificate exchangeable for art specimens prepared by the United States Bureau of Engraving and Printing or for the equally valuable and handsome products of the United States mint. It was worth \$4,600.

The annual meeting of the stockholders of the Stationers' Board of Trade for the election of trustees for the year 1884, and the transaction of other business, will be held at the office, Nos. 97 and 99 Nassau street, on Tuesday, January 8, 1884, at 2 o'clock P. M.

In the United States Circuit Court of Boston, Mass., on the 26th ult., the case of the Hamerschlag Manufacturing Company v. John F. Wood *et al.*, was heard. On October 12, last, the court granted an injunction to the Hamerschlag Manufacturing Company restraining John F. Wood *et al.* from selling a patent wax paper, which was manufactured by the above company, who held a patent for the same. Notwithstanding the injunction issued, Woods *et al.* continued to sell the patented paper, in consequence of which they were arraigned on a charge of contempt of court. Foster & Co., of New York city, and F. P. Fish, of Boston, appear as counsel for the plaintiffs, and George E. Betton & Co., Boston, for the defendants.

ANSWERS TO CORRESPONDENTS.

C. asks for the address of Tafts, manufacturer of valentines, somewhere in Massachusetts.

Ans.—We don't know it. Perhaps some friend can tell us.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, January 2, 1884. }

THE MONEY MARKET.—The money market has been firmer, owing to preparation for dividend disbursements, annual settlements, &c.; but this is only temporary, as these funds will shortly be released and the present ample supply of loanable funds abundantly increased. Call loans on stock collateral were $2\frac{1}{2}\%$ per cent. The stock market is still devoid of features of interest. Transactions since our last have been light and prices have for the most part declined. Railroad bonds were active and weak, and prices with few exceptions were lower. Government bonds were lower for the 4s and $4\frac{1}{2}$ s. The market for sterling was dull, but fairly steady and without new features.

THE PAPER MARKET.—The past week has been devoted largely to stock-taking among the city trade, and in fact almost everything has been subordinated to the annual settlements and in getting ready for another year. Many houses have not completed taking their account of stock, but this will be very generally the case by the last of the week. Prices continue tolerably well sustained with one or two exceptions, and, although dealers generally have larger stocks to carry over into this year than they had a year ago, the surplus is not inconveniently large and causes little or no concern. Manufacturers continue fairly engaged on orders for goods to be made up and delivered early in the year, and, as a general thing, they regard with hopeful feelings the prospect of profitable employment for their mills for the year.

THE STATIONERY MARKET.—Trade generally remains quiet with no perceptible variation from last week. There is a general squaring up of accounts, the disposition among buyers and sellers alike being to begin the new year on an equal footing. The difficulty experienced in collecting accounts leads many to think that the fall and holiday trade in the West and South has been rather overrated. The envelope trade is quite steady, and, although there has been no fluctuation in prices because of better business, the trade in this line shows evidence of improvement from the fact that the consumption is steadily growing larger. The same may be said of blank-books. In fine stationery there is literally nothing doing. A few orders are being taken, but dealers evince great cautiousness in their transactions. In plush goods, particularly birthday and valentine novelties, there is a brisk trade. The prevailing styles in these goods are panel cards in various pretty shapes. These are very popular. There is little doing in Easter cards, but the production of these goods has as yet been very limited, and buyers are hesitating about making their selections thus early.

PAPER TRADE REVIEW.

Consists of Sixteen pages, size of this Newspaper.

EVERY THURSDAY, Post Free, \$3 a Year

Remit Greenbacks or Post-Office Order. EDITOR
AND PROPRIETOR W. JOHN STONHILL.

PAPER MARKETS:—Mill News—Trade Gossip—Samples of Paper—Technical Articles—Record and Illustrations of New Patents—Descriptions of Factories—Letters every week from Paris, Berlin, Vienna and other countries—Market Prices—Gazette.

STATIONERY:—Novelties Illustrated and Described—Technical Articles—Stationery in the Provinces—American Notes—Colonial Reports—Industries of the Trade—Reviews—Gazette.

PRINTING:—Doings of the Craft—Printing in the Provinces—Colonial Intelligence—Foreign News—Criticisms on Specimens—New Machinery—Type Specimens—Original Trade Technical Articles—Descriptions and Illustrations of British Establishments—Letters from our Correspondents, and every item of news concerning the trade during the preceding seven days.

The B. and C. P. and S. has corresponding representatives in North and South America, Canada, East and West Indies, Australia, New Zealand, Tasmania, India, China, Japan, Constantinople, Turkey in Europe and Asia, Russia, Austria, Germany, Italy, Spain, Holland, Belgium, and France; letters from whom appear periodically.

"The amazing industry and excellent tact of the conductor, Mr. Stonhill, is apparent even on a superficial glance over its pages."—*Mackellar, Smiths & Jordan (Phila.)*.

"The recognized organ of the Paper and Printing Trades."—*Belfast News-Letter*.

"It has features of enterprise unusual to European Trade journalism."—*American Stationer*.

"The notes upon Trade cover the entire country and the Colonies."—*London Figaro*.

"There is an American touch about the paper."—*Leigh Chronicle (Eng.)*.

"In the matter of printing it is PERFECT."—*W. and A. K. Johnston (Edinburgh)*.

"The very best journal of its class that finds its way to our table."—*James D. Whitmore & Co. (N.Y.)*.

Advertisers will see that it is better for them pay fair charges to a Journal which covers the whole of the commercial world, than to pay less sums for advertisements in journals whose circulation is limited to one country, one town, or possibly one parish.

UNIVERSAL CIRCULATION.

Address, W. JOHN STONHILL,
IMPERIAL BUILDINGS, LUDGATE CIRCUS
LONDON, E. C., ENGLAND.

OBITUARY.

W. REID GOULD.

W. Reid Gould, the well-known stationer, died at his residence, No. 141 West Sixteenth street, New York, on Monday morning, at the age of forty-nine years. He had been ill for several months, but had been able to spend a few hours at his store every day until about a week ago. The funeral services will be held at Mr. Gould's late residence to-morrow morning. Mr. Gould was born in Paterson, N. J. His father was the late Alexander Gould, at one time publisher of the Paterson Courier. Soon after W. Reid Gould's birth his father came to New York, and the firm of Bell & Gould, stationers, was formed. In 1854 the firm was dissolved, Mr. Gould retired from business and his son succeeded him. The store has been at No. 168 Nassau street, or in that immediate vicinity, ever since it was opened by Bell & Gould. The house is best known for its publication of law blanks. Legal forms bearing its imprint are known from one end of the country to the other. Mr. Gould was never married. His mother, five sisters and a brother survive him. He was a member of Company B, Seventh Regiment, during the civil war, and at the time of his death of the Veteran Corps of the Seventh.

JOHN WILLYOUNG.

John Willyoung, proprietor of the Detroit Book Depository, whose death has been previously noticed, died at Detroit, December 2, aged forty years. Mr. Willyoung was born in Lancaster, N. Y., September 20, 1843. At the age of twenty he left home and engaged in farming in Niagara County. He remained upon the farm about two years, when he removed to Buffalo, and entered the Methodist Book Depository, in charge of H. H. Otis, where he continued for about twelve years. In January, 1878, after thorough deliberation, he purchased a half interest in the Methodist Book Depository in Detroit, then owned by J. M. Arnold & Co., and entered into partnership with Mr. Arnold. In March, 1879, he purchased the entire interest and good-will of Mr. Arnold, and assumed the control of the Depository.

THOS. H. WHEELER.

Thomas H. Wheeler, paper-stock dealer on Long Wharf, New Haven, Conn., shot himself through the heart on Saturday morning, and died instantly. He was 48 years old, and leaves a widow and six children. He was a member of the West Haven Methodist Church, and was highly respected by the business men of that city, among whom his financial rating was first-class. The cause is a matter of conjecture. It is known that for several months he had been carrying large lots of paper stock and metal, and it is presumed that the depressed state of the market, in iron particularly, worried him into insanity. Only a day or two previously he was reading a newspaper article regarding suicides in Germany, and remarked to his wife that he did not see how any one could be so foolish as to take his own life.

FRANK W. THOMPSON.

Frank W. Thompson, for many years with Robert Clarke & Co., died on December 10, at his residence in Cincinnati, at the age of thirty. Mr. Thompson was born and raised in Cincinnati, attended the public schools, where he stood unusually high in his classes, and then took a position with Robert Clarke & Co. He was engaged there for more than ten years, during which time he made himself a valuable acquisition to the retail department, forming many acquaintances with the public and en-

dearing himself to his associates in the store. His face was one of the familiar ones at Robert Clarke & Co.'s, and his loss will be greatly regretted by those who were accustomed to deal with him. In the store among his fellow-clerks his death seems hard to be realized. He was with them but last week, bright, courageous, generous, helpful, self-sacrificing. The loss which his mother and father sustain in this bereavement is irreparable. He was their only son, and a better one never lived. He was a young man of exemplary private character, and a consistent member of the Mt. Auburn Presbyterian Church.—Cincinnati Times-Star.

WILLIAM PATTON.

By the death of William Patton, which occurred on December 2d, at Waterbury, Conn., the entire trade loses an old friend.

Impulsive, impetuous at times, he was ever a sturdy defender of right and principle whatever the cost to himself. Of a clear and discriminating mind, and with the ability to discover the

vulnerable part in a sham, he bore a free lance for what he thought right, and against what he thought false. He took pride in his business, and gave it his most unremitting attention. William Patton was of Scotch-Irish descent. His father, a cotton manufacturer from near Belfast, came to this country and settled in Brooklyn, N. Y. Becoming a skilled button chaser in New York, Mr. Patton went to Waterbury to pursue the industry, and was one of the first skilled chasers in Waterbury. But soon, however, his fondness for reading turned his attention to the book business, in which he was Waterbury's pioneer, and with which he has been identified now for about forty years. As his health began to fail a few months ago, he sold out his business in Patton's block to George N. Ellis. His decline since then has been gradual but sure. His old complaint, that of rheumatism, was the immediate cause of his demise. Had he lived he would have been seventy-four years old the 17th of this month.—Publishers' Weekly.

The Philadelphia Novelty Manufacturing Company advertises a large reduction in the price of its staples and suspension ring staples. The regular trade discounts have also been largely increased. The "Novelty" paper fastener, for which the staples and rings are adapted, is now standard, and it is to increase its usefulness with the public that the prices have been reduced upon the staples. Certain parties have been selling an imitation of the "Novelty" fastener, and also an inferior staple, but a recent decision of the United States Court has fully established the validity of the Heyl patent under which the tools are made, and a decree of perpetual injunction has been granted. All parties are warned by the manufacturers of the "Novelty" paper fastener, against selling or using any such infringements. The Philadelphia Novelty Manufacturing Company is also bringing out a new tool for desk use, called the "Keystone" fastener, which differs from the "Novelty" only in having the parts united in one tool, for which there has been a demand. It also manufactures the "Original" fastener, a larger desk tool for inserting staples, and a large line of stationers' patented specialties. R. R. Watson, of 51 Nassau street, New York, is the sole agent for the United States of the stationers' goods manufactured by this concern.

The wholesale and retail stationery book and fancy goods house of John B. Lewis, Walla Walla, W. T., has become one of the largest business concerns of its kind in the Territory. Mr. Lewis has done much toward introducing fine works of bric-a-brac and handsomely bound books. He opened his store in Walla Walla in 1871. His business grew very rapidly, and today he carries as large a stock of books, stationery, leather and ivory goods, &c., as any house in the entire Northwest.

TRADE NOTES.

"One Thousand and One Riddles" is the title of a little book which contains the material for much fun and home amusement in the way of riddles, conundrums, enigmas, and hints for acting charades. It contains 128 pages, with enameled paper cover, and is published by J. S. Ogilvie & Co., New York.

R. T. & S. Blood, Jr., who carry on a blank-book paging and perforating business, will begin the new year by providing themselves with some new machinery, which they would be pleased to have the trade call in and see in the course of a week or two. The business of the house has grown very largely during the past year.

The Christmas number of the *Crockery and Glass Journal* was printed with handsomely illustrated covers, and the general typographical features of the number were very creditable, displaying much taste and enterprise on the part of its publishers. Its fine typographical appearance, added to its extra size, made it in all respects an exceptionally interesting number.

John B. Davids & Co. announce their intention of bringing out a novelty in the ink and stationery line in a short time. It will be in the shape of a novel form of inkstand, which will be sold with the firm's inks. The invention is Mr. David's, who has applied for a patent for it. A full description of the novelty will be given as soon as it is ready for introduction to the trade.

James D. Whitmore & Co. have introduced a very attractive line of menu guest cards. A very striking design represents a tea cup and saucer mounted on a card handsomely fringed, with the card for the guest's name suspended from the handle of the tea cup by a ribbon. Another design is a plain white, oblong card with a colored picture of a page carrying under each arm an envelope enclosing a small card for the guest's name. A heavy plush card with a shaggy surface is ornamented at the top with a ribbon in a delicate shade of pink, the guest's card being fastened in the centre by a satin bow.

Charles Beck, Philadelphia, has a line of Valentine and Easter fringed cards and puffed satin goods, which he has been paying particular attention to for several seasons past with gratifying success and increasing business. While the regular fringed goods are as fine and novel as any shown, special mention may be made of the puffed satins and plush cards, which for novel design, chaste sentiment and superior workmanship, combined with the use of the best materials, are thought to surpass anything as yet exhibited. Mr. Beck states that his Xmas line of similar goods had an enormous sale, and very properly expects an equal, if not increased trade, for the coming seasons. He has also an extraordinary line of cheap double and single fringed cards, which he sells assorted at prices which are extremely low and worth examining.

Among the multitudinous designs in Thanksgiving, Christmas and New Year cards introduced during the past season there are many whose beauty will make them favorites another year. Especially may this be said of the dove card of J. H. Bufford's Sons. The design of this card is simple, and in its very simplicity lies much of its beauty. The artist could not have chosen a design more calculated to please the popular taste. The card is of large size and contains the figure of the legendary dove sailing earthward through a clear blue sky toward

a rose-tinted horizon. The figure is natural and life-like, being embossed, and the coloring is remarkably true to nature. The simplicity and beauty of the dove card made it adapted both as a Christmas and a New Year card, on both of which occasions the demand for it was so great that the publishers had great difficulty in meeting it. A customer once shown the dove card would rarely fail to be charmed by it. The card was sold in three styles, plain, fringed and of extra size and fixings, the latter style making it suitable for hanging on the chandelier. In the introduction of this card J. H. Bufford's Sons made a decided hit.

Hard & Parsons are very busy this week in arranging for the removal of their office and salesroom from No. 126 Duane street to 35 Beekman street, corner of William. Their factory will be removed to 160 William street. The line of Easter and valentine novelties which the firm has recently brought out is extremely novel and attractive, embracing a great variety of plush panel cards, with easel backs, and richly and tastefully decorated with artificial flowers and many beautiful designs in hand-painting. A very striking Easter novelty produced by this firm is a plush-covered cross, mounted on a pyramidal base, on which rests an anchor, the chain of which is gracefully arranged around the lower and upper portion of the cross. Some other special attractions in Easter goods consist of a rustic groundwork of bark, with a bird's nest in the lower right-hand corner, underneath the branch of a tree, on which a bird rests. The upper right-hand corner contains a bunch of roses in various colors, forming a novel and pleasing ornamentation. These and many other designs deserve to be classed as novelties of the new year.

PHOTO-LITHOGRAPHIC TRANSFER PROCESS.

The following particulars have been communicated by E. T. Asser, of Amsterdam, the inventor of the process:

Unsize paper, as it is habitually used by lithograph printers, must be employed. It has to be of the best quality and rather thick. It would be better if it were made on purpose by a paper manufacturer. The smooth side is covered with a layer of starch. In order to avoid different kinds of starch, of which one ignores the different peculiar qualities, it is better to use an invariable substance. Experience shows that boiled wheat-flour is most suitable

for that purpose. It must be rather concentrated, but, nevertheless, sufficiently liquid to permit of regular running off. This starch is poured into a flat dish, and the smooth side of the paper is carefully placed upon it so that bubbles are avoided. After that it is laid to dry horizontally on its other side. In a dark room the unstarched side of the paper is laid upon a concentrated solution of bichromate of potash, till by its porosity the paper is entirely pervaded by the liquid. Then it is hung on a pin in the dark and left to dry. In order to give to the paper a smooth surface it is laid on a polished stone in the lithographic press, the starch side toward the stone, and the scraper is pulled several times over it. During this operation light must be avoided.

In this state it is placed as usual under a negative in a photographic printing frame, exposed to the light till the picture shows of a strong brown color. Then the paper is taken from the frame and soaked in various baths of water till all the unaffected parts are of a clear white, and the insolated ones of a light green tint. If this result is not obtained by cold water, hot water may be employed to destroy any traces of the soluble bichromate of potash. Then it is again hung to dry on a pin. Sunshine or a moderate fire will contribute greatly to the acquirement of a clear image. In order to ink the copy, the thus prepared paper is laid with its back upon water, which in winter is to be slightly warmed; then, after the superfluous water is removed by blotting-paper, it is placed upon a stone or a glass. The transfer ink consists of common lithographic printing ink mixed with a convenient part of oleine. Before blackening the image, a layer of mastic dissolved in absolute alcohol is conveyed to the paper and spread regularly over it with a little cotton till it is dry. The above-described ink spread upon a stone is put on a wooden roller, which has been covered first with cloth or flannel, and thereupon with cotton or silk velvet. The water that has remained in the paper is sufficient to preserve from ink the places which must not be blackened. If there might still remain some impurity, as frequently happens, it may be removed by using the roller very lightly, and finally by taking it off with a wet, soft sponge. Afterward the water is again removed by blotting-paper. The velvet of the roller has to be renewed frequently. After the last preparation the blackened paper is transferred upon a lithographic stone or upon zinc, and handled in the usual manner.—*Ptg. Times and Lith.*

BOLOMETER.

The bolometer, a curious instrument recently introduced for measuring minute quantities of radiant energy, promises important results in optical and astronomical investigations. It is based upon the fact that when equal conductors of the electrical current are at the same temperature their conductivities are equal, and the current of a battery can be equally divided between them, while, if unequally heated, their conductivities are unequal, and the difference in current can be detected with the galvanometer. By substituting thin sheets of metal for the wires ordinarily employed as conductors so as to take up and part with its radiations with great rapidity, an instrument is produced capable of measuring such minute quantities of heat as a hundred-thousandth of a degree, Cent., capable, also, of recording the infinitesimal heat radiations of the diffraction spectrum. The interesting statement is made in this connection, that the curves of light, heat and actinism, instead of receding from each other, as commonly understood, are in reality coincident—that is, the solar beam, instead of consisting of a pencil of rays bound into a luminous sheaf called light, is a homogeneous and simple energy, the names light, heat and actinism being merely names for its different mode.

SOME LOST POEMS OF WHITTIER.

Many poems thrown off at odd moments, and of which the author thought so slightly that he included them in no collection, are now lost. Among these are "Isabella of Austria," written when he was but twenty, and said to have had a grand ring to it; "Palo Alto," which, assuming to be the translation of a Mexican lament, beginning with the words "Rio Bravo! Rio Bravo!" never did appear under his name; "Bolivar," a copy of which a revolutionary general, commanding in Venezuela, has lately requested of the author; and a poem on Henry Clay, which has had some singular fortunes, having been metamorphosed in a Western paper into an address to Mr. Benton, and again read, on the occasion of a public welcome to Vicksburg given Sergeant Prentiss, as the effort of an admiring Southern poet, and still later appearing in the shape of an apostrophe to Smith, the Mormon!—*Harriet Prescott Spofford, in Harper's Magazine for January.*

A correspondent of the *Scientific American* says: "The stylographic pen is a great convenience, but no inventor seems to have succeeded thus far in making a joint which will prevent soiling the fingers with ink. A remedy for this leakage, which has been tried and thus far seems to be complete, is to rub the joint on which the fingers rest with the thin edge of a piece of wax. Hold the pen over a candle, lamp, or the flame of a match till the wax melts, when it will lute the joint so that no ink can escape through it.

To make plastic carbons for batteries, the following receipt is recommended by Max Nitsche-Niesky: Good coke is ground and mixed with coal tar to a stiff dough, and pressed into molds made of iron and brass. After drying for a few days in a closed place it is heated in a furnace, where it is protected from the direct flames and burned feebly at first, then strongly, the fire being gradually raised to a white heat, which is maintained for six or eight hours. The fire is then permitted to slowly go down, and when perfectly cold the carbon is taken out of the furnace.

OPTICAL PHOTOMETER.

Edmund Bequerel, the well-known French physicist, recently brought a simple photometer, the device of L. Simonoff, before the notice of the French Academy of Sciences. The principle of this little instrument is well known, and consists in reducing the aperture through which the light enters until the light falling on a transparent screen inscribed with figures is not quite sufficient to let the figures be distinctly seen. The luminous intensities are inversely proportional to the squares of the diameters of the apertures, which are circular. The apparatus as made by M. Simonoff consists of a small lunette made of three tubes sliding into each other telescopic fashion. At one end are a series of apertures in movable diaphragms, which can be brought one by one into the line of sight. At the other end is the ocular glass, and in the middle is the screen, with figures which are illuminated by the light coming through the aperture. The light is diffused by a sheet of opal glass placed between the aperture and screen. The apparatus is useful for measuring a diffused light such as that of the sky, and M. Simonoff has used it for the purpose during a year. It has also proved useful to photographers in determining the length of exposure to give a plate with different brightnesses of daylight.

In an attempt to trace invention to its origin, in the mind of primitive man, Col. F. A. Seely, of the U. S. Patent Office, remarks: "Obviously, archaeology can find no trace of a remoter age than that of stone; but I mistrust that then thoughtful anthropologist will except the evidence of earlier ages, one of which, taking one of its perishable materials as the type of all, we may call the age of wood. Still farther back must lie an age, as indefinite in duration as any, when man existed in his rudest condition, without arts of any kind, except such as he employed in common with lower animals; and this is the true primitive period."

Never make a promise that you don't intend to keep.

STIPPLING, SHADING OR TINTING PRINTING STONES OR PLATES.

This is an improvement upon devices for the production of stipple, line, or waved shading or grain work upon printing stones and plates.

It has for its object the production of a device for stippling, line-shading, or graining printing-surfaces, which shall develop upon such surfaces the desired effects in shading and varying the lights with greater accuracy and facility than any of the devices previously in use, and which shall be adapted to the largest work, as circus-posters, equally as well as to the smallest card-work.

To accomplish this object a pressure-roll is constructed of any desired or convenient size—as, for instance (for large work), of two and one-half inches diameter and twenty-four inches long—mounted upon a shaft or spindle in a suitable frame, for use by hand, which roll is made of an unyielding or firm material—as wood, hard rubber or metal—and upon this pressure-roll is placed a transfer-sleeve of any suitable yielding material—as fine glue or gelatine, and glycerine—upon the external surface of which sleeve is produced in relief, by means of a corresponding matrix or mold, any kind of stipple, line, waved, or grain design for shading. The internal diameter or bore of this sleeve is sufficiently less than the external diameter of the roll upon which it is mounted, that when drawn over or upon the latter, it will adhere to and revolve with it. The thickness of the transfer-sleeve is such that when pressed upon the surface to which the shading effect is to be applied, such shading may be heavy or light, according to the pressure applied. In the same frame in which the roll is mounted a feed or inking roll is provided, charged with transfer-ink, in the usual manner, which feed-roll, by means of its weight, if heavy, or by means of springs, if light, bears upon the surface of the transfer-sleeve and imparts to it the requisite ink or color to maintain the sleeve in condition to produce the requisite shading effects upon the printing stone or plate.

The principal use of the device is in the preparation of stones and plates for lithograph printing.

When large surfaces are to be shaded with the flat films, they (the films) must be set over the figure several times, care being had that the joints of the shade-work shall register perfectly. Thus in shading or toning a surface 18x24 inches with a flat film 6x8 inches, it must be set over the figure on the stone or plate no less than nine times, and possibly more than this number of times if deep tones are required upon portions of the figure. This transferring of the film from place to place over a large stone or plate requires great skill and considerable time, all of which is said to be avoided by this device, which may be large enough to cover the entire figure or plate at one sweep.

In using this transferring device such portions of the figure as do not require tinting or shading are stopped out by an overlay of thin paper cut to the form of so much of the figure as requires high lights; or the entire figure may be tinted and the high lights scraped out. To increase the depth of tint or shade, the roll is passed over the figure repeatedly, successively stopping out, with a solution of gum and acid or an overlay of paper, so much of the figure as has been given the proper tone or shade.

Maintain dignity without the appearance of pride; manner is something to everybody, and everything to some.

ON THE SELECTION OF A BUSINESS.

"Choose a business—

"First—That you are acquainted with the details of.

"Second—For which you have sufficient capital.

"Third—For which you have a taste or liking.

"Fourth—Which gives promise of making something more than simply a living.

"It is a prevalent idea among men that are not very prosperous in their occupation that any other business is better than the one in which they are engaged. Those who are ever ready to act on this idea and make frequent changes generally remain poor through life.

"This of itself should show us that such an opinion is not the result of close observation of the profits of different kinds of business, but rather a conclusion or supposition, made without reflection." * * *

Wealth is rarely accumulated in any other way than by persistent and continuous efforts in one direction; and then it may seem long to the anxious expectant before the reward comes. Spasmodic and speculative efforts to expedite it often do more to retard than to hasten it, by diverting the attention from the sober and practical routine of details essential to success, and causing them to seem dull and plodding.

Fortunately, in this country, while there are great differences in respect to the profitability of the various kinds of business, there are very few of them by which an industrious and prudent man cannot make money, not only sufficient to support a family, but something beyond as an accumulation for his old age.

But no prudent man would embark in a business, expecting success, if unfamiliar with the details, or with insufficient capital. And though he may have sufficient knowledge and capital, if the business is one that is distasteful to him in many of its details, or if with all his skill and capital he can only succeed in making a living, he will soon become lukewarm and irresolute in conducting it, and thus make it less profitable. It is therefore also indispensable to success, that a man should like his business, and think it the one best suited to his peculiar gifts and qualifications.

The acquaintance required for a business should not be merely a superficial knowledge of the articles dealt in, but should descend to minute details of the various qualities and the advantages and disadvantages resulting practically in the use of different qualities, the causes of increase and decrease of supply, the periods of greater and less demand; and also the fashion or prevailing taste which in many things governs or influences the public in the purchase of many articles.

Thus, if a man proposes to deal in lumber, he should not only know and be able to distinguish the various kinds, as pine, spruce, hemlock, &c., but he should also know what qualities are recognized in the trade as "clear stuff," "first," "second," or "third qualities," "box boards," "cullings," and so forth, so as to be able himself, if necessary, to assort a mixed pile of lumber; and should know these qualities, not only as they are recognized in the locality in which he proposes to trade, but also as they may be differently graded in rival markets. He ought to know what deduction is proper to be made for any defect in a piece of lumber or board, by knowing for what purpose it could most advantageously be used, and with least loss. He should know where the different kinds of lumber are obtained, the superiority of that from

some localities over that which is brought from other places, the various methods by which it is brought to market, something of the geography of the country, so that as new avenues are open to transport it, he may be among the first to avail himself of the advantages, and not, as is sometimes the case, learn this from some rival dealer, who has enjoyed a monopoly of the advantage of the new route for a year or two, before it generally became known. In addition, he needs to know the sizes and qualities of lumber that are more especially used by those who will be customers—what will be wanted by builders, what by box-makers, what by cabinet-makers, what by ship-builders, &c.

All this information he could scarcely expect to acquire short of three months' service in the practical details of a lumber-yard, specially devoted to learning, with a view of going into the business.

It will be that much time well expended by any young man, ignorant of a business he proposes to embark in, to go to some long-established dealer, residing far enough away from the locality of the contemplated business to avoid uneasy jealousy, if necessary, and make arrangements with him to be instructed in the details of the business, even by a payment of money to him if required.

The better a man is acquainted with the details of the business in which he is engaged, the greater is his chance of success. In truth, the man that is ignorant of these has no right to expect success. Ignorance may take the risk and occasionally win, but it is not once in ten times. —*How to Keep a Store.*

THE ROMANCE OF PRINTING.

They were energetic men, those burghers of Holland—men with a zeal and earnestness in them from which much was in future times to spring; men, too, many of them, with greater thoughts than those of mere money-making—rejoicing, indeed, as they had a right to do, in their prosperity and their wealth, but rejoicing still more in that common energy of progress which found its expression in civic monuments no less than in civic discords. Though but a slight indication of this zeal of labor, which hesitated at no sacrifice that might lead to success, the unstable, almost roving, life of many of the early printers is worth notice. Almost all the most successful of them made at least one move. Gerard Leeu starts at Gouda, moves to Bruges, and moves on to Antwerp. Veldener comes from Germany at the invitation of the University of Louvain; he stays but a short time, and then—apparently disagreeing with his partner—moves on to Utrecht, moves again to Kuilenburg, and finally returns to Louvain; and yet, if a manuscript note in one of his books is to be believed, he must have been at least sixty years of age when he left that town the first time. William Caxton, after learning his trade, it is said, in Germany, came to Bruges and set up in partnership with Colard Mansion; he soon crossed the sea to London, and became our first printer. Gavaert Van Ghemen, —a contemporary of Gerard Leeu's—printed at Gouda; then he removed to Leyden; then he suddenly took flight and introduced the new art into Denmark, settling down at Copenhagen. And so it was with many more of them, wherever an opening occurred they were eager to rush in.—*W. Martin Conway, in the Magazine of Art.*

When a strong brain is weighed with a true heart, it seems to be like balancing a bubble against a wedge of gold.

ISOLATING HEAT RAYS.

A means of isolating the heat rays from any luminous source, intercepting the illuminating and chemical rays, has been communicated to the Académie des Sciences by M. Van Assche. Upon a piece of glass he lets fall a drop of melted and sublimated selenium, which is immediately covered by a thin glass; and the melted material is then squeezed gently until it is extended into a very thin, homogeneous sheet. The glass is then placed under pressure and gradually cooled. It is necessary that the selenium should not boil on the glass, or otherwise cells are formed by means of the vapor, which interfere with the action of the material. When properly made, the cell is of uniform thickness, and is free from bubbles and striations. Cells so constructed, when placed in the light, reflect the chemical rays, and convert the luminous ones into electrical energy. Only the calorific rays pass through the cell, being at the same time subjected to a definite refraction. The transmitted light is mono-chromatic, of a ruby vermillion tint, only showing one luminous band in the spectroscope. If the light of burning sodium is passed through this form of cell, there is annihilation of luminosity. The author contends that an arrangement of this kind will form a considerable addition to the apparatus used for analyzing light and determining the constituents of flames.

THE ELECTRICAL EXHIBITION.

Preparations for the great electrical exhibition to be held in Philadelphia next fall have so far progressed that rules and regulations have been prepared for the government of the extra classification of the various apparatus. The different groups will consist of: 1, apparatus for the production of electricity; 2, electric conductors; 3, measurements; 4, applications of electricity, under which there are two subdivisions, apparatus of small power and that of large power; 5, terrestrial physics; 6, historical apparatus; and 7, educational and biographical. The section devoted to measurements is probably one of the most interesting to scientists, and the least known to the public, of any of the exhibits. It is the purpose of the committee to make a notable departure from usual exhibition ideas, in not giving any medals or diplomas. The reports of the judges of each department will be given after the fashion of a jury, and will be a statement of the facts in regard to the size, speed, force, energy, resistance and other points of the exhibit which may call for mention; but these will not be given by any guess work. Instruments of precise measurement will be used by the committee of judges, and the conclusions reached will be the record of the judges. By a special arrangement with the Treasury officers, such instruments of precision as are not to be had in this country will be admitted without duty, on the bond of the institute being given that they will be kept for the single use of the institute at the exhibition. If the arrangements can be made by the committee for an unbroken front on the Schuylkill, the method of placing an electric light of 100,000 candle-power in the bed of the river, to discover torpedoes or other impediments of warfare, will be exhibited by the ordinance department of the United States Navy.

Let us enjoy the fugitive hour. Man has no harbor, time has no shore; it rushes on and carries us with it.—Lamartine.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

“The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving “honorable mention.” Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers.”—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

“5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion.”—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

MANUFACTURE OF ORNAMENTAL PLAQUES.

Plaques, vases, brush-backs, and similar articles of utility and ornament are decorated on their surfaces by different processes—some by painting the design and varnishing it afterward to make it more durable, others, as on China-ware, by being submitted to heat until the ornamental designs amalgamate with the softened surface of the china-ware. The first process described is not very durable and soon gets defaced and worn. The second is very expensive, and does not come within reach of all.

The object of the present invention is to produce ornamental surfaces which will admit of the most elaborate designs and yet be produced so cheaply and in such quantities as to come within the means of the humblest citizens.

If a plaque is the article to be made, glass plaques are blown or molded into the required shape, and another plaque made of paper or pasteboard, which has on its upper surface the design intended to be seen through the glass plaque is made. The upper surface of the paper or pasteboard plaque is made to fit exactly to the under side of the molded glass. The two are united by cementing them together or by binding them together round the edges with cloth, wood, metal, or other bands, so that when the two are firmly fastened together an article is produced which is hard and smooth on its outside surface, easily kept clean, and shows all the brilliancy of decorated glassware.

Plaques, card-receivers, napkin-rings, brush-backs, and other similar objects, when the outside surface is made of glass and the inner or under surface is made of decorated paper or pasteboard, pressed or stamped to conform to the shape of the glass, are within the range of this invention.

Stationers always have more loss in gilt goods, and it is no easy matter to keep these gilt goods bright and clean. The following is a good recipe: Gilt articles, if of metal, may be cleansed by rubbing them gently with a sponge or soft brush moistened with a solution of half an ounce of potash, or an ounce of soda, or, perhaps best, an ounce of borax, in a pint of water; then rinsing them in clean water and drying with a soft linen rag. Their luster may be improved, in certain cases, by gently heating them, and then applying gentle friction with a soft rag. A very dilute solution of cyanide of potassium will answer the same purpose, by applying it in the same manner as above, washing in water and finally drying by gentle friction with a linen rag; but as this substance is very poisonous, it is not to be recommended for household uses. Gilt frames of mirrors, pictures, &c., should never be touched with anything but clean water, gently applied with a soft sponge or brush.

The following process for enameling cardboard and pasteboard is taken from the *Papier Zeitung*: Dissolve ten parts of shellac in a sufficient quantity of alcohol and add ten parts of linseed oil. To each quart of the mixture add also about one-fourth of an ounce of chloride of zinc (solid?). The board may be immersed in it or the solution applied with a brush. The board is thoroughly dried and the surface is polished with sand-paper or pumice before applying this preparation.

The only jewel which will not decay is knowledge.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

TORONTO ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., January 4, 1884.

As I have not written you since some time last year, it may be well for me to put in an appearance. In my last letter I had something to say about mud, and that sort of thing, and I intimated that there was a long-drawn-out growl from various classes of tradespeople about it. You know people will growl anyway, and in this case they had but little reason, for the fall trade had been good. There was fine sleighing at Christmas and for a few days before. New Year's day was exceedingly fine for the season—thermometer 20°—and capital sleighing. I am sure there was not a horse in the city, from the most miserable old hack up to the highest-toned animal of that species, that was not glad, *i. e.*, if a horse can be glad, when New Year's day was done, and perhaps there was another class of animals, too, who would have been delighted if they could have been persuaded that they were needless the next morning. The holidays, however, have come and gone, and we have stepped out into a new year, and let us hope that we may not be driven too hard and come out at the end fresh and ready for another year's race.

We are having a wild day, and while I write the wind is whistling through the cracks and howling outside in a way that might well excite the envy of a half-dozen Highland bagpipers. And the snow is twirling and dancing about the streets and dashing against the windows as if it were mad about something. The thermometer chalks zero and seems to have lost all vitality, for it is gradually sinking, but we hope for the best. It is a tough day to be out and a hard day for many a poor soul in this northern country of ours.

I have seen most of our principal dealers several times before and since the holidays, and without an exception the verdict is that we have had a good holiday trade. As is always the case, there are variations. Some say that trade was better than last year, others not quite so good, but very satisfactory. And so far as I can learn I believe this will apply to the whole country. I do not think, and indeed I am certain that the volume of business done for the last year will be considerably under that of the preceding year, and we are perhaps all the better for it. The Northwest speculative fever that swept over the country in 1882—it was of a very malignant type, and in a great many cases the bottom

dollar went, and has never been heard of since—has pretty much died out. And the results of the past year, while it may seem less in amount, are likely to be more satisfactory. I am informed by leading houses that they have had a good year's business, and that collections up to this date are good. I met, casually, one of our largest—I don't refer to his size personally because, in fact, his altitude is rather under than over that of the majority of the "lords of creation," but he is comfortably rotund—and I said, "Well, I suppose you will be quiet now for a time?" This was on the last day of the year. "I don't know," he replied; "I have received a larger number of letters to-day than I have had for some time; several large orders, besides the usual daily run of orders, and a large amount of settlements of accounts." This, and it is not by any means an exception, does not look bad.

I intimated in a former letter that the Rev. G. Richardson had superseded R. O. Smith in the management of the book department of the Standard Publishing Company. Mr. R. is an old and respected minister of the Baptist church, and I am informed his appointment is giving great satisfaction, and that the business of this house is increasing most satisfactorily. Mr. Richardson had a book-store in Woodstock, which he has disposed of to G. Odell. C. H.

BOSTON BREVITIES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., BOSTON, January 9, 1884.

After the storm a calm is always in order, and the large trade of the past year, with its holiday spurt, is now followed with its customary quietness. Trade is by no means dull, however, a considerable amount of business being done for this season of the year, and the trade in general express no uneasiness concerning the future outlook. In blank books there is no small demand, and the various manufacturers are found busy on orders both for immediate use and for February delivery. Some little trade is also reported in commercial stationery and counting-room supplies. In fancy goods not much is doing. Jobbers of Easter novelties and valentines are beginning to stock up, and retailers are about looking up the best bargains. Love missives are very expressive this year and they are presented in many fantastic shapes and costly designs. But, fear not, this is leap year, you know, and Venus must fee Cupid if she would enter the court of St. Valentine.

Ward & Gay are presenting a large and

varied line of Easter novelties and valentines, among which are some very rich and elegant goods. This house is also offering some special bargains in ruled papers, of which large quantities are in stock. Its travelers are now on the road, and the many patrons of this enterprising house will be called upon.

In fancy cards, tags, scrap pictures, &c., the Hub Card Company is prepared to supply the trade in such quantities as may be ordered. The catalogue and price-list issued by this company cover a large line of goods which are in constant demand, the prices of which are very low to the trade, and wide-awake dealers might find a catalogue of these goods quite handy. Bevel-edge cards and chromo cards are among the bargains offered.

A. Storrs & Bement are making a specialty of "orders for dance," having in stock many very pretty designs in great quantities. This house enjoys a good trade throughout the New England States, though its business is not confined entirely to this section. The lines of goods carried embrace only the choicest of staple goods which are offered to the trade at living figures.

Samuel Hobbs & Co. is a firm very well known to the trade, who might be interested to know that this house is the sole agent for Hubbard's pens and pencils. Hano's manifold books are also to be found here, as well as Shannon files and Globe files. Staple and fancy stationery of all kinds, it is needless to state, can be ordered from this house. In speaking of the business of the past year, Mr. Hobbs stated that he was pleased with the volume, and saw no reason to fear the new year.

The letter file companies are very well represented here just now, and from what I can learn a good deal of business is being worked up. The Globe Files Company, of Cincinnati, is having its interests very well presented by W. W. Edwards, the company's traveling agent. Mr. Edwards has spent some ten days in the city to good purpose, he having placed about fifty cabinet files in as many different counting-rooms. Mr. Edwards will remain some days longer in the city, as he finds the Hub a good place to do business in, and while here he makes the office of Samuel Hobbs & Co. his headquarters.

Mr. Bardwell, of Bardwell & Brigg, New York agents of the Shannon files, has also spent some profitable time here and proposes to remain some days longer putting in good work on the Shannon file. Mr. Bardwell is pleased with the success of his visit here, having done a good trade in his files. Mr. Bardwell's address while in the city is with Carroll W. Clark, Franklin

street, who would also take pleasure in selling you a Shannon file or anything else wanted, for Mr. Clark has everything in stock.

While on the subject of files, a word or two in behalf of the "Yankee" letter file and binder might not be amiss. This file, if I mistake not, was the first invention of its kind, and for years it has held its own, and even now, as Mr. Gould claims, its sales among counting-rooms and to the trade are still as large as ever. In the face of such competition as there now is, the "Yankee" letter file and binder does well in commanding such trade—but then it is because of its real merits that it does so. A. L. D.

IMPROVEMENTS IN TYPE-FOUNDING.

The corrosion and deterioration of the copper matrices commonly used in type-founding is produced by several causes, to obviate which is the object of a recent German invention. In the first place, the sulphur, phosphorus and arsenic contained in the type-metal, and mostly derived from the regulus of antimony, are injurious to the matrices, as the so-called type-metal when in a molten state gives off its impurities to the metal of the matrix which is being used, and these substances, under the influence of the highly-heated atmospheric air which is compressed by the jet of metal, enter into chemical combination with the metal of the matrix, destroying its face and rendering the same useless, such combinations being, for instance, sulphide, &c., of copper or of iron, and the destructive effect of these frequently continues even after the matrix is out of use. The overheating of the type-metal in the melting-pot, which, when the operator is careless, soon rises even to red heat, is a factor which considerably contributes to the destruction of the matrix, as the face (or register) of the matrix is completely burned, especially where the jet of metal strikes.

These facts being recognized, the question arises how the pyrogenic matters and arsenic contained in the type-metal are to be rendered innocuous, and how the effect of the overheated metal upon the matrix is to be paralyzed, and lastly to carry away as completely as possible from the matrix the hot air driven into the "eye" by the jet, and by these means to attain a certain success.

To render innocuous or impossible the effect of the pyrogenic matters and the arsenic, it would only be necessary to use chemically-pure metals for forming the alloy of type-metal, but the high price of such so-formed alloys will not allow the same to come largely into use. Instead of this, the following may, according to inventors, be used with advantage: The impurities contained in the type-metal (pyrogenic matters and arsenic) are abstracted therefrom while it is in the melting-pot and before it enters the pump, and at the same time a metal is used for the mold which will bear without injury a higher temperature of the type-metal, whereby a part of the injurious matters (such as sulphur, phosphorus, arsenic) will be caused partly to be burned, partly to be volatilized in the melting-pot. By this means, viz., by raising the temperature of the type-metal, the air contained in the casting apparatus and the mold is considerably attenuated and its injurious effect reduced in consequence.

The metals or alloys to be used for the molds must be of such a nature that they behave neutrally or have but little affinity for the pyrogenic materials and arsenic; such is, for instance, platinum pure or in any desired alloy with the platonic metals (palladium, iridium,

osmium) or with zirconium. Other precious metals, gold for instance, may also be used in alloys with platinum for this purpose.

For removing the pyrogenic matters and the arsenic from the type-metal, finely-divided metallic iron is used, combined, or not combined, with plastic or other coal or carbon, by either placing these materials into the melting-pot or crucible simultaneously with the metal to be melted, or by subsequently adding them to the already molten metal. By preference metallic iron is used in a fine state of division, either in the form of bundles of wire, coils of wire gauze, iron filings, or turnings of granulated iron, or precipitated metallic iron in a spongy state (similar to the so-called spongy platinum). It is advantageous to surround the finely-divided iron with pulverized coal of any origin; by preference, however, wood charcoal, or to mix it therewith, forming therefrom, by the use of an appropriate binding medium, plastic porous bodies whose shape is either adapted to the melting-pot or crucible, or otherwise suitably formed.

As a binding medium and for producing porosity, among others, syrup and pulverized boracic acid, or borax (acid borate of sodium) or other boracic salts may be used. Thus, as one instance, 10 parts of powdered charcoal, 80 parts of iron finely divided, 2 parts boracic acid, and 18 parts of syrup, produce an appropriate, easily-molded compound, from which, when it is annealed (in which process the syrup is carbonized and the boracic acid renders the mass porous), a well-coherent and porous body results. The porous bodies thus obtained, consisting of coal and finely-divided iron, are put into the liquid metal and permanently remain therein during the casting; finely-divided iron offering a great surface may, however, be used even without combination with carbon or boracic acid or boracic salts.

The effect of this application, which for distinction is called "Antipyrogene," is as follows: In consequence of the heating of the coal with the molten metal, a part of the impure and combustible materials (sulphur and phosphorus) is burnt with the coal or carbon and rises in the form of ashes to the surface of the metal. The finely-divided iron (either powdery or granulated) enters partly into chemical combination with the pyrogenic matters in the type-metal (the liquid metal here exerts a catalytic action), forming, for instance, sulphide of iron, which separates as grayish-black powder on the surface. Another part of the iron, being finely divided, readily melts in the heat of the molten type-metal, becomes alloyed with the same, and hardens it.

Besides the advantage to the matrices or patrices above set forth, the further advantage is attained, that the wear of the pump piston of type-founding machines is considerably reduced, as it much less attacked by the purified type-metal, while cleaner, denser, harder, and consequently more durable, castings are obtained.

As soon as this porous, finely-divided iron has become a grayish-brown, soft powder, and as such separates upon the surface of the liquid metal, or where bundles of iron wire are used, as soon as the iron has become black and brittle, the powder or the wire having ceased to be effective, must be removed from the melting-pot, and replaced by fresh iron (or Antipyrogene).

To render, as above stated, the eye or face of the copper matrices, or in some cases patrices, unaffected by the overheated liquid metal, even if the metal be at a bright-red heat, the inventors use at these parts of the matrix either a metal with a very high point of fusion which is not

oxidizable and neutral to pyrogenic matters and arsenic, or at least cover the face or eye with a thin layer of such metal. Experiments show that only precious metals are suited for this purpose, platinum either pure or alloyed with palladium, iridium, osmium or zirconium being preferable. Alloys of platinum with other metals are not very injurious, provided the latter are not present in too high a percentage, that is to say, if the addition or the alloy of other metal, say gold, does not exceed 20 per ct.

The matrices, whether solid or electrotyped, are produced in the same manner as heretofore; they are prepared, punched, adjusted, &c., in the usual manner. Now, to provide the eye or face where the letter or symbol is with platinum or its alloys, a plate of precious metal may either be soldered upon the proper place or it may be inserted in a dovetailed recess; moreover, the precious metal may be deposited on the face or in the eye of the matrix by electricity applied in any suitable manner. Generally, in matrices or patrices in which the part to be protected is to be provided with a plate of precious metal soldered on or inserted in a dovetail, the letter or symbol will be struck or stamped or punched only after the plate is applied and the adjustment subsequently effected, while in matrices already made or produced by galvanism the precious metal will preferably be deposited in the finished eye in a thin layer by means of an electric current.

The third element which causes the destruction of matrices in type-founding—the hot atmospheric air compressed by the jet of metal—is removed from the eye of the matrix and from the founding apparatus, that is, from the mold generally, in the following manner: The matrix is provided in appropriate places, viz., where the air can most readily escape from the interior of the matrix eye, with apertures or holes starting from the face of the eye and at the sides or the edge of the eye, which openings are at a suitable distance, say, for instance, two or three millimetres from the edge of the matrix eye or face and pass entirely through it. At the face of the matrix these vent-holes may be widened out, similarly to the countersink for a pin.

Now, when a number of vent-holes, according to the size of the matrix, have been drilled, the edge of the matrix is by the shortest way connected with the vent-holes by a groove or channel whose depth may vary between a quarter and one millimetre. The vent-holes may pass vertically or obliquely through the metal of the matrix, but their position is, to some extent, determined by the shape of the letter or figure in the matrix. The connecting channel between the vent-holes and the edge of the matrix eye may, moreover, be made in a straight line, curved, or in a zigzag shape.

The small steel plate which in most founding apparatus at present in use serves to make a tight joint between the casting-tool and the spout of the melting-pot has usually an aperture for the passage of the jet of metal.

By the present process a second opening is provided by the side of this first one, and the two are connected by a groove or channel. Generally, only one secondary aperture will be used, but several may be arranged to allow the air to escape still more quickly; it is likewise not absolutely necessary to provide the small steel plate with secondary apertures, as one or more grooves or channels of appropriate depth and width extending to the edge of the plate will have the same effect. These grooves or channels must always be made on that side of the plate nearest to the founding apparatus.

The process here described is the invention of H. J. Kolk, C. A. J. Gursch, and C. H. J. Klemm, all of Berlin.—*Printing Times and Lithographer.*

SUPERB VALENTINES FOR 1884.

PURE and chaste in sentiment, the combined work of our best American artistic and literary talent, our line of Valentines for 1884 cannot fail to receive the support of the most refined class of buyers.

We have been guided in their preparation by the success in former years, and by the expressed wants of the trade.

The following artists, among others, are represented:

MISS L. B. HUMPHREY,
MRS. O. E. WHITNEY,
MISS ROSINA EMMET,
MISS L. B. COMINS,
MISS ALICE W. ADAMS,

F. S. CHURCH,
HARRY BEARD,
C. Y. TURNER,
H. GIACOMELLI, of Paris.
F. SCHUYLER MATHEWS.

A varied assortment of Valentines by the above-named artists is offered in plain form, and single and double silk fringed.

ENVELOPES furnished with almost all our Valentines, without extra charge.

BACKS.—We again beg to call attention to the elegantly-designed backs, which are a special feature in our cards.

SATIN PRINTS.

Besides a number of FLORAL DESIGNS mounted in a variety of novel styles, special attention is called to our finest production in this line,

THE "LION IN LOVE" VALENTINE.

This is a rich satin print, on an elegant fancy plush mount. The design is after F. S. CHURCH's important work of above name. The poetry is by J. V. CHENEY. The picture is of the greatest artistic merit, and, on its elegant mount, forms, what we think, one of the most unique, artistic and sumptuous St. Valentine Souvenirs ever offered to the public.

Retail Price, in a neat suitable box, \$10.00.

DESCRIPTIVE PRICE LISTS OF OUR VALENTINES ARE NOW READY.

Besides our Valentines, we call attention to our NEW BIRTHDAY CARDS, including SATIN ART PRINTS, NEW SCRIPTURE TEXT CARDS, NEW COPIES FOR PAINTING, &c.

Our line of EASTER CARDS and EASTER NOVELTIES will shortly be announced.

THE STATIONERS' BOARD OF TRADE.

ANNUAL MEETING.

The annual meeting of the Stationers' Board of Trade was held at the rooms of the board in the Bennett Building on Tuesday, January 10. The following-named firms were represented either by proxy or by member: Alexander Agar, Althorf Bergmann & Co., B. B. Holbrook & Co., Cambridgeport Diary Company, E. Claxton & Co., A. M. Carr, Son & Co., Esterbrook Steel Pen Company, R. Graves & Co., New Hampshire Paper Company, R. S. Boggs & Co., Janeway & Co., Henry C. Lee, Son & Co., Liebenroth, Von Auw & Co., Massasoit Paper Company, Mount Holly Paper Company, Riverdale Paper Company, Daniel Slote & Co., Charles Taber & Co., S. A. Trowbridge, Vanderburg, Wells & Co., Warren, Fuller & Lang, G. Henry Whitcomb & Co., Whiting Paper Company, Dennison Manufacturing Company, Eagle Pencil Company, Boorum & Pease, Samuel Raynor & Co., Charles T. Bainbridge's Sons, Edward Todd, Acme Stationery & Paper Company, Baker, Pratt & Co.

The attendance was not so large as on some occasions, but the meeting was very interesting, the various reports submitted showing an increased membership, better financial condition of the board and a hearty interest taken in its work by the members and executive officers. A member ventured the opinion that a collation served at the annual meetings of the board might, by imparting a more social character to the occasions, call out a larger attendance. The matter was informally discussed before the closing of the board, and it is probable that some action will be taken on it at some future meeting.

After the meeting was called to order the minutes of the last meeting were read and approved. The following report was then submitted by the president of the board, George L. Pease:

PRESIDENT'S REPORT.

Gentlemen of the Stationers' Board of Trade:

We have again convened for a review of the work performed by this office during the past year, as also to exchange cordial greetings and welcome our new members. When I recounted to you at our last annual meeting the satisfactory and effective work performed, and the general prosperity of our organization during the previous year, I hardly ventured to predict an increased membership and extended usefulness of our board in 1883. It is, however, my pleasure to report a larger number of members to-day than ever before since our organization, viz., 177.

The report of our treasurer will show you a very satisfactory condition of our finances. The Finance Committee will furnish you details of the office work performed in its several departments, viz., Collection Bureau, Records and Reports and Bankruptcy. The two former have made great advancement, and I trust our vice-president in his report will show those members who have not availed themselves of their privileges how great is their loss.

In the Bankruptcy or Failure Department we have had largely increased work, but with not as satisfactory results as when we had a national bankruptcy law, and were not subjected to as many different collection laws to work under as there are States in the Union. I urge upon our members to work earnestly for the passage of a

just bankruptcy law—one framed to protect the creditor as well as the debtor, and provide for an honest administration and division of an estate. If such a law can be enacted during this session of Congress, I predict that my successor will be able to report to you at our next annual meeting a doubled membership as well as increased prosperity in all departments of our board.

There is no work this organization is so well informed on and adapted to as the working up of a crooked failure, through its Bankruptcy Department. The large number of failures during the last few months in all lines of trade warns us to act promptly and vigorously to secure a bankruptcy law.

The work of the Arbitration Committee has been light; and permit me to suggest to our members that they employ this committee oftener to settle trade differences. Certainly no more economical court exists, and no better informed jury can be found to decide differences between traders than intelligent merchants and manufacturers—those engaged in the same or in similar occupations.

I desire to speak a word in commendation of our corps of employees, who have served the board faithfully and efficiently, and who can show to-day the office work balanced up, cleaned up, and in better shape than in former years. I thank these gentlemen for their promptness and faithfulness.

Our increase in numbers have come from nearly all departments of trade, quite a number from the toy manufacturers and dealers, and I hope the board will prove so useful to those now with us that they will feel like inducing those outside to join us in a body.

During the year two of our members have passed from among us—George W. Davids and Joseph Rickendorfer. Both of them were trustees, and were in deep sympathy with every work and act that advanced the interest of our organization.

In conclusion, I thank the trustees for the hearty interest they have taken in the board and the support they have given me in carrying out any measures for promoting the welfare of our organization.

(Signed)

GEORGE L. PEASE,

President.

The report was accepted, and motion was made that it be recorded on the minutes by the secretary.

William T. Pratt, vice-president of the board and chairman of the finance committee, submitted a report as follows:

REPORT OF FINANCE COMMITTEE.

Mr. President and Gentlemen of the Stationers' Board of Trade:

Your Finance Committee beg to submit the following report for the year ending December 31, 1883:

MEMBERSHIP.

On January 1, 1883, the board numbered 166 members. During the year 17 new members have been elected, while 6 have withdrawn, our present membership numbering 177. Of the six resignations noted during the year, two of them represented firms who have gone out of business and one a firm which joined the board in order to avail themselves of the advantages offered in the settlement of a dispute through the medium of our Arbitration Committee. The dispute having been arbitrated, the firm withdrew its membership; so that practically but three members have been lost during the year, while seventeen names added to our roll make our present membership 177, the largest which our association has ever attained. There is yet

room, however, for more, and in no other way can the trade obtain such valuable benefits as our organization affords them at such a minimum expense.

RECORDS AND REPORTS.

In the Departments of Records and Reports, on January 1, 1883, our record books contained detailed reports of 16,050 firms and individuals dealing with our members. During the year 3,742 of these reports have been revised and corrected to date; 2,645 reports of new names have been added, making the total number of dealers now reported on our record books 18,695.

There have been received 8,474 inquiry tickets from members seeking information, which have been promptly answered, while 10,273 general, and 362 special reports, making a total of 10,630 reports, have been sent out to members. In addition to these, 66 voluntary information tickets, containing early reports of failures and assignments, have been sent to all members of the board.

During the year there have been 5,656 inquiry tickets sent to members for information, while 69 special inquiries have been made, and the valuable data thus gained has been duly incorporated on the record books of the office.

There have been 696 statement blanks sent out to dealers, followed by 289 second requests for reply; 724 inquiries to banks, 379 to attorneys, making a total of 2,088 inquiries through this medium; while during the said period we have received 518 statements from dealers, 588 reports from banks, 476 reports from attorneys, making a total of 1,582 reports.

In addition to the above work, this department of the office has issued 17,807 information circulars to its members.

It is gratifying to note that all our members, with the exception, perhaps, of some twenty or twenty-five, have this year taken advantage of this department of the office for obtaining information.

The comparison of the past three years' work in this department may best serve to show its increasing value to our general membership.

Inquiry Tickets from Members.

1881.....	6,429
1882.....	7,121
1883.....	8,474

Inquiry Tickets sent to Members.

1881.....	4,238
1882.....	4,736
1883.....	5,656

General Reports issued to Members.

1881.....	7,975
1882.....	8,810
1883.....	10,278

BUREAU OF COLLECTION.

In the Collection Department there have been received during the year 1,361 claims for collection, aggregating the sum of \$142,576.94. Of this sum, dividends to the amount of \$45,323.76 have been collected through the office, and the proceeds paid to members, exclusive of the large number of claims which have been withdrawn, having been settled direct on receipt of notice from this office.

In this department 4,095 letters have been received; 6,374 letters have been written.

Seven hundred and eighty-one claims have been sent to attorneys.

The fees received by the office in the Collection Bureau during the year were \$1,398.82.

In 1882 there were two claims amounting to over \$5,000, each collected through the office, which included made the aggregate of claims for 1882, \$114,525.55. While this year shows an increase of about 33½ per cent. in the number of claims presented for collection, it will be

observed that the aggregate is only \$142,576.94, thus showing that the average amount of claims this year has been considerably less than last. These two claims coming under last year's work also explains why the dividends collected in 1882 were \$48,604.19, as against \$45,323.76 in 1883. It will be noticed, however, that the office fees are a trifle larger than last year, standing \$1,398.82, as against \$1,193.31 for the year 1882.

FAILURES AND ASSIGNMENTS.

In the Failure and Assignment Department during the last year there have been received 153 cases for adjustment, consisting of 817 claims, aggregating \$273,351.91.

There were 111 unsettled claims in the office on January 1, 1883, which with the 153 received during the year make a total number of 264 cases. Of these 5 cases have been closed by payment in full, 40 cases do., under assignment, 44 cases do. by compromise, 8 cases do. direct with creditors, and 36 cases have been cancelled and returned as worthless, making a total of 133 cases disposed of during the year, and leaving now in process of collection in this department 131 cases.

There has been paid to creditors through this department of the office \$49,045.66, exclusive of amount paid in direct settlement.

There have been 2,670 letters written, 2,227 letters received, and 4,233 circulars issued to creditors.

By comparison, it will be noticed that the business in this department has increased materially within the past three years.

1881, 86 claims; 1882, 88; 1883, 153.

The 88 cases in 1882 represented 479 claims.

The 153 cases in 1883 represented 817 claims.

Therefore, the records of letters received and written and circulars sent out show an increase in something over 50 per cent. In addition to those already mentioned, there have been 577 letters received on the general business of the office, and 1,041 letters have been written.

In this department the want of a bankruptcy bill is felt, and your committee unite with our president in the earnest desire that the board may do all in its power to secure the speedy adoption by Congress of some bill which shall satisfactorily meet the wants of merchants. In this connection we would report, that by resolution of the trustees, the Finance Committee have been authorized to draw up and have presented a suitable petition to Congress, praying for the passage of a uniform bankruptcy law. This petition will be immediately sent to members of our board for their signature, and then forwarded to our representatives in Congress.

FINANCIAL DEPARTMENT.

Regarding our financial position, in view of the treasurer's report which is now before you, which so fully covers the ground, it is perhaps unnecessary for any further comments. An abstract, however, from his report shows:

Cash in the treasury January 1st., 1883..... \$2,349.21
Receipts through the office during this year 11,347.50

Total.....\$13,696.71

The total disbursements through the office have been \$10,540; leaving a balance in the treasury January 1, 1884, \$1,848.21, added to which the redemption fund of \$1,308.50 shows a balance of \$3,156.71.

A comparison of our present condition with that of former years is certainly very encouraging, as it contains the largest membership ever attained by the association, while each department of the office shows a larger amount of work accomplished during the past year than heretofore, and we think with better results.

We desire to express our thanks to those mem-

bers who have so kindly aided us in obtaining information through the medium of our inquiry tickets, especially is this due to those in the city who are daily reached by our canvassers.

We also most heartily congratulate the members of the board as with pleasure we bear testimony to the efficient and faithful services rendered by our secretary and his able corps of assistants.

It would seem that the mission of the Stationers' Board of Trade is to establish and cultivate broader and deeper principles of business than the temporizing policy which it is so natural and easy for individuals, disassociated in action, to fall into.

We firmly believe that if a more general attendance at our regular meetings could be brought about the efficiency of our Board could be materially strengthened. There are many crying evils which, by long toleration, have become usage in the trade. If these matters could be brought up and freely discussed by our members, we feel that it would be much to the interest of all.

All of which is respectfully submitted.

(Signed) W. T. PRATT,
Chairman Finance Committee.

The report was duly approved and filed.

Alexander Agar, treasurer, submitted the following report:

Balance on hand January 1, 1883..... \$2,349.21

RECEIPTS DURING THE YEAR.

Initiation fees.....	\$650.00
Quarterly dues.....	8,212.50
Stock issued.....	130.00
Collection fees.....	1,368.86
Advances on account of members and creditors repaid....	877.64
	\$11,239.00
Interest on redemption fund....	108.50
	11,347.50
	\$13,696.71

DISBURSEMENTS.

Rent.....	\$1,300.00
Salaries.....	6,766.84
Office salaries.....	1,994.27
Certificates of stock redeemed.....	60.00
Counsel fees.....	200.00
Taxes.....	3.75
Advances to members and creditors.....	215.14
	10,540.00
Balance on hand, January 1, 1884.....	\$3,156.71
General account.....	\$1,848.21
Redemption fund.....	1,308.50
	\$3,156.71

In regard to the redemption fund it may be well to state that all dealers who become members of the board pay an initiation fee of \$50 and is also required to place at least one share to the credit of the board. If he withdraws from membership for any cause this stock is redeemed. The board was organized with one hundred and twenty members, and a redemption fund of \$1,300. This, with interest, &c., has accumulated to 1,308.50, but were it not for withdrawals of members from the board would, as is obvious, be much larger.

After the reading of these reports the following named gentlemen were elected trustees for the coming year: Alexander Agar, J. F. Anderson, Jr., B. Van Wagenen, H. V. Butler, Jr., A. C. Barnes, E. Faber, Patrick Farrelly, Jonas Langfeld, Wm. I. Martin, George L. Pease, William T. Pratt, R. M. Fairfield, D. Scott, S. I. Knight, C. F. A. Hinrichs, Charles E. Runk, Charles T. Dillingham, E. Embree. On a vote being taken they were unanimously declared elected.

The new board of trustees is composed of five booksellers and publishers, four paper manufacturers and dealers, one toy dealer, one wall-paper dealer, one pencil manufacturer, one en-

velope manufacturer, one leather goods dealer, one paper-stock dealer, two manufacturing stationers, one blank-book manufacturer.

A committee of five, after some discussion, was appointed to make the necessary arrangements for the annual dinner of the board and to appoint the time for holding the same. The committee consists of David Scott, Wm. I. Martin, Alex. Agar, Chas. E. Runk and Wm. Graham.

On Monday afternoon, January 14, at 3 P. M., a meeting of the trustees of the board will be held for the purpose of electing a president, vice-president and secretary for the year 1884.

AN EARLY CHAPTER IN THE HISTORY OF STEEL PENS.

The subject of the identity of the inventor of steel pens has lately been broached in one of the Birmingham papers, in connection with which attention has been drawn to the statement, made some years ago, that the first steel pens were made by Daniel Fellows, of Sedgley, an old sportsman, intimate in his younger days with the then Lord Dudley, of Himley. D. Fellows also made gold pens and claimed to be the inventor of them, but this was disputed by a Dr. Wise, of London, between whom and Fellows a paper war was carried on respecting it some seventy or eighty years ago. The writer of the above statement was asked to give further details, names, dates, &c., and he then stated that the "paper war" was by rival hand-bills; that he had been at Fellows' house in 1806, and seen "Thomas Sheldon, his apprentice, making steel pens;" that Fellows began to make steel pens about 1793, that he himself paid Sheldon £100 in 1822 for pens, and more than that amount in 1823, but that soon after the machine-made pens of Mitchell & Gillott took the place of the barrel-made pens. Another contributor ("T. S.") wrote that in 1815 Sheldon's pens were sold at 18s. per dozen, less 10 per cent. for cash, that they were the barrel-shape, and that with bone handle and cover to protect the pen, for pocket, the price of B. Smith & Co.'s steel book was 36s. per dozen, discount 25 per cent. quarterly, or 5 per cent. for prompt cash. The writer added that he had in his possession a metallic pen, of Dutch make, the date of which was provable as sold in the year 1717.—*Printing Times and Lithographer.*

EARLY TYPE-FOUNDING.

In 1636 Joseph Moxon, the earliest writer on the technique of printing, type-founding, &c., published his "Mechanical Exercises," a work often quoted in the typographical literature of to-day. He was the first of English letter-cutters to reduce to rule the art which before him had been practised only by guess, and left to succeeding artists examples that they might follow. By nice and accurate divisions he adjusted the size, situation and form of the several parts and members of letters, and the proportion which every part bore to the whole. The bodies most in use when Moxon wrote, and which were the only ones noticed by him, were Pearl, Nonpareil, Brevier, Long Primer, Pica, English, Great Primer, Double Pica, Two-line English and French Canon. Moxon further says: "We have one body more, which is sometimes used in England, that is, a Small Pica; but I account it no discretion in a master printer to provide it, because it differs so little from Pica, that unless the workmen be more careful than they sometimes are, it may be mingled with Pica, and so the beauty of both may be destroyed." Moxon followed the occupation of a mathematical instrument maker, and was hydrographer to the king.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 288,967. Paper-Bag Holder.—William Henry Ashton, Seward, Neb.

No. 289,014. Feed-Gage for Printing Presses.—Edward L. Megill, Brooklyn, N. Y.

In a feed-gage for printing presses, the combination of a gage-shank with a gage-head having suitable fastenings for adjusting, varying and securing the latter under and along the former, whereby the sheets are allowed to go under the forward end of the gage-shanks any required depth.

No. 289,029. Plate-Holder for Photographers' Cameras.—Frederick G. Sargent and Allen C. Sargent, Graniteville, Mass.

No. 289,032. Game Apparatus or Toy Target.—Chas. Sears, South Evanston, Ill.

No. 289,042. File Case.—Anthony W. Voltz, Buffalo, N. Y.

No. 289,043. Game Apparatus.—Harry T. W. Waller, New York, N. Y.

A game representing stock operations, consisting of a board upon which counters or checks are placed to represent the amount invested in by the players, and a mutable wheel, dice or cards, marked and employed to indicate, in connection with the board, the names and fluctuations of the stock or commodities.

No. 289,047. Stamping Machine.—Wesley N. Wheelless, Augusta, Ga.

No. 289,131. Toy Kitchen.—Max Miller, Brooklyn N. Y.

No. 289,133. Clasp for Albums.—Albert Pflüger, Berlin, Germany, assignor to Richard Moser, same place.

No. 289,140. Toy Money-Box.—Wm. S. Reed, Leominster, Mass.

No. 289,161. Paper Box.—Henry D. Stimson, Had-donfield, N. J.

No. 289,167. Calendar.—Samuel D. Styles, New York, N. Y.

No. 289,195. Combined Copy-Holder and Book-Rest.—Gustave Weinschenk, Cambridge, Mass.

No. 289,217. Game Table.—Geo. Calder, Mill Creek, Utah.

No. 289,221. Return-Ball.—Charles W. Clark, Cincinnati, Ohio, assignor to Laura A. Murray, same place.

No. 289,239. Apparatus for polishing Sheets of Zylonite, &c.—Jarvis B. Edson, Adams, Mass.

No. 289,240. Forming and Finishing Surfaces coated with Zylonite.—Jarvis B. Edson, Adams, Mass.

No. 289,241. Patent-Leather and a substitute therefor.—Jarvis B. Edson, Adams, Mass.

No. 289,252. Clamp for Books.—Frank E. Halliday, Geigersville, Ky.

No. 289,297. Game-Ball.—William B. Melot, Fleetwood, Pa.

No. 289,338. Treating material with Zylonite to resemble Pebble, Goat, French Calf and Alligator Leather.—Jarvis B. Edson, Adams, Mass.

The method of making a substitute for leather resembling goat pebble, French calf, or alligator, consisting in partially dissolving the surface of a sheet of zylonite or similar pyroxyline substance by a suitable solvent; secondly, applying the sheet to the material forming the base with the partially-dissolved side of the sheet next thereto; and, thirdly, applying pressure for a period of time sufficient to imitate the kind of leather to be produced, and to expel the surplus solvent and air and cause an intimate union of the base and sheet of zylonite.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

TURNER & HARRISON, Twelfth and Buttonwood Streets. PHILADELPHIA, PA.

A NEW THING UNDER AN OLD NAME!

The Rubber-Finished Slateograph and Transfer Ink.

THE RUBBER-FINISHED SLATEOGRAPH is the most economical and rapid Dry Copying Process in the market.

For Simplicity and Durability it has No Equal.

IT CHALLENGES COMPARISON, DISTANCES COMPETITION and SURPASSES EXPECTATIONS.

It cleans easily, copies splendidly, and avoids the annoyance of remelting, as by the old method. Sold by all Stationers. Send for Circular Price List to the manufacturers,

SUNDERLIN, TABER & CO.

WATKINS, N. Y.

SILICATE BOOK SLATES, BLACK DIAMOND SLATING, REVOLVING BLACKBOARDS, LAPILINUM (Slated Cloth).

THESE GOODS are in constant use by the BOARD OF EDUCATION of the City of New York (in every Public School), and have been for the past twelve years, which is a sufficient guarantee as to their durability and perfection. They are also in use by a large number of the BOARDS OF EDUCATION, Colleges and Schools throughout the country. The Private Schools have also adapted our Book Slates in preference to slate or paper pads—finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance, and finely finished. The BLACKBOARDS are well seasoned, and will last for years, slated on both sides with the celebrated BLACK DIAMOND SLATING. For sale by all the leading Houses throughout the United States and Canada. SEND FOR CATALOGUE. Patented and manufactured only by the

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

- FIRST.*—It handles buckled paper as well as flat, and runs the work through straight.
SECOND.—It has the best system for rapid and perfect feed.
THIRD.—It has the best system for gauges, and can be more quickly adjusted.
FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.
FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.
SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.
SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.
EIGHTH.—Each machine has a scoring cutter attached.
NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

T. W. Ripley, printer, Boston, Mass., has been damaged by fire.

Jacob Gleason, bookseller and stationer, Red Oak, Ia., is selling out.

B. H. Rothwell, bookseller, &c., Toronto, Ont., is advertising his business for sale.

The National Paper Company, Milan, Ill., has confessed judgment in the sum of \$11,683.

Eli Saulsbury, publisher of the *Delawarian*, Dover, Del., has sold out to J. F. & J. P. Saulsbury.

H. G. Razall & Co., blank-book manufacturers, Milwaukee, Wis., have been burned out; insured.

A receiver has been appointed for the Goodwillie Wyman Company, dealer in printers' supplies, New York city.

McArdle & Hart, paper-stock dealers, New York city, have dissolved partnership. P. J. McArdle continues the business.

An attachment has been issued against the Philadelphia Paper Box and Paste Manufacturing Company, San Francisco, Cal.

S. Hubbuch & Brother, dealers in wall-paper, Louisville, Ky., have dissolved partnership. Otto Hubbuch has been admitted to the firm.

A dissolution has taken place in the firm of Fitzpatrick & King, paper hangers, Philadelphia, Pa. William R. King continues the business.

S. A. Rudolph's Sons, paper dealers, &c., Philadelphia, Pa., have admitted Sebastian A. Rudolph as special partner for \$20,000 to December 31, 1885.

W. T. Donaldson and C. S. Magrath have succeeded the firm of Donaldson & Co., printers and publishers, Philadelphia, Pa., under the style of Donaldson & Magrath.

George W. Reid & Co., dealers in stationery, &c., Pittsburg, Pa., have dissolved partnership. Harry Watts retires, and George W. Reid continues the business under the same style.

W. T. Tilden & Co., Philadelphia, Pa., have formed a copartnership, composed of William T. Tilden, with David Hey as special partner for \$10,000 to December 31, 1885. The firm will deal in paper.

The *Venango Citizen*, Smiley Brothers, publishers, Franklin, Pa., has been consolidated with the *Press*, and the title of the paper is the *Citizen-Press*. The style of the firm has been changed to E. W. Smiley & Co.

Edward Posen & Co., of Offenbach-on-the-Main, Germany, have opened a branch house at 437 Broadway, New York. This firm was established in 1838, and it is one of the oldest manufacturers of albums, fine leather goods, &c. It proposes to give the American public novelties of the highest order in its line of production. Its goods are well known throughout the world and also in the American market. The growth of its business here and the increasing demand for its goods has induced the house to form closer connections with the American trade, with whom it is said to be the first European manufacturer in its line to deal direct.

The loss by the Chicago fire of December 30 is figured out to be between \$300,000 and \$400,000, so that the former estimate of \$200,000 is fairly within bounds. It will cost about \$25,000 to repair the building, the roof and top floor being entirely gone. It is insured for \$50,000, not including \$20,000 on rents. Bradner Smith & Co., paper dealers, who occupied the first floor and basement, estimate their loss at \$100,000. The insurance of this firm is \$117,000 and \$13,200 on rents. President McConnell, of the National Printing Company, which occupied the second floor, estimates their loss at \$125,000; insurance, \$177,750. Shober, Carqueville & Co., the lithographers, who occupied the two upper floors, say that their loss will exceed the insurance, \$105,000—by from \$50,000 to \$75,000. The other losses—caused largely by water in adjacent buildings—were comparatively small.

Milton Bradley & Co. report the demand for the Tapley patent self-indexing file to be rapidly increasing as its qualities become known. It is so entirely unlike all other files in the market that, with those who admire it, no praise is too strong as compared with others, while to those who have not tested it, the peculiarities may seem objections in comparison with those with which they are familiar.

R. & T. A. Ennis, stationers, &c., St. Louis, have completed the twenty-fifth year of their existence as a business firm, with unbroken business standing. On New Year's the employes of the firm presented Richard Ennis, the senior partner, with a silver tea set, coupled with expressions of regard.

The sheriff's sale of the stock of Geo. McDowell & Co., Philadelphia, has been made very inopportune. The bids were small, and Joseph Langfeld bought the greater part of the stock, and will run the business for the present in the same premises lately occupied by Geo. McDowell & Co.

Telegrams state that the Chagrin Falls (Ohio) Paper Company has given chattel and realty mortgages for \$55,000, and the mortgagee took possession. The company was organized in 1873, with an authorized capital of \$100,000, of which \$50,000 was paid in.

At Milwaukee, January 3, a fire in the second and third floors of A. G. Razall & Co.'s bookbindery on East Water street, did damage to the extent of \$5,000. Schultz & Co., dealers in paper boxes, also suffered a small loss.

The Pittsburg *Evening Telegraph*, Pittsburg, Pa., has been consolidated with the *Evening Chronicle*, and the publishers will do business under the style of the *Chronicle-Telegraph* Publishing Company.

J. E. Linde, New York, has issued some new folders for masquerade ball programmes which are attractive. He is also offering a large lot of job bill-heads cheap.

Jarvis Patten, Bath, Me., is the patentee of a postal tablet, in which the sheets are so gummed as to fold over and seal, dispensing with the use of an envelope.

Fullington & McIntire, booksellers, stationers, &c., Clay Centre, Kan., have dissolved partnership. S. S. McIntire continues the business.

The National Paper Company, at Milan, Ill., has confessed judgment for \$11,683 to the Rock Island National Bank.

Mills & Chapman, printers, Chicago, Ill., have dissolved partnership. M. B. Mills continues the business.

J. H. Dietrich, publisher of the *Gazette*, Berwick, Pa., has sold out to N. B. Margerum.

Margaret Rockwell, toy dealer, Philadelphia, Pa., is dead.

An assignment has been made by N. S. McConnell, stationer, &c., Grand Forks, Dak.

George E. Richardson, publisher of the *Rutland Standard*, Rutland, Vt., has been burned out.

Jesse Wood, publisher of the *Chicago Enterprise*, Chicago, Ill., has been succeeded by Ed. Hoole.

Morrison & Duval, card dealers, Washington, D. C., have dissolved partnership. E. B. Duval continues the business.

Spencer Brothers, manufacturers of baby carriages, Chicago, Ill., have dissolved partnership. L. G. Spencer continues.

Halliday, Emigh & Co., paper manufacturers' agents, Chicago, Ill., have dissolved. Halliday & Emigh succeed to the business.

N. Frank & Sons, paper-stock dealers, Baltimore, Md., have dissolved partnership. The business will be continued under the old style.

Eliot, Hunt & Co., printers, &c., Attleboro, Mass., have dissolved partnership. The business will be continued by Perry, Barnes & Co.

W. D. Cole, publisher of the *Rushville Republican*, Rushville, Ind., has admitted John A. Moses to partnership. The style of the firm is Cole & Moses.

George W. Etter, James S. Fenimore, Harry G. Stagg and Charles J. Stagg, Jr., Philadelphia, Pa., have formed a copartnership under the style of the Philadelphia Book, Die and Engraving Company.

Judgments in the sum of \$10,781 have been issued against the Metropolitan Publishing Company, publishers of the *House and Home*, New York city, in favor of the president, Bradhurst Schiefflin.

Chain & Hardy, booksellers and stationers, Denver, Col., have admitted I. M. Low to membership in their firm, the style of which has been changed to Chain, Hardy & Co.

Clarke & Co., booksellers and stationers, Vicksburg, Miss., send THE STATIONER their New Year greeting on a neat, engraved beveled card, with tasty monogram.

Magargee & Green, paper dealers, Philadelphia, Pa., have purchased the Weymouth paper mills, at Bloomfield, N. J., for \$60,000. The production of the mills will be changed from manilla and printing to writing papers.

The Newsdealers and Stationers' Union of New England held its annual meeting at Boston, Mass., on Tuesday, and elected these officers: President, Thomas Marsh; vice-president, Chas. W. Drake; secretary, Joseph P. Willis; treasurer, J. H. Henan.

Robert G. Ives, proprietor of a bookbindery at 15 Dutch street, seized the huge leather belt of a big embossing machine, on Thursday afternoon of last week, and tried to stop the machinery. He got caught and his back was strained so badly that he became helpless. He was removed to the Chambers Street Hospital in an ambulance, and subsequently sent to his home, at 368 Fifth street, Brooklyn.

In the publication of the *German-American Grocer*, New York city, a complete reorganization has been effected, that paper being now published by the Retail Grocers' Publishing Company and its name having been changed to the *Retail Grocers' Advocate*. The January number, under the latter title, appeared in a new dress, which gives the publication a much

neater and more improved appearance than the old form.

Ranson & Eldridge, publishers, Boston, Mass., have gone into insolvency.

Carl Richter, dealer in picture frames, Wellsborough, Pa., has been burned out.

Dexter & Milliken, printers, Springfield, Me., have sold out to G. W. S. Brackett.

F. Weater, manufacturer of brackets, &c., Chicago, Ill., was burned out last week.

The Portland Paper-Box Company, Portland, Me., has been burned out; partly insured.

An assignment has been made by S. C. Hastings, bookseller and stationer, Middletown, Conn.

The bookstore of W. T. Wells, Covington, Ga., has been destroyed by fire. Loss, \$200; not insured.

S. W. Hawkins, publisher of the *Covington Enterprise*, Covington, Ga., has been burned out; not insured.

M. W. Wolf, of M. W. Wolf & Co., Baltimore, Md., was in town during the past week. He speaks favorably of business.

Frank & Veit, manufacturers of fancy cases, New York city, have dissolved partnership. Julius Frank continues the business.

The St. Louis Printing and Stationery Company, St. Louis, Mo., has dissolved. H. K. Kletzker continues under the same style.

The plant of the *Tribune* Printing and Lithographing Company (Incorporated), Hamilton, Ont., is advertised to be sold by the sheriff.

L. Coltrin & Co., manufacturers of toys, &c., Detroit, Mich., have dissolved partnership. J. T. Daniels withdrawing. Style remains the same.

The *Farmer* Company, publisher of the *Practical Farmer*, Philadelphia, Pa., has dissolved. Henry Harris continues the business under the same style.

The firm of D. Maujer's Nephews, dealers in paper-hangings, &c., Brooklyn, N. Y., has dissolved. The business will be continued by Thomas J. Maujer.

Joseph B. Robinson has been admitted to partnership in the firm of Butts & Robinson, printers and publishers, Baltimore, Md. The style of the firm has been unchanged.

W. P. Dick has been admitted to partnership in the firm of Dick, Ridout & Co., manufacturers of twines, &c., Toronto, Ont., and John Dick has retired from the firm. The style of the firm is unchanged.

Robert Clarke & Co., Cincinnati, have just published "Suggestions to China Painters," by M. Louise McLaughlin. The author says that this work is the result of wide experience, and is put forth as a ready help to those who would have to acquire that experience by toil and patience. It is a practical manual of china painting, and is intelligent and instructive in its teachings.

The business heretofore conducted by Robt. D. Patterson and Irving McGowan, under the firm name of Robt. D. Patterson & Co., St. Louis, has this day been transferred to the Robt. D. Patterson Stationery Company, which assumes the outstanding liabilities, and to which all accounts due the former firm are payable. Robt. D. Patterson is president, and Irving McGowan vice-president of the new company.

Torrey Brothers, publishers of the *News and Enterprise*, Easthampton, Mass., have dissolved partnership by mutual consent. The business will be continued by L. E. Torrey, and D. C. Torrey will enter Williston Seminary.

The will of W. Reid Gould, the well-known stationer, who died on Monday, 31st ult., was offered for probate on the 3d inst. The testator leaves all his property to his sister, Margaret Reid Gould.

A dissolution has taken place in the firm of Smith & Spinning, manufacturers of blank-books, New York city. Alfred D. Smith succeeds to the business.

Pease, Traill & Fielding, publishers of the *Salem Observer*, Salem, Mass., have dissolved partnership. F. A. Fielding & Co. succeed to the business.

The style of the firm of R. H. Smith & Co., rubber type manufacturers, Salem, Mass., has been changed to the R. H. Smith Manufacturing Company.

The Chagrin Falls Paper Company, Chagrin Falls, Ohio, failed on Wednesday; assets, \$50,000. The liabilities are greater, but how much is not stated.

C. F. Holcomb has retired from the firm of J. R. Holcomb & Co., dealers in school-books, &c., Cleveland, Ohio. The style of the firm is unchanged.

The Charles B. Woodward Printing and Book Manufacturing Company, St. Louis, Mo., has been incorporated with a capital stock of \$20,000.

The factory of the Crandall Type-Writer Company, Syracuse, N. Y., was burned on Friday night. The company was insured for \$8,000.

The City Printing Company (not incorporated), Winnipeg, Manitoba, has dissolved. John B. McDowell continues under the same style.

William M. Hastings, stationer, &c., New York city, advertises to do business under the style of Wilbur & Hastings.

A. J. Millette, printer, Camden, N. J., has failed.

Charles A. Scadding, engraver, Toronto, Ont., is dead.

Kusz & Co., publishers, Manzano, N. M., have dissolved partnership.

H. C. Card, dealer in picture frames, Holyoke, Mass., is reported assigned.

The *Times* Printing Company, Brockville, Ont., has sold out to N. B. Colcock.

Hoag & Toune, publishers of the *Echo*, Petaluma, Cal., have dissolved partnership.

The *Globe*, Camden, N. J., has suspended publication on account of a lack of patronage.

Samuel L. Noyes, toy manufacturer, Westminster, Mass., has removed to Ashburnham.

Mages & Bolton, manufacturers of picture frames, &c., Chicago, Ill., have been burned out.

H. C. Card, dealer in picture frames, Holyoke, Mass., has closed up his business, having failed.

James H. Hughes, dealer in paper patterns, Toronto, Ont., has suffered from damage by fire.

A dissolution has taken place in the firm of Test & Webster, dealers in wall-paper, &c., Salem, N. J.

Alfred Saunders, dealer in picture frames, stationery, &c., Lansing, Mich., has assigned to E. C. Chapin.

James W. F. Holah, of the firm of Wallis, Holah & Ashbrook, publishers and printers, Philadelphia, Pa., is dead.

H. N. Hubbard's new catalogue and price-list is now ready, and he requests all buyers of copying presses to get it before placing their orders, as there are several important changes in prices.

Rosenbaum & Co., Philadelphia, were very successful with their novelties for the holidays. They are now preparing some entirely new articles for valentines which will surpass anything they have manufactured before.

The Paragon Slate Company, Foxboro, Mass., is manufacturing Irving Carpenter's "Paragon" slate, which has an elastic rubber frame stiffened with a steel wire inclosed within it. It is claimed to be a perfectly noiseless slate; it will not slide from the desk, and will not scratch or deface furniture. The trade should send for samples.

A FEATHERED SHEPHERD.

In South America there is a very beautiful bird called the agami, or the golden-breasted trumpeter. It is about as large in the body as one of our common barn-yard fowl, but as it has longer legs and a longer neck it seems much larger. Its general color is black, but the plumage on the breast is beautiful beyond description, being what might be called iridescent, changing, as it continually does, from a steel-blue to a red-gold, and glittering with a metallic lustre.

In its wild state the agami is not peculiar for anything but its beauty, its extraordinary cry, which has given it the name of trumpeter, and for an odd habit of leaping with comical antics into the air, apparently for its own amusement. When tamed, however—and it soon learns to abandon its wild ways—it usually conceives a violent attachment for its master, and, though very jealous of his affection, endeavors to please him by a solicitude for the well-being of all that belongs to him, which may fairly be termed benevolence.

It is never shut up at night as the other fowl are, but, with a well-deserved liberty, is permitted to take up its quarters where it pleases. In the morning it drives the ducks to the water and the chickens to their feeding ground; and if any should presume to wander, they are quickly brought to a sense of duty by a sharp reminder from the strong beak of the vigilant agami. At night the faithful guardian drives its charge home again.

Sometimes it is given the care of a flock of sheep; and, though it may seem too puny for such a task, it is in fact quite equal to it. The misguided sheep that tries to trifle with the agami soon has cause to repent the experiment; for, with a swiftness unrivaled by any dog, the feathered shepherd darts after the runaway, and with wings and beak drives it back to its place, not forgetting to impress upon the offender a sense of its error by pecks with its beak.

Should a dog think to take advantage of the seemingly ungarded condition of the sheep and approach them with evil design, the agami makes no hesitation about rushing at him and giving combat. And it must be a good dog that will overcome the brave bird. Indeed, most dogs are so awed by the fierce onset of the agami, accompanied by its strange cries, that they incontinently turn about and run, fortunate if they escape unwounded from the indignant creature.

At meal-times it walks into the house and takes its position near its master, seeming to ask for his caresses. It will not permit the presence of any other pet in the room, and even represents the intrusion of any servants not belonging there, driving out all others before it will be contented. Like a well-bred dog, it does not clamor for food, but waits with dignity until its wants have been satisfied.—*From "Benevolent Birds," by Will Wooman, in St. Nicholas.*

The weathering of brick walls into a friable state is usually attributed to the action of heat, wet and frost, but from recent observations of M. Parize the real destroyer is a micropterous creature, and the action played by the weather is only secondary. He has examined the red dust of crumbling bricks under the microscope and found it to consist largely of minute living organisms. A sample of brick-dust taken from the heart of a solid brick also showed the same animalculæ, but in smaller numbers. The magnifying power of the instrument was three hundred diameters. Every decaying brick showed the same kind of population, but the harder the brick the fewer were noticed.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JANUARY 10, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE proceedings of the annual meeting of the Stationers' Board of Trade are given in another column. The organization seems to be prosperous, and we presume that it intends to keep prospering by re-electing its energetic president.

SOME people assert that Congress will not pass a bankrupt law. Whether this confidence is founded upon intimate acquaintance with the opinions of our legislators, or that the wish is father to the thought, we don't know; but it ought to inspire those who really favor such an enactment with zeal to urge its passage in season and out of season. No time should be lost in pushing the work. If any preparation is needed it should not be deferred, although we hope that full preparation for effective work has been made ere this. General public interests demand the law; private and special interests reject it. Which shall prevail?

A READER of THE STATIONER takes occasion to present one side of the "dating bills ahead" question from a buyer's point of view, and we think that his comment deserves consideration. He complains of the readiness and even anxiety of salesmen to offer exceptional terms, if only they can dispose of goods. It is obvious that no salesman will offer to date bills ahead unless he has the sanction of the house which he represents, and it therefore follows that the fault rests not so much with the person who is trying to effect a sale as it does with his principals, who send him out to sell goods upon the general understanding that he is to dispose of his wares upon the best terms for them, but if he can't sell to the best advantage, to sell anyhow. If such temptations were not offered to buyers, they would be less likely to expect, much less to demand, specific favors not sanctioned by sound business principles. We cannot really consider the drummers, as a class, at fault in this, inasmuch as they follow out a plan of action dictated or authorized, for the most part by their employers. But the commercial traveler is certainly to blame for urging purchases when he has the evidence before him that the market is surfeited with unsold stocks, and he is still more to blame for taking up with any class of customers who may be induced to give him an order and undersell the legitimate trade. There is a *raison d'être* for the drummer, and we think that our correspondent on reflection will see where his usefulness begins. The traveler, on the other hand, ought to be able to determine at what point he ought to stop, and how far he should go in the effort to press his wares upon buyers. Much is done that would be and had better be left undone were it not for the spurring of the house, which not being on the ground, and failing to repose that confidence in the conscientious effort of its salesman which ought to obtain if employer and the employed are mutually honest, does not make proper allowance for circum-

stances. The salesman feels that he is obliged to retain his position at all hazards, and the house pushes its competition at all odds, and the result is the system of loose credits and unwise expansion of trade, which results in loss and reaction. These considerations and the suggestions of our correspondent should command the attention of the trade, and we leave it to the gentlemen on the road themselves to declare whether their best judgment does not confirm the belief that too much is at most times expected of them, and that, were it not for the license given them and the pressure put upon them, they would oftentimes hesitate to urge a customer to buy and still less often deem it desirable to offer to "date the bill ahead just when you say."

ROUNDABOUTS.

BY THE TRADE LOUNGER.

Probably everybody has done figuring up. The question is: How does it look? It would not be amiss if the trade gave some idea of results, and let out their opinion as to the actual status of business. I have had a few, very few, interviews with members of the trade, the inquiry being chiefly directed to collections.

Delays are mentioned. Some people want new goods, and don't say anything about their bills long past due. In one instance, a man who had been dunned time and time again, and against whom the resources of the law had been unavailingly employed, came forward and did the unexpected. Paid up when his account had been given up as lost. One member of the trade said that he had not failed in any of his collections except in two or three instances, where the amounts involved were too small to be disturbing.

And yet 1883 closed with a long list of failures, evidences of things uncertain and suggestive of uncertainties to come. Are these things to continue? This is a question for the trade to answer. If they haven't had enough of it, they have the privilege of taking more of it. Debtors may say: "We have piped unto ye and ye have not danced." What are the odds, so long as you pay the piper?

Fifty-one years of business life makes a man a patriarch in trade, particularly in that line to which one has devoted the whole of that time. Although Col. Cyrus H. Loutrel completed on January 2 that period of devotion to the stationery business, you can scarcely find a more active man in the trade in this city. He sets a vigorous example to the younger men. With a large mercantile stationery and printing business to look after, he finds time to perform the duties of president of a fire insurance company, director of several other corporations, and as a leader in a veteran military organization and president of the American Institute. Yet he has not, I think, reached the allotted three score and ten years. Long may he endure!

A well-known firm manufacturing leather and plush goods as an adjunct of its otherwise extensive business, declares its intention of giving up this line. The reason assigned is that it is too much of a bother and exacts too much attention, although profitable. Perhaps it is

right. A general store business may do for the retailer, but it is often found that close attention to one specialty is the wisest course for a manufacturer. This does not always hold true, to be sure, for we have many proofs of successful effort in a combination of manufacturing specialties. The firm referred to has a good record for artistic productions. Perhaps it will reconsider its intention.

Going back to my first reflections, I want to give a neat little thing taken from a French paper. Two men carry on the following colloquy: "Business is very bad, stocks are always falling, and yet you always seem to have money. How do you do it?" "It is very simple. I never pay any of my old debts." "And the new ones?" "I let them grow old!" It's all there!

Here is a circumstance culled from the Chicago *Saturday Herald*. The inquiry at the end of it is left for the unmarried men of the trade to answer.

"They were returning home from the theatre, and had nearly reached her home, when the young man observed, 'Isn't the weather cold and raw?' She must have misunderstood him. 'Raw,' she said, hesitatingly. 'Yes, I like them raw, but,' she continued, looking sweetly in his eyes, 'don't you think they are nicer fried?' What could he do?"

ANSWERS TO CORRESPONDENTS.

C. last week inquired for the address of Taft, manufacturer of envelopes.

Ans.—In response to our request, a friend, whom we thank, informs us that it is: J. W. Taft, New England Village, Mass.

R. E. F. wants name and address of manufacturers of Tingley's rulers.

Ans.—Tingley & Co. are out of the business and were succeeded by others who have since dropped out, and although there are rulers bearing the name of Tingley & Co., New York, we don't know any firm that has a right to the name distinctively. Rulers of the same character are made by Henry Davidson, 95 Bowery, New York, and by E. M. Chapin, Pine Meadow, Conn.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

Dating Bills Ahead.

GREENVILLE, S. C., January 7, 1884.

To the Editor of *The Stationer*:

I see a good deal about "dating bills ahead" in *THE STATIONER*, but nothing on the buyer's side of the question. I never buy goods with bills dated ahead, but I have the hardest work not to do so. Drummers will come from all of the different houses and actually beg and hang on all day to sell me goods, and when I tell them that I do not need the goods they say: "We will date the bill ahead just when you say." I wish that the trade would not send out drummers. I have decided not to buy of any house that sends them out when I can help it. They hurt my trade every time. When I have all of the goods I want they go and sell or leave on sale goods in my line with anyone who will take them. Then those parties sell out at cost after a little while. They also usually work off a lot of goods upon us which

we would never buy otherwise—goods that we never sell.

I think of writing a circular letter to stationers asking them to refrain as much as possible from buying from drummers, so as to abolish this nuisance, if possible. H. J. FELTON.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, January 9, 1884.

THE MONEY MARKET.—The money market shows continued ease, with an accumulation of loanable funds. The rates for prime endorsed commercial paper and acceptances are $4\frac{1}{2}$ @ 6 per cent. On call the rates are $2\frac{1}{2}$ @ $4\frac{1}{2}$ per cent. The stock market has relapsed into a dull and depressed condition, the breaking out of a war among the local trunk lines being a new element of weakness. Railway mortgages are in fair demand as are also government bonds, with very slight fluctuations in prices. Sterling and Continental exchange is firm, and rates have advanced.

THE PAPER MARKET.—The paper market betrays a little more vitality this week, although this improvement is only in comparison with the closing weeks of last year. As the spring season approaches there will be a gradual improvement in the volume of general business, and in some of the earlier branches of the spring trade there is already said to be an increased movement. As prices are believed to be down to hard pan, it is believed that there will be less hesitancy in regard to buying than there was during the spring of last year, when prices were undergoing shrinkage, and it is argued that buyers cannot run much, if any, risk whatever in buying almost any grade of paper at present prices. Values continue to hold their own very well, and whatever change may take place will most certainly be for the better. Any great interruption to the production would bring about an advance, and there are some reports now of mills on some of the streams being unable to run on account of low water. We have heard of orders recently renewed for print papers at about the same figures made three or four months ago. The straw-board manufacturers and dealers will meet next week at Chicago, and it is probable that they will take some action looking to shortening the production and give some relief to the straw-board market, which is very weak.

THE STATIONERY MARKET.—The general condition of the trade this week shows little improvement, but a better feeling prevails and business is looking up somewhat. In staple goods a fair amount is doing, and in the staple line of toys and games there is a fair demand. In blank-books there is no perceptible change. The envelope trade is very dull, with considerable of an over-supply on the market, and manufacturers have reduced production in a large measure, many establishments being run on half time. There is no variation in the ink trade, which ceased sometime ago, dealers being unable to fill orders in consequence of cold weather. The large number of orders, however, that have accumulated show that the demand is good. The trade in both steel and gold pens is quite fair, with a more favorable showing for the latter.

PIN TAG.

In an improved pin tag, the fastener consists of a single piece of wire bent to form lips by folding the wire upon itself and bending over the folded ends. After being folded and bent to form the lips, the ends of the wire are then inclined a short distance inwardly toward each other and away from the body of the wire, then bent at right angles, or nearly so, and carried under the body of the wire, so as to project from the same about the same distance that the bend is from the said body, and then bent at right angles, or nearly so, to form the points, which are to be sharpened for penetrating the goods to which the card is to be attached. The card, when inserted between the body of the wire and the lips, and the latter bent down on the same, will be firmly held. By this construction of the fastener the face of the card is left almost entirely unobstructed, and the necessity of pasting a sheet of paper over the face of the card is avoided, which is a great advantage, especially when the tag is used on garments or goods which may require pressing, as the pressing may be done without removing the tag and without danger of disturbing the price-mark. By this construction, also, it will be seen that by passing the ends of the wire under the body of the same the bends will project about an equal distance on each side of the body of the wire, thereby giving a firm support to the back of the card and avoiding all liability of bending while being written upon. It also permits of its being held more firmly to the material or goods to which it is attached, and avoids all liability of loosening the grip of the lips upon the card, either by any strain upon either of the ends of the wire after the card has been attached to the goods or in attaching the same.

THE WHISTLING TREE.

In Nubia and the Soudan grows a species of acacia is described as existing, whose scientific appellation, as well as its popular name, is derived from a peculiar sound emitted by the branches when swayed by the wind. The Arabic name is the "soffa," or pipe, and the specific name of *fistula*, also meaning a pipe, has been given to it for the same reason which prompted the natives to give it its local designation. The tree is infested with insects, whose eggs are deposited in the young shoots and extremities of the branches. A sort of gall-like excrescence about an inch in diameter is produced at the base of these shoots, and when the larva has emerged from this nidus, it leaves a small circular hole, the action of the wind in which causes it to produce a whistling sound like that produced by a flute or by blowing any hollow pipe. When the wind is violent, the noise caused by thousands of these natural flutes in a grove of acacias is most remarkable. The description given by Dr. Schweinfurth of these bladder-like galls leaves it uncertain whether they are true gall-nuts or whether they are the secretion of a species of lac insects. The valuable Indian lac insect thrives on two or three species of acacia, while one variety (the *A. Arabica*) also produces a pod or gall-nut, which is useful for tanning. In either case, these natural "whistles" of the whistling tree would form a valuable article of commerce if they could be easily and regularly collected and exported.

There is nothing useless to men of sense; clever people turn everything to account.—*Fontaine.*

OBITUARY.

EDWARD H. HALL.

The death of Edward H. Hall, at the early age of fifty-five, removes from the ranks of the book trade one of its most active members. Beginning his business career as a boy with the firm of Phillips, Sampson & Co., for more than thirty years Mr. Hall has been identified with a profession which has always found in him an indefatigable worker and one of its most zealous supporters. His gentlemanly bearing and modest demeanor, with an untiring devotedness to their wants, won for him hosts of friends among the trade throughout New England, by whom he will be greatly missed. Mr. Hall leaves a widow and one son. Mr. Hall, as a member of the firms of Whittemore, Niles & Hall, Nichols & Hall, and Hall & Whiting, will be remembered by the trade everywhere.—*Publishers' Weekly.*

NEWTON S. OTIS.

Newton S. Otis was born in Syracuse, N. Y., on March 19, 1838. It was his intention to study for a profession, and he entered Andover College, Mass. His close application to study was too great a strain upon his physical strength, and he was compelled to discontinue without completing his course. This turned his attention to mercantile pursuits. Returning to his father's store in Aurora, Ill., he learned the hardware business.

In April, 1860, he married Miss Hanson, and at the close of the war he went to Memphis, Tenn., as an agent for the St. Louis Mutual Life Insurance Company, and transacted a large and successful business in the States of Mississippi, Arkansas and Tennessee.

He sold out his business in that company, and organized in 1870 the Memphis Ice Manufacturing Company, filling the position of vice-president and superintendent. This organization failed, causing him financial embarrassment.

In 1871 he removed to Chicago and became the agent for the Aurora Silver Plate Manufacturing Company.

In 1875 he came to New York and began business with W. S. Gray, under the style of the

Acme Letter File Manufacturing Company, continuing until December, 1878, when he withdrew to accept the position of manager and principal traveling agent for the Acme Stationery and Paper Company, which position he filled at the time of his death.

Mr. Otis was a scholar of rare attainments and of late years contributed some literary articles and poetry for publication. He leaves a widow and five children. He was an affectionate husband, kind father and a sincere friend. He was a member of St. Mary's Episcopal Church, in Brooklyn, where he resided during the past four years.

Mr. Otis' death occurred on January 1, 1884, at 4 o'clock P. M., at his residence, 211 Grand avenue, Brooklyn, N. Y.

SOME NOTABLE FANS.

Following is a description of some of the fans shown at the loan exhibition in aid of the Bartholdi Statue Fund, as reported in *Art Amateur*:

The fans belonging to Mrs. J. J. Astor are the first to strike the eye, in both catalogue and gallery. The prize fan of the London Exhibition in 1878 is a rare and fine specimen of the famous old "verniss Martin," which time has not robbed of its soft lustre. This class of fans originated with a French carriage-maker of the eighteenth century, who invented for the decoration of court fans of the period a varnish successfully emulating the brilliant lacquers of China, then much in vogue in France. The mounts are of paper, silk, or vellum, exquisitely painted, and the sticks in ivory, overspread with hard and enduring varnish, presenting a surface of great brilliancy. Mrs. Astor shows in "The Toilet of Venus" another good example of "verniss Martin." Her best fan on exhibition, however, is the Louis XV. specimen.

A charming modern fan of Mrs. Astor's is that painted by Dr. de Beaumont, representing a champetre group of youths and maidens upon a crag overhanging a bit of summer sea. The "verniss Martin" fan of Mme. de Vaugrigneuse is a good specimen of its class. Mrs. Pierpont Morgan's vellum fan is a dainty representation of Watteau subjects in soft colors. Mrs. Pinchot's old Dutch fan is very interesting, and so also is the Japanese fan of ivory and lacquer supplied by Mrs. W. K. Vanderbilt. Marvelously fine, like frost-work, are the old ivory and bone carvings, to which the ladies of the committee have given a separate case. Chief among these is a regal fan of transparent shell, with enameled garlands. This is one of the most interesting exhibits of the collection; according to the tradition handed down to its present owner, it was "bartered for a kiss" long years ago, having come originally from the imperial family of Russia. Miss Hayward's ivory fan-screen and the semi circle of carved ivory bearing the Cruger coat-of-arms, are unusually good. Miss Furniss' fans are very interesting, particularly the old Spanish specimens. One of these represents an outdoor scene of rural life painted upon paper, and another is a graceful picture of the loves of Venus and Adonis. An old Italian fan contributed by Miss Worth has a mount of coffee-tinted thread lace upon sticks of ivory, carved in relief, painted in natural colors, and then varnished. A Louis XV. fan of Mrs. Seligman's has depicted upon it a scene from harem life, and is decorated with gilt and silver medallions upon kid. Of the fans with historical associations, the most conspicuous is that belonging to Miss Furniss, painted in Spain in commemoration of the

signing of the Treaty of Utrecht, with the inscription, "Por el amor de la Paz." General Genet's fan, depicting a volcano in eruption, was originally given by Napoleon to Josephine, then by the Empress to Mme. Campan.

A Watteau-style fan of white silk with spangled scroll-work and gold fringe, lent by Mrs. Woolsey, was once the property of her great-great-grandmother, the wife of a governor of Jamaica. Mrs. Ryland has a beautiful Regency fan with a scriptural subject printed upon the mount, the sticks decorated with Chinese enamel faces in cartouches. Mr. Joseph exhibits a fine Louis XV. fan with mythological subject lent by Miss Alice de Rothschild, of London, and also a fan painted by the well-known English amateur, the Hon. Hugh Rowley. The decoration on the first-mentioned object is very rich, differently colored golds being used on the pearl with excellent effect.

The modern fans are very beautiful and varied. Some of the sticks are set with turquoises in silver, others with roccoco garnets and emeralds in mother-of-pearl. Mrs. Del Monte's, by the younger Detaille, is a spirited picture of "horses taking the fence at Jerome Park." Mrs. Woolsey's, signed by the Spanish painter Borra, minutely depicts a christening scene before a Spanish alcalde. Another of this lady's exhibit shows a charming skating scene in the Bois de Boulogne, painted by Lafitte. Mrs. Gouverneur Morris, Jr., sends a lovely painting on crepe lisse, edged with point d'Alençon, and mounted on sticks of mother-of-pearl. Perhaps the finest modern fan of the collection is that painted by Louis Leloir; it is valued at \$2,000, and is contributed by Mrs. Schuyler Van Rensselaer.

The annual meeting of the Newsdealers and Stationers' Union of New England was held at Boston on Tuesday. The reports of the various officers and committees were read and acted upon. Plans for the further prosecution of the work of the union were discussed. The following-named directors were elected for the ensuing year: President, Thomas Marsh; vice-president, James F. Hunt; secretary, Charles W. Drake; assistant secretary, Joseph P. Willis; treasurer, J. H. Henan; P. N. Sprague, W. A. Dunn, J. J. Daly and Joseph Osgood.

Samuel D. Tilden, the Hartford map publisher, has been caught by New York bunko men with the venerable picture dodge. The "steerer" who piloted Mr. Tilden to the art gallery and interested him in drawing for a prize represented himself to be J. R. Morris, the son of the president of the Charter Oak Bank of Hartford. Mr. Tilden did not realize the situation until he had given his check for \$2,800, when he at once telegraphed to his bankers to stop payment on the check. He afterward told his story to Inspector Byrnes, whose detectives arrested Charles Garcia, alias "Keester Bob," and Robert Martin, alias "Spanish Dick," two well known swindlers and confidence men. Mr. Tilden fully identified them both, the former as "Mr. Morris" and the latter as the person who had afterward assisted in the drawing. They were both held on a charge of larceny.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LODGATE CIRCUS BUILDINGS,
LONDON, E. C., Dec. 28, 1883.

"The year is dying! Let it die," will probably be the mental comment which most people will make upon the approaching dissolution of 1883. Of course, I mean from a business point of view; for those whose business is pleasure the past twelve months may have been all that could be desired. For the "sporting gent," the "masher" and for gilded youth generally the year may have had special claims to remembrance; but as regards the experience of the average business man, there is no disguising the fact that a dead level of monotonous mediocrity has been the characteristic of 1883.

Of course, there are exceptions to this as to every other generalization. One meets with men who have done big business, taken heavy lines at fair prices, but their cases are not common, and when met with are almost invariably among those who cater successfully for the public craving for something new, and for every one man who makes his novelty or specialty pay, a dozen could be found who have "good things" that "won't go." There have been, of course, years of disaster, when ruin fell thick and fast upon thousands, compared with which the present year of grace might be considered prosperous. To such I am not referring. They were recognized as the inevitable results of certain easily understood causes, such as rash speculation, crop failures, &c., but it is not to any such reasons that the absence of flourishing trade can be attributed in the present case. No, the downward tendency of prices, the diminution of profits, has reached a stage at which the largest business only pays a small percentage on capital, while the smaller one only just survives.

I do not pretend to see deeper than my neighbors, and so I shall not attempt to prescribe any infallible remedy for the state of things I have alluded to, but it certainly appears to me that in this country too much importance is attached to the patronage of those who, after all, are but a small proportion of the population—the upper classes—while the great consumers—the bulk of the people—are regarded with more or less contempt. So long as owing largely to political and social causes, the great majority of the people can only just live, and can certainly spare but little for the luxuries and elegancies of life, there is little prospect of any great improvement in trade. The time has gone by when England could flourish at the expense of every other country on the globe.

As an example of what I have referred to—trading without profit, or, at any rate, without adequate profit—I may cite the Christmas card trade. Here, surely, is something from which we might anticipate considerable advantages, but what are the facts? It is supposed that about a million sterling is expended every year in the production of these articles. At that rate, about three millions should be realized by the sale of them to the general public, so that in their manufacture the working classes, the publisher and the wholesale houses should be largely benefited, while in their sale the shopkeeper should reap a golden harvest. Instead of this being the case, the receipts of the working classes from this source are very small inasmuch as nearly all the work of production is done abroad, principally in Germany. The manufacturers declare that at the present low prices they hardly see an actual profit at all. The middle-man gets what "pull" there is, and the shopkeeper—cheated by the traveler who

backs his orders in June at 20 per cent. higher rates than he is ready to take from the draper in September—finds that instead of a big profit, the competition of the favored draper has left him results that, when the wear and tear, the trouble and loss of time are considered, are scarcely appreciable. The truth is, that if it were not for the sake of preventing their competitors having it all their own way, and extending their aggressions further, the stationer might as well give up the sale of Christmas cards altogether.

There is little to chronicle in the way of new things; stock-taking and posting up are the order of the day. Of course, this week no one expected to do business. Next week the spring and summer goods will be showing, and I hear that several absolutely new papers are being made. What they may be like, I, of course,

cannot prophesy, but hope that they will be better adapted to the purpose for which they are intended—namely, writing on—than some of the materials now in the market. Many of these might be extremely serviceable as wall-papers, but can scarcely be pronounced suitable for the purpose of correspondence.

Fewer firms are going in for valentines this year than heretofore. I suppose these hard times Cupid is at a discount—at any rate a once profitable trade seems verging on extinction. However, as long as the observance of February 14 does last, ample justice will be done to it by the enterprising art publishers who are this year again to the fore, S. Hildesheimer & Co., Raphael Tuck & Sons and others.

After the lugubrious jeremiad to which I have treated the readers of THE AMERICAN STATIONER, I cannot do less than wish them a happy and prosperous new year. W. F. C.

ENVELOPE BOX.

This invention relates to improvements in envelope or other boxes used for holding and displaying their contents, the object being to provide in such boxes means for holding the contents of a partially-filled box in the same position and order that they occupy when the box is full, to the end that the removal of one or of several packages of envelopes from a box, or other similar objects therefrom, shall not leave those remaining therein in such a disordered condition as to impair their appearance.

The improvement consists in a movable abutment, fitted between the sides of the box, and capable of being moved up against the remaining contents of the box as fast as a part of them are removed, thereby holding the remaining contents in proper position. To this end the abutment is so formed and connected to the box that when the latter is filled the abutment can be moved close against one end of the box, and from that position be moved against the packages as fast as any are removed.

The abutment is made with angular end pieces bent around from the ends of the abutment, so as to form braces for the latter when it is moved against the packages. End pieces, extending from the lower ends of the end pieces, are bent at right angles to the latter toward the centre of the abutment. Suitable guideways for supporting the abutment and which permit the latter to be moved to and fro between the sides of the box, are secured to the ends of the latter. These guideways consist of two strips, having turned-up ends. These strips, after they are placed between the bottom edge of the abutment, and the ends are secured in the box and near each side of it by having the outer face of the turned-up ends connected or otherwise suitably secured to the ends of the box. Thus the way is clear from end to end between the strips and the bottom of the box, to permit the abutment to be moved to any desirable position. The abutment is substantially of the form of one of the box ends. If it should appear desirable, the means for securing the abutment within the box and providing guideways for it may be modified in construction by a strip of such a width as the distance may be between the faces of the braces of the abutment, and having its ends secured to the box substantially in the manner described relative to the strips; or it may be cemented through its centre to the box-bottom, leaving its edges unattached. This change would substitute one strip for the two narrow ones.

In practice, for envelope and similar boxes, the abutment and the strips are made of the same material as the box—that is to say, properly stiff pasteboard; but any suitable material may be used for those parts, according to the class of boxes to which they are to be applied.

Wilson Brothers Company will introduce several new styles in baby carriages this year. The carriages controlled by this firm are claimed to be better in every respect to others in the market, in style, finish, material and construction, being manufactured by a firm which makes a specialty of carriage manufacture. The goods are all perfect when they come into the market, which is not always the case with the products of other manufacturers. Wilson Brothers Company will also carry, as usual, a very large and full line of croquet and lawn-tennis sets, as well as a great variety of games this season.

Variety of mere nothings gives more pleasure than uniformity of something.—*Richter.*

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

TRADE NOTES.

Phil. Hake is very busily engaged in the production of Easter and Valentine cards, a full line of which will be ready for the trade about the 15th of the present month. It will embrace many novel and attractive designs.

The Silicate Book-Slate Company has recently issued a very beautiful business card. It is printed in bright colors, and shows a school-room full of small children, who are learning to use the silicate book-slate. The design is very pretty and picturesque and well executed.

Charles J. Cohen, Philadelphia, has everything in his establishment in readiness for the spring trade. New goods are in store in all of the leading staples, and attention is asked to the advertisement of the house which appears in another column of this issue.

R. R. Watson announces himself now ready to meet all demands of the trade for his late novelty, the coin and letter scale (previously noticed in THE STATIONER). This scale is claimed to be the most correct in the market and a safeguard against counterfeit and light coins. It is very elegantly and finely made and deserves a wide popularity.

The National Publishing Company, Philadelphia, expresses the desire to tender its thanks to the trade for the very liberal patronage extended to it during the past year. Its sales have been very large, and it was necessary to run its factory night and day for several months to meet the demand on it. The evident satisfaction with which its Bibles have been received is very encouraging. It is preparing some new and beautiful designs for the coming year.

E. B. Stimpson has lately improved his perforating machine by an arrangement which brings the punches in view, thus enabling the operator to adjust the work more easily and accurately than under the old arrangement, by which the punches and stripper blade were hidden from sight, making accurate adjustment of the punches very difficult. The uprights in the new machine are also in the inside of the bearings, which greatly strengthens the machine and makes the perforations more true and uniform. Besides these and other improvements the machine has been very much improved in appearance.

John Gibson will this spring have one of the finest lines of Easter cards and novelties on the market. This house has made for itself a wide and enviable reputation for its excellent fringed cards and fine quaint novelties. The latter will this season consist of about thirty pieces, made up in satin, and card specialties in banneret and easel form. It is sole agent for Julius Bien & Co.'s new line of fine art gift cards. These goods are receiving high praise wherever they are shown, and a large trade is anticipated in them. Any of the numbers published for this season can be furnished with birthday or Easter mottoes. This house also shows new steel-plate designs in notes, drafts and receipts, with new border and vignettes. The line of Sunday and day-school reward cards has been increased by a showy line of new large cards. An oblong satin card has a cushioned centre, with the figure of a dog holding in his mouth a basket of flowers. The figure is inclosed by a circular outline, surrounded by a wreath of flowers. Another card is of a square shape, with a beautiful floral design. This card has an easel back, and is altogether very elegant and tastefully made. Mr. Gibson's entire line is novel and attractive and will certainly take well with the

trade. The firm will be represented on the road this year by John Aikenhead, R. L. Thomas and Eugene A. Porter.

The Richmond *Mercantile and Manufacturing Journal*, Richmond, Va., has just entered on its second volume. Its editor and publisher is Richard E. Frayser, who has demonstrated his ability to produce a good trade journal. Judging from the large advertising patronage of the *Journal* it is well supported.

Dealers in microscopes and microscopic slides and materials report a rapid increase in the sales for the past few years. The preparation of slides by amateurs has led to a large mail business in exchanging, and a demand has grown for some safe, cheap and convenient protection. Milton Bradley & Co., of Springfield, Mass., have invented and offer for sale a very perfect mailing-case, which is in sections so arranged that one or more slides may be readily and safely packed for mailing, at an expense of less than one cent per slide. The same firm also makes a new box and cabinet for preserving slides, which meets with much favor because of its convenience, elegance and cheapness.

The Richmond (Va.) *Dispatch* says: "On New Year's morning, as A. S. Bacon, superintendent of the Richmond Paper Manufacturing Company, entered the manufactory he was surprised to see about fifty of the operatives assembled. As he advanced toward them he was met by G. C. Anderson, the millwright, who has been with the company since 1872. Mr. Anderson is an old Confederate soldier, and stands over six feet in his stockings. Mr. Bacon thought it looked like a strike. Mr. Anderson assured him it was only a caning he intended to give him. This is the way he did it: 'My Honorable Friend Bacon—As it was through you that all of the employees of this company received a substantial Christmas gift, I have the honor of presenting to you, in the name of the

employees of the Richmond Paper Manufacturing Company, a New Year's gift. I hope you will receive it as a free gift, for I assure you every cent was given cheerfully. This contribution consists partly of the widow's mite; though it was but a few cents, I know you will appreciate it as much as you would so many dollars from some in the higher walks of life. It is a token of our best regards, and the appreciation of your kindness in the past. We do not present it in the shape of a cane because we think you are so feeble as to require a supporting staff. No; far from it—for we hope to see you walk for many years with that elastic step so familiar to us all. And when old age fixes his final grip on your feeble frame may it then serve as a supporting staff to steady your tottering steps. I now present it with the wish that you may never have to use it as a chastening-rod for our shortcomings as employees." Mr. Bacon made brief reply, feelingly acknowledging the compliment.

The many styles of office, library and other calendars brought out by M. J. Anderson have been in great demand for the new year, their great popularity being due to their novelty and attractiveness, points which have been features of Mr. Anderson's calendars for many seasons.

Ackerman, envelope manufacturer, will, in the course of a few weeks, place on the market his new loop envelope of which he will be the exclusive manufacturer. This envelope combines many of the points of excellence of envelopes now in the market and will probably command a large trade.

JAPANESE FAN-PAINTING.

The fan-painters of Japan are an especial separate guild, as distinct from artists in other branches as with us the scene-painter is from the portrait-painter. The unknowing Englishman looking at a Japanese fan sees nothing in it but upon one side a grotesque representation of the "penny plain and twopence colored" order, and upon the other a few crude splashes of ink. But to the citizens of Tokio or Osaka each fan carries a special signification—a story, or part of a story: an allusion, a satire, or a suggestive idea. To a certain degree the fan is to the Japanese citizen what *Punch* or the window of the Stereoscopic Company is to the Londoner. If a political event of some importance takes place, it is sure to be followed by a flood of new fans upon the market, and the Japanese, who have the keenest sense of humor and ridicule, find that to libel or to criticise, or caricature by means of a fan, is safer and cheaper than by means of the press. When Japan was first thrown open to a certain extent to foreigners, and even for some time after, until the natives grew accustomed to their new guests, it was difficult to take up a fan without being confronted by some hideous caricature of western personal appearance, manners and customs. But now that every town-bred native tries to look as much as possible like a European, and that the common crowd have become familiar with cigars and breeches, the fountain-head of fan ridicule is the powers that be. Fan libel is a cheaper and safer mode of procedure than pen libel, because the public censors are thoroughly acquainted with the editors and proprietors of the few public journals, while the number of fan artists and merchants is legion. Not always does the reverse side—the plainer side—of the Japanese fan bear a well known allusion. Sometimes it is a simple caricature, and an examination of one of these caricatures reveals that, however crude and sketchy the execution, the most genuine vein of humor lies beneath it, especially if it be what is deemed the forte of Japanese caricaturists—the delineation of grotesque animals. Sometimes we get a bit of landscape, the inevitable Fuji yema, or a tea-house by a torrent, or a country side represented by a few apparently random dashes, of which each, however, tells its tale—or we get one of those weird moonlight effects of which the Japanese are so fond. The great characteristic of all these is truth to nature. The rabbits nibbling at a bale of rice may have clothes on, but they are rabbits for all that; foxes especially are delineated in all conceivable attitudes and costumes, but they are perfect foxes; so with wild birds, frogs, monkeys, fish and storks.

The gaudy side of the Japanese fan is invariably a serious piece of work, and the scenes depicted are generally either bits from a popular drama or from one of those countless legends and stories which have delighted Japanese of all classes and ages from time immemorial, and in many cases bear so strong a family likeness to the stories familiar to English childhood. The popular actor in Japan shares with the popular wrestler the privilege of basking in the sunshine of the best circles of society; he has always been very much what the English popular actor promises to become—the darling of the masses and the favorite of the Court. Consequently his "portrait" appears on the fans, and although to us the faces on Japanese fans appear as like one another as are the faces of Sir Peter Lely's beauties in Hampton Court Palace, the Japanese citizen pretends to discover a likeness by the accessories. So there are certain plays in which

these actors take chief parts, and of which Tokio audiences never weary; and, as a rule, the painted side of the fan represents a scene from one of these plays—perhaps Karukaya, the self-exiled prince, with his child clinging to him, or a scene from the famous play of the "Forty-Seven Ronins," or an incident from the touching history of Gompachi and Komurasaki, or the Prince of Sendai lamenting his lost love on the shores of Takasago bay. The legends and stories are plentifully drawn upon by the Japanese fan artists, and every child knows at once when he sees Inari, the fox god, or Hatchiman, the war god, or Ieyas, the warrior priest, or Benten, the goddess of the sea, or any other hero or heroine of popu-

lar mythology, just as an English child knows "Blue Beard" or "Cinderella." All classes appreciate the artistic value of the fan in Japan. The great lord at the council, the merchant over his counting board, the priest presiding at the money coffer, the tea-house girl calling out to passers-by to "rest their honorable limbs," the pilgrim toiling up the holy mountain, the coolie resting on the pole—all see in it something to amuse or something to interest. As the fan accompanies the Japanese at all hours and under all circumstances, it is not surprising that it plays something more than the part of a machine for wafting cool air. To the illiterate man it is a book; to the oppressed man it is a reviver; to the political student it is a suggester; to the child it is a story-teller.—*London Globe.*

S. S. MERRILL, General Manager

J. T. CLARK, General Superintendent

AN OLD NEWSPAPER PRINTING OFFICE.

Not a few literary associations are connected with Crane court, Fleet street. Here lived Dryden Leach, the printer, who in 1763, was arrested on a general warrant upon suspicion of having printed Wilkes's *North Briton*, No. 45. Leach was taken out of his bed in the night, his papers were seized, and even his journeymen and servants were apprehended. He recovered, however, ultimately £300 damages in connection with his imprisonment. At No. 6, in the same court, was carried on the second circulating library established in London, and a catalogue of the books in stock was issued in 1745, from which it appears that the subscription was one shilling a quarter. Thomas Bensley, the famous printer, carried on business in his later years, at No. 9. Another building in the same court, with the appearance of which many of our readers are probably familiar, is figured on one of our advertisement pages. It was in this house, No. 12, Crane court, that Joseph Bruton, in conjunction with the late John Tallis, of *Illustrated London News* fame, originated what developed into an extensive newspaper printing business. Mr. Tallis' connection with it was very brief, but Mr. Bruton continued it with spirit and energy for a number of years. In 1861 Mr. Bruton started his partly-printed newspaper sheets and type high stereotyping, by which many printers and stationers in provincial towns and watering places and in suburban London were enabled to set up and establish newspapers where otherwise it would have been a practical impossibility. A list of some of Mr. Bruton's customers of twenty years ago may not be without interest to the student of literary history of the nineteenth century. But, beyond supplying these country and suburban customers, the Messrs. Bruton did a large business in printing metropolitan journals, entirely composing and printing several, including that of the old *Atlas* newspaper, with its special editions "for India and the East," a paper with which so many eminent names in journalism have been connected; Edward's *Oriental Mail* and *Oriental Circular*, Street's *New Zealand Examiner*, *River Plate Mail* and other Anglo-Colonial papers; Le Grand's *Paris Times*, for which H. B. Farnie wrote some of his most charming compositions, and the *Boulogne Express*; Marshall's *Brussels Express* and *La Situation*, the latter was a daily paper; the *Cosmopolitan*, Colonel David Seaton Richardson's *Court Circular*, the *British Ensign*, the *Independent* and other organs of the leading Nonconformist body, and the long numbers of the *Christian World* (100,000 weekly) were machined in Messrs. Bruton's office, as was *Herapath's Railway Journal*, Faulkner's *News*, an insurance journal now dead, and *John Bull*. The *Church Times* of Mr. Palmer first saw the light at 12 Crane court, as did also the *Church Standard*, an Evangelical Church of England paper, which may have jostled at times with the Free Thought *National Reformer*, the *Illustrated Sporting and Theatrical Guide*, the *Tissue*, *Sporting Opinion*, and the industrial *Beehive* of George Potter were all printed here. The *Penny Mechanic* was a venture of Mr. Bruton's own, and it reached the respectable circulation of about 40,000 weekly, and was continued for some few years. A complete list, however, of the metropolitan and other journals that emanated from this house could only be gathered from the books of the firm; suffice it to say that the literary history that attaches to so many prints is far-reaching and of considerable interest.—*Printing Times and Lithographer*.

A Revolution in Stylographic Pens. {
The Latest Improvement.**THE KERNER.**

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with Iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. ✍ Send for Circulars.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

BOSTON BITS OF NEWS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE OF THE LOCKWOOD PRESS,
49 Federal Street,
Boston, January 16, 1884.

A tour among the stationers found the fraternity in good cheer this week, for the signs of the times are indicative of an increasing trade. In staple lines of stationery there seems to be considerable activity for so early in the year. The demands for blank-books still hold good, and the numerous manufacturers are filled with orders. Inks, pens and pencils are reported as having very good sale. In fancy articles many novelties for the Easter season are being presented, some of which are very artistic in their design and general make-up. Among the card dealers valentines are receiving much attention, and jobbers are already filling orders. Love is very æsthetic this season, and the tender murmurings of the heart are done up in satin and silk to suit the "forty love-sick maidens." Art has joined hands with Cupid, and between them they have worked up a formidable array of agonizing darts.

The sample room of Ward & Gay presents an alarming scene to a timid man, stocked up as it is with hundreds of samples of Cupid's favors; some in satin and some in silk, some fringed and some puffed, and all bearing sentiments that cannot fail to crush. Save me—from being "mashed!"

What a busy scene is always presented at the aristocratic rooms of H. H. Carter's Beacon-street store! Somehow there is a good deal of trade that goes that way, and the genial proprietor is ever presenting such bargains to the trade. His sale of Christmas cards was unusually large, and now for Easter and Valentine a stock of 100,000 cards is offered to the trade at the low price of a cent and two cents apiece. Fancy fringed at \$5 per hundred. Just think of such prices for such cards as are turned out by Marcus Ward & Co., Prang, Hildesheimer and Faulkner. But it is just this kind of business that makes trade so lively on Beacon street. Retail dealers, when they hear of such bargains, generally look into the matter a little and sometimes they find it money made.

Geo. F. King & Merrill are at their old tricks again—over-working themselves. But they claim to be able to stand a good deal of work in the cause of trade. In staple goods they are busy; their blank-book trade has never been better, while the run on King's pens and pencils

is continually increasing. Hardly a State or Territory in the Union is there from which orders are not received for these pens and pencils. There is nothing like a first-class article, even in the pen and pencil line. "King" George knows it and the rest of mankind must soon find it out if they will but use the King pen and pencils.

D. B. Fletcher & Co. are doing a very fair business in a quiet kind of a way, and, no doubt, their little cramped room on Devonshire street will, ere long, take on larger proportions. I remarked to D. B. that there was not room to swing a cat—that is, with safety to the cat. Whereupon Mr. Fletcher replied that he hadn't time to swing cats, but that he could swing a number of orders during a day, and that's what he was doing. This firm is also manufacturing manifold letter copying books, and fills numerous orders for the local trade. This style of letter books is becoming very generally used, especially by commercial travelers, and their sales are growing larger.

Among the many calendars presented this year, that published by the Heath Letter-File and Index Company is very ingenious. It is styled "The Forever Calendar." Upon a revolving disk is printed a series of years and numbers, and these are so arranged that by a proper adjustment of the card, the day of the week of any month, in any year, is given. For commercial uses this calendar is very valuable. Elroy N. Heath, the designer of this device, has applied for a patent. A. L. D.

WILMINGTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., January 15, 1884.

I desire to express in my initial letter my pleasure in that the stationers of Wilmington are allotted space in your valuable journal.

As a constant reader of THE STATIONER, it has always been a subject of much surprise to me, why they have not been regularly represented heretofore.

As a city of 50,000 population, and the centre of so much well directed and valuable industry, it surely merits recognition by the leading trade journals of the land. Yet I do not intend to reflect, but on the contrary, appreciate your acknowledgment of our claims. It shall be the aim of your correspondent to gather items that will prove of interest to your readers and contribute to the deserved success of THE STATIONER.

Perhaps, at the outset of my task, a brief refer-

ence to the "holiday season," just closed, would not be out of place.

All of the dealers, as I learn, anticipating a busy season, entered into the work with zest, and most of them say that their sales exceeded those of any previous years. After a careful review of the field, there is, with only few exceptions, a feeling of satisfaction and encouragement at the results.

When we take into consideration the unfavorable weather which prevailed here on Christmas eve and morning, such reports are very gratifying.

With the Christmas card trade there seems to be general satisfaction. Fearing a decrease this year in the demand for these, most dealers bought very conservatively, but, contrary to expectations, the demand was far beyond the most sanguine, and few were left with which to swell the stock account. The demand for fine cards was surprising, and some of the stores were "cleaned out" of them at an early date. It was difficult to decide whose line deserved the most praise. Apropos of cards, I am reminded that already the trade have been shown some lovely designs for the Easter trade. One of the leading importers promises some exquisite designs for Easter, on which special attention has been paid to appropriateness. This feature is too often lost sight of.

Before my next letter reaches you the Valentine season will be here and gone. Judging from what I have seen and heard, the lads and lasses will secure something very handsome in this line.

During the past week trade was dull. This, in a measure, is due to the extremely cold and stormy weather which prevailed. We had rain, snow and sleet, with the mercury nearly down to zero.

The demand for staple goods has been fair, and I believe equals that for a corresponding date of last year. Orders for printing are coming in at a rate which promises to bring encouraging reports for the month. On the whole, I am sure that the outlook for a good trade is favorable.

Glancing over the last number of THE STATIONER, my eye caught an advertisement, which recalled an invention of merit lately produced by a Wilmington gentleman. The article referred to is a device for securing the contents of a book-case. As it is not yet on sale, I am unable to give you any information regarding its manipulations, but in my next will give you all the points of interest connected with it.

Among new firms is that of Boughman & Co. This firm entered the field in December last as a competitor for the stationery and blank-book

trade of our city; it occupies the ground floor of 404 Market street, and has a neatly arranged store with a well selected stock of articles usually found in a first-class stationery house. Mr. Boughman is widely known as a former partner of the old house of Boughman & Thomas, now C. F. Thomas & Co., but of late years commercial travelers will remember him as the genial clerk who greeted them at the desk of the Clayton House. His former experience in the old firm will prove invaluable in the new enterprise.

Among the commercial men who have "beamed" on the trade during the past week were, E. P. Whitney, of Charles Moritz, Philadelphia; William G. Walker, of Forbes Company, Boston and Mr. Wiessenborne, of American Lead Pencil Company, New York.

The only business change to record is that of N. C. Gibbons, who has disposed of his stock and fixtures to George A. Davis. TRACY.

SAVANNAH GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

SAVANNAH, Ga., January 14, 1884.

The principal printing offices are doing a very fair business, and the prospect is good for an excellent trade during the coming months.

The *Morning News* steam-printing house is putting in another large steam lithographic press. This branch of its business is rapidly increasing.

There is a fine opening in Savannah for a wide-awake bookstore. Those now in the business devote their energies to toys or pictures, making books a secondary consideration. A live man would do well in this line.

W. G. Patten, printer, has made an assignment.

The City Council of Savannah in its tax budget for 1884 fixed a tax on drummers of from \$50 to \$200, according to their business. The *Morning News* has attacked the measure and advocated "no tax on drummers;" the prospect is that the tax will be abolished or reduced to a nominal sum.

The mammoth hotel project is still in the hands of the committees on subscriptions. Three hundred thousand dollars is the amount wanted. H.

DAYTON DASHES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, January 14, 1884.

Times are dull, and no mistake. I am not prepared to say that they are duller than one year ago at this time, but, compared with the Christmas rush, the comparison is not very cheerful.

Travelers have not been very numerous as yet, but advance notices give promise that they are on the way.

Mr. Livingston, of Weill, Livingston & Co., was here over Christmas, and reported his orders as very satisfactory, and that reports from his house showed a good trade at home.

Among our local dealers there is not much new to report; they are not busy, but all seem to be in good spirits. Jas. F. Crane, the senior member of Crane, Jackson & Crane, is in New York, but is expected home every day now.

L. D. Reynolds is agitating the question of starting a new establishment in Kansas City, Mo., to make his specialties. He will also increase his facilities here, should he make the expected change.

The Rev. W. H. Lanthurn, for many years in charge of the retail business of the United Brethren book-store, died on Saturday after a long illness, of consumption. He was a gentle-

man well liked by the trade, and his place will be difficult to fill.

M. M. Benson, for many years with R. A. Rogers & Co., has just returned from New York, where he combined pleasure with business. He bought about all of the new things that he saw.

R. A. Rogers & Co. made a new departure in Christmas cards, by having a large number of satin mats hand-painted by first-class artists. They retailed the week before Christmas 500 of them; and the only reason they did not sell more was that they could not get them painted. They are now getting Easter cards out in the same styles.

Long continued snows have helped largely to protect vegetation, and unless we have severe weather the prospects are good for all kinds of grain next season.

Such a consummation would help trade all over the country, and gladden the hearts of the honest farmers in the MIAMI VALLEY.

LOUISVILLE LOITERINGS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., January 14, 1884.

Trade at this writing is quiet and spiritless, more attention being given to inventories, balance sheets, collections and liquidation of old matters than to the creation of new business. Preparations for the spring season will be made just as soon as the result of fall operations is determined. The Louisville tradesman is eminently conservative in everything; there is nothing rash about him; he is always so cautious and careful that he is often accused of lacking energy and enterprise and in the leading markets you will be told that he is more apt to rust out than to wear out. But while the temper of the average business man here is conservative it is not so to a degree that entitles him to be classed as an old fogey, as some would have it. The progressive element predominates here and Louisville is not only fully maintaining but advancing her relative position among the prominent cities of the country. Ten years ago Louisville could not or would not support a board of trade. To-day we have a vigorous and influential board numbering eight hundred members and the interest manifested in the organization is indicated by the fact that there is just now a red-hot fight over election of twenty-five directors, three separate and distinct tickets being in nomination, besides any number of fusion lists.

Our jobbing trade is expanding steadily and manufactories are increasing in variety and extent; railroad facilities are nearly perfect and improving; we have twenty-five banks, thirty public schools and four prosperous daily newspapers.

The movement of leaf tobacco in this market in 1883 was of unprecedented proportions, the sales in the past year having reached 88,900 hogsheads, or 27,500 hogsheads in excess of the year before and a gain of 41 per cent. over the average of the preceding four years. The sales of manufactured tobaccos were about doubled. The whisky trade does not show the same prosperity, but is slowly recovering from a period of depression brought about by overproduction. The plow and implement manufactories are generally enlarging and the multitude of factories of wood and iron goods are yearly increasing their output.

The tanning industry is another solid branch of trade here, in which, though low prices are ruling, there is a steady improvement.

The paper mills are doing well and publishers,

printers, blank-book and paper-box manufactories are every season giving employment to an additional number of workmen. The growth is not rapid but regular.

The record of commercial failures in Louisville for 1883 is not appalling, on the contrary, it shows quite a healthy and satisfactory condition of affairs. In detail, the number of failures here last year was 51, distributed among the following departments of trade:

Retail dealers.....	32
Wholesale and retail dealers.....	3
Wholesale, strictly, dealers.....	2
Manufacturers, wholesale.....	8
Manufacturers, retail.....	6
Total.....	51

The average liabilities of each failing trader in Louisville last year was \$13,400; average assets to each, \$6,130. There was no failure with liabilities of over \$100,000. All of which is not a bad record for a city containing about 4,000 business concerns. And as for the book, stationery and paper trades there was not a single collapse of importance, and very few embarrassments even among the small fry. When it is remembered that the clearing-house returns show an increased business here for 1883 of nearly twenty per cent. over the previous year and consequently a proportionately increased amount of risk, together with the fact that in almost every article of commerce there has been a decline and shrinkage of value, and that in the face of all this Louisville's failure figures are reduced, it requires no boasting to establish the comparative solidity of her trading community.

There is no special news in the stationery trade. The arctic weather last week made everything as dull as a hammer; this week the temperature moderated considerably, and some little replenishing trade is doing with the jobbers, while retailers are having a quiet shopping demand. January is always a dull month.

The river is clogged with floating ice and navigation is temporarily suspended. A rapid thaw would bring a flood or overflow. BOURBON.

CINCINNATI COLATURES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, January 14, 1884.

The whole Ohio Valley at this writing is threatened with a great flood. Snows lie deep in the mountains and on every hillside and plain from the sources of the Ohio and Mississippi to the Gulf of Mexico. Warm winds and rains on the south are melting them and filling the lower rivers. That same warm "wave" has reached here and is turning the snows into water. Many of the tributaries of the Ohio are pouring into that river the ice which has covered them for ten days or two weeks past. In some of them this break-up has been attended with great destruction of property. This was notably the fact in the breaking of the ice in Elk River, West Virginia, near Charleston, last Saturday, when \$100,000 worth of property was destroyed in a few minutes. On the Ohio River, from Pittsburg to Cairo, millions of dollars' worth of property is afloat. Some of this is coal in barges, some rafts of logs and lumber, and some steamers in harbors. The coal in barges is generally in great fleets either moored opposite some elevator on shore, or shut up in some harbor where the freeze caught them when going down the river.

The many owners of this property aggregating millions of dollars in value, are very anxious now, and they will have no peace of mind on the subject until the danger is past. This prop-

(Continued on page 70.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

SUPERB VALENTINES FOR 1884.

PURE and chaste in sentiment, the combined work of our best American artistic and literary talent, our line of Valentines for 1884 cannot fail to receive the support of the most refined class of buyers.

We have been guided in their preparation by the success in former years, and by the expressed wants of the trade.

The following artists, among others, are represented:

MISS L. B. HUMPHREY,
MRS. O. E. WHITNEY,
MISS ROSINA EMMET,
MISS L. B. COMINS,
MISS ALICE W. ADAMS,

F. S. CHURCH,
HARRY BEARD,
C. Y. TURNER,
H. GIACOMELLI, of Paris.
F. SCHUYLER MATHEWS.

A varied assortment of Valentines by the above-named artists is offered in plain form, and single and double silk fringed.

ENVELOPES furnished with almost all our Valentines, without extra charge.

BACKS.—We again beg to call attention to the elegantly-designed backs, which are a special feature in our cards.

SATIN PRINTS.

Besides a number of FLORAL DESIGNS mounted in a variety of novel styles, special attention is called to our finest production in this line,

THE "LION IN LOVE" VALENTINE.

This is a rich satin print, on an elegant fancy plush mount. The design is after F. S. CHURCH'S important work of above name. The poetry is by J. V. CHENEY. The picture is of the greatest artistic merit, and, on its elegant mount, forms, what we think, one of the most unique, artistic and sumptuous St. Valentine Souvenirs ever offered to the public.

Retail Price, in a neat suitable box, \$10.00.

DESCRIPTIVE PRICE LISTS OF OUR VALENTINES ARE NOW READY.

Besides our Valentines, we call attention to our NEW BIRTHDAY CARDS, including SATIN ART PRINTS, NEW SCRIPTURE TEXT CARDS, NEW COPIES FOR PAINTING, &C.

Our line of EASTER CARDS and EASTER NOVELTIES will shortly be announced.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

F

ELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor : **JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.**

CINCINNATI COLATURES.

(Continued from page 66.)

erty is all endangered by ice should it float heavily, which is not likely now. The coal fleets are endangered by a great rise in the river. Damage and losses of this sort are of yearly occurrence on the Ohio River, and when they are great as they were in the great flood last year, they affect trade injuriously.

A change in the weather this evening gives ground for the hope that but little mischief will be done. The thaw has been beautifully gradual.

In Cincinnati the manufacturers and dealers in stationery goods have been taking an inventory of stock and looking retrospectively over the last year's history of their business and its results. The results are, of course, business secrets. Generally, good large sales are reported, but it is also the general admission that margins have been close and profits small. This is the testimony of men in all branches of general business. Financial experts say that the logic of it is that incompetent and pokey men must get out of the way and leave business to live men with capacity for making large sales and putting up with small profits.

Robert Clarke & Co. have just published a little manual, by Louise McLaughlin, on china painting. It is a gem in execution and deserves, in every respect, the large sale it will surely have. The demand for it here, in and around Cincinnati, will be almost sufficient to pay for publishing it. The same authoress made a success a few years ago in the publication of a little work on underglaze pottery decoration.

George Stevens has had a good year's sale of books and an unusually good holiday trade. One peculiarity of this year's business in the book and stationery line is that the trade keeps up well after the holiday period. The lull that usually follows new year is omitted from this year's calendar in the book and fancy stationery line.

W. B. Carpenter & Co., report reasonably good sales of staple mercantile stationery.

John Holland will go East at the end of this week to remain a fortnight.

Snider & Hoole are not affected by holiday trade to speak of, but they make a fair start in the new year.

In the paper trade there has been no incident worthy of note as out of the ordinary everyday business commonplace.

In its line of fancy goods the Cincinnati branch of the Dennison Manufacturing Company has had good holiday sales, and its year's transactions foot up handsomely.

The weather for a month has been hostile to local trade, a circumstance which gives a favorable look to the really good volume of the sales during this time.

Collections generally are fairly good, and business men of all classes are expecting an early reaction which will impart vigor and life to trade.

PRINCE WILLIAM.

The noble "I will" has no worse enemy than the cowardly, self-deceiving "Yes, if I choose."

—Marie Eschenbach.

TO THE TRADE.

A man of long experience in the First-Class Commercial Stationery business, and possessing a good knowledge of its branches, including Order Wood wishes a position as Manufacturing Clerk or Salesman; good reference. Address

MANUFACTURING CLERK,
Care of American Stationer, New York.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879,

and re-registered June 6, 1883. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

E. P. DONNELL & CO., Chicago, Ill.,

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

INGENIOUS COIN AND LETTER SCALE.

The engraving herewith represents the "Peerless" coin and letter scale, for bankers, brokers and business men generally, as well as for family use. The scale is elegantly and finely made, nickel-plated, and is adjusted to the utmost accuracy, being sensitive to one-tenth of a grain. As will be seen, the apparatus is made for giving the standard weights of American silver and gold coins, and is really three scales in one, in other words, *multum in parvo*. In weighing a one-dollar silver coin, or rather to ascertain the correct weight of the coin in order to determine whether it is genuine or spurious, it is only necessary to move the pan containing the coin to the notch marked \$1 in the upper division of the beam, and to weigh a ten-dollar gold piece, to the notch marked \$10 in the second or middle division of the beam. In weighing letters the lower scale is used. The scale altogether is a very handy and useful contrivance, for besides being a perfect counterfeit detector, it is very convenient in weighing letters. R. R. Watson as the agency.

NEW PATENTS.

No. 289,363. Album-Clasp.—Leonhard Vorpahl and Herrmann Pohl, Berlin, Germany.

An album-clasp composed of a casing, the walls and bails of which are made from one continuous blank, and of a spring-cushioned slide-piece having guide-shanks, connecting abutment, and sleeves at the outer ends of the shank, also made from one continuous piece.

No. 289,384. Book Rest.—Archibald R. Byrkit, Fairfield, Ia.

The combination, in a book-rest, of an upright hollow slitted shaft provided with means for attaching it to the chair, with a rod adapted to fit within the shaft and to be adjusted up and down, provided with a horizontal extension having bearings and a perforated quadrant-plate, and the spring-actuated catch fitted in a bearing secured to the rest, and provided with a knob and an actuating spring, the catch being adapted to rotate in the bearing, and to be adjusted from one perforation to the other.

No. 289,392. Pencil Holder.—Alphonse T. Cwerdinski, St. Louis, Mo.

No. 289,394. Book Support.—John Danner, Canton, Ohio.

No. 289,434. Book.—Frederick Mills and Clarence H. Knight, Boston, Mass.

A book, provided with independent cleats applied thereto on opposite sides of one end, combined with a metallic back, adapted to engage and hold the cleated edge of the book when inserted therein.

No. 289,444. Ornamental Cardboard.—Charles S. Plummer, Newark, N. J., assignor to Evans, Plummer & Co., New York, N. Y.

As new article of manufacture, cardboard, when used for wedding invitations, circulars, orders of dance, Christmas, birthday and Easter cards, &c., having satin, silk, plush or velvet,

ruffled, shirred or plain, raised by artificial means to the surface of said cardboard through apertures of any desired shape or form cut in said cardboard.

No. 289,457. Parallel Ruler.—Charles A. Shields, Washington, D. C.

Sliding extension-indicators embedded in a ruler at its ends, or at any desired point, and running out at right-angles thereto, with case and scales.

No. 289,475. Dating Box for Self-Inking Hand-Stamp.—Geo. Van Zandt, Ravenswood, Ill.

No. 289,476. Pencil Clasp.—Sigourney Wales, Cambridge, Mass., assignor to William C. Howard, New York, N. Y.

No. 289,483. Adding Machine.—John N. Wilson, Carthage, Mo.

No. 289,489. Type-Writing Machine.—Josiah L. Young, Tarrytown, N. Y.

No. 289,491. Mechanical Toy.—Frederick Aberle,

COIN AND LETTER SCALE.

Bridgeport, Conn., assignor, by mesne assignments, to Frederick Egge, same place.

No. 289,505. Combined Foil and Paper Fabric.—Henry S. Crooke and Lewis Crooke, New York, N. Y.

No. 289,514. Bill Journal.—John J. De Garis and Tracy L. Paine, Milwaukee, Wis.

A bill journal consisting of a book of bound bill-heads with a vertical row of perforations near the inner edge of each sheet, half of which face to the left, leaving a full sheet for each account, while the other half of the sheets face to the right and have a plurality of bill-heads and accounts to each sheet, separated by horizontal rows of perforations.

No. 289,515. Paper Pocketbook.—Charles De Quillfeldt, New York, N. Y., assignor to Wemple & Co., same place.

No. 289,523. Mechanical Toy Hoop.—William R. Fowler, Philadelphia, Pa.

As a new article of manufacture, a mechanical toy, which consists of a wheel adapted to be propelled along the ground, in combination with a figure located wholly on one side of said wheel, and provided with a pivoted arm carrying a hoop-stick, and mechanism actuated by the rotating wheel to cause said arm to strike the hoop with said stick as in the act of rolling the hoop.

No. 289,558. Driving Mechanism for Oscillating Printing Presses.—Francis H. Richards, Springfield, Mass.

No. 289,562. Toy Animal.—Charles F. Ritchel, Bridgeport, Conn., assignor to the Unexcelled Fireworks Company, New York, N. Y.

A toy animal or other walking or running figure standing or otherwise resting on the plat-

form of a truck by its feet or limbs only, and having its feet or limbs connected to cranks of the truck-axes by jointed rods connecting the fore feet to the hind axle and the hind feet to the front axle, the feet and limbs being thereby made to slide forward and backward on a platform when the truck-wheels revolve, and the legs being the sole support of the body.

No. 289,566. Card for Book Marks and for Advertising mediums.—Leopold S. Samuel, Newark, N. J.

No. 289,578. Toy Knitting Machine.—William P. Stewart, New York, N. Y.

No. 289,581. Twine Holder and Lifter.—Albert Baker Tomlin, Fort Collins, Col.

The combination, with a twine holder, of a pivoted ring surrounding the twine holder, which ring has a part weighted, and has a rod or wire projecting from the part opposite the weighted part, which rod or wire is provided in its free end with a loop or eye.

No. 289,586. Perfumery Stand.—Albert Wanner, Hohoken, N. J.

No. 289,603. Self-Registering Thermometer.—William H. H. Barton, Brockton, Mass.

No. 289,608. Blotter.—Leonidas Hamlin Binkley and Thomas Henry Wright, Ironton, Ohio.

The combination, with a board, of a clip for holding paper on the same, a swinging blotter-board, and a spring-finger in the clip for holding the blotter-board on the clip-board.

No. 289,647. Book Cover.—George W. Hackstadt, Covington, Ky., assignor to C. F. Bradley & Co., Cincinnati, Ohio.

No. 289,652. Book Rest.—Chas. F. Haynes, Newton, Mass.

No. 289,688. Machine for Wetting Paper.—John Wesley Morrison, Omaha, Neb.

No. 289,711. School Slate.—Christian F. Rapp, Cincinnati, Ohio.

No. 289,735. Paper-Holding Device.—Seth Wheeler, Albany, N. Y.

No. 289,790. Paper Box.—Myron L. Wilcox, Brooklyn, N. Y.

No. 289,799. Show Stand.—Mary K. Barnes, Chicago, Ill.

No. 289,810. Oscillating Cylinder Printing Machine.—Andrew Campbell, Brooklyn, assignor to John McLoughlin and Edmund McLoughlin, New York, N. Y.

An improved printing press having an oscillating cylinder and reciprocating bed, and capable of printing while the bed is moving in either direction, the cylinder being driven from the bed by means of a toothed rack on the bed engaging a circular toothed rack on the cylinder, and said press provided with means, substantially as described, for shifting one of the racks at each movement of the bed.

No. 289,825. Stand for Holding Wrapping Paper and Paper Bags.—John M. Fulton, Roanoke, Ind., assignor of two-thirds to James H. McCahon and Ervin E. Richards, same place.

In a device for holding wrapping paper, the combination, with a suitable base frame, of vertical bails of gradually increasing size attached to the base frame side by side.

No. 289,844. Hand Stamp.—Charles A. Klinkner, San Francisco, Cal.

By pressing down on a transverse spring-piece to which the lids are hinged the die-plate is pressed down on the inking-pad, and the lids are thrown upward until their outer edges come into contact, so as to constitute a handle, by which the stamp may be lifted out of the box containing the inking-pad. When no pressure is exerted on the said spring-piece, it holds the die-plate out of contact with the inking-pad.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

F. Trift, stationer, Boston, Mass., has failed.

Alexander J. Millette, printer, Camden, N. J., has failed.

Francis Flanders, dealer in paper stock, Lynn, Mass., is dead.

H. V. Hicks, printer, Preston, Ia., is reported to have been burned out.

J. V. Johnson & Co., publishers of the *Democrat*, St. Louis, Mich., have been burned out.

B. H. Rothwell, bookseller and stationer, Toronto, Ont., is advertised to sell out at auction.

Mrs. John Oerl, dealer in wall-paper, &c., Cleveland, Ohio, has sold out to Oerl & Dangelsen.

John A. Marcus, stationer, &c., Philadelphia, Pa., is advertised to be sold out by the sheriff on the 19th inst.

Andrew Blume has retired from the firm of Mansell, Birnbaum & Co., importers of sponges, &c., New York city.

John Wilson & Co., printers, Geneva, N. Y., have dissolved partnership. The business will be continued by John Wilson.

Thomas & Pike, publishers of the *Echo*, Greenville, Ky., have dissolved partnership. Thomas & Ragon succeed to the business.

A judgment of \$750 has been issued against A. J. Lawenstein, toy dealer, Wilkesbarre, Pa., and execution has been issued.

Traquair & Wilkes, dealers in wall-paper, Terre Haute, Ind., have dissolved partnership. Charles H. Traquair continues the business.

A dissolution has taken place in the firm of Samuel S. Smith & Son, printers, Bangor, Me. Frank R. Smith continues the business under the old style.

Julian Sale, Jr., manufacturer of pocketbooks, Toronto, Ont., has admitted into partnership William J. Somerville and the firm will do business under the style of Julian Sale & Co.

An excellent opportunity for buying a good retail business in stationery and fancy goods is advertised in another column. Information is to be had by addressing the Philadelphia office of THE STATIONER.

The *Midland Industrial Gazette*, St. Louis, Mo., with the new year enters upon its nineteenth volume. The *Gazette* is an able exponent of the industrial and mechanical progress of the West, South and Southwest.

The estate of Thomas H. Wheeler, paper-stock dealer, New Haven, Conn., who recently committed suicide, is found to be insolvent. Liabilities are about \$25,000, of which over \$15,000 was for borrowed money, and assets \$16,000.

J. R. Pigman & Co., booksellers and stationers, Lafayette, Ind., have made an assignment to Mortimer Levering of that city, for the benefit of their creditors. The liabilities are about \$8,000. Mr. Pigman confessed judgment in favor of his brother to the amount of \$3,300. The assignee thinks creditors will realize about 20 cents on the dollar.

Stephen Meer, Brooklyn, N. Y., has just patented a new device for album leaves. The mat, which is made to include the whole page, whether designed for one or more pictures, is "struck up" or embossed from a die, forming a pocket without an inside board. The simplicity of this device and the elegant results attained by it, constitute a feature which will probably effect a change in the construction of albums. It is remarkable that it has never been suggested before. The manufacturers of albums are likely to find that the popular demand will require the adoption of this device.

At a meeting of the Board of Trustees of the Stationers' Board of Trade on Monday, the following named officers of the board were elected: George L. Pease, president; Wm. T. Pratt, vice-president; Alexander Agar, treasurer. Finance Committee—J. F. Anderson, Jr., Patrick Farrelly, Samuel I. Knight, B. Van Wagoner. Arbitration Committee—David Scott, William I. Martin, A. C. Barnes, C. F. A. Hinrichs, E. Eubree.

Moses King, whose success as a publisher at Cambridge, Mass., has been phenomenal, began with the new year the discharge of his duties in connection with the Bradstreet Mercantile Agency, of New York. He will act hereafter as business manager of *Bradstreet's Weekly*. His publishing business at Cambridge will be continued for the present, at least, without interruption.

George L. Pease, William T. Pratt and William I. Martin were delegates appointed by the Stationers' Board of Trade to attend the meeting of commercial bodies held in Washington on Tuesday of this week, for the purpose of urging upon Congress the necessity of passing national bankrupt law.

Jesse McClellan, bookseller and stationer, Wooster, Ohio, has admitted his brother to partnership under the style of McClellan Brothers. The firm has added wall-papers, &c., to its stock, and asks manufacturers of shades and fixtures to send latest lists.

The *Railroad Gazette* has been sold by its late proprietors, S. Wright Dunning and M. N. Forney, to a corporation, organized under the laws of the State of New York. The directors of this company are Mr. Dunning, Mr. Forney and W. H. Broadman.

The American Crayon and Slate Company, New York city, heretofore owned by the Parmenter Crayon Company, Waltham, Mass., will be carried on under the same style and at the same place by the Specialty Manufacturing Company.

A meeting of the creditors of B. J. Kopperl, of Austin, Tex., was held in the rooms of the Stationers' Board of Trade, on Tuesday, but it is understood that no final disposition was made of the matter, Mr. Kopperl not being present.

Haas & Stahl, proprietors of the New York Purse and Novelty Company, New York city, dissolved partnership on the first inst. William Haas retires from the firm and Stahl continues under the same style.

A dissolution has taken place in the firm of Field & Evans, booksellers and stationers, Lawrence, Kan. The business will be continued by S. T. Field.

A judgment amounting to \$238 has been issued against Farnsworth & Ryan, dealers in wall-paper, Lock Haven, Pa., and execution has been issued.

H. J. Henser, bookseller and stationer, Wytheville, Va., has been damaged by fire. Insured,

F. Trift, stationer, Boston, Mass., has failed.

John T. Williams, stationer, Hartford, Conn., has assigned.

E. H. Brundage, dealer in twines, New York city, has assigned.

Allen Horsfall, stationer, &c., Boscobel, Wis., has been attached.

Timms, Moore & Co., printers, Toronto, Ont., have been burned out.

L. W. Rowell, printer, St. Johnsbury, Vt., has been damaged by water. Insured.

Adam Beck, manufacturer of paper machinery, Newton, Mass., has been attached.

Broyles & Mix, publishers, Alamosa, Col., have dissolved partnership. Broyles continues.

A realty attachment for 1,000 has been issued against S. G. Otis & Co., printers, &c., Springfield, Mass.

Silberman & Hecht, manufacturers of fancy leather goods, New York city, have dissolved partnership.

Walter C. Hadley, publisher, Las Vegas, N. M., has been succeeded by the *Gazette Publishing Company*.

As attachment has been issued against Adam Beck, paper machinery manufacturer, Newton Lower Falls, Mass.

The Erwin-Lane Paper Company has been incorporated at Terre Haute, Ind., with an authorized capital stock of \$35,000.

Rumpel & Liller, booksellers, &c., Austin, Tex., have assigned to H. E. Shelley. Liabilities, \$5,000; nominal assets, \$6,500.

Chas. H. Smith & Co., stationers, St. Stephens, N. B., have given three bills of sale on stock, and some of their paper is going to protest.

Nagle & Co., Philadelphia, were sold out by the sheriff last week. Their failure was brought about by the fire which destroyed their stock.

A dissolution has taken place in the firm of High, Hoffman & Patterson, publishers, Socorro, N. M., D. L. Patterson having retired from the firm.

W. E. Doud, publisher *Republican*, Eureka, Kan., has admitted into partnership A. L. Stiskle. The firm will do business under the style of Doud & Stiskle.

Henry Swere, bookseller and stationer, Schenectady, N. Y., has made an assignment with preferences of about \$4,345, which are expected to absorb the assets.

The firm of W. C. Lawless & Co., dealers in printers' materials, Montreal, Quebec, has dissolved. W. C. Lawless continues the business under the same style.

Thomas W. Stuckey, printer, Philadelphia, Pa., has admitted to partnership William A. and John S. Stuckey. The firm will do business under the style of Thomas W. Stuckey & Sons.

A dissolution has taken place in the firm of Wallis, Holah & Ashbrook, publishers and printers, Philadelphia, Pa., on account of the death of James W. F. Holah. The business is continued by Wallis & Ashbrook.

Patrick Garvin, of East Hartford, has sold his paper mill in South Windsor, Conn., and land and houses connected with it, to Mr. Gaskill, of North Manchester, who will move to South Windsor and manufacture coarse paper.

W. B. Ayer & Co. have bought the retail business of J. K. Gill & Co. Portland, Ore., and will continue the book and stationery business at the old stand, 93 First street, in that city. J. K.

Gill & Co. will conduct the wholesale business at First and Front streets.

D. Pickett, publisher, Henderson, Minn., has sold out to E. H. McCloud.

Rumple & Ziller, stationers, Austin, Tex., have made an assignment.

J. T. Leonard & Co., printers, St. Louis, Mo., are advertising to sell out.

Boone & Clippinger, newsdealers, &c., Akron, Ohio, have dissolved partnership.

Edward Hine, printer, Peoria, Ill., has admitted Victor Feuchler to partnership.

R. Bell & Co., manufacturers of paper boxes, Montreal, Quebec, have been burned out.

The stock of Allen Horsfall, stationer, Boscobel, Wis., in possession of the mortgagee, has been attached.

Allen & Gates, stationers, Ware, Mass., recently reported failed, have liabilities of about \$3,600; assets, \$2,800.

Alfred Saunders, stationer, Lansing, Mich., has assigned to E. C. Chapin.

The *Stock Report* Publishing Company, San Francisco, Cal., has increased its capital to \$200,000.

Ferdinand Trifet, dealer in foreign stamps and art novelties, Boston, Mass., is reported failed, and offering 70 cents on \$1.

A dissolution has taken place in the firm of Roach & Groos, stationers, &c., Kyle, Tex. Roach & Nance succeed to the business.

Gardiner & Mackinder, publishers of the *St. Helena Star*, St. Helena, Cal., have dissolved partnership. C. A. Gardiner retires from the firm.

Davis Brothers, dealers in toys, &c., San Francisco, Cal., have dissolved partnership. The business is continued by Andrew M. Davis under the same style.

Charles E. Cooley, printer, Waterbury, Conn., has admitted to partnership P. F. Malone and the firm will do business under the style of Malone & Cooley.

The firm of Dietrich & Weihe, printers, book-sellers and stationers, Milwaukee, Wis., has been dissolved. The business will be continued by Henry G. Dietrich.

Charles H. Spaulding, dealer in novelties, Boston, Mass., offers to compromise with his creditors for ten cents on the dollar and what profits may result from continuing business sixty days.

The calendar issued by the Russell & Morgan Printing Company, Cincinnati, Ohio, is in extremely good taste and shows some very striking effects in the way of rich coloring. The calendar for each month is printed on a separate sheet, showing various scenes, corresponding to the season of the year. It is on the whole a calendar that is worthy the study of those who admire fine printing.

The firm of S. Brainard's Sons, music publishers, &c., Cleveland, Ohio, has admitted E. L. Graves to membership, and H. M. Brainard retires. The style of the firm is unchanged.

The limited partnership of Disbrow Brothers, dealers in paper and twine, New York city, will dissolve on March 1, 1884. A new firm of Disbrow Brothers will continue from that date.

The *Evening Argus*, Wilmington, Del., after a brief existence of six days, ceased publication on January 12. Its collapse is said to be due to want of capital.

A judgment of \$350 has been issued against John A. Marcus, stationer, &c., Philadelphia, Pa., and execution issued.

W. E. Rice, bookbinder and stationer, Wooster, Ohio, has sold his bindery to D. E. Robinson.

L. Firestone, dealer in notions and wall-paper, Wooster, Ohio, has sold out to D. W. Bechtel.

D. M. Dickinson & Co., dealers in paper stock, &c., Norwich, Conn., have sold out to Gordon & Stowe.

F. N. Boutwell, publisher of the *Enterprise*, Leominster, Mass., has sold out to A. G. Morse.

Sanborn Brothers, booksellers and stationers, Sedalia, Mo., are advertising to sell out.

P. J. Giesen, bookbinder, St. Paul, Minn., has been burned out. Fully insured.

J. G. Bloom, dealer in toys, &c., Shelby, N. C., has sold out to John F. Tiddy.

L. Volkenning, bookseller, &c., St. Louis, Mo., has been damaged by fire.

The Goodyear Rubber Company, St. Louis, Mo., has been damaged by fire.

The West Virginia Fibre Company, Parkersburg, W. Va., has been burned out.

Thomas L. Carson, stationer, &c., Philadelphia, Pa., has been sold out by the sheriff.

Francis Wright & Brothers, publishers, Chicago, Ill., have been closed out by the sheriff.

R. McLean & Co., manufacturers of mirrors and picture-frames, Boston, Mass., have failed.

Charles A. Daniels, publisher of the *Mirror*, Malden, Mass., has sold out to Henry C. Gray.

An assignment has been made by George B. Owen, bookseller and stationer, Mankato, Minn.

H. L. Wigand has bought out the business of Otto Wigand, dealer in artists' supplies, Richmond, Va.

John P. Kelly's bookbindery on the fourth floor of No. 13 Barclay street, New York city, was damaged \$1,000 by fire on Wednesday morning.

Lehman & Bradford, paper dealers, &c., Chattanooga, Tenn., have dissolved partnership. Bradford & Deardorff succeed to the business.

A fire, which started in the steam rag room of the Clinton Paper Mill, Steubenville, Ohio, on January 7, owned by August Hartje, did damage to the extent of \$10,000. It was insured.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

CRYPTOGRAPHY.

In the early days of the civil war was invented one of the best—possibly the very best—cipher codes ever built. Its author was Gen. Anson Stager, assisted by Colonel Lynch and several of his aides. This code was very flexible; that is, its capacities for expression covered a wide range; its principles once understood, it was comparatively simple, and without the key a message written in it was an impenetrable secret. It was the first code in which phrases were determined by a single word, and from this peculiarity it was called by its inventors an arbitrary cipher. Thus the expression "Hood is coming North," was indicated by the word "Brute;" "Animals in poor condition" by "Adam." Every phrase and sentence describing the condition of field and camp, the state of the army, movements of the enemy, every event and incident likely to occur was described by a single arbitrary word.

Names of places, States, counties, townships, the name of every prominent individual in civil and military life in the country were all fitted with code words. This of itself constituted a cipher practically impossible to read. But, not content with one band of secrecy, the inventors provided two. A system of arranging the message, after it had been turned into cipher, was included in the code. The arrangement was in a square, divided by vertical and parallel lines into smaller squares. In every separate instance the arrangement varied, and its peculiarity was that until the last word of the message was translated the key word did not appear, and the proper arrangement was not manifested. This wonderful code was known and understood by not over two hundred persons. The cipher operators of the United States Military Telegraph Corps (who have maintained their organization in civil life, and were last week in convention in this city) were its custodians. One of them was attached to the staff of each division commander, but even the commanding general of the army was as ignorant of the code as the veriest shoulder-strapper.

To guard against the contingencies of an operator's capture or of a copy of the code being secured, the code was divided in twelve books, each set numbered and being made up of a totally different set of words. Book No. 2 was dropped in a Southern river, and book No. 9 was captured with its custodian, an operator named McReynolds. He chewed and swallowed six leaves of it before the rebels seized and wrested it from his grasp. Their capture was of small advantage to them, however. An arrangement was in force which made the disappearance of an operator known immediately by General Stager, and within twelve hours after McReynolds' capture book No. 9 was abandoned by the army.

At the close of the war the army cipher, minus the arrangement of routes and lines, which is manifestly too complicated for ordinary uses, came into wide use among merchants and individuals who patronize the telegraph. With scarcely an exception, every commercial and governmental cipher is now built on the arbitrary plan. There are a vast number in use, each fitting one particular kind of business and none other. Their present object is less to insure secrecy than to serve the purpose of economy. A message of perhaps sixty words may be condensed by means of an ordinary copious cipher in ten. It is for this reason that telegraph companies do not regard them with a lasting love, and control their use by rules which limit the length of code words, and also force their selection from Webster's or other equally well-known dictionary.—*Inter-Ocean*.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JANUARY 17, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WHILE attention has been directed to congressional legislation on the subject of bankruptcy, little has been done to influence State action in the way of reform in insolvency proceedings. If we do not get the hoped-for aid from Congress there yet remain the different State legislatures, which may be induced to modify laws which operate to the detriment of creditors and help fraudulent bankrupts to dispose of their assets to their own advantage. In the Legislature of New York two bills, intended to govern the granting of preferences in bankruptcy, have been reported adversely in the Senate. That undue haste has been made to reject any improvement in the legal disposition of assets is not probable, but it seems to us that propositions to amend State laws relating to the settlement of insolvent estates ought to receive more attention from business men. It is quite possible that enactments might be procured which could be useful in helping the business of lawyers or in promoting the purposes of people more ready to incur liabilities than to discharge them, and, on the other hand, something might be done to impart confidence and realize security against fraud. It is alleged that the bills rejected by the State Senate Committee were carelessly drafted. If this is true, it is all the more evident that suggestions for legislation affecting business interests should be carefully watched wherever originated or projected. Our commercial bodies ought really to have law committees, or should deputize someone to keep an eye on legislation, whether State or national, so as to be apprised of everything that concerns them and the constituencies which they represent.

"If it isn't one thing it's another." This is an old-time remark with which, we have no doubt, many of the readers of THE STATIONER are familiar. The quotation is more than likely to carry them back to boyhood's days, when the reproachful mother relieved her feelings thereby on seeing her "hopeful" brought home after being fished out of the stream or mill pond or picked up after some unfortunate mishap resulting in broken bones, marred features or ruined clothing. But the stationery trade have occasion for the exclamation at times, and what with failures and other things unexpected, it is not to be wondered at. This time it is a matter of gum, something in which they are not the only ones concerned. One of the principal subjects of foreign news now running through the papers is the rebellion which is threatening the well-being of Egypt—if there is any chance for well-being in that unfortunate country. And this not only affects Egypt but this country also, and may get up an excitement. This may seem rather funny, but the fact is that El Mahdi's rebellion has cut off, or is said to have cut off, the entire supply of gum arabic. Gum gedda, gum suakim and gum sennaar are different qualities of the gum, each taking its name

from the district whence it comes, these districts all being included in the Soudan territory, where the False Prophet and his followers have raised the standard of religious revolt and are waging war. The gum is gathered from the acacia trees by the Soudan natives, taken to Khartoum on the backs of camels and bartered with Cairo and Suakim merchants for guns, cartridges and trinkets. Between three and four millions of pounds of gum arabic are said to be consumed in this country yearly, being used by manufacturers of mucilage, envelope manufacturers, confectioners, tobaccoists and others. The price of the gum has advanced from twelve cents a pound in lots to twenty-two and twenty-four cents, and an advance of 30 per cent. has been reported during the past week. It is alleged that there is not enough gum arabic in all of the markets of the world to supply American requirements for one year. The gummy question is: What shall we do? Is there to be an advance in the prices of mucilage and envelopes consequent on El Mahdi's nonsense? Perhaps we shall now be able to discover whether gum arabic is really a standard article in trade, or if there is not some handy substitute which has been going under its name for ever so long. If El Mahdi only knew of the trouble he is likely to give us, he might perhaps be more considerate; but the reports do not indicate that he will. He seems to be determined to stick, and, in so doing, to make "gum stickem" at home.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

A Western firm prints a caution on the outside of the envelope in which it mails its catalogue. It is to the following effect:

"Remove this envelope carefully, and exercise still greater care in handling the inclosed catalogue. Do not pitch it into the waste basket, or hand it to the office-boy to kindle fires with, as the most disastrous results will follow, inasmuch as the catalogue is dipped in a solution of dynamite, the most powerful explosive known. Hang it up in a cool, dry place over your desk, and after a few days' exposure to the air, its dangerous properties will disappear, and it can be burned like any other catalogue."

This is prodigious! But the firm alluded to goes on to remark as follows:

"P. S.—Most firms do their heavy lying in their catalogues. We do all of ours on our envelopes."

Still more "prodigious!"

Picking up a Philadelphia paper the other day I came across a little thought, of which I do not know the origin, but I am sure that it is not Philadelphian. It is as under:

"We may hold a man amenable to reason for the choice of his daily craft or profession. It is not an excuse any longer for his deeds that they are the custom of his trade. What busi-

ness has he with an evil trade? Has he not a calling in his character?"

Methinks that there is something for us all to consider in the above. It is not an excuse for one's deeds that they are backed up by custom; still less that they are the result of a trade demand. If people want short weights and short counts, don't give it to them. If they ask for undue credit refuse it. If they want to buy goods lavishly, and others stand ready to sell, shut down on them yourself.

"Has he not a calling in his character?" There's an inquiry for you which goes home to every man, merchant or clerk, manufacturer or workman, "boss" or "help."

A new bronzing apparatus has been invented by a machine-minder at Mannheim, named Daniel Muller. It consists of a box to be fixed to the printing machine behind the cylinder; the printed sheet, after leaving the latter, is guided directly through the box, where it is bronzed and cleaned by brushes, moving in rotatory and lateral directions, and driven by the mechanism of the printing machine, to which it may be fixed by means of a cog-wheel.

An appeal was lately made from the decision of the Collector of Customs at Baltimore, assessing duty at the rate of 25 per cent. ad valorem on certain articles made of paper, claimed to be dutiable at 15 per cent. ad valorem, as a manufacture of paper. They consisted of paper pictures fancifully embossed, and cut out to represent flowers and figures, and so arranged that by pulling a string or ribbon they assumed different shapes and positions.

Under the former tariff, articles of this class were recognized as manufactured paper, then dutiable at 35 per cent., while printed matter was then subjected to a duty of 25 per cent. Now printed matter retains the duty of 25 per cent., while manufactures of paper are dutiable at 15 per cent. Held that such articles were still to be regarded as manufactures of paper, and that the reversal of the rates of duty made by the new tariff over the old did not affect their classification.

Tally another! I think that THE STATIONER is responsible for virtuous resolves this year. The Toronto News Company announces its determination to limit credits to thirty days, 6 per cent. for cash. Keep this sort of thing up and the whole country, territory of Ontario included, will be safe. I wonder whether "C. H." will "get on his ear" now!

The old officers of the Stationers' Board of Trade have been re-elected. The president deserves this recognition of his earnest work, and I offer him best wishes and the hope that he may never be less a president than he is now.

I am sorry to hear that Henry Bainbridge keeps ill, his condition showing no improvement. His many friends are concerned at his protracted illness.

The many friends of Col. Cyrus H. Lourel will be pained to learn that he is seriously ill. Hopes are entertained of his recovery.

Proposals for supplying paper for the public printing will be opened at Washington on January 31. The contracts for stationery for the Treasury Department have been awarded.

ANSWERS TO CORRESPONDENTS.

The correspondent who inquired for the address of J. W. Taft & Son (Valentines) is informed that the P. O. address has been changed to North Grafton, Mass.

J. C. W. & Co. ask where to buy a machine for wiring water-closet paper.

Ans.—We do not know of any machine to be had except from manufacturer who is, we think, the Sullivan Machine Company, Claremont, N. H.

S. B.—1. Want address of Bertha M. Clay, author of "Dora Thorne." 2. Address of manufacturer of American Pocket Record. 3. Address of parties making the Perpetual Diaries.

Ans.—1. We understand that she is an English writer, whose address is not known to American publishers. Her name is said to be attached to many stories for which she is not responsible. 2. Case, Lockwood & Brainerd Company, Hartford, Conn. 3. Answered in No. 2.

T. asks whether non-copying ink pencils, made by E. Wolff & Son, London, can be had in this country.

Ans.—They were at one time imported but are not now in this market. They will be imported to order in 20 gross lots.

FLYING MACHINE.

The model of the flying machine with which Mr. Linfield, the English inventor, expects to navigate the air at the rate of sixty miles an hour, resembles an elongated tricycle, with a cigar-shaped body for the engine, fuel and navigator. It is twenty feet long, fifteen wide, eight and one-half feet high, and weighs 240 pounds. The lifting gear consists of two square frames about three feet deep, containing parallel sails, like an open Venetian blind, and so placed that the air impinges on their lower surfaces. The source of motion is a large wheel, with canvas-covered spokes, shaped like the screw of a steam vessel. The rudder is kite-shaped, with the point at the extremity. The machine was lately attached to an engine on the Great Western Railroad, and when a speed of thirty-five miles was attained it rose and flew through the air, the total forward pull amounting to only twenty-four pounds. Treadles are attached to the wheels so as to allow a gradual start. For power the inventor is disposed to rely more upon high-pressure steam than upon electricity or compressed air.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, January 16, 1884.

THE MONEY MARKET.—The discount rates for prime indorsed mercantile notes and acceptances remain $4\frac{1}{2}$ @ 6 per cent. Call loans vary from $1\frac{1}{2}$ to $2\frac{1}{2}$ per cent. It had been supposed that the disbursement of the heavy January dividends and interest would have strengthened the stock market, but such has not been the case. Prices have further declined, and there is the same lack of interest on the part of the general public that has prevailed for many months. The cut rate troubles in the West, decreasing railroad earnings, a succession of financial embarrassments and numberless rumors—all of a derogatory character—have, together, destroyed all or nearly all confidence in railroad stocks and bonds. Government bonds were strong. There has been a sharp advance in sterling exchange, and also some improvement in Continental, due to a scarcity of commercial bills.

THE PAPER MARKET.—The paper market is without any new feature. Prices continue to hold their own very fairly on nearly all grades, with one or two exceptions. Some of the manufacturers are experiencing difficulty from anchor ice, and the freezing up of some of the small streams is another drawback, and tends to lessen the production a little. There is every reason for believing that the consumption of paper will be larger this year than it was last, through the increase in immigration and the opening up of newer sections of the country. Besides, the Presidential election occurring this year, a considerable quantity will be added to the regular consumption for political purposes. A large number of manufacturers are busily engaged in the execution of orders received before the beginning of the year for deliveries to run into the spring and summer.

THE STATIONERY MARKET.—The general trade in staple goods shows no signs of improvement as yet. The absence of any positive indications by which to judge of the character of trade for the future has rather a quieting effect, and dealers are cautious in placing orders. While the outlook is uncertain, however, most tradesmen are sanguine that the business of the new year will open up briskly, the general indications being favorable to this feature. The trade in fine stationery is as fair as can be expected at this early period—in fact, it shows a slight improvement over a week or two ago. In envelopes there is no perceptible change. The only thing which can affect the envelope trade is a rise in the price of paper, and this is not looked for. The toy trade shows no particular activity, but is quite fair in staple goods. In masks and mask goods there is a brisk demand, caused by the ball season, which lasts during the greater part of the winter. There is also a large demand for Easter and valentine novelties in cards, plush goods, &c. There is an endless variety of these goods made up in every conceivable form to please the popular fancy. There is a little doing in inks, a few shipments being made to Southern points.

OUTWITTING BUNCO MEN.

S. D. Tilden, of Hartford, underwent cross-examination at the Tombs on Friday last on his charge of swindling against Spanish Dick and Keester Bob, the bunco men. He is the man who put up at a bunco joint in East Fourth street \$2,850 in checks on George P. Bissell & Co., bankers, of Hartford. The bunco men got another check for \$20 from him, and it also appeared that he borrowed \$5 from Keester Bob Martin. Colonel Spencer cross-examined him. His replies in substance were as follows:

I said as I was leaving that I had no money to go home with. The man behind the counter said he would cash my check for \$20, and he gave me back in return for my check \$20 that I had put up in cash. He locked the door and said I must give him back his \$5. I replied that I would give it to him at his father's bank in Hartford. I do not know how much money I had on deposit with George P. Bissell & Co. when I drew the \$2,850 check. The amount was very small.

Colonel Spencer argued that the prisoners had not swindled Mr. Tilden, but had, in fact, made him a present of \$5. They were discharged.

ABSCONDING BOOK AND NEWS DEALER.

The Hightstown (N. J.) Gazette, of January 11, says: "Last week the borough was thrown into a state of excitement by the report that J. Dale Robinson, a prominent citizen and book and news dealer, had suddenly and mysteriously disappeared. At first the air was full of all sorts of rumors as to the flight and the cause of it, but later developments make it pretty certain that the man has run away from his creditors. The worst of it seems to be that, while he was maintaining a reputation for fair dealing and general honesty, he was getting just a little in debt with a great many people, and that the only way out of his trouble seemed to be to go. His house was found to be almost bare of furniture, and the greater part of his valuable stock was gone from the store. Robinson came to Hightstown several years ago as hostler and bar-tender for Wm. Tabler, and was mixed up in the real estate transactions with that landlord's license. After the exposure of that affair he seemed to be inclined to get out of bad company, and received sympathy and help from some of the other side. When his reformation had sufficiently progressed he was taken into the Baptist Church, elected a Justice of the Peace, and was patronized by almost all classes in his book and news business. So far as we have heard, he was exact in the settlement of all his legal business. As to his debts, it seemed strange that they should lead any one to run away, as we know many people in the community who have played the part of prominent citizen for years, and in all that time have never seen the day when they did not owe more than Justice Robinson does. The man was plainly weak in some respects, but we do not think he was a deliberate fraud, else he would have taken more of his stock and played to a better advantage on the purses of his brethren in the church, the Republican party and the Masonic and Odd Fellows lodges with which he was formerly connected. Among those whose names we hear mentioned as wishing the Justice a Happy New Year are Mason & Allen, Samuel Fowler, J. J. Ely, Reuben Norris, C. E. Cole, J. V. D. Beekman, H. W. Robbins, S. Sickles, A. S. Voorhees, William Robbins, Dr. Dawes, A. B. Wyckoff, William Warwick and the Gazette. We have no doubt that there are others with whom he has had dealings in the cities who are also interested."

OBITUARY.

JOHN DENNISON SMITH.

John D. Smith, of Springfield, Ohio, died at his residence on North Factory street, Springfield, Ohio, on the 10th inst., after suffering acutely for weeks. Deceased was born in Ross County, Ohio, December 6, 1821, making him sixty-two years and one month old.

As early as 1832-33 he worked with Kills & Baker, bookbinders, learning that trade and making a specialty of blank work, in which he was well skilled, being especially proficient at the ruling machine. In September, 1844, he started in business for himself as a bookbinder, locating in the third story of Trapper's corner, now W. M. Black's building. He continued there until 1860, then selling out to E. L. Barrett, and opening a boarding-house and hotel, known as the National and Smith House, in what now forms part of the *Republic* printing concern building. He sold out in 1862 to H. F. Willis. For many years previous to 1879 he carried on the *Republic* bindery, under an arrangement with the printing company. In January of the latter year he formed a partnership with his son-in-law, E. T. Thomas, under the title of J. D. Smith & Co., and has since carried on a general bindery and stationery house, over Jones & Son's dry-goods house at Main and Limestone streets.

In business life he was strictly honest and upright, even to his own loss, perhaps. In the community at large he was ever the liberal, just, friendly and safe citizen, and as a husband and parent none could be more kind and indulgent, taking pride in his family and happiness in seeing them happy. His home was often the scene of merry social gatherings, where the guest was always made to feel himself welcome. He himself was just as welcome to many a social circle.

BLEACHING SPONGES.

There are several methods for bleaching sponges, but the following are the best:

1. First wash and squeeze out the sponges; then dip them into a 2 per cent. solution of permanganate of potassium. Here they become quite brown (from separated manganic oxide). After ten minutes they are taken out, washed in water, again well pressed, and then dipped into a 2 per cent. solution of oxalic acid; some prefer diluted sulphuric (1.20), or diluted hydrochloric acid (1.15), in which they become perfectly white. Success mainly depends on the soaking in the permanganate solution. If they are macerated too short a time, they do not become thoroughly white; if too long, they are apt to become rotten.

2. Clean the sponges by immersing them in diluted hydrochloric acid; then soak them in a bleach composed of hyposulphite of sodium 1 part, water 12 parts, and hydrochloric acid 2 parts. After some time remove and well wash. To the last wash water a little glycerine is added, in order to preserve the sponge soft. The liquid is best pressed out by passing the sponge through a clothes-wringer.

3. Toilet sponges which have been in use often become peculiarly slimy and almost useless, owing to some action of the soap. Mere washing in distilled water does not remove the dirt. The sponge should be pressed as much as possible, placed on a plate, and powdered chloride of calcium sprinkled over it and allowed to deliquesce upon the sponge. After about half an hour the sponge may be washed in water and dried, when it will become white.

All the above processes furnish satisfactory.

results; but the following combination and modification of two of them will be found to work better still. Soak the sponges, previously deprived of sand and dirt by beating and washing, in a 1 per cent. solution of permanganate of potassium; then remove them, wash them thoroughly with water, and squeeze out the water; next put them into a solution of $\frac{1}{2}$ lb. of hyposulphite of sodium in 1 gallon of water, to which 1 oz. of oxalic acid has been added, and leave them in a solution for fifteen minutes; then take them out and wash thoroughly. By this treatment the sponges are rendered perfectly white. Many sponges contain a more or less dark-colored brownish core. If treated only with permanganate and acid the core is either not bleached at all, or, if it has been slightly bleached, the tint is apt to grow darker again.

STANDARD SLATE CO.

No. 265 BROADWAY, NEW YORK.

The Only Noiseless Slate adopted by the Boards of Education

OF NEW YORK CITY AND PHILADELPHIA.

THE STANDARD SLATE, patented October 9, 1883, is the only **TRUE NOISELESS SLATE** yet produced, surpassing anything in the market, being MUFFLED between the Slate and Metal Frame, also on the outside of the Metal Frame; will not scratch a polished table. No slate made to equal it. Before purchasing other slates send for Sample, Price List and Discounts, enclosing 25 cents.

SOME EXPENSIVE CLOCKS.

A black marble case, a perfect model of the Grecian Parthenon, contains a very fine movement, whose chief peculiarity is its double chimes, either of which may be used. At the quarter the chime is rung once, at the half twice, and at the hour four times, after which the bell is tolled to indicate the time. The chimes are silver, and sound sweet and low like the bells of old Trinity on a still summer night far down the bay. The price of this clock is \$800. A Moorish mosque, in brass scroll-work, makes a showy and expensive time-piece. A large marble globe upheld by four sturdy gilt cupids, is a unique style of a time-piece. The globe revolves, and an upright stationary hand marks the minutes and the hours as they slowly pass by. A similar clock has a hollow transparent globe in which a lighted wax taper shows the figures by night as well as by day. This is intended for a sick room. The former is valued at \$1,000, but the latter is far cheaper. A Japanese summer house fabricated of brass, with a roof which makes no pretensions of sheltering the interior, contains a very fine movement. The dial is a rare specimen of cloisonne enamel. A Persian palace, with elaborate mural decorations in Japanese gilt and enamel, and a Chinese joss house, also very much enameled, complete the set, which are designed to accompany various fashionable styles of house decorations. The price of the three with their several ornamental vases and candelabra, is over \$2,000.

One of the neatest cases is an exact model of the great bell of Moscow, with the many inscriptions thereon plainly preserved and brought out. This is comparatively cheap, and costs \$250. These clocks have a simplified arrangement of the works, which only requires two windings to set the wheels, chimes and bell in motion, whereas the ordinary clocks require three. This is a new application of old principles, and is patented by the inventor. Another ingenious invention does away with the hands, and tells the minute and the hour so that a child may understand. Through two holes in the dial the figures are visible. One changes every minute and the other every hour, and the time reads like figures from a railroad timetable. Half-past twelve is indicated by the figure "12" in the hour hole, and "30" in the minute hole. This effectually solves one objection to the plan of making the horological day consist of 24 instead of 12 hours, which was that there was not room enough on the dial for 24 hour figures. A day of 100 hours would be no more difficult for this clock to keep track of than one with only 12. The most expensive clock in the room is part of an Algerian onyx mantel and handsome ornaments of the same costly material. The whole set is valued at \$8,000, and has already been sold to a wealthy banker for the drawing-room of his new residence.

The use of watches for traveling purposes is to a large extent usurped by the new styles of traveling clocks, many of which are of elaborate design and great beauty. Chief among these was one as large as an ordinary cigar-box, and much the same shape. The four sides were of Persian porcelain, on which was painted four peculiarly Oriental scenes. The first represented a fashionably-attired lady, seated on a richly-colored divan, indolently fanning herself with a jeweled spread of peacock plumes, while an ebonized serf reclined at her feet half asleep; when a cavalier appears and thrusts a handsome black-bearded face through the window bars. In the next scene all is excitement. The slave

has been awakened by a kick, and a hasty search is being made for a chair on which her ladyship may stand to reach her lover, for her ladyship is short and the window is high. The next scene exhibits that happy fertility of resource which since the days of Eve has ever been a crowning characteristic of the sex. No chair could be found, and the slave has been obliged to crook his back, on which her ladyship stands, and the interview is consummated. The last scene shows the erring lady, in company with her sister wives, ministering to the wants of an aged and obese husband, and none seem more devoted and affectionate than herself. This interesting clock had a repeating attachment by which the minute and the hour could be struck at will on a silvery chime which tinkled like Kriss Kringle's sleigh-bells. It also had a calendar. The cost was \$500. The traveling clocks were of many shapes and sizes. The square shape, however, was the most prevalent. In size they ranged from a tiny contrivance made to fit a waistcoat pocket, and no larger than a snuff-box, to large and bulky ones which almost needed a trunk for themselves. The prices also varied from \$50 to \$1,000.

J. H. Bufford's Sons' line of Easter and valentine cards, as usual with the productions of this firm, are very fine and attractive this season. The firm's extensive facilities enable it to produce the very best in its line and to sell at a price which will compare favorably with the prices of competitors. The line throughout shows much artistic taste, such a commendable choice of subjects and careful blending of colors being quite rare in art prints of this character. Some of the cards bid fair to gain the popularity of the dove card, which attained so large a sale last season. Two of them are companion pictures, one representing an angel bearing a babe in its arms, gently descending through a lattice-work covered with beautiful vines and flowers, and the other represents the babe sleeping in the cradle and the angel watching over it. Both cards are handsomely embossed and fringed and made up with silk cord and tassels, so that they may be hung against the wall or on the chandelier as desired. Besides these cards the firm has brought out a number of new designs in small cards. They are all artistic and pretty, and possess a quality of finish which would be creditable in more costly art prints.

The longest river in the world is the Mississippi, reckoning from the source of the Missouri, being 4,300 miles, or equal to the combined length of about thirty-three millions of Esterbrook's mammoth falcon pens and pen-holders.

Thought is the property of him who can entertain it, and of him who can adequately place it. —Emerson.

CUSHING & BROTHER, Importers & Manufacturers,

138 MARKET STREET, PHILADELPHIA.

25c. A GENUINE STYLOGRAPHIC.—This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and cap, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 30 cents Gold Plate. Address COLLNER MFG. CO., 222 Centre St., New York.

SCHLEICHER, SCHUMM & CO.
PHILADELPHIA, PA.

TRADE NOTES.

A new concern at Bristol, N. H., is preparing to engage in the manufacture of croquet boxes.

The Toronto News Company announces that it will not sell goods on longer credit than thirty days.

The Palmer Art Company has its new line of valentines ready for inspection, and samples are ready.

J. B. Lippincott & Co.'s monthly bulletin for January has been received. It contains some interesting lists and announcements.

F. H. Loss, Jr., is distributing among the trade some very handsome cards, tastefully and appropriately inscribed with the compliments of the season.

As usual, J. E. Linde has got something new. His list of shape novelties has been enlarged, one of the neatest being in the form of a key designed for use as a valentine.

Cassell's *Family Magazine* for February justifies its publication. It is well illustrated, contains good reading, both fact and fancy, and valuable suggestion. It is really a family paper.

A. Weidman's trade in masks is very active just now. Mr. Weidman has everything in this line that could be desired, being one of the largest importers of French and German masks in this country.

Caw's brand of black inks has recently been placed on sale at all of the news stands of the Manhattan Elevated Railroad, the company having chosen it in preference to other brands of black inks.

The Silicate Book Slate Company is having a very large demand for its advertising memorandum books. These are neatly and substantially made and hence their popularity is not surprising.

The *Lumber World* is a well edited journal, devoted to all matters pertaining to the production and utilization of lumber. Its articles on wood-working machinery, &c., are able and well written, and the journal presents a very neat typographical appearance. It is published at Buffalo, N. Y.

The *Saw Mill Gazette* is the name of a new publication issued by M. T. Richardson, New York city. It is devoted to the interests of owners of saw mills, planing mills, shingle mills, lath mills and sash, blind and door factories. The December number shows a long list of contents, which must prove of value to all interested in the industries mentioned. The *Gazette* was evidently intended to fill an important place in trade journalism.

Owing to its largely increased dealing, as well as manufacturing business, the Richmond Paper Manufacturing Co., of Richmond, Va., maker of the celebrated "Climax" blotting paper, which is so well and favorably known to the whole trade, has found it necessary to acquire larger and more commodious quarters to accommodate its requirements for additional room. On February 1 it will move into its new premises, 1215 Main street, which will be fitted with every convenience for the conduct of the paper business in all of its details, and where the company will still further extend its operations. The building to be occupied by it is four stories in height, 160 feet in depth and 28 feet in width; the whole of which it will require. In addition to its "Climax" blotting, which has met with such general favor and has been sold

so largely, it carries a full stock of all such papers as are usually sold by wholesale paper dealers, and with the advantages it enjoys can offer inducements to the trade generally.

The Paragon slate, lately mentioned in *THE STATIONER*, is the invention of David Scrymgeour.

There has been a strong competition among the manufacturers of files to supply bill files to the House of Assembly of New Jersey at Trenton. The Globe Files Company secured the award on the merits of its goods.

The work on the new ink factory of Carter, Dinsmore & Co., at Boston, Mass., is progressing slowly, and the company expects to have it completed in the spring. The new factory will very largely increase the company's facilities for the manufacture of its various brands of inks and mucilages.

With the January number the *Breeder's Journal* entered upon its fifth volume. This is a little monthly of sixty-four pages devoted to the dissemination of information on cattle, sheep and swine breeding. The *Journal* regularly publishes articles written by able writers on various subjects pertaining to its special sphere. The publisher is the Breeder's Live-Stock Association, Beecher, Ill.

The Merriam Manufacturing Company, Durham, Conn., has got out a paper-weight clock which is one of the neatest desk appliances yet put upon the market. It is said to be an excellent timepiece and will run in any position. The case is of japanned iron, $3\frac{3}{4} \times 2 \times 1\frac{1}{8}$ inches. The same company has also got a combined rule, check cutter and measure, which comes in ten and twelve-inch lengths, japanned in black and gold.

C. F. A. Hinrich's assortment of Easter novelties is very large and fine. He has just received a large invoice of egg dishes representing an egg on its end in a beautiful floral wheelbarrow or other form of frame, the upper end of the egg being broken, thus adding to the novel appearance of the dish. Mr. Hinrich has also received a large assortment of bull's-eye or polka-dot glassware, jugs, tumblers, punch-bowls and sets, finger-bowls, &c. This ware comes in various delicate colors, and as its inside surface is covered with innumerable prism-shaped protuberances, the effect in gas and lamp light is very fine.

In answer to many inquiries in regard to parchment drawing papers, it may be well to state that Kueffel & Esser are the agents for the European manufacturers of the celebrated drawing and tracing papers known as the blue process, the standard profile and cross section papers, &c. This firm has three kinds of parchment papers put up in rolls of twenty yards and it will send samples to those wishing them on application. All of the parchment papers used in this country now are imported, even including the parchment papers used by druggists in putting up oils and in protecting substances put up in bottles from evaporation, Kueffel & Esser being the agents for their sale here.

Among the out-of-town tradesmen who have been in town for the past few days were: John Morris, successor to Culver, Page, Hoyne & Co., Chicago, Ill.; Mr. Sheehan, of the firm of Sheehan & Co., Ann Arbor, Mich.; Mr. Brown, of Brown, Pettibone & Kelly, Chicago, Ill.; the Metcalf Brothers, of the firm of Abercrombie & Metcalf Brothers, stationers, &c., Eau Claire, Wis. One of the latter-named gentlemen was

formerly of the firm of Baird & Metcalf, Ogdensburg, N. Y., and the other of the firm of Metcalf, Parvis & Metcalf, Utica, N. Y. They recently dissolved their connections with the firms named and established themselves in business at Eau Claire, Wis., under the style mentioned.

Theo. Leonhardt & Son, lithographers, Philadelphia, Pa., have issued an attractive calendar this season. It is a monthly-pad calendar, and between each month there are samples of the firm's work, consisting of lithographed checks, drafts, certificates, billheads, views of public buildings, specimens of crayon work, &c. The calendar may also be used for 1885, the tablet to which the monthly pads are fastened being handsomely printed and arranged for this purpose.

The programme issued for the Montreal Winter Carnival, which will begin in Montreal on February 4 and conclude on February 9, is of nice design, the outside being printed in various shades of green and gold, with scenes representing winter landscapes, with figures of boys coasting, skating, carnival festivities, &c. It is the work of Morton, Phillips & Bulmer, Montreal.

Morton, Phillips & Bulmer, stationers, &c., Montreal, Quebec, display their capacity to do fine printing in their business card, which *THE STATIONER* has received. This is a large card, printed in delicate colors and gilt, after a very tasteful design and arrangement of type. This firm also shows some good printing in its calendar for 1884, which is done in colors, and especially designed for office use.

Virtue is the first title of nobility.—Molière.

Erie and Chicago Line

PASSENGER ROUTE.

THE SHORTEST, QUICKEST, AND SAFEST ROUTE to all points EAST. Two trains to the East daily, leaving Chicago at 5.40 P. M. and 11 P. M. The only route running **PULLMAN PALACE HOTEL COACHES** between

NEW YORK and CHICAGO,

LEAVING CHICAGO AT 5.40 P. M.,

Returning leave New York at 8 P. M., Making direct connection at Chicago for all points beyond.

You should travel by the E. & C. LINE,

BECAUSE its trains run through from New York to Chicago, avoiding the dangers of transfers, the risks attending the changing of cars, and the possibility of missing connections.

BECAUSE the PALACE HOTEL COACHES run in connection with its trains, furnish Meals as good as can be had at any first-class hotel, and allow passengers to eat with as much comfort as at their own homes.

BECAUSE not one passenger has been killed or even injured on its trains since the opening of the line five years ago. Nor has an accident of any kind occurred.

BECAUSE the great variety of scenery on this line renders the journey pleasant and profitable.

BECAUSE provision has been made for running the trains from Mansfield, "Special" to destination, whenever they arrive after departure of train forming regular connection. This insures a continuous passage between New York and Chicago.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

ARTISTIC ODDITIES.

"The customers who visit us most frequently," remarked a New York dealer in bric-a-brac, "are those who have a passion for the quaint and odd in art playthings. We are careful to call their attention at once to any oddity we may pick up. Each of them seems to infer that he alone has had a sight of it, and if we can show that it is as unique as it is odd, we do not have to wait long for a customer."

"Do you often meet with articles which are really unique?"

"No, we do not. Practically, in this business, an article is unique when, the demand for it not being large, we do not often run across it. People often believe, if they have a bronze article differing in some striking point from others of the sort, that it is the only one of its kind. They do not know that elastic molds are used for certain kinds of quaint bric-a-brac. The maker casts his first figure as the mold stands; then, by altering the mold slightly after each cast, he produces a large variety of figures. Some makers do not use changeable molds, but cast large numbers of their specialties, and ship them to various points in assorted lots, not permitting more than a dozen of a kind to go to any particular place. This is the sort of stuff that admirers of the odd pay considerable prices for."

"A man showed me one of these quaint and so-called ancient bronzes the other day, for which he had paid \$250. The subject was 'The Morning Bath,' and the bronze signed 'Romo P. fec.' It purported to have been dug up in the Campagna. Incrustations of soil were to be seen here and there; the metal was oxidized in places, and verdigris lent its aid to the effect. But the design was of to-day, the soil was of New York origin, and the green tints and oxidations were artificially produced. The 'odd' characteristic of this little bronze was the fact that a boy in the piece had the legs of a satyr. Otherwise the piece would have been a wholesome piece of design, a quality which would have ruined it for searchers of the queer in art."

"Do I consider the taste for oddities a healthy one? Not when it is carried as far as it is by those who make it a specialty. I had a customer once whose taste in art was ruined by his fancy in this direction. I had placed in my window a very curious old print of Abraham and Isaac. On account of a slip of the engraver's burin Abraham's nose was so enormously large as to interfere with the solemn nature of his intentions touching his son. The young man I speak of was fascinated by this picture. I held it at a prohibitory price, \$75. He determined to buy the print, and deposited \$25 on it, begging me to hold it for him. After a while he took his prize away, and he has been buying things of that kind ever since."

"A man I used to sell old snuff-boxes to dates his passion for art oddities from the time I sold him a large metal bowl, which he still regards as the gem of his collection. It is a basin about eighteen inches in diameter, surrounded by animals who are engaged in swallowing each other. A whale, with his tail bent upward so as to form the handle, is taking in a crocodile, who, in his turn, is disposing of a big-headed donkey; the latter animal is making away with a gorilla, who is straining every nerve to swallow a struggling goat; and so on, till we come to a goose who is gobbling up a snake, who consoles himself by hoisting in a frog. A young devil, who forms the other handle, looks on with a grim smile, while he displays a scroll on which is

written: 'Ye big fishes swallow ye little.' This piece cost its owner \$3,500.

"This person had an old punch bowl of Yunching ware, on the edges of which there sat astride a number of curious figures in various stages of intoxication. One of them appeared about toppling over into the bowl, another had fallen over on the outside, but was preserving his neck by hanging with one toe caught on the edge of the article."

"Another of my old customers cared most for oddities which included some kind of a battle. He had a funny thing called 'Dwarfs Fighting.' Their idea of a knock-out was pulling each other around by the ears, which stretched enormously. He had a piece for which he paid \$800. This man had a little old painting, which was more than quaint or odd. The design, as it appeared three feet away, was of a young and beautiful woman, very richly dressed. I was charmed with the effect, and withdrew for a better perspective. As I moved away, the magnified draperies merged into a dull mass of color, and I could distinguish through all the finery the bones of a skeleton occupying the place of the figure. It was a very skillful piece of painting, and cost the owner \$1,700. He bought it in Antwerp."

ORNAMENTS, ETC., UPON A FOUNDATION MATERIAL.

This is a process for the production of a foundation material having either ornaments, letters, figures, or characters of any desired or selected design. It is carried out as follows:

Prepare a foundation-piece, of either wood, metal, paper, or any other suitable material, with a good covering of one, two, or more coats of shellac or other varnish. If desired, pigments to produce any desired color may be introduced into the varnish. This coating forms an embedding surface for ornaments, letters, figures, or characters. Next prepare a piece of paper or other suitable protection and covering material, with cementing substance on one of its surfaces, and take any desired ornaments, letters, figures, or characters, made of thin material—such as wood, metal, celluloid, shell, or pearl, or any other suitable material—and apply the same to the cement-coated surface of the paper. If found more convenient or desirable, the ornaments may have the cementing material applied to them instead of its being applied to the paper. When the varnish coat is perfectly dry, the portions are brought together, with the ornaments lying face downward upon the varnish embedding surface, and then either a warm or hot board, warm or hot iron plate, or warm or hot roller or rollers placed upon the upper surface of the paper, and through one or the other of these implements the whole subjected to heat and pressure sufficient to insure melting of the varnish-embedding surface and the embedment of the ornaments into the surface. The protection or covering paper is removed when the ornamented foundation material is used, in order to expose the ornaments to the eye. The heated board or iron plate may be acted upon by a screw, while the roller may be pressed down by springs or manual force while it is rolled over the paper.

Any suitable mode or means for applying pressure may be adopted, as well as any suitable mode of heating the board, plate or roller—as, for instance, the common hand smoothing-iron.

As another way of performing the process and producing foundation material having ornaments upon it, the ornaments may be placed

directly upon the varnish surface without being first fastened to the paper, in which case the paper will be placed upon the ornaments and heat and pressure applied, as in the first instance. This done, the paper will be removed (whenever the manufactured product is brought into use) to expose the ornaments.

The gist of the invention lies in a foundation material, either of wood, metal, paper, or other suitable substance, having a varnish coat, which is allowed to become dry, and the ornaments of any description, or letters, figures, or characters, covered by paper, and the whole united in one body by heat and pressure. As the heated pressing implement softens the varnish, care must be had that it is not used too hot.

The object sought by the heat and pressure is to effect such an embedment of the ornaments into the varnish as will produce ornamented foundation material having a plane surface after the paper covering is removed.

The process may be employed in the production of an entire panel, as follows: A whole panel with border and other adjuncts might be sawed out to show a very rich ornament when pressed into varnish, and the sawed-out parts might be filled with pearl-shell or particles of metal. In such case but little, if any, of the varnish surface remains to be seen if the sawed-out parts are filled out with pearl-shell or other ornamentation, but if they are not filled out the spaces will show the color of the varnish surface.

In carrying out this invention, it will be found that the ornaments to be adopted are almost innumerable, a few of which may be mentioned as instances—to wit, sawed-out ornaments of wood, cut-out ornaments of metal, or ornaments of particles of metal, pearl-shell, and the like.

By using paper as the foundation material, having a dried varnish coating, for receiving the ornaments, a wall-covering consisting of paper, varnish, metal or wood veneer, might be manufactured by following the process; and by pressing thin metal ornaments into dry transparent varnish applied to walnut foundation material, a walnut background will be visible when the paper covering is removed; and by pressing wood veneering into dry varnish applied to metal foundation material, a metal background would be visible when the paper covering is removed.

Wood, metal or composition ornaments can be pressed into a coating of varnish applied to other material serving as a foundation, the wood, metal or composition ornaments to represent either sawed-through or open work, and when pressed into the varnish, to unite into one body the ornament, the varnish coating and the foundation material. Basso-relievo, or raised ornaments, can also be produced by either heating the ornaments and pressing them into the varnish, or by heating the foundation material and coating varnish, or by sawing out wood to a shape required and pressing it by a heated plate into the covering of varnish, and afterward carved.

A transfer consisting of a film of varnish, or, in other words, a varnish veneering, may be transferred to paper or other foundation by heating and pressure.

Transferring of any kind of prints upon a varnish surface by means of heat and pressure, the front being placed upon transfer paper or other common paper not prepared specially. For instance, the print of a newspaper can be transferred, the print adhering to the varnish and the paper being washed with very little difficulty.

Striking Head Lines

Are used to call attention to the fact that this is an advertisement of the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY.

Its EIGHT Trunk Lines Traverse the best portions of NORTHERN ILLINOIS, WISCONSIN, MINNESOTA, DAKOTA and IOWA.

Located directly on its lines are the cities of CHICAGO, MILWAUKEE, LACROSSE, WINONA, ST. PAUL, MINNEAPOLIS, MADISON, PRAIRIE DU CHIEN, MASON CITY, SIOUX CITY, YANETON, ALBERT LEA, ABERDEEN, DUBUQUE, ROCK ISLAND, CEDAR RAPIDS, and COUNCIL BLUFFS, as well as innumerable other principal business centres and favorite resorts; and passengers going West, North, South or East are able to use the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY to the best advantage.

Ticket offices everywhere are supplied with Maps and Time Tables which detail the merits of the line, and agents stand ready to furnish information, and sell tickets at cheapest rates over the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY.

BEADS AND BEAD-MAKING.

"What can I say about beads?" replied a large, pleasant German gentleman, who carries on in Howard street a large business in the importation of those little articles of adornment. "Oh, I could tell you much more on that subject than you would find space to print, and still would not exhaust the curious and interesting things that may be said about beads. How many texts do you think I could find in those old sample books? They were made up in Venice more than one hundred years ago. No such collections are now made. See! There are thousands of varieties, and yet these do not comprise all, even of the Venetian glass beads. Those very large cylindrical beads, like pieces of red sealing wax, were once in great demand for the African trade. Vessels going out from Boston and Baltimore used to take great quantities of them, and the natives of Africa had such a penchant for them that they would exchange their neighbors for them. The Africans are doubtless as fond of red beads now as they were then, but are no longer supplied from Boston and Baltimore. Those red-brown beads, almost as large as pigeons' eggs, are in demand among certain tribes of North American Indians, who wear them in long strings dangling on their hips, to rattle when they dance, and they call them 'hip beads.' Here are certain others, flat disks of chalky white and turquoise blue of various sizes, that are made only for one Indian tribe, and they bear their name—the Nez Percés. The South Sea Islanders have a liking for those square and oblong and flattened cylinder beads, often for the very large ones and those which are curiously decorated with colors. Observe in what an almost endless variety the colors are combined, in what might almost be termed a riotous outburst of barbaric taste, for the delight of two very widely divided orders of beings, the South Sea savages and refined civilized ladies, who at times, in obedience to the dictates of fashion, demand the most outré, bizarre and ugly things imaginable. This is a specimen of English wampum—white, black and with shell marbling. The latter is a very good imitation of the genuine wampum, but it cannot deceive the Indians. They have been swindled so long and so often, in so many ways, that they have become quite sharp, and it is very hard to trick them now. But enough of the old books. We can do no more than dip into them now, just enough to show that beads may lead us a long way in many directions, and having seen so much, let us take a little thought where beads come from, how they are made, and so on.

"Beads are made of many different materials, such as glass, stone, wood, metals, coral, bone, ivory, amber, &c. The coral and amber should properly be classified as jewelry, and may be left out of our study of beads. The amber beads, by the way, are the only ones on which no duty has to be paid. All others bear a duty of 50 per centum ad valorem. The bone and ivory ones are in little demand for anything else than rosaries. The wooden ones are not used for anything, so far as I know, except to make heads for ladies' bonnet pins. Stone beads may as well be put among the jewelry and left there, for there are not many of them. Metal beads come from Paris, and are generally made of steel, either brightly polished or fire-gilt with gold or silver. Sometimes, however, they are made of the precious metals, and then they, too, pass over to the jewelry classification.

"We have left, then, as our main resource for ornamentation of wearing apparel and the per-

son by means of beads—other than those valuable enough to be classed as jewelry—the material glass. The greatest production of glass beads is in Venice, where their manufacture has been a staple industry for a thousand years. It has been attempted in many other places in all parts of the world, but never successfully anywhere else than there, where living is so cheap that an artisan can exist on five cents a day; where labor is proportionately low, and where secrets for the coloring and treatment of glass are possessed that are known nowhere else, and are invaluable for this work. The Venetians make many thousands of different kinds of beads, and I can show you sample cards of plain single colored beads in more than 200 different tints. When you come to the combinations of colors, the varieties they are capable of producing are only limited by the possibilities of human fancy. As an illustration of their cheapness of production, a bunch of 80 strings of small beads, each string six or seven inches long, is sold in Venice for a sum equivalent to two cents and a half of our money. It would cost much more than that simply to string them in this country, to say nothing of material and labor in manufacture.

"The smallest beads made are those most in demand among the Indians of North America, who are the greatest consumers of Venice's product. Beads so small that a threaded needle cannot be passed through them are what the Redskins value most, and for sewing them on deer sinew thread is employed, a material stiff enough to be poked through the beads, yet strong enough to last forever. Few persons have any adequate idea of the quantity of beads the Indians take. The few of them here in New York city use up about 200 pounds a month in making bead-worked moccasins and such things. The Indians haunting the vicinity of Niagara Falls also find employment for a great many, and the quantities that go to the wild Indians in the far West are simply enormous. Traders take them out, and sometimes the government, through the Indian agents, supplies them. With white people, beads come into fashion and go out again, sometimes remaining out for four or five years, but with the Indians they are always in fashion. An importer may do a business of \$100,000 in fine dress-trimming beads, for white people's use, in one year, and the next year do not more than one-fifth as much in them. But those that the Indians want are staple goods. I have in some years imported as high as 300 cases, weighing 400 to 500 pounds each, of beads, 200 of which would go to the Indians. Unluckily, the beads that suit the Indian taste are never in demand among white people. Their preferences are directly opposed. We like beads that sparkle and are brilliant. The Indians will only have opaque colors. Chalk white, dull greens, dead black, orange and lemon are his favorite tints. If he has a red, it must be an earthy, dull red, not a bright one, and transparent beads, or even the finest Bohemian cut beads, with facets shining like those of gems, have no attraction for him. Quite the orthodox aesthete he is in his choice of beads.

"I have seen them make beads in Venice, and a very interesting work it is. A man takes a cylinder of glass, say two inches thick by seven or eight inches long, so hot that it is soft, rolls it smoothly round on a table and punches a hole through it lengthwise with an iron rod. Then two boys seize its ends with pincers and run away rapidly in opposite directions. The faster they run and the further they go before the glass cools so that it will no longer draw, the

finer will be the rod they will pull it out to, and thin as it may be, that rod will be hollow all the way through. But it will not all be of the same thickness. In the centre it will be very thin, and toward the ends will be less so. Therefore the workman breaks it up into short rods and carefully sorts them to get together those of like diameter. Then the beads are cut from the ends of those rods, a handful of them at a time, as you would cut off bits from a bunch of grass. How they do that I never quite understood. There is something in it I did not learn, for the rods are cold. The beads are cut off without smashing even the most delicate, and with greatest accuracy in length. All I can say is, they do it, and for the proof there are the beads. Now, to smooth the ends of those little bits, which have sharp edges, quantities of them are put in big drums with ashes, and at a pretty high temperature are revolved there until they are round and smooth. If they are to be sold simply as round 'seed' beads they are at this point finished, and are put upon strings by children. The rapidity with which that is done is astonishing. Each child has before it a great pile of the beads, and in each hand holds four or five long threaded needles, which are rapidly thrust into the pile until each needle is full, when the beads are pushed back on the threads. An attempt has been made to introduce unstrung beads, but consumers would not have them. The stringing is the practical evidence that each bead is perfect, and that is demanded."—*New York Sun*.

POSTAL STATISTICS.

The United States government has had printed a chart of postal statistics covering the period since the organization of the government in 1789. Like all documents which afford an opportunity for comparison between the early beginnings of the institutions of the country and their present expansion, the chart presents a striking view of the immense development which has been going on in the intervening time. In 1790 there were only 75 post-offices in the United States; in 1882 there were 46,231. The extent of post-routes has grown from 1,875 miles in 1790 to 343,618 miles in 1882. The revenues of the department have grown from \$37,935 in 1790 to \$41,883,005 in 1882, and the expenditures have increased from \$32,140 in 1790 to 40,482,021 in 1882. The total salaries paid to postmasters have increased during the same period from \$8,198 to \$10,134,091, and the amount paid for transportation of the mails has grown from \$22,081 to \$22,846,112. A most remarkable increase is noted in the employment of domestic money orders. The amount of these issued in 1865 was \$1,360,122; in 1882 the total issue amounted to \$113,400,118.

THE KERNER.

\$1.

IT is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

M. dal of Honor and Perfection

At PARIS, 1878.

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recordors, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XV.--NO. 4.

NEW YORK, JANUARY 24, 1884.

WHOLE NO. 448.

Correspondence.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE OF THE LOCKWOOD PRESS,
49 Federal Street,
BOSTON, January 23, 1884.

Trade in the stationery line still continues on an even tenor; not as active as it might be, but much better than is expected for so early in the year. Collections are reported as being very good, although there are cases where extensions have to be granted. The enterprising drummer representing, as he always does, the most progressive house in his line, must place his goods even if the dealer does over-stock himself, on a long credit. But the long credit soon comes to an end, bills are due and the goods remain upon the shelves unsold, so an extension is asked and unless it is granted a failure ensues. This business of forcing sales and over-stocking an unwilling customer is a bad policy, injurious both to the jobber and to the small dealer. How long it will be continued is a question. A large jobber, with whom I talked upon the subject, admitted that it was a wrong system of doing business, but, said he, "I cannot afford to start a reform; competition has introduced this system and I must compete. It may end in failure, but we hope for the best, and so long as my neighbor's force sales and date bills ahead I must do so or shut up shop." That is the argument they all present and the system of over-selling and dating ahead still runs on.

George H. Atwood, who for the past five years represented the business interests of Charles Pollock in Chicago, and who with Mr. Downs succeeds to the art novelty business of the house, has lately returned from the West, and is now busily engaged in getting things into systematic shape. Both Mr. Atwood and Mr. Downs are well known to the trade, as they have been connected with the house of Charles Pollock for a number of years. Truvelers representing Atwood & Downs are now on the road with an elegant line of valentines, Easter goods and art novelties. Charles Pollock still remains at his old quarters on Washington street, and proposes in future to give his entire time to the importing and publishing of photographs, for which there is a good demand. Trautmann's steel-plate portraits of authors, poets and the presidents, which were introduced by Mr. Pollock, continue to meet with ready sale.

The Russell Paper Company reports that orders for its blotting papers so far this year are far more numerous than during the early days of last year. The company's mills at Lawrence

are turning out larger quantities than ever. Orders are coming in very freely, nor are they confined to the local trade, but they come from distant centres, and even from countries beyond the water. The quality of the Russell blottings is still maintained, and it is because of its excellence that this blotting paper has such a hold upon the trade throughout the country.

With the number of letter-files in the market, several of which are so well devised for counting-room use, one would hardly suppose that inventive genius could study out a new system; but Gilman's "Challenge" letter-file is quite an innovation, and it possesses such merit as to commend it to the attention of all. The case, in which are the several divisions for filing, occupies only a very small space upon the wall to which it is attached. When the cover is opened all of the filing divisions are immediately accessible, and letters can be very quickly filed away. For rapid filing and speedy reference the "Challenge" letter-file is specially recommended, as much time is saved by its use. Although only lately introduced, large numbers of it have been placed in counting-rooms in this city, and the users give valuable testimony to its superiority. The only trouble with the company has been its inability to supply the trade as fast as wanted, but the manufacturing facilities have been largely increased, and orders will now be filled without delay.

For a long time we have been reading about the "False Prophet," but without much interest. Now, however, that gum-drops are getting scarce, and our mucilage thin, we are beginning to take more interest in the "war in Egypt." With some people the short supply of gum-arabic is causing a little anxiety, for the price is going up to fabulous figures. William A. Davis, manufacturer of the United States Treasury mucilage, uses large quantities of gum-arabic in his mucilaginous preparations, and I called upon that gentleman to ascertain how his business is being affected. "Well," said Mr. Davis, "the short supply of gum is a more serious matter than some people suppose, and there are some who are inclined to think the whole matter a hoax. I have issued a circular to the trade, setting forth the causes of the advance in gum and the probable effect the shortage will have upon the price of mucilage, which is certain to advance. My extensive trade compels me to carry a heavy stock of prepared mucilage and raw gum, so that as yet I am not forced to increase the price of my mucilage. As the advance in gum becomes known to the trade orders for mucilage increase, and I am filling large orders now from all parts of the country. Many of these orders would have been delayed

for a month had it not been for the publicity given the gum question. Dealers are getting a little anxious and are ordering early and largely, for the trade know that my mucilage is the best in the market and that it will keep." Mr. Davis assures me, that no matter to what figures gum may advance he will not lower the standard of his preparations, but will maintain their long-established excellence. He has not yet advanced the price of mucilage, but may shortly be compelled to do so in common with other manufacturers. Old quotations have been canceled, so the trade will do well to order early while present prices rule.

Colonel Albert Clarke has sold the *Saturday Times* and the *Yankee Blade* to Edward C. Davis and H. Irving Dillenback. These gentlemen have long been associated with the colonel in conducting these papers—Mr. Davis in the business department and Mr. Dillenback in the editorial. These gentlemen are well qualified for the responsibilities of proprietorship, and the fraternity wish them every success.

A. L. D.

CINCINNATI NEWS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, January 21, 1884.

Another raid of the storm king has frozen up business. The thermometer marked zero here this morning, but reports from thirty-five miles north of here represent the mercury twenty-two below zero, and these reports are confirmed by others on the same parallel of latitude north and east from here. This is freezing up business. But it is an ill wind that blows good to nobody. The ice men and coal dealers are gathering a harvest, and the weather is causing a demand for boots and shoes and for overcoats and heavy winter wear. Stationers are not getting much immediate good out of it. But people are reading, and that helps the booksellers and newspapers.

Taking a general survey of trade from surface indications and comparing these with the testimony of traveling salesmen and business men, one is forced to admit that it is dull almost to stagnation. Business men are hopeful, as a rule, that better times will come with the early spring.

If anyone takes a gloomy view of the situation, he doesn't let that fact be known. Collections are reported fairly good. Here in Cincinnati money is paid out freely for amusements. Five theatres, one museum and several variety shows have been flourishing all along, except in the very worst of the winter weather. And now tickets are on sale this week for Henry

Irving and for Abbey's and Mapleson's opera festivals, both of which commence the same week, February 11, within two blocks of each other, one at Music Hall, the other at Heuck's new Opera House. These tickets selling for the season only have gone off rapidly.

It has not been usual for money to go out so freely for such purposes in really dull times.

The wheat market and the corn market have tended downward right along, sympathizing with the ruling market at Chicago. The cold weather, which favors slaughtering, has kept the price of hogs up. At all events the price has been firm, which may have been caused in part by light receipts. Manufacturing industries in the line of carriages and of boots and shoes, whose wont is to be very active at this season, are flat now. The rolling mills are all running full forces on full time and selling their product as fast as they turn it out. Some iron mill owners say they are making money, others hint that the present business will not justify declaring dividends. There is one class of manufacturers here whose products have not fluctuated, and that is the whisky distillers. They furnish the rare example of manufacturers forming a combination to limit production and regulate prices, and carrying out their purpose successfully for a term of years. This combination includes all the distillers west of the Alleghenies and north of the Ohio River. This general state of business is regarded anomalous by experts. They fail to agree upon an adequate cause for it, though all observe that it was an immediate successor to times when speculation in grains and stocks ran high all over the country.

Paper dealers here keep a stiff upper lip. Manufacturers of wrapping paper are having a good time. Some other grades of paper are not bringing the profits they should yield. Manufacturers of mercantile stationery are less crowded with orders than they were at the corresponding time one year ago. In the matter of advertising there is less call than usual for pamphlet work. Theatrical printing has furnished manufacturers in this line a good share of work. The weather, along with the season of the year, form just now special causes for dullness. Sales of fancy stationery keep up quite well, but there is a falling off in what for want of a better term might be called society stationery. Cards of invitation and fancy menu cards have been in better request in former seasons than in this one. In the way of staple stationery sales have been improved by the reduction of postage on letters, trivial as that cause may seem.

Now, what seems to be puzzling all sorts of business men—stationers included—is how to adjust their business for the spring and summer seasons. With the present situation a riddle the future is obscurity personified. It is not precisely dark in the sense of being gloomy—the business future isn't—but it defies the vision of the keenest expert to penetrate it and discern what is hidden therein. PRINCE WILLIAM.

AN ELASTIC LACQUER.

Van Nostrand's Magazine says a lacquer of great elasticity, perfectly supple and not liable to peel off, is made in the following manner: About 120 pounds of oil varnish are heated in one vessel and 33 pounds of quicklime are put into 22 pounds of water in another. As soon as the lime causes an effervescence 55 pounds of melted india-rubber are added. This mixture is stirred and then poured into the vessel of hot varnish. The whole is instantly stirred, so that

the ingredients may become thoroughly incorporated. Straining and cooling complete the process. When required for use it is thinned with the necessary quantity of varnish, and applied hot or cold to wood, iron, walls, waterproof cloth, paper, &c.

TASTE IN TYPOGRAPHY.

Though the word scarcely admits of the idea of variety of style, whether good or bad, it is pretty generally so understood. The proper use of the word is to denote the sensation produced on the tongue as to distinguishing agreeable flavors. Figuratively, we may use the term in perceiving agreeable sounds, colors or forms. In this sense a printer ought to try to educate himself to a high degree of excellence in discerning not only what is agreeable to his own eye, but to that of others. In other words, he should be able to appreciate a variety of tastes. The artist, whether he be a painter, a photographer or a printer, who can see beauty only in one style of art, or the musician who is always humming the same tune, can satisfy but few except himself. There may be but one perfect style of beauty in each department, and it may be possible for a man to attain to it, but it is certain that many more whose tastes may have had some cultivation are still unable to appreciate it. A printer, therefore, while he should strive to elevate his art by educating his customers up to his standard, should not seek to go so far above that they cannot follow. We have sometimes listened to what was termed classical music as produced by a highly-educated performer on the piano, and were told that it was very fine, but following it came "Way down upon the Swanee River," performed on the mouth harp by a lad with much wind-power and a little common music in his soul, and we observed that the latter gave the greater satisfaction to the uneducated audience.

There are hundreds of little pleasing effects that can be produced with type, line, curve and color, and the artist who would succeed in an eminent degree must study them carefully, having in mind at all times not only his ideal of perfection, but a desire to educate and please his patrons.

Tastes change, and what were once popular have in time gone out of fashion, and by-and-by have been renewed, generally, however, returning with more delicate shape and detail. Some of the old styles of type, like some of the ancient bric-a-brac, are at this time considered very fine, and so indeed they are. They were produced by the artist, and now need only the artist's educated touch to adapt them to modern educated taste.—*Inland Printer*.

THE FIRST WATCH.

After long experimenting and many disappointments, Peter Hele, an ingenious mechanic of Nuremburg, produced in 1490 his first and famous "pocket clock." It was in oval shape, and hence gave rise to the name of "Nuremburg Egg," by which watches were for some time called. This watch was six inches wide and nine inches long. There is no record of how much it weighed. Jacob Zech, of Prague, made a famous watch in 1525. It still exists, the case being covered with a wealth of curious emblematical decorations and engraving. It is in a circular case of gilt brass, nine and one-quarter inches in diameter and five inches high. In the days of Henry VIII. of England, watches of curious construction were made for monarchs

and for a few of the wealthy, but were too costly to come into general use. In the time of Queen Elizabeth many of the people about her court wore watches, not one in a dozen of which was able to keep time correctly. Most of these watches made up in external embellishment what they lacked in accuracy as timekeepers.

Switzerland became in time the centre of the watch-making industry. One Charles Cusin went, 1487, from Autun, in Burgundy, to escape religious persecution. He established himself at Geneva, and is believed to have been the first Swiss watchmaker. His watches were clumsy and heavy, but sold for their weight in gold. They had the cumbrous fusee chain, and no two of them would keep time together. The next step in watch-making was the invention of the coiled hair-spring for the balance-wheel.

The honor of this invention is divided between Huyghens, the great Dutch astronomer, and Dr. Hooke, who, about 1658, presented to Charles II., of England, a watch containing this improvement. About this time Nicolas Faccio, of Geneva, learned how to pierce rubies and other gems with minute holes, so as to use them for bearings. Before this time pivots had run in metal bearings, and suffered from the wear. The introduction of the jewels made the watch a radical improvement on what it had been, both in accuracy and durability.

Next came the compensation balance, introduced somewhat over a century ago, Harrison and Berthoud both claiming the honor of its invention. Its circumference was in two sections, the ends of which were fastened to a cross-bar of steel. The outer rim was of brass and the inner of steel. The contraction and expansion of the two metals compensated exactly, and secured accuracy. Prior to this time even the best of watches had been very inaccurate things. Some of them would vary as much as half an hour a day.

Between the Swiss and the English the competition in watch-making has been lively. Systematic division of labor and the very low price of living has done very much for the industry of watch-making in Switzerland. Years ago the Swiss overran the English market with their watches, which were lighter and far less clumsy than the English, and quite as accurate.

CURIOSITIES OF TRADE.

The demand for eye-stones has fallen off very largely, but they are still kept and sold in considerable quantities. The eye-stone will clear the eye. There is no doubt about that, but its movements are regulated by its shape and by a formation on the flat side or the base of the stone similar to a blade in a turbine water-wheel. The whole resembles a shell just begun—before the cavity was formed, if shells were so formed, but are not. The stone is composed of lime, and vinegar or any acid by its action upon it causes motion. The stones are found on the seashore on the Pacific coast. Sailors gather them by the quart and vend in trade centres. The price is 10 cents.

Bloodstones are also called for, not the kind known to seal-rings and sleeve-buttons, but glass stones or beads of the color of blood, dark red. These are worn to prevent the nose-bleed, although the old plan to prevent, namely, to keep the nose out of other persons' business, is in use still and works well. With a string through the glass bead and the string around the owner's neck the liability to nose-bleed is removed. The bloodstones, some of them, come from Germany.—*Exx*.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

NEW PATENTS.

No. 289,892. Printed Blank, Form, &c.—John O. Cole, Portsmouth, Ohio.

The blank has a backing or briefing section arranged at its side, said section being provided with a space which, when filled in, registers with and forms a portion of the matter in the body of the blank, and also becomes a part of the backing or briefing of the paper when it is folded.

No. 289,917. Manufacture of Ornaments, Letters, Figures, or Characters upon a Foundation Material.—Frederick Koskul, St. Louis, Mo.

The process of producing embedded ornaments, letters, figures or characters upon foundation material, consisting in applying a coat or coats of varnish upon said material, allowing this varnish to become dry, applying the ornaments upon the varnish beneath a covering of fibrous material, and applying heat and pressure upon the mass, and then removing the covering to expose the ornaments, substantially as described.

No. 289,923. Mechanism for Cutting Paper.—George Miles, Wellesley Hills, Mass.

No. 289,933. Writing-Paper Tablet.—Lewis G. Reynolds, Dayton, Ohio.

No. 289,951. Photographic Developing Pan or Tray.—W. Irving Adams, Montclair, N. J.

A photograph pan or tray made of a single piece of glass or like material, having an opening extending from one end toward but not quite to the other end, thereby leaving a lip at the other end, said opening being adapted to permit the introduction of a photographic plate sideways into the pan or tray, so that when introduced it will extend under the lip, whereby there is formed a well, which, when the pan or tray is stood on end, will hold the liquid used in developing photographic plates.

No. 289,983. Petter-Copying Press.—Ezra Cope, Hamilton, Ohio.

The combination, in a copying-press, of the bed and platen and an absorbent web mounted between them.

No. 290,004. Paper-Cutting Machine.—Edward P. Donnell, Chicago, Ill.

1. In a paper-cutter, the combination, with the clamp-bar of a locking arm or cam falling behind the clamp as it is drawn down, and provided with means for unlocking it, when desired.
2. In a paper-cutter, the combination, with the clamp-bar having rods extending downward through the frame, of a foot-treadle journaled in the lower ends of this rod and connected by a toggle to the main frame, and provided with a weighted arm adapted to break the toggle, whereby the clamp is drawn down by foot-power and thrown up automatically.

No. 290,018. Paper Box.—Daniel J. Ferry, Philadelphia, Pa.

In a paper box, whose ends are closed by flaps folding upon each other, two opposite flaps, one of which is provided with a slot and the other with a tongue, loose at the outer end and integral with the flap at the inner end, the latter flap having a portion of the paper left joining the two sides thereof over the loose end of the tongue.

No. 290,102. Perforating Machine.—Alfred Partidge, Chicago, Ill., assignor to Edward P. Donnell, same place.

In a perforating machine, a needle-bar or

block, formed in sections and adapted to be adjusted to and from the work, whereby part of the needles may be rendered inoperative at the will of the operator.

No. 290,169. Book Support.—Albert Bell, Reisters-town, Md.

No. 290,178. Lead or Crayon Holder.—Myer Dittenhoefer, New York, N. Y., assignor to Henry Berolzheimer, same place.

The jaws which grasp the lead or crayon are lined with an elastic substance.

No. 290,179. Advertising Letter-Paper and Envelope.—François Pangaert D'Opdorp, Brussels, Belgium.

As an improved article of manufacture, a sheet provided with a blank space, in connection with two or more spaces at its sides and bottom containing advertisements, which sheet is further provided with perforated lines for detaching the blank space and its adjoining side spaces from the rest of the spaces and sheet.

No. 290,185. Toy.—Edward R. Ives, Bridgeport, Conn., assignor to himself and Cornelius Blakeslee and Edward G. Williams, both of Brooklyn, N. Y.

The combination, with a wheeled vehicle, of shafts or a pole so connected with the vehicle that they or it will be supported against downward movement solely by the vehicle, an animal or animals pivotally connected with the shafts or pole, so as to be supported thereby, an axle or shaft which will derive a rotary motion from wheels forming part of the vehicle as said wheels roll over the ground, and provided with a crank or equivalent device, and a connection between said crank or device and the rear portion of the animal or animals, whereby the vehicle, being made the sole support of the shafts or pole, serves to support the animal or animals and also to transmit a rocking motion to the animal or animals.

No. 290,191. Lead or Crayon Holder.—Benjamin G. Platt, Bayonne, assignor to James M. Clark, Jersey City, N. J.

No. 290,201. Printing-Type.—Linn Boyd Benton, Milwaukee, Wis.

A font of types the bodies of the characters of which are runningwise all multiples of a unit, and the spaces of which are similarly equal to said unit and multiples thereof.

No. 290,210. Spacing-Instrument for Drawing.—Geo. P. Conant, Geneva Lake, Wis., assignor of one-half to John F. Conant, same place.

In a spacing-instrument, a ruling-blade provided with a slotted arm having an adjustable gage and a finger-hold, in combination with a box in which the slotted arm moves, provided with a projection engaging with and moving in said slot, and having a thumb-hole.

No. 290,217. Machine for Retouching Photographic Negatives.—Jay Densmore, Niles, Mich.

No. 290,223. Envelope or Other Box.—Frank W. Field, Springfield, Mass.

In a paper or other box, a movable abutment substantially of the form of one end of the box, having an angular brace at each end thereof, and means for attaching said abutment to the interior of the box, whereby the abutment is maintained in an upright position and is free to be moved to different positions in the box.

No. 290,267. Printing-Press.—Geo. W. Prouty, Boston, Mass., assignor to the Prouty Press Company, Hartford, Conn.

The combination, in a printing-press, of a type-bed and a platen both mounted upon and adapted to be vibrated about the same shaft mounted in fixed bearings, a cam arranged to act upon and impart an intermittent motion to said platen, a pair of cranks mounted upon and

operated by the shaft of said cam, and a pair of draw-bars connecting said cranks and the type-bed.

No. 290,280. Calendar.—Horace Taylor, Canandaigua, N. Y.

1. A calendar-card having the years arranged in upright columns, each column comprising a set of twenty-eight years, and the day of the week on which the years begin placed by the side of the years, the column in which each century ends being broken off, the next century beginning in the succeeding column. 2. A calendar-card having the months with their respective number of days arranged in the centre, and the columns of years with the days of the week on which the years begin placed on each side of the months, the days of the week being arranged in columns and in relation to the years. 3. A sliding scale having the days of the week printed thereon and arranged above the months, and sliding in clasps secured to the calendar.

No. 290,291. Pencil-Holder.—Edward Tyrrell, Cincinnati, Ohio.

No. 291,301. Printing-Press.—George Williamson, Cambridge, assignor to J. O. Hayden, Somerville, and Walter G. Chase, Brookline, Mass.

No. 290,303. Machine for Gilding Cards.—Charles A. Wright, Philadelphia, Pa.

A gilding-wheel formed of a wheel provided on its periphery or circumference with a series of clamps, the jaws of which clamp in lines radiating substantially from a point within the supporting-wheel outward.

DESIGN.

No. 14,465. Calendar-Card.—Herman Toasperm, Jr., Brooklyn, N. Y. Term of patent, $3\frac{1}{4}$ years.

REISSUE.

No. 10,424. Galley Type-Lock.—Samuel D. Webb, Washington, D. C., assignor, by mesne assignments, of two-thirds to Samuel C. Hill, same place. Original No. 274,681, dated March 27, 1883.

TRADE-MARKS.

No. 10,782. Lead-Pencils.—Gilbert & Co., Givet, Ardennes, France.

"The firm-name of the registrants, 'Gilbert & Cie.'"

No. 10,783. Lead-Pencils.—Gilbert & Co., Givet, Ardennes, France.

"The word 'Chinois.'"

BRITISH PLAYING-CARD MANUFACTURE.

Playing-card making is an industry that in England is in comparatively few hands; and the manufacture is, moreover, almost exclusively confined to England, there being only one maker in Ireland, and none in Scotland, in which latter kingdom, indeed, the trade seems never to have taken root. *The Printing Times* states: "The number of makers and individual partners in England, which stood in 1881-82 at fifteen, had increased in 1881-83 to nineteen. Happily there has also been a considerable increase in the number of packs manufactured, last year's total being 1,216,960, as compared with 1,150,560 in 1881-82. The stamp duty paid thereon was £15,212 last year, and £14,332 in the preceding twelvemonth. Hitherto the official playing-card wrappers have been supplied by a private firm, but the Commissioners of Inland Revenue have now made arrangements to produce these wrappers in the Stamping Department at Somerset House, where certain confidential revenue printing is already carried on. In order to ensure greater security, the stamps are now printed on water-marked paper.

"ACME"

PADS AND BLOTTER TABLETS.

We desire to call the attention of the Trade to the most DESIRABLE and SALEABLE goods on the market.

WHITE DESK OR SCRATCH PADS,

Made from a hard calendered, engine-sized, CREAM-LAID paper, bound on end and side with our RED ELASTIC COMPOSITION.
Put up in Nine Sizes, $2\frac{1}{4} \times 4$ to 8×12 inches.

"YE KNICKERBOCKER" PERFORATED TABLET.—A LOW-PRICED Scratch Pad, made from well-sized book paper, with Antique Card-Board Cover, each sheet perforated and PERMANENTLY BOUND at the top. Made in Five Sizes, $2\frac{3}{4} \times 4\frac{1}{2}$ to $5\frac{3}{8} \times 9$ inches; Two Sizes, PERFORATED IN THE MIDDLE for Cash Checks.

"YE KNICKERBOCKER" BLOTTER TABLET.—Intended as a Low-Priced Blotter Tablet, and bound with neat Antique Covers. Made from Fine Quality of Cream-Laid Paper, both ruled and plain, and put up in COMMERCIAL NOTE, PACKET NOTE and CONGRESS LETTER. For Educational purposes they have no equal.

E. P. DONNELL & CO., Chicago, Ill..

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

COLLECTING SEALS.

In Germany, where all documents and important letters bear a seal, collections are numerous and well classified. In a general way, impressions may be classified into seals of noble families, seals of states and cities, and seals of religious and secular institutions. Some of the German state seals are of enormous size, and are inclosed in large wooden boxes and suspended from the parchment by ribbons. A handy way to get a duplicate is to press some soft putty over the seal, and so get a die. The putty having been removed and hardened, sealing wax may be poured over it, and when the wax has cooled the putty may be broken away, when a fair duplicate will be obtained. The seal collector will often acquire duplicates, and these he of course exchanges with other collectors, and sometimes gets rare and quaint impressions in return.

At the sale in June last of Major Horner's effects, there was an interesting collection of replicas of the great seals of England, from Offa, King of Mercia, to Queen Victoria. These numbered 164, and were mounted on cardboard. Offa's Dyke, which runs from Seachley to Flintshire, existed when the Romans were in England, and is crossed by five Roman roads.

In many of the seals of the German township the Prussian eagle forms the most prominent feature. Others are more original, such as an angel riding on a lizard, a knight in heavy armor on horseback, a city gate, a church on a mountain side, and a swan gliding through the water. One of the oldest of these seals is of the city of Herborn, in Nassau, dated 1281, and represents a bishop on his throne receiving homage from citizens. Above are five castles, round about the inscription, and beneath the date 1281. Another curious impression dates from 1727, and is the seal of the blacksmiths and wagon-makers' union of a large city. The seal consists of a wheel, a horseshoe and a hammer, besides other implements. One notable seal dates from 1623. The centre piece is a phoenix rising from the ashes. The Latin inscription translated reads, "Seal of the illustrious college of Hanover." A design that is clear cut and very effective is the seal of the Bavarian city Aschaffenburg; another, which is about a quarter of an inch in thickness, represents the head of the Virgin. Around the head are the words "Regina Angelorum." The impression gives each feature perfectly, especially the fine lines about the lips and chin.

For those who are not inclined to incur the expense attending numismatic collections, seals are an interesting and inexpensive substitute.—*British and Colonial Printer and Stationer.*

THE UTILITY OF POSTAL NOTES.

Postmaster Pearson states that country folks find postal notes convenient in paying for small purchases made in this city by mail.

For the week ending January 12, the number of postal notes received at the New York Post-Office was 26,840, amounting to \$50,387.44, while the notes issued hardly reached a third of that number. The total number of transactions in this department for the same week was 63,316, involving \$2,644,449.40. In the first week of their issue in September last 9,535 notes, on which \$20,366.99 were paid, were received at the Post-Office in this city. Since that date the number has been trebled. From September 3, 1883, to January 1, there were issued 182,937 postal notes for amounts aggregating \$338,994.11.

Prejudice is the reason of fools.—*Voltaire.*

L. PRANG & CO.'S

1884. EASTER CARDS. 1884.

FOR THE COMING EASTER SEASON we have prepared a line of Cards and Silk Novelties, which we are confident will compare favorably with our previous efforts, and will meet with a ready sale. The following Artists are among the contributors to our line:

Miss FIDELIA BRIDGES,
Miss L. B. HUMPHREY,
Mrs. O. E. WHITNEY,

Miss L. B. COMINS,
Mrs. E. T. FISHER,
Miss ALICE C. SWAN,
Etc., Etc.

W. HAMILTON GIBSON,
WALTER SATTERLEE,
F. SCHUYLER MATHEWS,

Among the Cards of the regular line we would mention the following series as of special merit and attractiveness:

- No. 705.—TRIANGULAR FLOWER CARDS, by MRS. O. E. WHITNEY.
- No. 711.—MOVABLE SHAPED CROSS (figure design), by Miss L. B. HUMPHREY.
- No. 712.—BIRDS, by Miss FIDELIA BRIDGES. A very attractive series.
- No. 713.—FLOWERS ON PURPLE GROUND, by MRS. O. E. WHITNEY. A gorgeous series.
- No. 714.—FIGURE DESIGNS, by WALTER SATTERLEE.
- No. 715.—BUTTERFLY DESIGN, by W. HAMILTON GIBSON. This is emblematic of the Resurrection, and we think one of the most Striking Easter Cards ever published.
- No. 716.—EASTER LILIES, by Mrs. E. T. FISHER. A very chaste and appropriate card.
- No. 717F.—WISTERIA EASTER CROSS. A fitting companion card to our last year's Water-Lily Cross, which proved so popular.

— BESIDES THESE, SPECIAL ATTENTION IS CALLED TO OUR —

SATIN ART PRINTS FOR EASTER,

Consisting of appropriate Flower and Figure designs. Our Satin Art Prints are put up in the following styles:

"A" STYLE.—A richly fringed tinted Mount, with cord and tassels for hanging.

PLUSH MOUNTS.—Fine mounts, made of rich plush of various appropriate colors, with easel back.

"B" MOUNT.—An exquisite Satin Mount of various colors, with extra fine quality shaded triple fringe, satin ribbons and bow, cord and tassels for hanging.

"C" MOUNT is a fine combination of rich plush and satin in contrasting colors, with cord and ribbon, easel back.

"D" MOUNT is similar to the "C" Mount, with the addition of extra fine quality scalloped silk fringe trimming and satin bow, easel back.

The sale of our Satin Art Prints have heretofore been very large, and our specialties in this line for Easter will, no doubt, meet with a ready sale. Sample Books are now in the hands of our Travelers.

We would urge our friends to send in their specified orders as soon as possible, to avoid delays in the filling of orders.

Our extensive line of BIRTHDAY CARDS has received several attractive additions, and we have also issued SEVERAL new series of SCRIPTURE TEXT-CARDS.

 PRICE LISTS OF EASTER CARDS ARE NOW READY.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Albert Clark, publisher, Boston, Mass., has sold out.

W. J. Boese, stationer, San Francisco, Cal., has sold out.

John Duff, stationer, &c., Urbana, Ohio, has sold out to M. L. Duff.

R. N. Clagett, bookseller, San Antonio, Tex., has sold out his business.

B. S. Whitehead & Co., printers, Newark, N. J., have dissolved partnership.

A. C. Lowery, publisher of the *Courier*, Georgetown, N. M., will remove to Kingston.

H. G. McWilliams, stationer, Lowell, Mich., has been damaged \$200 by fire. Not insured.

Aug. Otto Lavidis, bookseller and stationer, Racine, Wis., has been closed out by the sheriff.

Charles S. Case, manufacturer of paper pails, &c., Binghamton, N. Y., has been burned out; fully insured.

Pitcher & Wise, printers, Philadelphia, Pa., have dissolved partnership. Wise & Van Horn succeed to the business.

The *Spectator* printing-office, at Hamilton, Ont., was burned this morning. The loss is \$50,000; insurance, \$21,000.

Charles W. Holmes, dealer in stationery and news, Norristown, Pa., has sold out to H. C. Hughes and E. E. M. Evans.

The style of J. Meyer & Co., importers and wholesale dealers in toys, Philadelphia, Pa., should be Meyer & Schoenemann.

Stone Brothers, paper-stock dealers, &c., Cleveland, Ohio, have removed their office to 70 and 72 Merwin street, in that city.

The Springfield Rubber Type Company, Springfield, Mass., has been dissolved. Charles P. Crossman succeeds to the business.

H. M. Colton has retired from the Berkshire Valley Paper Company, Pittsfield, Mass., and D. B. Colton has been admitted to the firm.

O. T. Porter, publisher of the *Herald*, Albany, Ore., has admitted D. M. Jones to partnership. The style of the new firm is Porter & Jones.

Garrett & Co., booksellers and stationers, Pittsfield, Ill., have dissolved partnership. The business is now carried on by Mattie A. Garrett.

A dissolution has taken place in the firm of Wood & Bancroft, stationers, Wilmington, Del. William Bancroft continues the business under the same firm name.

Dr. Edward J. Bermingham, doing business as Bermingham & Co., medical book publisher, No. 28 Union square, has made an assignment to Frederick S. Lyons, M. D., preferring claims to the amount of \$18,322.13, the largest of which is to Miss Bermingham for \$9,527.

J. H. Bufford's Sons have begun the preparation of a line of satin art prints for the Easter, valentine and birthday card trade. This is the first attempt of this firm to produce these goods. The line will embrace a large number of embossed satin cards, all of which will be made up in the most artistic designs.

A few days after the firm of A. & E. Wallach, of this city, had made an assignment, for the benefit of creditors, to Frederick Lewis, in September last, several cases of fans that had been consigned to the firm by Simon Strahlheim and others, of Paris, France, arrived here. Before they were claimed and entered at the Custom House by Assignee Lewis the agents of the consignors gave notice of their stoppage *in transitu*. Under the United States law only the consignees or their representatives could enter the goods at the Custom House. Assignee Lewis refused to enter them, so that the consignors could obtain possession of them. A suit in equity was then begun by the consignors, through Koones & Goldman, to compel A. & E. Wallach's assignee to enter the goods, the plaintiffs being willing to pay all charges therefor, to have the possession of the goods awarded to the plaintiffs, to restrain the defendants from disposing of the bills of lading, &c., and to have a receiver of the goods appointed pending the litigation. In this suit the plaintiffs procured a preliminary injunction restraining the defendants from in any way disposing of the goods. In the Common Pleas, Chambers, this injunction was dissolved, and a motion for a receiver was denied. An appeal was taken, and the General Term has reversed the order below, holding that the suit was properly brought in equity, and that the plaintiffs were entitled to an injunction *pendente lite*.

Alling & Cory, paper dealers, Rochester, have moved into new quarters, located at the corner of Exchange and Wilber streets. The building is five stories high, handsomely fitted up, and the various departments of the business are arranged with a view to facilitate work, the several lines of goods which the firm carries being separate. New and improved machinery add to the facilities for business. The firm consists of Wm. Alling, David Cory and Joseph Alling, and is a leading house in the paper trade. The senior partner, Wm. Alling, will celebrate his semi-centennial anniversary as a business man in April next.

The "Gollner" stylographic pen is a new thing in fountain pens with a stylographic point. It is constructed of a drawn glass tube, one end of which is brought to a fine, smooth point, which being packed with filtering cotton prevents the stopping up of the point by sediment in the ink. The Gollner pen is, perhaps, the cheapest thing of the kind in the market, and many leading stationers and news companies have already taken hold of it.

Among the tradesmen who have been in town during the past few days are: B. F. Wade, of B. F. Wade & Co., Toledo, Ohio; R. D. Patterson, of the R. D. Patterson Stationery Company, St. Louis, Mo.; James Youngs, Bridgeport, Conn.; James Buckley, New Orleans, La.; Mr. Krite, of St. Louis, Mo.

An important circular and information of value to every dealer in stationery, notions and drugs in the country has just been issued by William A. Davis, Boston, Mass. Those who have not received a copy should procure one at once.

Searing & Hyde is a new stationery firm which has just fitted up a very attractive establishment at No. 40 Exchange place, New York city. Mr. Searing was formerly associated with F. F. Taylor in the stationery business.

The R. H. Smith Manufacturing Company, which succeeds R. H. Smith & Co., manufacturers of rubber types, Springfield, Mass., has been incorporated with a capital of \$30,000.

Phil. Bohnett, printer, Cincinnati, Ohio, has assigned.

Warren J. Robinson, printer, Boston, Mass., has been attached.

John S. Carter, dealer in periodicals, Waterville, Me., is dead.

M. Thompson, printer, Severy, Kan., has sold out to R. H. Smith.

The Valencia County *Vindicator*, Los Lunas, N. M., has suspended.

M. Gore, publisher, Orlando, Fla., has been burned out. Not insured.

A. Mueller & Co. have succeeded M. Wolf, paper-box manufacturer, St. Louis, Mo.

Williams & Wesley, publishers of the *Enterprise*, Attleboro, Mass., has been burned out.

M. C. Humaston, toy dealer, &c., Terre Haute, Ind., has sold out to Mrs. M. M. Riddle.

C. V. Smith, publisher of the *Republican*, Centreville, Mich., has sold out to S. D. Crane.

Charles A. Kiel, bookseller and stationer, Tecumseh, Mich., has been burned out; insured.

Theo. Faulwetter, toy dealer, Louisville, Ky., has made an assignment to the Fidelity Trust Company.

John A. Marcus, dealer in stationery and fancy goods, Philadelphia, Pa., has been sold out by the sheriff.

The *Daily Democrat* Publishing Company, Cheyenne, Wyo., has been incorporated with a capital stock of \$10,000.

M. W. Dowd & Co., printers, Winchester, Conn., have dissolved partnership. The business is continued by M. W. Dowd.

Wales & Mautz, printers and publishers, Binghamton, N. Y., have dissolved partnership. Ira L. Wales continues the business.

White & Adams, paper rulers and manufacturers of paper bags, Holyoke, Mass., have dissolved partnership. F. E. White succeeds to the business.

J. R. Skeggs has been admitted to partnership with J. R. Montgomery, stencil cutter, Nashville, Tenn. The style of the firm is Montgomery & Skeggs.

The Fort Smith Printing Company, Fort Smith, Ark., has been incorporated with a capital stock of \$10,000. The corporation succeeds the firm of Weaver & Johnson, publishers.

Allan C. Kerr & Co., dealers in printers' supplies, Pittsburg, Pa., have dissolved partnership. J. Grace Hilliard retires from the firm and the remaining partners continue the business under the same style.

F. Trifet, manufacturer of and dealer in art novelties, &c., Boston, Mass., has settled with his creditors for 70 cents on the dollar and continues business. Several mortgages given by him and previously noted are said to be discharged.

The Nonotuck Pocket-book Company, Northampton, Mass., has given up its lease of the old Agricultural Hall, and expects to take quarters in the rebuilt Jones' block. There are to be some changes in the company's organization.

The National Publishing Company, Philadelphia, is manufacturing some beautiful and attractive styles of photograph albums, bound in morocco and plush. Some are ornamented with nickel trimmings, while others have handsome appliqué flowers. Their success was so great that they were ordered ahead nearly three weeks, and many more could have been sold. The company will have larger facilities during

the coming year, and be in a position to meet all demands.

Allen & Gates, stationers, Ware, Mass., have become insolvent.

Molo & Watkins, manufacturers of toys, New York city, have dissolved partnership.

C. A. Laffarty, stationer, Bellville, Ohio, has sold out to J. Mock and W. W. Wilson.

Trimble & Austin have bought out the publishing business of S. E. Colegrove, Corry, Pa.

The Novelty Book Store (H. E. Siddall, manager, Minneapolis, Minn., has been attached for \$1,162.

An assignment has been made by Bloch & Co., printers and flag manufacturers, Cincinnati, Ohio.

Bridgman & Gay, publishers of the *Evening Herald*, Holyoke, Mass., have sold out to V. J. Irwin & Co.

Hugh M. McNeill, printer and stationer, Alleghany, Pa., is offering to compromise with his creditors at thirty cents on the dollar.

H. V. Butler, wholesale paper dealer, New York city, advertises that he will do business under the style of H. V. Butler, Jr., & Co.

A dissolution has taken place in the firm of Ivison & Perry, booksellers and stationers, Auburn, N. Y. J. H. Ivison continues the business.

The highly colored and handsome calendar got out by the Russell & Morgan Printing Company, Cincinnati, was printed on a Cottrell press.

A dissolution has taken place in the firm of Gates & Lincoln, dealers in paper hangings, Providence, R. I., H. L. Gates succeeding to the business.

W. A. & C. S. Houghton, wholesale and retail stationers, Sacramento, Cal., have dissolved partnership. The business is continued by C. S. Houghton.

A dissolution has taken place in the firm of White & Jacobson, manufacturers of paper boxes, Brooklyn, N. Y. R. Tyson White continues the business.

A dissolution has taken place in the firm of Neuburger, Messner & Co., importers of toys and fancy goods, New York city. M. Neuburger & Co. continue the business.

Waggener's improved trial balance-books, manufactured and sold by W. M. Christy's Sons, Philadelphia, are in greater demand now than at any other time of the year. These books are said to be absolutely indispensable in bookkeeping, and are sold by the best stationers in this country.

The *Phrenological Journal* for February contains a portrait and sketch of Babu Mozoomdar, the Hindoo teacher; articles on Vegetable Chemistry, Faith in the Verities of the Universe, portrait and sketch of the late Arthur Erasmus Brinkworth, Deference, Apparitions and what they are, Minute Life in Water, a Series of Don'ts, &c., besides editorial items, scientific notes, answers to correspondents, humorous selections, poetry, &c.

The Globe Files Company announces a very brisk trade in its extensive productions. C. M. Ward, the manager of the New York branch of the company, is indefatigable in his efforts to push the Globe files. His endeavors, and the fact that he has a popular line of productions to sell, are bringing forth good fruit. The company will introduce to the trade in a short time some new things in files, which, for practicability, durability and cheapness will certainly command attention.

Another lot of taking shape goods is on the market. Of course, J. E. Linde is the man who does the novelty business in this line. The "Key of My Heart" will be used as a valentine. The latest thing is a "Punch and Judy," which gives the whole show. It is a card representing the customary box, and the figures are changed by revolving a disk on which they appear.

James D. Whitmore & Co., have opened the new year with very flattering prospects. They have received orders in such quantities that they are compelled to run their factories every evening in order to keep up with the demands of their customers. The new line of fancy papereries gotten up for the spring trade is meeting with very gratifying success.

Marcus Ward & Co. will be prepared to show samples to the trade of a new and striking line of Easter and birthday cards in a few days. This line will be made up in the most popular styles, and will be in every way worthy of the inspection of intending purchasers.

C. Jorgensen has recently very handsomely fitted up his store at No. 98 Maiden lane. The establishment now has a fine plate-glass front, while the interior is provided with glass cases and counters and ash fittings.

G. Walter Snow has been admitted to membership in the firm of Coburn Brothers, printers and stationers, Boston, Mass. The style of the firm has been changed to Coburn Brothers & Snow.

M. L. Goldenberg has been admitted to partnership with C. C. Davis, publisher of the *Leadville Democrat*, Leadville, Col. The firm will do business under the style of C. C. Davis & Co.

Porter & Patterson, booksellers and stationers, Rochester, Minn., have dissolved partnership. J. M. Porter continues the business.

S. B. Betts & Co., dealers in paper stock, &c., Henderson, N. C., have dissolved partnership.

W. G. Blymer, publisher of the *Democratic Times*, Defiance, Ohio, has sold out to White & Mains.

Edwin C. Stokes has been admitted to an interest in the firm of E. S. Hand & Co., publishers' agents, Philadelphia, Pa.

Hooker, Knox & Tuttle, printers, New York city, have dissolved partnership. Knox & Tuttle continue the business.

Salls & Kent, newsdealers, stationers, &c., Burlington, Vt., have dissolved partnership. B. L. Kent succeeds to the business.

W. J. Clarke, stationer and fancy goods dealer, Montreal, Que., has compromised with his creditors at 50 cents on the dollar.

Hagedorn & Sheubrooks, printers, Baltimore, Md., have dissolved partnership. Thomas J. Sheubrooks succeeds to the business.

Edward J. Buckley has been admitted to an interest in the firm of John E. Potter & Co., publishers and booksellers, Philadelphia, Pa.

A. C. Keel, stationer, &c., Fort Wayne, Ind., has taken Louis A. Etzold into partnership, and the firm will do business under the style of A. C. Keel & Co.

L. Prang & Co. will offer to the trade, in a few days, a new line of Easter and birthday cards. It will be equal in every respect to previous productions of this house.

W. L. Ames and J. S. Houghton continue the business of Ebersold & Co., printers, Seattle, W. T., under the style of the Globe Printing Company, the old firm having dissolved.

Collis & Lees, Philadelphia, have made a great many new articles for valentines of entirely new design and shape. This firm had a success with its holiday and Christmas cards.

The January number of the *Farm and Garden* presents a long list of contents. The publication is a neat little monthly of sixteen pages. It should be read by every wide-awake farmer and gardener.

The newspaper file manufactured by J. H. Atwater, Providence, R. I., is said to be the "lightest, neatest and best" thing of the kind in the market. One person who has used it says: "After many years' experience in furnishing and conducting association rooms, and after trying every file in general use, I can unhesitating pronounce the 'Atwater File' to be altogether the best I have found." The file is simple and convenient.

PORCELAIN DECORATION.

A writer on French porcelain speaks of a printed process used in Limoges for the production of colored designs on porcelain and describes it as being closely analogous to the ordinary operations of chromo-lithography. He adds that when carried out with great care and skill this process yields extraordinary results, in many cases superior to hand painting. He might have qualified this latter by saying that it might be superior to some grades of hand painting; and if it were not better than some hand painting that has been thrust upon us like unsolicited honors we would not give much for it. As for our opinion of process printing in colors, we will say that from some amusing personal experience with chromo-lithography in enamels, there are great possibilities in it provided it is handled by some one who has a perfect knowledge of both the lithographer's and decorator's art. Certain acquaintances of ours conceived the plea of using the chromatic process for decorating earthenware. Presses, stones, and all of the other apparatus pertaining to the art were purchased, and the practical lithographer was soon busy in tracing his delicate patterns on the surface of the spongy stone. The first designs made took eight stones besides the "mother-stone," and when all was ready the prints were rolled up for the enamels. After several hundred sheets had passed through the press eight times, the decorations were transferred to the ware, and all hands looked smiling when the paper was removed. There was the design in eight colors, as nice as you please, and nothing appeared to be wanting to make the process a perfect and lasting success. But just at this point the fun began. The goods were put into the muffle and fired, and when the kiln was opened what a sight was there! Those decorations that were not eaten away into blisters were the saddest looking things of the lot. They were not even as tolerable as a tea-store chromo, and all hands agreed that they did not see how that was. But it was. And all of the succeeding efforts were precisely the same. It was then decided that something was wrong with the blistering, but why the pieces that were not blistered looked like the side of a country paint shop they could not conjecture. Of course that sort of thing would not pay, and it was stopped before too much money went the way of all cash invested in experiments.

Having occasion some time afterward to examine the stones in connection with some of the impressions from them we discovered that the practical lithographer has been innocently engaged in demoralizing the whole business by working just as he would for a picture chromo on paper, and instead of making his modeling or top color the first impression, he had made it last. The result may be imagined. The whole thing was upside down and looked like a flag of distress. Another cause of trouble was in planting colors one on top of another without any regard for their affinity for one another, a little thing in vitrifiable colors that is of the utmost importance. In brief, this is a history of process work in this country; but the fact that it is now done in France confirms us in our belief that there are yet undeveloped possibilities in chromo enamels that time and experience will bring to the surface.—*Exc.*

That virtue which requires forever to be guarded is scarce worth the sentinel.—*Goldsmith.*

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JANUARY 17, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

ELSEWHERE will be found a brief account of the celebration of Benjamin Franklin's anniversary by the society known as Typhothetae. The event was one of interest, and from a trade standpoint of some importance, as indicating a union of interests and a laudable desire to improve trade standards. It is to be hoped that this union will be lasting and beneficial.

LEX TALIONIS is the principle which it is proposed to apply to France and Germany, not because those countries have protected their domestic products by heavy import duties, but because they have made false and injurious discriminations against products of this country. We approve of the principle, and if retaliation is to be the rule there will be some very important changes in the trade relations of France and Germany with the United States.

It is an old saying that "the Dutch have taken Holland," but perhaps a more startling announcement than this is that the Dutch are taking protection, or, more properly speaking, that the thrifty Hollander is asking his government to impose duties on foreign imports for the sake of defending and preventing the extinction of home industries. This is a feature which is of more than usual significance, for it has been thought that of all civilized people the Dutch were best able to get along without a tariff. "The world moves!"

THE treaty of commerce with Mexico has not been ratified, that is, the Senate having failed—by one vote—to give it the constitutional majority for approval, the treaty is still pending on a motion to reconsider. The time set for the exchange of ratifications has expired, but we believe that by a supplementary convention lately made by the two governments, the time for ratification has been extended. It has been asserted that the hesitation of our Senate has been due to the objection that we will depart from safe protective principles in the adoption of the treaty; but we do not see that if Mexico were given an advantage in this respect that she has any means of utilizing it. The real reason for rejection in the minds of some of the Senators is alleged by one of the Washington papers to be the fear that General Grant has some pecuniary or valuable interest in the conclusion of the treaty. If the story of this suspicion, as given in the daily papers, is true, it is a lamentable exhibition of weak-mindedness. Without anything tangible to found the suspicion on, it would appear that Senators are addicted to gossip for which they disclaim responsibility. This is about the "thinnest" thing that we have heard of lately, and shows how readily some men can jump at small excuses for their acts or cultivate their jealousies on unfounded fancies. This objection has been refuted by General Grant, who, in a letter to one of the Washington papers, expressly denies that he has

any pecuniary interests in Mexico which will be benefited by the treaty. This letter is, we think, convincing, and the dignified way in which General Grant passes over the innuendos flung at him commands respect. But why should the Senate or any of its members refuse to ratify the treaty? It can readily be seen that, where any of our own producing interests may stand in jeopardy from Mexican competition, there is good reason to oppose the treaty; but the danger is not now apparent. If goods could be imported from other countries through Mexican custom-houses free or at lower duties than are prescribed by our tariff, there would be further reasonable objection; but this does not appear, and probably cannot be done. The country has looked forward to the extension of its trade interests in Mexico, and to the closer commercial union of that country with our own. The failure of the Senate to encourage and authorize the means for effecting this will be disappointing, and will meet with condemnation.

ROUNABOUTS.

BY THE TRADE LOUNGER.

There are some people who find fault with these paragraphs. Perhaps there are many; but, for all that, shall we have "no cakes and ale?"

* * * *

I have been shown a letter in which it is alleged that the "Lounger" is a "twaddler," and the desire is expressed that he shall be—shall be—"bounced," so to speak. Now, I want to say that probably there is a good deal of "twaddle" in this column, but then it isn't written for people with weak stomachs—or weak intellects either. If readers don't get their money's worth in this paper outside of this column, they wouldn't get value if something else took its place.

* * * *

Again, why does the gentleman who finds fault with the "twaddler" read what is said by him? Are these paragraphs so interesting that e'en disgust must fain to liking, or that while he would not be could not keep his eyes off from them. I have a panacea for his grief. Let him write some paragraphs himself. They will go in—if proper—and will lend variety to the twaddle.

* * * *

It is funny, though, how difficult it is to suit people. Not long ago some were hurt because of personal allusions and the "Lounger" has scarcely dared to spell a man's name out lest he might wring the feelings of somebody. He was good-natured and thought that he would generalize a little, and now he finds that there is another horn to the dilemma on which somebody wishes to hang him up. After this he'll just gang his ain gate and let a' the ithers gang wi the owd ane.

* * * *

But let us proceed. This is business now! Among some late decisions on tariff disputes the following are of interest to the trade: Tinsel, consisting of a fine metal wire or strip, in hanks or rolls, intended principally for use in ornamentation, held not to be dutiable under the provision for toys as claimed, but to be liable to duty under the provision for metal threads in schedule M, paragraph 401.

* * * *

Engravings imported for educational institutions not entitled to free entry, not being comprised within the list of articles which are exempt from duty when imported for such societies.

Diamond, gold and silver powder, claimed to be dutiable at 15 per cent. ad valorem, under the provision in schedule C, paragraph 196, for bronze powder, held to be dutiable as a toilet preparation, under paragraph 99, at 50 per cent. ad valorem.

There were imported into San Francisco, embraced in one invoice, cases containing covers for albums and other cases containing the bodies of the albums made of paper. The values for the covers and for the bodies were stated separately; held that the bodies were dutiable at 15 per cent., as manufactures of paper, while the covers were dutiable at the rate incident to the materials of which they were composed.

A decision as to what may be done to effect a copyright of the title of a book was lately made by the United States Circuit Court for the District of Oregon as follows: The "printed" copy of the title of a book or other article required by section 4,956 of the Revised Statutes to be delivered or mailed to the Librarian of Congress, may be "printed" with a pen as well as type, with or without the aid of tracing-paper. The copies of a copyright work required by section 4,959 of the Revised Statutes to be deposited with the Librarian of Congress within ten days after publication, may be so deposited after the printing of the work and before its formal publication.

The "bunco-steerers" have been having a public time lately. The Hartford map publisher, S. D. Tilden, was taken in by "Keester Bob" and "Spanish Dick." But from all accounts Hartford got the best of New York by giving a check that was not good. If Connecticut isn't sharp one way she is another.

This week James Cahill, a prosperous paper dealer of Oakland, Cal., while promenading our streets, was taken in hand by one of the adepts, and went like a lamb to be fleeced. Police Inspector Byrnes, who happened to see the proceedings, put an officer on the trail of the swindler and his anticipated victim, and the next scene was astonishment. There was only one man in the party disgusted. It was the bunco man—and he had a right to be disgusted.

One of the papers—I don't know which—prints a communication from a young man who wants to enter that "noble army of martyrs," the commercial missionary band. The writer of the communication is not highly educated, and his pretensions to fellowship in the corps would amount to nothing were it not for the natural ability which he displays. All commercial travelers are noted for natural ability. In fact, it is their strong point. The letter reads as follows:

WHITE PINE, CALHOUN CO., WEST VA.

DEAR SIRS—As I understand that you run a Whole Sale Store, and not noing but that probly that you would wish to hire a Drumer or Trveling Salesman, I take this oppertunity to address you and offer you my Services, Providing we can agree on the termes. I will travel over West Virginia and South Western Pennsylv-

vania providing you furnish team and Wagon and pay all Expensis the first Six months for \$25.00 per month and the next Six months for \$40.00 per month and after the first year or as long as we can agree I will work in the above mentioned Territory for \$50.00 per month and you furnish Team and Wagon and paying all Expensis all the time Good Reference's given and required. Hoping to hear from you soon I remain
Yours Respectfully R. S.
P. S.—My wages must be payable monthly or as often as I wish Yours, R. S.

Messrs. Dorsheimer, Culbertson and Poland, of the House Committee on the Judiciary, yesterday recommended to the full committee the passage of the Dorsheimer Copyright bill, with certain amendments. The bill grants the privilege of copyright to citizens of foreign countries for 25 years when similar privileges are granted to American citizens. The amendment offered extends the time to 28 years, with a right of renewal of 14 years.

ANSWERS TO CORRESPONDENTS.

S. B. asks for explanation of our answer about diaries last week.

Ans.—We did not refer you to No. 2 of THE STATIONER, but to our answer to your second inquiry. The same parties make the diaries and the pocket records.

Dating Bills Ahead.

KEOKUK, IA., January 14, 1884.

To the Editor of The Stationer:

As there has been much said in regard to dating bills ahead, I should be pleased if you will allow me a few lines in your valuable paper on the subject.

I am, in part, of the same opinion as your correspondent from Greenville, S. C., but I would like to hear from the trade throughout the land as well as from the manufacturers and jobbers in the East. Now, for instance, here comes — from a house which claims to be opposed to dating bills ahead and who offers his goods and says: "Buy now. We are out early in order to catch the trade." I say to him, "I do not care to purchase now; it's too far ahead." He says: "Buy now and we will ship when you say." He takes my order in July and sends the goods along at once, dating the invoice October 15, as this is as soon as I care to have my order shipped. Who is to blame in this matter of dating ahead? I am not finding fault with parties who sell the goods, they, of course, have done their part in selling and the house does the balance. I myself think the drummer business a bad one. I much prefer not to buy my goods in this way, but as the system has become so general one cannot do otherwise than buy. I don't think that your correspondent from Greenville would gain much if he did refuse to buy from the drummer. I, myself, much prefer to go to the market for my goods, and I think that this is the feeling of most of the trade. I have read so much in reference

to circulars about dating bills ahead that I could not refrain from airing my views on the subject.

As to the drummers, they are a whole-souled corps of gentlemen, and I like to shake them by the hand when they call to see me, but I do not like to make my purchases through them. They are paid to sell the goods and do it very often. As to myself, I have yet to ask any house to date my bills ahead, and this is probably the case with a great majority of the trade. I think that this matter all lies with the manufacturers and jobbers and not the buyers. I would be pleased to hear from others in the trade. Come, gentlemen, don't be afraid to express your candid opinion!

SAM. C. WESTCOTT.

Antoine & Fils, Paris, forward their calendar for 1884. This firm maintains its reputation as a manufacturer of writing inks.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, JANUARY 22, 1884.

THE MONEY MARKET.—The money market shows increased ease. The rates of interest are down to 4@5½ per cent. for prime indorsed mercantile notes and acceptances, and 6@7 to 10 per cent. for second class and single name paper. Call loans vary from 1½ to 2½ per cent. There has been a marked depression in stocks, and the condition of the market has at times bordered closely upon panic. Many stocks that had been carried for months have been thrown upon the market. Government bonds are less firm than of late; the currency notes sold lower. Railroad bonds were irregular. Foreign exchange was quiet, but firm in tone, owing to the scarcity of bills, rates seeming to tend toward a higher range.

THE PAPER MARKET.—The paper market is without any new feature. Dealers are still buying only for their immediate actual wants, and the probability is that the hand-to-mouth policy will be pretty closely adhered to until the demand from consumers augments. Failures in general trade continue quite numerous, but are fewer than many predicted that they would be after the turn of the year, the greater part of them being for small amounts, it being estimated that 69 per cent. of them is among those whose capital was under \$5,000 each. Although prices continue to rule very low, they hold to a very steady position, with the exception of straw-boards and to some extent straw-wrappings, the latter showing more regularity than a month or six weeks ago. The shrinkage of prices has run its course, and the worst may be considered as over and the outlook is more promising than it has been for two years. The improvement, however, it is thought, will be so slow that it will scarcely be noticeable before the spring.

THE STATIONERY MARKET.—There are a few complaints of dull trade, but as a rule the feeling among tradesmen is quite cheerful and satisfactory. A few chronic grumblers have predicted a dull opening up of the trade of the new year, but even they are inclined to take a more hopeful view of the situation last week. The past few days have brought to town quite a number of buyers, and orders have increased in number considerably. In blank-books business is very quiet, but there is no reason to doubt that it will revive again when the trade of the new year fairly begins. There is a fair demand for picture-frames—rather better than at a corresponding period last year. In fine stationery no improvement is shown, but judging from all indications, the prospects for a speedy opening up of this line are not discouraging. The trade in Easter and Valentine cards shows no signs of diminution, and will probably continue to show its present activity for the next two weeks. Quite a marked improvement is evinced in shape novelties, and dealers in these goods are more hopeful than a few days ago.

1125 CHESTNUT STREET, PHILADELPHIA.

THE KERNER PEN.

\$1.

IT is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Price, \$1 and upwards, according to mounting. Send for Circulars.

N. Y. SILICATE BOOK SLATE CO., 191 Fulton Street, cor. Church St., New York City.

TYPOTHETAE.

The association of employing printers in New York, known as "Typothetae" celebrated the one hundred and seventy-eighth anniversary of the birth of Benjamin Franklin by a dinner at the Metropolitan Hotel on Thursday evening, January 17. This was the first dinner given by the organization since the corresponding night in 1872.

The dining-room was beautifully decorated with potted palms, and the tables were ornamented with flowers and artistic designs in confectionery. At either end of the principal table, elevated on pedestals fancifully conceived, were statues of Franklin and Morse, a wire emblematic of the telegraph and of the philosophic investigation which animated the minds of those two men, stretching from the hand of one figure to that of the other.

The menu was generous and choice. Wm. C. Martin, first president of the society after its organization in 1866, took the head of the guests' table, at which were also seated the Rev. Henry Ward Beecher, Geo. W. Cable, the Southern novelist; Theodore L. De Vinne, the vice-president; John F. Trow, the Rev. S. Irenaeus Prime, editor of the *Observer*; Henry C. Baird, and Howard Lockwood, chairman of the Committee of Arrangements. Over one hundred other gentlemen were present, among them P. C. Baker, Andrew Little, Douglas Taylor, Wm. H. Parsons, Max Heinrich, Edward O. Jenkins, R. H. Smith, Martin B. Brown, Daniel Godwin, J. B. Putnam, Wm. C. Rogers, John Polhemus, John J. Caulon.

When the time for speaking arrived, Mr. Martin, before taking up the list of toasts, sketched the history of "Typothetae," and referred to the causes for its existence and the duties which it is called on to perform.

Letters from various gentlemen were read. Among these were responses to the invitation of the society from General Joseph R. Hawley, General Jas. Watson Webb, Wm. F. Storey, Chicago; *Times*; Captain Albert De Groot, H. O. Houghton, Riverside Press; Whitelaw Reid, New York *Tribune*; Samuel Bowles, Springfield *Republican*; Chas. Dudley Warner, Samuel L. Clemens, John B. McLean, Cincinnati *Enquirer*; E. B. Haskill, Boston *Herald*; Chas. A. Dana, New York *Sun*; Joseph Pulitzer, New York *World*; the Rev. Dr. Deems. John D. Parsons, Joseph Medill, Chicago *Tribune*; Geo. W. Childs, Philadelphia *Ledger*; Geo. Jones, New York *Times*, and Stillson Hutchings, Washington *Post*.

Mr. Childs' response was by telegraph and was as follows:

PHILADELPHIA Pa., January 17, 1884.
To Howard Lockwood, Chairman, and Committee
Typothetae Association:

GENTLEMEN—Until to-day I hoped to attend the Franklin anniversary of the book and job printers of New York, to which I have been kindly invited by your Typothetae Association. I find now, to my great regret, that I cannot do so. It would have been a pleasure to me to be among your guests, being in hearty sympathy with associations of printers and warmly cherishing the memory of Franklin. Our nearest side to Franklin is his distinction among our predecessors in the printer's craft; but all of us keep in mind that the result of his labors as philosopher, statesman and sage have benefited all the civilized world, and that his memory is now endeared to all enlightened mankind. In my judgment there is no worthier figure in human history. No topic was too humble or homely for his philosophic investigation, and he ranged from those to the most subtle of the invisible agents that govern the physical universe. Considering him simply as a man, the force of whose merits carried him to the

highest eminence and fame, what a far-reaching drama we have before us when we contemplate at one end of the line the printer boy plodding up Market street, with his bread under his arm, but with a strong, earnest soul, and at the other end an American ambassador at the Court of Versailles—the welcome companion and peer of princes and of the loftiest intellectual characters of Europe.

Very truly, GEO. W. CHILDS.

The first toast was "Benjamin Franklin." It was responded to by Henry Cary Baird, of Philadelphia.

The Rev. Henry Ward Beecher spoke to the second toast, "Our Country."

Other toasts were responded to by different parties.

The dinner passed off very pleasantly, much of its success being due to the exertions of Douglas Taylor, who was active in promoting the work of the committee of management.

One of the incidents of the evening was the exhibition to the guests of two relics—one a fragment of a composing-stick from the old Watts' printing-house, Wyld Court, near Lincoln's-Inn-Fields, London, England, and the other of a book printed in London in the early part of the eighteenth century. The interest of these relics is set forth in the following statement:

The composing-stick was used by Benjamin Franklin while employed at the Watts' printing-house during the years 1725-26.

This relic of Franklin was presented to the owner, P. Grant, of the Lockwood Press, New York, in 1851, under the following circumstances:

In the year 1851, Mr. Grant, then in London, was engaged in collecting the materials for an essay on the history and art of printing, when he was requested by a Mr. Blanchard to go with him to the old Watts Printing House, for the purpose of consulting with a Mr. Bell, proof-reader, about certain articles in the Lancashire dialect, with which Mr. Grant was famil-

iar. Mr. Grant passed several hours with Mr. Bell, and among other things they talked about was the old house and its history. During this conversation Mr. Bell was informed that Mr. Grant was working up data for an essay on printing and its history, whereupon Mr. Bell became very much interested, and put him (Grant) in possession of many points relative to Benjamin Franklin and his employment in that very house in the early part of the last century. Mr. Bell was very much pleased at the assistance rendered him by Mr. Grant, and after some talk with Mr. Pemberton, who was also present, Bell and Pemberton went to an old cupboard, brought out this stick, and Mr. Pemberton presented it to Grant, stating that it was used by Benjamin Franklin, and was a genuine and *bona-fide* relic of that great man, and had been used by him while he was a compositor in that house in the years 1725-26. Mr. Bell also stated that this stick, together with many other things associated with Franklin, had been preserved by an old employe of the establishment, and were found among his effects at his death.

It has been said that Franklin, while at Watts's, only worked at the press. In answer to this, Franklin's own autobiography, edited by Jared Sparks, reads as follows: "Watts, after some weeks, desiring to have me in the composing-room, I left the pressmen: a new *bien venu* for drink being five shillings, was demanded of me by the compositors."

This Franklin at first refused to pay, but he had so many pieces of private malice practised on him, by mixing his sorts, transposing and breaking his matter, that he was forced to comply with the demand. This shows that Franklin *did* work as a compositor while at Watts's in 1725-1726.

The second relic of Franklin is a book without covers, which is also owned by Mr. Grant, who came into possession of it as follows:

When Franklin first went to Watts's house, having previously worked at Palmer's as a compositor, he took to working at the press, "imagining," as he says in his autobiography, "that I felt a want of the bodily exercise I had been used to in America, where presswork is mixed with the composing." Among his companions at the press was one George Newcombe. They worked together, and printed the sheets which compose this little work, called the "British Chronologer." Newcombe preserved this copy, which came into the possession of his son George upon the death of his father in 1771, and was by him—George Newcombe, the second—specially mentioned in his will and bequeathed to his son George, the *third* George Newcombe, who, in the year 1850, while he was working as a compositor in Milbank street, Westminster, London, gave this book to Mr. Grant, with the assurance that Franklin and his grandfather were engaged upon its presswork. Newcombe specially requested Grant to treasure the book, and on no account to part with it. In the year 1766 Franklin was again in London, and called at the old Watts House, and gathering all the old boys together, he treated them to beer, and they all had a splendid time, he being in the best of spirits. He was at that time representing the Assemblies, and did much to have the Stamp Act repealed. At the time of his visit to Watts's and his old companions, George Newcombe, the second, was a youth of about eighteen years. The elder Newcombe was about to send his son away so that he would not join in the festivities, when Franklin remarked that the boy was old enough and that he might remain. Newcombe replied that the boy was only eighteen years of age. When Franklin said:

"I commenced life five years before that," Franklin urged him by all means to come to America. The book referred to has been in the hands of Charles Dickens, Thackeray, Douglass Jerrold, Tom Hood, Jr., James Nix and many others at various times. Charles Dickens gave it as his opinion that the book was published not later than 1730, which opinion was nearly correct, as the last date mentioned in the chronologer is 1720, and Franklin and Newcombe did the presswork on it in the years 1725 and 1726.

ENVELOPE MACHINE.

Henry A. Mann, Jr., has brought out an improvement in that class of machines employed in folding envelope-blanks that have previously been cut to the proper shape for the purpose, and wherein the blanks in quantities are placed upon a suitable feed-table or elevating support, and thence one by one automatically taken by the mechanism and gummed, folded, and delivered in a completed condition to the apparatus for drying, counting, or bunching the same.

The features of this machine are the combination and arrangement of the mechanism for operating the gummer and the pushing-fingers; also, in the pushing-fingers operated by an oscillating lever, which fingers push forward the envelope-blank as it is taken by the plate from the gummer as it rises, so that the blank is caught between the carrying-rollers and passed on; also, in the folder placed between the second pair of creasing-rollers and between them and the pressing-rollers, with its curved or folded sides so arranged as to fold one side of the envelope and partly fold the upper flap; also, in the mechanism which carries forward the envelope-blank through the machine, consisting of the pushing-fingers with projecting pins, platform, the first set of carrying-rollers with folder between them, a second platform with a guard on its outer edge, a lever, and oscillating attachments, and a second set of carrying, creasing and pressure rollers.

LANGUAGE OF THE POSTAGE STAMP.

Some ingenious persons have given a meaning to the location of a postage stamp upon a letter. For example, they say that when a stamp is inverted on the right-hand upper corner it means the person written to is to write no more. If the stamp be placed on the left-hand upper corner and inverted, then the writer declares his affection for the receiver of the letter. When the stamp is in the centre at the top, it signifies an affirmative answer to a question, or the question, as the case may be; and when it is at the bottom, or opposite this, it is a negative. Should the stamp be on the right-hand corner, at a right angle, it asks the question if the receiver of the letter loves the sender; while in the left-hand corner means that the writer hates the other. There is a shade of difference between desiring one's acquaintance and friendship, for example: The stamp at the upper corner on the right expresses the former, and on the lower left-hand corner means the latter. The learned in this language request their correspondents to accept their love by placing the stamp on a line with the surname, and the response is made, if the party addressed be engaged, by placing the stamp in the same place by reversing it. The writer may wish to say farewell to his sweetheart, or *vice versa*, and does so by placing the stamp straight up and down in the left-hand corner. And so on to the end of the chapter.—*Exc.*

A PAPER DEALER CAUGHT.

James Cahill, a prosperous paper dealer of Oakland, Cal., returned recently from his bridal tour in Europe and put up at the Union Square Hotel. He strolled out on Tuesday afternoon and met a pock-marked, red-haired young man in West Fourth street, who began the usual bunco patter, and to whom Mr. Cahill confided his name, residence and occupation. The next bunco man who came up was a tall, neatly-dressed, middle-aged man of a commercial aspect, astonishingly well informed of Mr. Cahill's name, residence and occupation. He was the son of President V. D. Moody of the First National Bank at Oakland. That is, he told Mr. Cahill so, and Mr. Cahill did not suspect him of having just discovered Mr. Moody's name in the *Bankers' Almanac*, under the head "Oakland, California." He invited Mr. Cahill to accompany him to a store where, he said, he intended to purchase some books for President Moody. Inspector Byrnes happened to see the confiding paper dealer and the affectionate son of Mr. Moody walking in West Fourth street and told Policeman Leeson to follow Mr. Cahill and ask him if he knew that he was walking with a swindler. Mr. Cahill confessed that he didn't know it and the policeman arrested the swindler and took him to Jefferson Market.

ASSER'S PHOTO-LITHOGRAPHIC TRANSFER PROCESS.

Unsize paper, as it is habitually used by lithograph printers, must be employed.

It has to be of the best quality and rather thick. It would be better if it were made on purpose by a manufacturer. The smooth side is covered with a layer of starch. In order to avoid different kinds of starch, of which one ignores the different peculiar qualities, it is better to use an invariable substance. Experience shows that cooked wheat flour is most suitable for that purpose. It must be rather concentrated, but nevertheless liquid enough, not to prevent regular running off. This starch is poured into a square pit and the smooth side of the paper is carefully placed upon it, so that bubbles are avoided. After that it is laid to dry horizontally, on the other side. In a dark room the unstarched side of the paper is laid above a rather concentrated solution of bichromate of potash, till by its porosity the paper is entirely pervaded by the liquid.

There it is hung on a pin in the dark, left to dry, and transferred on a polished stone in the lithographic press, the starch side toward the stone.

In order to give to the paper a smooth surface, the scraper is pulled several times over it. By this operation light must be avoided.

In this state it is placed as usual under a negative in a photographic chassis, exposed to the light till the enlightened parts present a picture of a strong brown color. Then the paper is taken from the chassis and left in various baths of water till all unaffected parts are of a clear white, and the enlightened ones of a light green tint.

If this result is not obtained by cold water,

hot water may be employed to destroy any traces of dissolvable bichromate of potash. Then it is again hung to dry, on a pin. Sunshine or a moderate fire will contribute greatly to the acquirement of a clear image. In order to transfer the copy, the thus prepared paper is laid on the back side upon water only warmed a little in winter. Then it is placed upon a stone or a glass after the superfluous water is removed by blotting paper. The transfer ink consists of common lithographic printing ink, only mixed with a convenient part of oleone.

Before blackening the image a layer of mastic dissolved in absolute alcohol is conveyed to the paper and spread regularly over it with a little cotton till it is dry.

The above described ink spread upon a stone is put on a wooden roller, covered first with cloth or flannel, and thereupon with cotton or silk velvet.

The liquid that has remained in the paper is sufficient to preserve from ink the places which must not be blackened. If there might still remain some impurity, as frequently happens, it may be removed by using the roller very lightly, and finally by taking it off with a wet sponge. Afterward the water is again removed by blotting paper.

The velvet of the roller has to be renewed frequently.

After the last preparation the blackened paper is transferred upon a lithographic stone or upon zinc, and handled in the usual manner.—*Printers and Lithographers' Reporter.*

INKSTAND.

A combined inkstand and pen rack is made with a suitable rectangular box, which forms the casing of the inkstand, and which contains the ink-well, on one side of which is formed a laterally-extending box, completely filling the case, and forming a receptacle for a sponge or pen-wiper, which is held in place by means of inwardly-projecting lugs upon the ends of the box. The top of the ink-well is provided with an opening, surrounded on its upper side by a circumferential collar to receive a tightly-fitting cover. The latter is provided with an elliptical or oblong concave recess, inclined or deepened toward its front end, where it is provided with a circular opening. The recess is covered by a convex plate or cover, having at its front end an opening for the admission of the pen. A ball is fitted in the recess, where it serves to cover the opening, over which it drops by its own gravity, the loss or displacement of the ball being prevented by the covering-plate. The ball keeps the ink-well automatically closed, thus preventing evaporation of the ink and excluding dust. When the pen is inserted, it displaces the ball and enters the well, where it is supplied with ink. As it is withdrawn the ball will press lightly against it, thus removing any superfluity of ink which it may have received, and consequently preventing the dropping of ink and making of blots. The cover of the case or box is provided on its inner or under side with racks adapted to receive and hold one or more pen-holders. The sides and top of the box are provided with recesses which will receive the pen-holders when the cover is closed. This inkstand is designed by Thomas B. Knowles.

DRAFTING IMPLEMENT.

A drafting implement devised by Nevin Milloy, consists of a rule, made of any thin flexible material, preferably elastic. The material preferably employed is steel or brass. Whalebone and gutta-percha are also among the available materials. The rule may be made of any desired length. Each end of this rule is preferably provided with an eye, through which a pin may be inserted. A number of pins are employed for retaining the rule on the board at a desired curvature, and these pins are each so constructed that an unbroken line may be made by a pencil or pen against one side of the rule, the pins not interfering with the point of the pen or pencil. Each of these pins consists of a pointed leg, to be driven into the board, and a shorter leg, which, when the leg is driven into the board, will not extend down to the board. Both of these legs are secured to a single head, a space equal to the thickness of the rule being left between the two legs. The pins which are to be inserted through the eyes consist of a single pointed leg having a suitable head. When the rule is to be connected to the board, one of the pins is passed through one of the eyes and driven into the board, and the rule is then bent around to the

desired curvature, and the required number of the pins employed, being placed at suitable intervals apart, to retain the rule at the proper curvature, the short leg of each pin resting against the side of the rule against which the pen or pencil is to rest, and as these short legs do not extend down to the board no obstruction is presented to the point of the pen or pencil, and a continuous unbroken curved line may be thus made. If desired, one side of the rule may be provided with a number of eyes, extending, preferably, only partly across the width of the rule, in which event pins consisting of a single leg, similar to the pins, may be used instead of double pins, one of the pins, C, being inserted in one of the eyes and driven into the board. It may sometimes be desirable to draw the pen or pencil along both sides of the rule, in which event a double pin will be found advantageous. This pin consists of two points or legs, connected together by a cross-piece, from which projects a pin, which latter pin can be inserted in one of the eyes when present, or placed against the concave side of the rule when the eyes are not present. The pin is shorter than the points, and therefore does not reach down to the board, and the points being separated, the pen or pencil may be drawn along the rule at both sides of the lower edges instead of the eyes. Suitable offsets may, when desired, be connected to the rule and serve in lieu thereof.

The rule is to be varied in width and thickness, as well as in length, to suit the size of the curves to be made and the character of the work to be performed.

This rule will be found very convenient for railroad platting, and is very much cheaper than the system of curved rules heretofore employed for this purpose. It is not alone applicable to railroad platting, but is equally applicable to any other description of platting or drawing in which curved lines are to be made.

SALE OF POSTAL NOTES.

The Washington correspondent of the New York Commercial Advertiser reports an interview with an official of the Post-Office Department, presenting some interesting facts in regard to the postal notes. The demand for these notes has been much greater than was anticipated, and the number which will be used during the first year after their introduction will exceed the estimate by about 1,000,000 notes. The greatest sale of the notes is in the small towns, from which they are sent to the large cities, some large retail establishments in New York receiving as many as 500 or 600 in a day. During the second week in December upward of 20,000 were paid at the New York City Post-Office. When this system was inaugurated, the officials who had the money-order system most at heart feared that the postal notes would largely supersede the money-orders, and therefore not favorable to them. But reports from ten of the principal offices show that the decrease in money-orders is only twelve to fourteen per cent. Before the use of postal notes began, postage stamps—a most unsatisfactory medium—were largely used in making remittances by mail, and it has been estimated that several million stamps were constantly in the mails. Postal notes are now generally used instead. No case of loss in transmission, alteration, or counterfeiting has come to the knowledge of the department, and only about a dozen cases of reissue occurred during the first three months. The life of a postal note—that is, the period elapsing between the date of issue and presentation for payment—averages about eleven days, while the life of an English postal note is said to be but six days. This dissimilarity is to be accounted for by the difference in the size of the two countries. The color of the paper—yellow—which color was chosen because of its non-photographical qualities and also because it is sensitive to the action of acids, has some drawbacks and will be improved upon. Paper of a different color will be used in the next issue, and the appearance of the note will be greatly improved. These notes are the only government securities, except money orders, that are not issued at a fixed value, and this peculiarity makes it necessary to adopt precautions not required in the case of United States or national bank notes, where white paper can be used because the engraved letters and figures express the value. The post-office officials are endeavoring to overcome the obstacles met with, and another modification will leave the space where the value of the note is written at the issuing office perfectly plain, thus making the amount easily discernible. The notes are printed by the Homer Lee Bank Note Company, which is able to do the work more cheaply than it can be done at the government establishment on account of possessing the exclusive use of a newly invented plate-printing press which prints as many impressions per day as can be printed on seven hand-presses. Nine of these steam-power presses have been contracted for by foreign governments since their economy and utility have been so practically demonstrated in the printing of the postal notes. The notes have heretofore been canceled here, thereby entailing much additional labor on the employes, for which there has been no extra compensation. Hereafter the paying offices will cancel the paid notes before sending them in for audit. At first country postmasters made numerous mistakes in punching out the figures denoting the value of the notes, but there are now

few such mistakes, and the system is working without error. They are an assured success, and large numbers of them for twenty-five cents, fifty cents, one dollar, and two dollars are now in circulation. The total absence of small notes of national banks and the scarcity of one dollar and two dollar greenbacks will no doubt increase the use of the postal notes as circulation, for though they are not a legal tender they are freely taken in stores, &c., everywhere.

IMITATION OF COSTLY LEATHER.

The custom of carrying lunch reticules, money purses, and traveling bags of leather, has made an increased demand for the leather from rare animals, or for leather of attractive appearance. As the natural supply of alligator and the great python or boa skins is not sufficient to keep up with the demand, these skins—or the leathers from them—are imitated very largely by using the leather of commoner and cheaper skins. Even seal leather, goat leather, and kid leather, or morocco, are imitated. The surface of alligator leather consists of almost exact rectangles or squares, separated by deep furrows, the squares generally diminish in size as they recede from the centre of the skin. The boa leather is in diamond-shaped patches, forming a fine network, and is very elegant, the division lines being very fine. Sealskin leather is a fine diapered or arabesque pattern of irregular division raised and depressed. Goat leather is crossed in regular lines at acute angles, forming minute elongated diamonds.

As some of these leathers are too costly to be furnished at low prices, the million who desire the best, but cannot always afford the cost, are supplied by fair imitations which are not as durable as the genuine, serving in part the purpose of the costly leathers. These imitations are made by the aid of photography. A genuine seal, alligator, boa or other costly skin is photographed, then printed on sensitive gelatine, the parts not acted upon by light dissolved out in water, and a cast or an electric plate then made in copper or type metal, as practised in the reproduction of engravings, and then the metal plate and the smooth leather of some domestic animal are passed between rollers under pressure, and the figure of the plate is permanently fixed on the leather by great pressure. Any of these leathers may be stained, colored or dyed to any tint desired; but plain black or the color left by the tanning is generally preferred.

Many efforts have been made, says an exchange, to devise a method of preventing the tarnishing of silver and silver-plated ware upon exposure to the atmosphere. The blackening which such articles speedily suffer is due principally to the formation of a superficial film of silver sulphide by the action of the sulphurous vapors in the atmosphere, especially in cities, where the large consumption of coal and coal-gas charges the atmosphere with sulphur and sulphur compounds. Of all the suggestions that have been made, none appear to have given satisfactory results as a varnish of collodion—a solution of gun-cotton in a mixture of alcohol and ether. All other varnishes appear to impart a yellowish tinge to the silver or plated wares, but collodion varnish is quite colorless. The articles should be carefully brushed with the varnish with an elastic brush, making sure that the entire surface is covered. The film of collodion will protect the underlying metal surface for a long time.

STATIONERY FOR TREASURY
DEPARTMENT.

Bids were opened on the 8th inst., at the office of the stationery division for stationery for the Treasury Department. The awards are as follows:

Nescachogue Manufacturing Co., 50 reams manilla paper, strong, rope, 18x38 inches, unfolded, 29 lbs. to the ream, per ream.	\$6.62
E. D. Lockwood, 100,000 envelopes, 11x4 1/2, XX manilla, rope, per 1,000.	2.58
Wm. Ballantyne & Co., 20,000 tags, linen, eye-letted, 5 1/2x3 1/2, per 1,000.	5.40
Wm. H. Dempsey, 50 doz. quarts copying ink, A. W. Faber's French, per doz.	4.50
Wm. Ballantyne & Son, 100 doz. quarts writing fluid, Arnold's (genuine), per doz.	4.09
Wm. Ballantyne & Son, 50 doz. quarts ink, Carter's combined copying ink and writing fluid, per doz.	5.74
J. J. Chapman, 100 doz. quarts ink, David's black, per doz.	1.65
Wm. A. Wheeler, Jr., 30 doz. pints ink, crimson, Carters', per doz.	7.50
Wm. Ballantyne & Son, 20 doz. pints ink, crimson, Carters', per doz.	7.65
C. W. Thorn & Co., 50 doz. bottles ink, carmine, Davids' No. 3 ground glass stoppers, per doz.	2.29 1/2
C. W. Thorn & Co., 20 doz. shears, 10 inch, straight trimmers, per doz.	7.12
Wm. Ballantyne & Son, 10 doz. shears, 11 inch straight trimmers, per doz.	7.65
C. W. Thorn & Co., 10 doz. shears, 12 inch, straight trimmers, per doz.	9.36
Wm. Ballantyne & Son, 10 doz. clips, board, letter size, in extra heavy straw-board boxes, stayed with muslin, per doz.	2.70
Wm. Ballantyne & Son, 10 doz. clips, board, cap size, in extra heavy straw-board boxes, stayed with muslin, per doz.	2.90
Rowland A. Robbin, 50 doz. clips, metal, small size, in boxes of one dozen each, per doz.	.48
Wm. Ballantyne & Son, 50 doz. rulers, wooden, brass edge, 12-inch, per doz.	.77
W. H. Dempsey, 24 doz. rulers, gutta-percha, 12-inch, per doz.	1.50
C. W. Thorn & Co., 50 gross pencils, Eagle Pencil Co.'s best round black, No. 2 1/2, per gross.	2.90
C. W. Thorn & Co., 200 gross pencils, A. W. Faber's best round black, Nos. 2 and 3 (150 gross No. 2, 50 gross No. 3), per gross.	4.08
Wm. Ballantyne & Son, 50 gross pencils, American Lead Pencil Co.'s best round black, Nos. 2 and 3 (25 gross each), per gross.	2.92
Joseph L. Savage, 100 gross pencils, Dixon's American Graphite, best round black, SM, No. 142, per gross.	3.34 1/2
W. H. Dempsey, 5 gross pencils, A. W. Faber's Siberian, F, per gross.	9.00
Jonas Langfeld, 1,200 gross pens, steel, viz.: Spencerian—No. 5, 100; Esterbrook's—No. 11, 100; No. 76, 100; No. 92, 25; No. 049, 100; No. 135, 50; No. 182, 100; No. 267, 25; No. 280, 25; No. 284, 25; Falcon, No. 2, 200. Miscellaneous—Pratt's bevel pointed, 25; Miller Brothers' Q, 20; Miller Brothers' carbon, 25; Miller Brothers' Acme, 100. Average per gross.	44 57-100
E. D. Lockwood, 30 gross pens, steel, Perry's, No. 70, barrel, per gross.	2.25
Parker, Stearns & Co., 400 gross rubber bands, A. W. Faber's, Davidson Rubber Co.'s or Parker, Jones & Co.'s, viz.: 1,000 No. 31, 1,000 No. 32, 1,000 No. 33, 1,000 No. 45, 100 No. .00 1/4, 100 No. .00 1/2, 200 No. .00 3/4, average per gross.	49 9-10
W. H. Dempsey, 100 gt. gross rubber bands, A. W. Faber's, Davidson Rubber Co.'s, or Parker, Jones & Co.'s, viz.: No. 14, per gt. gross.	1.15
Wm. Ballantyne & Son, 500 lbs. sealing wax, brown, per lb.	.16
E. D. Lockwood, 500 lbs. sealing wax, brown, per lb.	.16
Wm. Ballantyne & Son, 700 lbs. pins, American & Howe Pin Co., best solid headed, in one-half lb boxes, viz.: 100 No. 1, 300 No. 2, 100 No. 3, 100 No. 4, 100 No. 5, average per lb.	55 9-10
Wm. Ballantyne & Son, 20 boxes seals, notarial, No. 25, red, per box.	.12
W. H. Dempsey, 1,000 pieces ink eraser, per piece.	.2 1/2

Edward Posen & Co. have just received a very extensive and varied line of albums made up in plush, fancy leathers, olive wood, &c., with decorations in antique, embossed silk flowers and other very attractive and elegant designs. There is also a large line of easel and illuminated albums, chamois skin albums, &c. The firm is its own manufacturer, and it therefore offers its line at very reasonable prices. Purchasers of albums will make a serious mistake if they fail to inspect these goods before placing their orders.

FOUNTAIN STYLUS-PEN.

William W. Stewart has made an improvement in fountain stylus-pens.

The object of this invention is, first, to provide the stylus-pen with a capacity to equalize the flow of ink under all circumstances by providing for the expansion and contraction of the fluid ink in the holder without permitting an undue flow or an absence of discharge at the stylus; second, to provide a stylus of some suitable animal substance which will not become permeated—such as horse-hair, quill, &c.—which are softer to the touch, yield more delicately, and deliver the ink in a finer mark.

The reservoir terminates at one end with a hollow head and at the other with a pen or stylus-point section. Within this last there is a condensing-chamber, connecting at its lower end with the tube whereby ink is delivered to the pen or stylus, and at its upper end with a froth or film tube, which projects up into the ink-space of the reservoir and is in communication with the same by means of holes near its junction with the condensing-chamber and a hole at its extremity. The extremity of the point-section is inclosed within a jacket, having a little space within it around the point-section at its extremity. The effect of this arrangement is to permit expansion and contraction of the ink at the discharge without danger of overflow, because capillary attraction will cause the ink to flow up into the space within the jacket instead of detaching and falling upon the paper.

The inventor finds it advantageous to employ what he calls "irritants" within the reservoir, to facilitate the formation of froth or film in the upper part of the reservoir, and thereby free the ink from the particles of air which it would otherwise absorb from the little bubbles of entering air. These irritants consist of strands of some non-absorbent substance—such as horse-hair, glass, polished gold, platina, &c. These strands, one or more in each pen, are attached by securing the two ends to the wall of the reservoir in some suitable way, leaving the central part loose, compelling the film to form a line along the irritants.

There are also placed within the reservoir one or more diaphragms or divisions, which, while they do not separate the reservoir into distinct sections, still practically confine the ink and prevent its ready flow from one part of the reservoir to another when the same is only partly filled, and thereby confine the ink at the lower end in the vicinity of the ink-chamber.

A stylus-point made of horse-hair or some similar non-absorbent substance, is claimed to have advantages over the rigid iridium-tipped stylus-point heretofore made, and to be softer and pleasanter to the touch. It is capable of delivering the ink in a finer stream, and thereby producing a finer mark upon paper, and it is much cheaper.

The horse-hair stylus is fixed in a cylinder of metal, which may be constructed so as to act as a valve when the pen is out of action. A fine gold wire extends upward from a weight through the film chamber, bearing against the walls of the chamber with sufficient force to maintain the weight in position. If desired, however, the weight may be omitted, and a delicate spiral spring on the wire or stylus may be substituted. A small collar is placed on the wire, and the spring is confined between the collar and the end of the film tube, so that its tendency is always to project the stylus from the point, yet to let it yield and recede when pressure is applied while writing.

TRADE NOTES.

The February number of the *Magazine of Art*, published by Cassell & Company, is a very elegant publication, both as to illustration and typography. It is full of interesting and instructive reading.

Pomeroy & Sons, Newark, N. J., make a can for holding stamping ink to be used with rubber stamp. The can is a handy thing for supplying ink to the pad. The same firm announces an advance in the prices of its mucilage.

The Powers Paper Company, J. L. St. John, agent, 62 and 64 Duane street, New York, is offering a special lot of linen paper, in folio and note and letter sizes, at a bargain. Stationers and printers are invited to send for samples.

Phil Hake has just completed his line of valentine, Easter and birthday cards. These goods are all made of the richest material, and all of the designs show a high degree of artistic taste. The cards come single and folded, with hand paintings, inscriptions in verse, embossed floral designs, &c., and in shape are circular, square, oblong, star, &c. A very pretty Easter novelty has a heavy border of swan's down, with raised silk cross and flowers in the centre. A card with a similar bordering has an imitation bird's-nest, filled with eggs, in the centre. The great variety of designs makes the collection such as to suit the tastes of all buyers.

The Palmer Art Company is showing to the trade a very fine line of Easter, valentine and birthday novelties. In valentines there are several very striking designs. A large square card, resting in a handsomely carved easel frame, is of plush and satin. The centre contains a hand-painted inscription in verse, which is hidden by a satin curtain ornamented with a beautiful floral scene, the effect of which is heightened by the figures of birds. The inscription is an original poem by Cheney, and is surrounded by a beautiful landscape painting. The bordering of the card is satin with plush corners. A large card with a blue plush border has the embossed figure of a dove gracefully poised in midair over a winter landscape carefully and finely executed. Something very pretty and novel is shown in confectionery boxes. These have a round oblong form, the lower portion being fitted up as a receptacle for confectionery and the upper portion having a landscape or other scene brought out in bold relief. The line also embraces a variety of of handkerchief cases, banner, panel and other cards made up in satin and plush, handsomely fringed and bordered.

What you attempt to do, do with all your strength. Determination is omnipotent. If the prospect be somewhat darkened, put the fire of resolution to your soul, and kindle a flame that nothing but death can extinguish.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe: and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—Ex. U. S. Minister, E. B. Washburne.

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—New York State Engineer's Report for 1881.

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

DRIVEN TO GUESSING.

The New Haven *Palladium* says: "In a New Haven bookbinding establishment a few days ago, a question concerning cutting a ream of paper arose. The order was that the paper be cut so that there should be an equal number of pieces of each of three sizes, one size to be sixteen to the sheet, another twelve to the sheet and the third eight to the sheet. Although accustomed for years to questions of this nature, the attachés of the establishment found this one too difficult. Outside assistance was asked, but none of those who undertook to divide the ream correctly for the purpose required were successful. Under the circumstances guessing was relied on, and, although the result of the cutting did not show that the divisions were incorrect, counting would have shown that the order had not been accurately filled."

Anent this two correspondents of the *Palladium* have something to say. One remarks: "I should like to dedicate the following solution to the attachés (especially the bookkeeper) of the bindery which has gained such fame for mathematical ability by their endeavors to divide a ream under conditions given in the Saturday issue of the *Palladium*. In the first place the division cannot be carried out without loss as the following will show: Since one piece of paper will contain 1-16 of a sheet, another 1-12, and the third style 1-8 of a sheet, the quantity of paper in single pieces of the three styles will be as 1-16 to 1-12 to 1-8. If we reduce these they become 3-48 ; 4-48 ; 6-48, or as 3:4:6. Now, as the number of pieces in each style is to be the same, the whole ream of paper is to be divided so that the entire quantity used for each style shall conform to this proportion, i. e., we use for the 16mo pieces 3-13, for the 12mo 4-13, and for the 8mo 5-13 of the entire ream of 480 sheets. Carrying out this, we find that we must use 110 10-13, 147 9-13, and 221 7-13 sheets respectively. This will give us, if we can utilize the fractional sheets, 1,772 4-13 pieces of each style. But this involves a loss of 1-12 of a sheet of paper (I wonder if the bindery men can tell me how!), and our attachés can by a slight act of generosity not only save this waste, but win the gratitude of their patron. My suggestion would be this: Add a sheet to the ream, making 481 sheets; then divide into lots of 111, 148 and 222 sheets, to be divided 16mo, 12mo and 8mo respectively, and you have not only simplified your work, but have to give to your patron, instead of 1,772 sheets and the worthless fraction, the number of 1,776 sheets in each of the desired styles, and you have used all your paper. Figure it out and see."

The other correspondent says: "In reading your Saturday paper I saw 'Driven to Guessing,' and I think I can offer you a correct solution. It would be an impossibility to divide a ream of a paper under the given conditions. The nearest result that would be practicable would be: Divide 222 sheets into eight parts each, which would be 1,776 pieces; divide 148 sheets in twelve parts each, which would be 1,776 pieces; divide 111 sheets in sixteen parts each, which would also be 1,776 pieces. But this would take 481 (222-148-111) sheets—just one more sheet than a ream. The correct solution would be to divide 221 7-13, 147 3-13, and 110 10-13 sheets, respectively, into eight, twelve and sixteen parts; but as sheets don't come in fractional parts, this solution is not practicable, though it is strictly correct."

If ye do well, to your own behoof will ye do it; and if ye do evil, against yourselves will ye do it.—*Koran*.

CUSHING & BROTHER, Importers & Manufacturers,
138 MARKET STREET, PHILADELPHIA.

25c. A GENUINE STYLOGRAPHIC. This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address GOLLNER MFG. CO., 222 Centre St., New York.

The Oldest Established House in the United States for the Manufacture of Machine-Made Envelopes and Envelope Machinery.

PHOTO-MECHANICAL PRINTING IN COLORS.

This invention relates to new and useful improvements in that class of photographic printing processes which are known as "licht druck" or "light printing;" and it consists in an improved process for photo-mechanical printing in colors, whereby all objects from nature or paintings are reproduced photographically, in any desired size and with their exact original colors, upon paper, fabrics, porcelain, glass, enamel, &c.; and the invention also consists in devising a color-scale by means of which any color, in all its shades and tints, may be mechanically defined, for the purpose of reproducing it by light printing or any like process of superimposing colors.

From a given negative of the desired object are printed, by the well-known process of photo-mechanical printing, as many prints as may be required, their number being determined by the number of colors to be combined, one print being required for the production of a monochrome for each color. According to the current theory of colors, each color-tone is to be regarded as composed of given percentages of the three primary colors—yellow, red and blue—and according to this theory all colors in nature could be perfectly reproduced in printing by the use of any or all of these three colors. The nature of coloring materials, however, presents an unsurmountable obstacle to carrying this theory into practice, as none of the coloring materials possess the depth, brilliancy and transparency combined which are seen in the prismatic colors in nature. It is necessary, therefore, in order to imitate all and every natural color in print, to enlarge upon the means for producing it. For this purpose a color-scale containing practically all the colors, in various shades and tints, as they are found in nature or in paintings, and wherein each color has been produced and can be reproduced in a mechanically well-defined manner by means of photo-mechanical printing in colors has been devised. The practical use of such a color-scale is self-evident when it is considered that the photographic negatives of colored objects very often do not furnish true lights and shades of the colors, that in the process of light printing the superimposed colors, owing to lack of transparency, more or less destroy the effect of the underlying colors, and that the transfer of the colors from the plate to the print is different in degree, according to the color coming on printed or unprinted spots. All of these influences, which have made heretofore light printing in colors totally uncertain in its final results, are said to be anticipated in the use of this color-scale, which gives a mechanically well-defined way for obtaining a desired result.

With the help of this color-scale it is a very easy matter for the artist, by comparison with any color of an original to find out how many color-plates will be needed for the production of such color, and, further, what percentage of each color has to be taken, the same succession of colors as given on the scale to be followed in the printing.

The manner of obtaining color-scales can be greatly varied as the succession and number of the foundation-colors may be changed. The color-scales may also advantageously be arranged according to color-tones, whereby the looking up of colors is greatly facilitated.

The process of colored light printing by the use of the color-scale is conducted as follows: As mentioned in the beginning, a number of

light prints in neutral gray are obtained from the given negative, and served as foundation for the production of monochrome plates. First, a comparison of the original with the color-scale will easily decide how many and what plates are necessary for the production of the colored object. Upon one of the light prints is then marked out on all necessary places the number of the color on the scale corresponding with the original color. The percentage of each color found in the color-scale is now marked upon the remaining prints upon the proper places—one print for each color. The prints thus obtained are now regulated with the brush, so that on required places the desired percentage of color is represented in its equivalent in gray or black, a monochrome in gray and black for each color being thus obtained. Of these regulated prints, negatives of exactly corresponding sizes are produced, and light-printing plates of them prepared in the usual manner. The plate which has been obtained for the yellow color is now printed with yellow color, the plate for the red color is printed with red color, and the plate for the blue color is printed in blue color, the plates being made to register properly. These three colors combined give now a tolerably well-colored picture, which will be greatly improved and appear more finished by the use of the fourth plate, which is printed with the neutral tone. For the production of finer effects the use of the fifth plate, with which the local or flesh tint is printed, is in certain places often very desirable, where flesh or local tints enter into the composition. The use of the sixth plate is required when it is desired to heighten the effect of the red color, as madder-lake, owing to lack of body, often requires strengthening.

By means of the above-described process even persons of little artistic ability can succeed after a short time to produce very fine and faithful colored reproductions, which will surpass in softness and strength of color chromo-lithographic pictures, in which the colors necessarily lose much of their strength and purity by considerable additions of varnish; and, while four or five plates in this process are said to produce practically a better result than is obtained in chromography with fifteen or twenty plates, the preparation of the plates does not require more time than often does a single plate in any of the other processes. Another advantage of the process is the ease with which the production of different sizes of pictures can be simultaneously carried forward.

The manner of producing monochrome-color originals may in certain cases be departed from, and the same may then be drawn directly with the brush and pencil.

The process for light printing in colors by the use of a color-scale can be applied with great advantage to the production of color-photographs upon porcelain, enamel and glass, producing easier, quicker and better results for the following reasons, viz.: The printing from properly hardened chrome-gelatin plates with porcelain colors compactly mixed with the necessary amounts of a proper oil and flux presents less difficulties than the printing from lithographic stones, which soon fill up with the pigment, and as the admixture of oil or varnish to the colors in printing is a necessary evil in porcelain printing, as it has to be dried and evaporated before the colors are burned in, to prevent blotting, the advantage of the light-printing process is obvious when it is considered that with the thick pigments used in light printing, flatter and softer tones can be produced than with the much-diluted pigments necessary for

flat tones in lithography. Finely ground flux forms a necessary addition to the pigments to produce their burning in under the glaze, and generally three times the weight of the pigment is the amount of flux required. The pigment and flux are then intimately mixed together with balsam of copaiba, to the proper consistency, which will allow, when desired, the powdering process to be combined with the light-printing process. The color-prints are first mounted upon a temporary support on a thin film of copaiba balsam laid on with the roller, or on a film of collodion.

The printing is done upon a temporary support, and with porcelain colors. The succession in which the pigments are printed depends upon their relative fusibility, and the printing is temporarily interrupted as soon as those pigments which easily fuse together and are mixed with the same flux are printed upon the temporary support, from which they are now transferred upon a porcelain plate and burned in. After this is done, the printing on a temporary support is then proceeded with, transposing the plate with each new color the width of one square to the right. This second color-scale, containing the remaining colors—such as purple and cobalt, the flux for which (borax) is different from that of the other colors—is then transferred upon the porcelain plate in its proper place, in which it would have come if no interruption had taken place. After a second burning in, the color-scale upon the porcelain plate is completed, and will show as a collection of different colors in as large a variety of shades and tints as the color-scale on paper. Should this scale not be sufficiently extended, more pigments may be made to enter into its composition.

For the powdering-in process a color-scale constructed after the principle herein described will be found of very great use for such process, as the colors can be thereby likewise mechanically defined. By comparing the object to be reproduced with the color-scale upon porcelain it is now easy to tell how many and what colors are required, and also how often they have to be burned in, so that a fine oil-painting can be reproduced upon porcelain in all its strength and effects, together with its technical qualities. The color-scale upon porcelain gives to the artist an intimate knowledge of the relative influences of the pigments upon each other and of their behavior in the fire—a knowledge which formerly required many years of practical experience; and combined with the process of light printing in colors the technical difficulties of painting upon porcelain are said to be entirely done away with by the photographic transferring.

The winds and the waves are always on the side of the ablest navigators.—Gibbon.

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection
At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

NEW YORK, JANUARY 31, 1884.

WHOLE NO. 449.

Correspondence.

BOSTON BEANS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE OF THE LOCKWOOD PRESS,
49 Federal Street,
Boston, January 30, 1884.

January is fast drawing to a close, and the stationers are preparing their stock account. With most of the trade February begins a new commercial year. Trade for the past month has been very encouraging, although during its later days a dropping off is reported by some dealers. Blank books and commercial stationery have been the most active, with little demand for fancy or society stationery. Valentines and Easter goods are meeting with ready sales. Taking the stationery trade, as a whole, the prospects seem encouraging.

The Forbes Lithograph Company is just about to introduce to the trade an artistic novelty in the way of a household screen. The frame is finished in ebony and stands about five and a half feet high. The screen is fourfold, each fold having upon both sides two panels. The upper panels are rich floral designs, by Augusta Reichalt, the renowned German artist. The panels on the reverse side present water scenes and landscapes from the brush of eminent English artists. The smaller panels at the bottom of the screen are beautified with ferns and ornamental designs. The price of the screen, complete, is \$50 net to the trade, or the panels will be furnished separate and dealers can have the frames made by whom and where they choose. When one takes into consideration that parlor screens command from \$50 to \$100, the price of this household ornament, being as it is such an artistic production, is certainly cheap, and within the reach of all whose refined tastes would call for home decorations. Dealers should remember that what the eye does not see the heart cannot crave. One of these elegant screens should be in stock as a sample, for it is only to be displayed to attract popular attention and ready sale. Two new sets of floral studies, to succeed the popular sets issued by this house last year, are among the novelties to be shortly presented. The studies presented last year by the Forbes Company were well received, having a very large sale. They are introduced to take the place of the higher-priced goods now in the market, although they are in no wise inferior to that class of goods, for these floral studies are really gems of art.

Entering the spacious warerooms of Chas. K. Wadham, that gentleman was discovered in the midst of piles of boxes of stationery, envelopes

and books. He was taking stock. Mr. Wadham had nothing to complain of with the exception of "a big day's work." J. E. Dickson, who is traveling for the house in the Western States, is frequently heard from in the shape of orders.

George Coleman, whose book bindery was destroyed in the Federal street fire some weeks ago, has bloomed up again in more spacious quarters, occupying new rooms at No. 30 Franklin street. His facilities are now increased, and orders are more quickly dispatched.

Chas. H. Whiting speaks very favorably of trade and sees no reason to draw any discouraging conclusions. His book trade has been very large, and orders are still satisfactory, being very large for the present month. He, too, will take stock this week.

Another house which enjoys a good local trade is that of M. R. Warren, manufacturing stationer. In blank books, especially odd styles, this house carries a very extensive stock, and does a large trade in railroad and corporation supplies. A specialty with the house is law blanks. It is here that the legal profession of the State supplies itself with the greater part of its stationery.

Geo. F. King & Merrill are fully alive to the times, and are determined that people shall know of their pens and pencils. A new device for local advertising is just being presented by the firm in the form of an office blotter. Four pieces of blotting, of varied colors, are neatly fastened together with eyelets to a stiff cardboard, upon which is printed an advertisement setting forth the merits of the "King office pen." These blotters are being extensively distributed among the counting rooms of the city, where, owing to their neatness and serviceability, they are highly appreciated. When one sheet of blotting becomes too much soiled it is easily removed, when the next sheet is ready for use, and all the while the "ad." is there, silently proclaiming "King's office pen." The telephone number of the firm is printed in red upon the face of the "ad." as a suggestion to the wise. It's a pretty good scheme, I think.

A. L. D.

RICHMOND RETURNS.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., January 28, 1884.

This city, with a population of more than seventy-five thousand inhabitants, sold last year upward of twenty-eight and a half millions of dollars' worth of manufactured goods. Among her manfactories are three paper mills, eight paper-bag, blank-book and paper-box establishments, which, last year, gave employment to

five hundred and fifty-six hands, and whose sales aggregated \$486,000. These all began the new year with encouraging signs in their respective branches. The holiday trade in the stationers' line and its adjuncts was lively and good throughout. This activity has been succeeded by the usual comparatively dull season.

Carlton McCarthy & Co. have recently published No. 40, "A Romance," the first edition of which was exhausted in ten days. The second edition is in press. They are also printing the second edition of "Goldie's Life in the Army of Northern Virginia," the large first edition having been exhausted. They are also printing a series of historical pamphlets, entitled "Contributions to a History of the Richmond Howitzer Battalion."

West, Johnston & Co.'s latest publication is "Garden of Creation," by Rev. R. R. Howison, which is having quite an extensive sale.

Baughman Brothers & Co., printers and stationers, have recently gotten out some beautiful specimens of lithographic work. The firm handles more fancy goods than any similar establishment in the city.

The Virginia Paper Company has and always carries a full line of goods, and its business is fully up to the standard of what it was at this period last year.

The Richmond Paper Manufacturing Company reports business as very active, especially in its manufacturing department. It is well known to all of the readers of THE STATIONER that this company makes the celebrated "Climax" blotting-paper, which has taken such high rank in the estimation of all of the buyers and consumers of blotting-paper. Since the reduction in price the sales have increased phenomenally. This is owing to the strict uniformity of the paper and the care taken to prevent a single ream from being sent out that is not fully up to standard. The company also does a large wholesale trade in paper bags, &c., and its trade has grown to such dimensions that it has been forced to seek much more commodious quarters, which will be occupied on the first of February. The new place of business will be No. 1,215 Main street.

J. W. Randolph & English report business as good as could be expected, considering the season and the bad weather. This house, as the patrons of THE STATIONER well know, is the oldest and most substantial of any of its line. What one cannot find at this establishment, in the book way especially, can seldom be obtained in any similar house in the State.

The Randolph Paper Box Company is now in its new quarters, where it has every facility for

prosecuting the large and increasing business of which it is the master in the South. It has the largest factory, employs the greatest number of hands, and has the most extensive patronage of any firm in their line south of New York.

SENTINEL.

SCHENECTADY ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

SCHENECTADY, January 23, 1884.

Schenectady merchants enjoyed an unusually good holiday trade. The day before Christmas was one of the busiest that our merchants have ever known. Scarcely any branch of business in the city received a larger or more profitable share of this trade than the book stores. The practice of giving books for holiday presents is notably increasing here, such gifts being recognized both as a source of instruction and as affording substantial grounds for appreciation on the part of the recipient. The dealers also had a large and well-selected stock of fancy articles in this line, from which buyers could make their selections. One dealer, however, did not share in the general prosperity, and on the 14th of January Henry Swere, stationer and bookseller, made a general assignment to James A. Goodrich, of this city, for the benefit of his creditors, with preferences to the amount of \$4,300. The preferred creditors were mostly Schenectady parties. His unpreferred business obligations outside of this city are estimated at about \$500, making total liabilities about \$5,000. His assignee thinks that there are sufficient assets to pay everything in full, but he will probably be unable to pay more than sixty or seventy-five cents on the dollar. Mr. Swere started about two years ago with little capital and a chattel mortgage on his stock. The interest on this, with his running expenses and interest on borrowed money, proved too much for him. His location, too, was not very good. Last September a judgment was obtained against him for some \$1,700, and he was forced to make the assignment to avoid being sold out.

In newspaper circles there has also been a change. The *Schenectady Daily Union* has passed from the control of ex-Senator Charles Stanford into the hands of John A. Sleicher, a well-known and experienced journalist, formerly on the *Troy Times* staff. Mr. Sleicher has greatly improved the general appearance of the *Union* and its columns give evidence of considerable ability. It is the only paper in the city and Congressional district having the Associated Press franchise.

On the first of February James H. Ward will resume his position as chief clerk for James H. Barhyte. Mr. Ward has been assistant postmaster for the last three years. It is said that he will become Mr. Barhyte's successor in the book and general stationery business in a short time.

AUGUSTA'S DOINGS.

[FROM OUR REGULAR CORRESPONDENT.]

AUGUSTA, Ga., January 25, 1884.

The weather has been so very bad since Christmas that everything has been very stationary in all kinds of business besides the one I am mostly interested in, and when the streets are filled with slush, and the thermometer is down to 15° above zero (which is as bad here as 20° below is with you), very few ladies are to be seen in the streets. This has been one of the coldest spells we have experienced for more than ten years, and we feel it very sensibly, as we are

not prepared for it, houses being built much more open.

On making a start to see how my friends the booksellers and stationers were getting on, I first stopped at Pendleton's (who, by the way, is a nephew of General Lee's chief of artillery, an Episcopal minister, who is said to have prayed for the enemy when directing the fire of his batteries), and asked him how trade had been with him. He told me that he had been very agreeably surprised with the way trade had opened and continued with him during the holiday season; he had sold more fine books, stationery, and high-priced Christmas cards than ever, and his fine stock of desks and work-boxes had been very much thinned out. Altogether he felt very well satisfied.

One very great drawback to the stationers and booksellers is that all of the drug stores and dealers in dry goods have gone into keeping goods that legitimately belong to stationers only. This is very injurious to the regular trade, and I am sure that the druggists and dry goods dealers derive very little benefit from it. I am glad to see that many have overreached themselves. I think it shows a weakness in their own business.

I next called on Wm. T. Richards & Son, an old house which has taken in three generations, having been in business here for upward of fifty-five years, mostly in the same store. The son gave the same account of trade having been very good during the holiday season, and their depleted shelves showed that they were not joking. They combine a fine printing establishment with their business, and have an excellent practical printer at the head of it, and turn out as beautiful work and at as low prices as in New York.

James Gow, their neighbor, who is also connected with the popular daily, the *Augusta Evening News*, as well as keeping school books, stationery and toys, reports business as having been beyond his expectations.

Mrs. Buckley keeps store down town, and I believe that she has done very well.

I missed our old friend George A. Oates on Broad street, where he had been for the last thirty-five years, and that mostly in one store, and at one time did a very good business; but he lost very heavily by the war, which threw him into pecuniary difficulties which he found it impossible to overcome, and he has now an office in a side street, near Broad, and hopes by agencies to try and build up again. He seems to have plenty of vim in him yet. I saw at his place some very rare old books, one a Hebrew Bible of 1620, and a Greek Testament of 1623, bound together. It is mentioned in Dibdin as being very rare and valuable. A fine copy of King James's Bible, folio black letter, 1639, printed by John Bill; also second volume of Fox's Book of Martyrs, folio, 1610. Many rare prints and etchings can be found at his place, and it would be worth any collector's while to give him a call when passing through. All kinds of trade are rather quiet since the holidays.

MILL BANK.

LOUISVILLE LOITERINGS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., January 26, 1884.

The weather continues extremely cold, with the conditions quite as favorable to some branches of trade as they are adverse to others. Ordinarily, winter in this belt of territory is a period of soft and slushy weather, varied by occasional freezes and a few raw days, quickly followed by thaws and rains. This season started in after that manner, but with the close of

last year, and right along in this year up to the present writing, the ice king has held quite a steady reign, the thermometer hovering almost uniformly close to the zero line and occasionally making a dip far below it. Had the advent of the cold wave been a month earlier the winter trade would have been large; but, as it was, December was for the most part too mild, and it is the general experience that business lost through unseasonable weather in the first part cannot be fully made up afterward. This applies more directly to general retailers, who have to lay in their stocks in advance of the season. But trade at present is tolerably good on the whole, and the outlook is fair. Values are mostly down to hard pan, the elements of inflation are eliminated, and the commercial temper is prudent and careful; hence spring business ought to be a good average. Winter wheat has a good snow covering, and the situation in agricultural circles is favorable. As to the reports of serious injury to the fruit trees, a well-informed country paper states that there has been more damage to the canned fruits in the stores by freezing than to the orchards. Collections are reported satisfactory by the banks, and the money market is easy. The supply of loanable funds is abundant at the standard rate of 6 to 7 per cent.

The following is a comparative statement of mercantile failures occurring in this city during the past six years:

Years.	No. of Failures.	Assets.	Liabilities.
1878.....	70	\$2,500,000	\$3,700,000
1879.....	30	238,000	475,000
1880.....	28	576,000	943,000
1881.....	38	374,000	610,000
1882.....	52	525,000	853,000
1883.....	51	343,000	684,000

It will be remembered that 1878, which shows the heaviest figures, was the last year of the national bankruptcy law.

In collecting items for *THE STATIONER* your correspondent sought, among others, Henry Hewes, the efficient and experienced department manager at John P. Morton & Co.'s, who can always be relied upon to state exact facts without any coloring. Mr. Hewes said: "January is usually a between-seasons period, when everything is expected to be quiet, the fall and holiday trade being over and spring sales not opened; but there has not been a lull in January of this year. Trade has passed along briskly from one season right into the next. There is a well-supported demand for general book and stationery stock, and the printing and blank-book departments are having a very full run of work. You can say squarely that the interests represented by *THE STATIONER* are in a healthy and encouraging state of activity here."

Visits to other leading establishments revealed the same satisfactory condition of affairs, the manufacturing stationers and printers being especially well employed. A representative retail book and stationery house is that of Curry & Dearing's, where your correspondent found Samuel L. Curry arranging a display of Prang's superb valentines, and many customers making their selections from the pure and simple designs for juveniles, the chaste and artistic silk fringed and the elegant satin prints. Truly the artistic world owes a debt of gratitude to the great firm of L. Prang & Co., of Boston. And that sumptuous souvenir, the "Lion in Love," the best critics pronounce it the paragon of artistic conception and execution. Mr. Curry's exhibit also includes some excellent specimens of work from the house of White, Stokes & Allen, New York, of which "Roses and Forget-me-nots," valentines and "Easter Flowers"

(Continued on page 132.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (4) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 130.)

are portfolios of superior excellence. Large satchets of velvet and satin of delicate tints, finished with varied floral designs, compose another line in this exquisite class of goods, which is no longer "fancy," but *staple* stock, for after the holidays comes the demand for valentines, for Easter cards, and for the remainder of the year birthday cards and souvenirs for countless purposes, until the season for Xmas and New Year cards is at hand again. Truly, American fine art publishers have carved out a phenomenal success!

Among other refreshing novelties at the book-sellers is a series of crisp, clean little volumes of birthday books, about 16mo. in size, delightfully bound in calf, seal and russia, with quotations for each day in the year, and a space opposite for autograph, the product of Thomas Whitaker, New York; and the prose and poetical selections are as fine as the book-making is perfect.

H. A. Elderkin & Co. (the new photo-supply house), are adding a department for the manufacture of frames, moldings, and plush goods.

Otis Hidden has disposed of his down-town retail store, selling the picture-frame department to M. Denhard and the book and stationery branch to Wm. Q. Haythorn.

Perry & Co., for many years in rubber goods and toys on Fourth street, are closing out at auction and will discontinue business here.

Stationers report an excellent share of orders for wedding invitations and visiting cards of the finest grades. Louisville stationers claim to turn out as fine a class of copper-plate and lithograph work in this line as any city in the Union.

The *Post and Commercial* are each claiming the largest circulation of any daily published here, while the *Courier-Journal*, grand and gloomy, continues its war on the tariff, pausing only an instant to remind the Kentucky Legislature that it ought to unlock the deadlock and select anyone of the nominees for United States Senator as all "tariff for revenue only" men. The latter paper exhibits in its counting-room a series of eight stereotype plates, each making one page of the journal and of which a new set is cast every day in the year.

The number of visiting salesmen from the North has been limited, but postal-card announcements are raining in thick and fast, and eloquence will be numerous next month. As I am closing, I discern a softer tinge to our polar wave and just as likely as not the barometer will be in a melting mood before this reaches type.

BOURBON.

CINCINNATI CINCTURES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, January 29, 1884.

Business is fairly under headway for the year 1884. Here in Cincinnati it exhibits the properties of the chameleon. To one man it has one color, to another man quite another; it has a separate shade and color for every beholder. There are fewer who see it dark-colored now than there were before the new year. To some it looks really gay, as a brier rose, but somewhat distant. Many stationers say that their last December sales were up to those of the month bearing that name in 1882.

The job printing trade, in the way of advertising circulars, has had quite an impetus during the last two weeks. Our mails are crowded with business circulars going out. Every incoming mail is freighted with them. This doesn't look as if business men in any part of

the country were scared. Manufacturing stationers are getting better orders for business blanks and general commercial stationery than they were a fortnight ago, and they, of course, regard this as a cheerful indication for the future. In general business, including all classes of mercantile traffic and all industries, there are indications which are construed by experts as pointing to a change in the times for the better. Merchants and manufacturers are universally hopeful. The exceptions are only sufficiently numerous to prove the rule.

Winter holds on grimly. He has given an impulse to the trade in boots and shoes and in clothing, both of which were dull, and to stoves and fuel, neither of which have been dull. Fuel has been very cheap here, the best soft coal selling at \$3 per ton, and slack for making steam going off at retail for about \$2.50.

John Sheppard, formerly with Pounsford & Co., has been laid to rest. That earnest, eager, sympathetic face of his is now turned to the stars with a silent but everlasting gaze. He went to the East last summer, to try to regain his health. After his return, one or two weeks spent at the store, and then business to be abandoned for a deathbed with the end not long delayed, was the history of his last days. It was his taste and skill that made the arrangement of A. H. Pounsford & Co.'s show-windows and cases proverbially attractive. Let us give a tear to his memory and try to realize that the impress on others of conscientious work like his is not likely to die, though its identity may be forgotten.

Trade here in the stationery line is without incident. No one is abandoning business, none are starting, no one is languishing and no one rejoice in a boom.

As to visits of traveling salesmen, just look at this array from New York city! They came down in great gangs, like wolves on the fold, and what business they've done can never be told. It must have been considerable, however, for they are staying around quite awhile. It does really look as if they were doing pretty well; still, in a very few days their work must be done. Then they'll skip away from us. But here is the muster-roll of the New York contingent: Ed. J. Gumpert, with Kahn & Halzingen (came by lightning express); Arthur S. Anable, with Obpacher Brothers, Munich, Germany, and New York; valentines, &c., &c.; "Our Mr. B. Alexander," from Schwed & Marks (coin purses); H. Birrell, of Ivison, Blakeman, Taylor & Co. (pens and inks); "Our agent, Mr. N. Frank," from Charles Ginn & Co. (baskets); "Our Mr. R. E. Bennett," from McLoughlin Brothers (toy books and games); "My representative, Mr. John B. Gunn," from Eberhard Faber; Frank L. Landers (Turner Manufacturing Company); Charles Plummer, of Evans, Plummer & Co.; Mr. Schad, of Saugerties Blank Book Company; Mr. Lipman, of Boorum, Pease & Co.; Frank Johnson, of Liebenroth, Von Auw & Co. A lot of reinforcements are coming in small detachments from New England and elsewhere in the East. E. Schwartz, Schulte Brothers & Co., bookbinders' materials, Philadelphia; T. S. Buck, rubber goods, Lambertville, N. J.; H. B. Handy, Morgan Envelope Company, Springfield, Mass.; "Our Geo. A. Clark," bookbinders' leather, Newark, N. J.; "Our E. Walter Giles," Esterbrook Steel Pen Company, Camden, N. J.; "Our Mr. Classon," the Plimpton Manufacturing Company, Hartford, Conn.; Lindsay Fairfax, of Richmond Paper Manufacturing Company, with blotting-papers. There—that is all for the present!

PRINCE WILLIAM.

JAPANESE POSTAL ARRANGEMENTS.

The postal system of Japan is always pointed at as a model in its way—one of the foremost departments of the Europeanized government. And, indeed, it must in all fairness be acknowledged that much credit belongs to Japan for swiftness in the dispatch of mails, while fettered with a lack of railroads. In the first place, every train carries mail, and in Japan, be it known, the imperial railways run through passenger trains every two hours, and on the Yokohama railroad nearly every hour. Thus, while in America three mails each way daily would be esteemed the climax of facilities, the minimum between the various cities here is about ten mails each way daily. This applies merely to the railroads, of course.

The delivery of mails is also very prompt, and takes place a good many times a day. A person may mail a letter in Yokohama for Tokio, one hour's ride to the north, as late as dusk, and yet receive an answer the same night, providing his friend is prompt. While in Yokohama I took occasion to mail a letter in a post-box as late as six o'clock in the evening, at a point fully a mile from the post-office. It was soon collected, delivered to the one to whom it was addressed over on the bluffs, and the same evening I received a call from the recipient.

Every effort is made in the case of foreigners to deliver their mail to them promptly. So anxious are the authorities to deliver mail, that one of the missionary ladies in Kobe says, when last summer she went up among the mountains, six miles distant, a special man was dispatched from the office here, really against her wishes, who came all the way on foot, and was not content until he had hunted her up and delivered her the mail. The city carriers have small carts painted red, with which they deliver mail upon the arrival of the large mail steamers. They go about the city at a dog trot. This applies, of course, to the large port cities. In the interior mail is carried from town to town by messengers, who also travel at a dog trot, in cases where stage lines do not exist. With all their ceremonious haste it is amusingly incongruous to notice that little effort is made to protect mail—doubtless because, in this poor country, valuables are not much transmitted through the mails. In summer the overland mail carrier transports the mail from place to place by means of two nets attached to the end of a pole balanced over the shoulder. In case of rain these nets are wrapped in oiled paper. To one who has been accustomed to the iron mail wagons of America it is a peculiar sight.—*Correspondence Philadelphia Press.*

CANFIELD. "DIVIDED" (Formerly "Acme") ERASER, of Rubber as pure as can be profitably used, with brush-like ends: has surprising erasive quality; never soils paper or abrades its surface; improves by use. Postpaid, 15c. The trade supplied. CANFIELD RUBBER CO., Middletown, Conn.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

Lor Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor : **JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.**

CELEBRATED "CLIMAX" BLOTTING PAPER,

The "CLIMAX" possesses the following advantages:

- 1st, *Full weight*, as marked in *figures* on bundle.
- 2d, Absolute uniformity as to quality and color.
- 3d, It will not harden with age.
- 4th, It is of absolutely *unrivalled* quality.
- 5th, Cheapness, in view of its excellence.

Sold by all Prominent Stationers and Paper Dealers.

Quarter-ream packages of assorted colors will be sold as a sample, if desired.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

No. 290,432. Check or Account Book.—Jacob A. Jackson, Des Moines, Ia.

No. 290,474. Mechanical Advertising Apparatus.—Samuel E. Riblet, Gallion, Ohio.

A device for advertising, consisting of a concave mirror composed of radially-arranged strips of mirror glass, and a revolving cylinder having curved tubular jet-arms, inner projections, and an inner upwardly-pointing cylinder, and turning upon a point upon the upper end of a supply-pipe, having inner curved arms upon its upper end and a downwardly-pending cylinder.

No. 290,497. Support for Bill-File Holders.—Wm. H. Tucker, Washington, D. C.

No. 290,498. File-Box.—Wm. H. Tucker, Washington, D. C.

In combination with the follower-board of a file-box, secured against vertical displacement and having fixed to its outer face an upright bracket formed with flanges, a vertical arm or post, having lugs or flanges engaging the flanges of the upright bracket and an actuating-lever arranged on the follower.

No. 290,514. Package-Holder.—Thomas E. Baden, Washington, D. C., assignor to Miletus J. Wine, same place.

In combination, a plate formed with a cord-retaining staple, an eccentrically curved clamping-lever passed under the cord-retaining staple and pivotally attached to the plate, and the binding-cord secured to the free end of the clamping-lever.

No. 290,532. Letter-Box.—John H. Carter, Keokuk, Ia., assignor to one-half to Frank A. Whitney, same place.

No. 290,553. Combining Sheets of Zylonite with other Sheeted Substances.—Jarvis B. Edson, Adams, Mass.

No. 290,561. Pencil-Sharpener.—Walter Kittredge Foster, Stoneham, Mass.

In an improved pencil-sharpener an abutment having its bearing-face between the apex and base of the conical mouth, in combination with a knife or cutter having its cutting-edge at its junction with the face, arranged at a distance aside of the axis of the mouth.

No. 290,570. File-Case.—John S. Gheen, Washington, D. C., assignor to Miletus J. Wine, same place.

As a new article of manufacture a guide-plate

for a paper-holder case, consisting of a longitudinal body provided with a flange or flanges extending at right angles from the sides and for the length thereof, and terminating in a curved end or ends, forming recesses, and adapted to be attached to the shelf of a case.

No. 290,587. Box for Photographic Dry-Plates.—Edward Klaufner, Louisville, Ky.

No. 290,615. File-Box.—Miletus J. Wine, Washington, D. C.

No. 290,616. File-Box.—Miletus J. Wine, Washington, D. C.

In combination with a tray or drawer, a transverse gravitating bar, and a joint connecting said bar at one edge with the tray, said parts adapted to permit the bar to rise and fall freely, and also to permit the same to be turned backward from the end of the tray.

No. 290,628. Machine for Manufacturing Type.—John C. Blevney, Newark, N. J.

The eccentric consists of a disk mounted on the oblique portion of a shaft, and its throw may be varied by shifting its position on the oblique shaft.

No. 290,648. Leaf for Photograph-Albums.—Richard Moser, Berlin, Germany.

A leaf for photograph-albums, consisting of an intermediate layer of card-board, having an oblong opening of greater length than the photograph, and of face-layers having transverse slits and depressed portions between the slits, said depressed portions being made integral with the face-layers.

No. 290,651. Blackboard.—Nathaniel F. Potter and Wm. H. Fenner, Jr., Providence, R. I.

A blackboard or marking-surface composed of soapstone or talc, alum, lime-putty, black sand, silica, mortar-black and plaster-of-paris.

No. 290,655. Process of Coloring Photographs.—Chas. L. Wright, New York, N. Y.

The process of making colored photographs, which consists in applying to photographic paper in a raw state an even coating of a mixture of egg-albumen, neutral sulphate of barium, chloride of ammonium, salicylic acid and glycerine, then sensitizing, printing, toning and fixing in the ordinary manner, and then softening the albumen coagulated in the preparation of the paper with concentrated ammonia, then applying the colors in a mixture of albumen, salicylic acid, glycerine, aqua-ammonia and water, and then setting the color in the prints by passing them through a bath of alcohol, water and nitric acid.

No. 291,668. Blotter.—Jas. Q. Davis, Winstonsborough, and Newton O. Pyles, Coruoco, S. C.

No. 290,683. Automatic Holder for Knives and Pencils.—Joseph Hoffman, New York, N. Y., assignor to Henry Berolzheimer, same place.

No. 290,684. Lead and Crayon Holder.—Joseph Hoffman, New York, N. Y., assignor to Henry Berolzheimer, same place.

In an automatic lead and crayon holder, the combination with the lead-grasping jaws and the spring-impelled tip, of a positive lock or detent, whereby when the tip is retracted or moved back from the lead-grasping jaws it may be locked in that position at will.

No. 290,691. School-Slate.—Israel Lancaster, Chicago, Ill.

The combination, with the slate-frame, of an elastic binding and the reed or strip to retain the same, said binding being arranged to protect the reed and the frame of the slate.

No. 290,747. Printing Press.—Calvert B. Cottrell, Stonington, Conn.

The combination, with two or more pairs of type and impression cylinders adjustable laterally toward and from each other, of spur-wheels on the shafts of the said cylinders, and

endless spur-toothed racks engaging with but supported independently of said wheels, for imparting motion to said cylinders.

No. 290,748. Printing-Press.—Calvert B. Cottrell, Stonington, Conn.

The combination, with two or more pairs of type and impression cylinders and spur-wheels on the shafts of said cylinders, of two endless spur-toothed racks engaging with and driving said spur-wheels, gripper rods or bars extending between and connected with said racks and provided with receiving-grippers, and a feed-board from which sheets may be taken by said receiving-grippers.

No. 290,763. Discal Calendar.—Arthur B. Freeman and Marcus F. Richardson, Lebanon, N. H.

No. 290,813. Paper-Hanger's Roller.—Horatio Sweetser, New York, N. Y., assignor to Horatio Sweetser, Jr., same place.

No. 290,820. Fountain Pen-Holder.—William Vale Birmingham, County of Warwick, England. Patented in England September 14, 1883, No. 4,401.

In a fountain or reservoir pen, the combination, with the exterior casing and the stylus or point, of an elastic reservoir communicating with the stylus and provided at its end with a movable plunger, whereby it may be compressed and its contents discharged upon or into the stylus.

No. 290,827. Advertising Fan.—Alfred Wieleh, New York, N. Y.

No. 290,830. System or Method of Reporting Speech.—John C. Zachos, New York, N. Y.

No. 290,846. Removable Book-Cover.—James M. Bronson, Chicago, Ill.

A removable cover for books, constructed with integral flanges around its edges, to form a socket of a depth sufficient to receive the inner book cover, and provided with overlapping pieces at the outer and inner corners, which hold the book firmly in place, but allow it to slide freely endwise.

No. 290,862. Combined Table and Desk.—Samuel T. Corbitt, Odessa, Mo.

No. 290,889. Rule or Measure.—Frank J. Kellogg, Battle Creek, Mich.

DESIGNS.

No. 14,503. Font of Printing Type.—Charles E. Heyer, Chicago, Ill., assignor to Arthur M. Barnhart and Alson E. Barnhart, both of same place. Term of patent, 14 years.

TRADE-MARKS.

No. 10,800. Writing Paper.—Carter, Rice & Co. Corporation, Boston, Mass.

"The words 'Crown Imperial Linen' and the symbol or representation of a crown."

No. 10,807. Perfumery and Perfumed Articles for the Toilet.—Plesse & Lubin, London, England.

"Firm-name, 'Plesse & Lubin,' in script, at the right of which is the picture of a musk-deer standing erect on the ground."

LABELS.

No. 3,786. Title: "Knickerbocker Subscription Agency" (for a Catalogue).—John H. Ireland, Brooklyn, N. Y., and William J. Russell, Jersey City, N. J.

HARDENING GYPSUM AND ALABASTER.

Articles cut out of crude gypsum are hardened by dipping into a bath consisting of alum and oxalic acid or an oxalate; they are next dried and then immersed in a coloring fluid. The first mentioned hardening fluid may also be combined with the latter by mixing the pigment, fuchsine, &c., with it.

He who knows only his own side of the case, knows little of that.—*J. Stuart Mill.*

EASTER CARDS.

1884.

FOR THE COMING EASTER SEASON we have prepared a line of Cards and Silk Novelties, which we are confident will compare favorably with our previous efforts, and will meet with a ready sale. The following Artists are among the contributors to our line:

Miss FIDELIA BRIDGES,
Miss L. B. HUMPHREY,
Mrs. O. E. WHITNEY,

Miss L. B. COMINS,
Mrs. E. T. FISHER,
Miss ALICE C. SWAN,
Etc., Etc.

W. HAMILTON GIBSON,
WALTER SATTERLEE,
F. SCHUYLER MATHEWS,

Among the Cards of the regular line we would mention the following series as of special merit and attractiveness:

- No. 705.—TRIANGULAR FLOWER CARDS, by MRS. O. E. WHITNEY.
- No. 711.—MOVABLE SHAPED CROSS (figure design), by MISS L. B. HUMPHREY.
- No. 712.—BIRDS, by MISS FIDELIA BRIDGES. A very attractive series.
- No. 713.—FLOWERS ON PURPLE GROUND, by MRS. O. E. WHITNEY. A gorgeous series.
- No. 714.—FIGURE DESIGNS, by WALTER SATTERLEE.
- No. 715.—BUTTERFLY DESIGN, by W. HAMILTON GIBSON. This is emblematic of the Resurrection, and we think one of the most Striking Easter Cards ever published.
- No. 716.—EASTER LILIES, by MRS. E. T. FISHER. A very chaste and appropriate card.
- No. 717F.—WISTERIA EASTER CROSS. A fitting companion card to our last year's Water-Lily Cross, which proved so popular.

— BESIDES THESE, SPECIAL ATTENTION IS CALLED TO OUR —

SATIN ART PRINTS FOR EASTER,

Consisting of appropriate Flower and Figure designs. Our Satin Art Prints are put up in the following styles:

“A” STYLE.—A richly fringed tinted Mount, with cord and tassels for hanging.

PLUSH MOUNTS.—Fine mounts, made of rich plush of various appropriate colors, with easel back.

“B” MOUNT.—An exquisite Satin Mount of various colors, with extra fine quality shaded triple fringe, satin ribbons and bow, cord and tassels for hanging.

“C” MOUNT is a fine combination of rich plush and satin in contrasting colors, with cord and ribbon, easel back.

“D” MOUNT is similar to the “C” Mount, with the addition of extra fine quality scalloped silk fringe trimming and satin bow, easel back.

The sale of our Satin Art Prints have heretofore been very large, and our specialties in this line for Easter will, no doubt, meet with a ready sale. Sample Books are now in the hands of our Travelers.

We would urge our friends to send in their specified orders as soon as possible, to avoid delays in the filling of orders.

Our extensive line of BIRTHDAY CARDS has received several attractive additions, and we have also issued SEVERAL new series of SCRIPTURE TEXT-CARDS.

 PRICE LISTS OF EASTER CARDS ARE NOW READY.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Isaiah Roggenburger, manufacturer of paper-boxes, Philadelphia, Pa., is dead.

Coy's paper mill, at West Claremont, N. H., has been remodeled at a cost of \$20,000.

The Typograph Manufacturing Company, Chicago, Ill., has been closed out by the sheriff.

M. E. (Mrs. R. W.) Thorner, stationer, &c., Hamilton, Ont., has made an assignment in trust.

The liabilities of Bloch & Co., printers and flag manufacturers, Cincinnati, Ohio, are about \$30,000.

Dean & Carroll, dealers in wall-paper, Memphis, Tenn., have been damaged \$500 by water; insured.

H. G. Razall & Co., binders and blank-book manufacturers, Milwaukee, Wis., have been attached for \$1,023.

W. E. Seebold, stationer, New Orleans, La., is asking an extension, claiming assets of \$37,000, and liabilities \$24,000.

Adler & Liebman, paper-stock dealers, Atlanta, Ga., have dissolved partnership. Moses Adler succeeds to the business.

John Ferguson & Co., dealers in wood pulp, Sherbrooke, Que., have dissolved partnership, and are succeeded by Symmes Brother.

Bennett & Patterson, printers and engravers, New Orleans, La., have dissolved partnership. Patterson & Co. succeed to the business.

V. G. Fischer, bookseller and stationer, Washington, D. C., asks an extension of two years. The liabilities are \$13,000 and assets, \$13,700.

Uglove & McGiffan, news agents and fancy goods dealers, Ottawa, Ont., have dissolved partnership, each continuing business on his own account.

Trout, McIlvaine & Elder, wholesale and retail dealers in paper-hangings, &c., Philadelphia, Pa., have sold out their retail store to Rowan & Fullaway.

W. F. Carter has retired from the Savannah Art Company (not incorporated), dealer in picture frames, &c., Savannah, Ga. C. P. Miller continues the business.

W. M. Sprague's leather-board mill, at Middle Falls, Washington County, N. Y., was destroyed by fire on Monday night, causing a loss of \$30,000; insured for \$16,000.

The Whitcomb Envelope Company, Worcester, Mass., has been incorporated with a capital of \$150,000. David Whitcomb is president; G. H. Whitcomb, treasurer.

The Hall Type-Writing Machine Company of New York is contemplating the establishment of its works in Beverly, Mass. Its present capital of \$200,000 to be increased to \$500,000.

W. C. Lawless & Co., dealers in printers' material, Montreal, Que., have dissolved partnership, E. F. Carter retiring and W. C. Lawless continuing the business under the same style.

C. C. Taylor & Co., Springfield, Mass., are about to open a paper-box shop at Holyoke. Stephen P. Burns, who has been connected with the Springfield establishment for many years, will be the resident Holyoke partner.

The manufacturing business of Hard & Parsons has suspended work temporarily on account of the removal of the firm from its present quarters at No. 126 Duane street, which will take several days. The firm requests the trade to have a little patience, as it will be unable to turn out any goods under a week. The office and salesroom will be located, after February 1, at the corner of William and Beekman streets, and thus be more accessible to the trade. Purchasers of valentine and Easter novelties will do well to give the firm a call at its new location, where they will find all of the latest fancies of the season.

The International Publishing Company and Book Exchange, New York city, had a meeting of its creditors a few days ago and offered 35 cents on the dollar, which the creditors refused to entertain, believing that by proper management of the assets it could be made to pay in full, whereupon it made a full surrender of its assets to the creditors who will settle up its business. The concern did an installment business, selling photograph albums and publications of various kinds throughout the country.

Howard W. Preston has been admitted as a general partner, and Augustus H. Preston as a special partner, of W. T. Tibbitts, bookseller and stationer, Providence, R. I. The partnership is limited to January, 1886, and the capital paid in by the new partners is \$4,000. The style of the firm has been changed to Tibbitts & Preston.

A fire occurred at 90 and 92 White street, New York, on Saturday night, and among the losses incurred were Louis Kloptsch, publisher of the *Daily Hotel Reporter*, loss by water \$2,000, insured for \$4,000, and Mitchell C. Levy, printer, loss \$7,000.

A. McArthur & Co., wholesale dealers in paper and twines, Montreal, Que., have dissolved partnership. J. W. Nelles, special partner, has retired from the firm, and A. McArthur continues the business under the old style.

K. P. James and Francis R. S. Fox have been admitted to an interest in the firm of Bryan, Fox & Son, manufacturers of picture frames, &c., Philadelphia, Pa. The style of the firm is now Bryan, Fox & Sons.

John Dolan, paper-stock dealer, South Hadley Falls, Mass., was burned out on Sunday morning, but his loss is covered by insurance. The fire was caused by spontaneous combustion.

Joseph V. Fullaway, dealer in paper-hangings, Philadelphia, Pa., has entered into partnership with Wm. Ellwood Rowan, under the style of Rowan & Fullaway.

Joseph Stellwagon's Sons, paper manufacturers, Philadelphia, Pa., have suspended. A meeting of creditors was called for yesterday.

The stock of the estate of Willing & Williamson, booksellers and stationers, Toronto, Ont., is advertised to be sold at auction.

Patrick Doyle, of the firm of Megargee Brothers, manufacturers of paper, Philadelphia, Pa., is dead.

The *Cheyenne Leader*, Cheyenne, W. T., has been sold to the *Daily Democrat* Publishing Company.

An assignment has been made by Bronner & Wermantine, booksellers and stationers, Davenport, Ia.

A. Conway, paper-stock dealer, Erie, Pa., has been closed out by the sheriff.

The sheriff has sold out McLeod & Cooper, stationers, Philadelphia, Pa.

Eddy Almon, bookseller and stationer, Bennington, Vt., is dead.

Walter Christie, dealer in letter-files, New York city, has assigned.

An assignment has been made by H. M. McNeill, printer, Alleghany, Pa.

McMillan & Randall, dealers in pictures and artists' materials, Ann Arbor, Mich., have dissolved partnership. Randall continues the business.

The Clark-Naergaard Company, paper dealer, &c., New York, will remove its offices on or before May 1 to No. 14 Beekman street, Morse Building.

Wm. Heller, manufacturer of traveling bags, New York city, has admitted Isaac Heller to partnership. The style of the firm is Wm. Heller & Son.

R. H. Crane has succeeded to the Peerless Paper Box Company, Cincinnati, Ohio, and has issued a circular to the trade, which includes a price list of the Peerless files.

Rand, Avery & Co., Boston, have in course of publication a new story which deals with the Mormon question, and is said to be of thrilling and powerful interest. It will be handsomely illustrated and sold by subscription.

The Manufacturers' Paper Company has succeeded the Hudson River Pulp and Paper Company at Luzerne, N. Y., and is now proprietor of the wood-pulp mill at that point. The officers of the new company are A. Payenstecher, president; K. B. Fullerton, secretary and general manager, and F. W. Bidwell, treasurer.

The marriage of Bolton Hall to Susie Hurlbut Scott, daughter of William Hoyt Scott, will occur at Calvary Church, Fourth avenue and Twenty-first street, on Wednesday, February 6. THE STATIONER tenders congratulations in advance and expresses the hope that the alliance may be one of unexampled happiness and prosperity.

H. V. Butler, Jr., & Co., paper dealers, 32 Reade street, New York, suspended last week, but are reported to be trying to make arrangements with their creditors. The liabilities of the firm are said to be about \$75,000. Among the New York creditors of the firm are J. W. Lyon & Co., \$1,800; John H. Lyon & Co., \$2,500; Vernon Brothers & Co., and S. Webber Parker & Co., amounts not given, and Wilkinson Brothers & Co., \$1,200.

The catalogue of Milton Bradley & Co., manufacturers of toys, games and other stationers' novelties, Springfield, Mass., is a pamphlet of 56 pages, and contains numerous engravings, with full descriptive matter of the various products of the company. Some of the engravings are especially noticeable, being printed in rich colors. Among the colored engravings shown are the American Fire Department toy, matched pictures, Bradley's Menagerie, Bradley's Aquarium, the Historiscope improved and the Magic Plaiter. The production is characteristic of the enterprise of Milton Bradley & Co.

Prof. Frank H. Fenno, author of "The Science and Art of Elocution," a text-book in general use among schools and colleges, has edited a little volume of literary selections, called "Fenno's Favorites, No. 1. One Hundred Choice Pieces for Reading and Speaking." The collection is prefaced by an exposition of the theory of elocution and the principles of gesture. The general character of each piece is explained in a brief analysis, and the appropriate gestures are indicated by figures referring to foot-notes. The book is printed on good paper, from large

clear type. John E. Potter & Co., Philadelphia, are the publishers.

The *Spectator* Printing Company (incorporated), Hamilton, Ont., has been burned out.

George H. McCully & Co., printers, Philadelphia, Pa., have been sold out by the sheriff.

Geo. H. Bonte, twine manufacturer, Cincinnati, Ohio, has been partly burned out; fully insured.

H. L. Pittock, proprietor Clackamas Paper Company, Portland, Ore., is reported to have sold out to Blake, Robbins, McFall & Co.

The Milwaukee *Evening Wisconsin* of January 21 says: "The latest name mentioned in connection with the mayoralty is that of George Des Forges."

William Mann & Son have issued a large, neatly and handsomely printed calendar. It is a sheet calendar, printed in colors and is a creditable production in every way.

The Hollingsworth & Whitney Company, paper stock and bag maker, Braintree, Mass., and Watertown and Gardiner, Me., will begin weekly payments on the second Saturday in February.

Marcus Ward & Co. have recently introduced a new line of fine linen writing papers. It consists of a hand-made paper, in note sizes, with envelopes to match, and is of heavy and medium weight. It is decidedly "toney," making it all that can be desired for society purposes.

C. F. A. Hinrichs has just received another large invoice of Easter novelties, embracing a very fine line of porcelain eggs, painted in various colors and plain, and ornamented with cupid, flower, bird decorations, bisque figures, &c. The line also comprises a large variety of what are known as hen dishes, that is, dishes of various sizes containing the life-like figure of a hen. These dishes come both white and colored. There are also egg-cups, boats, egg-boxes, &c., in various styles, with bisque figures.

In Easter goods Henry Levy & Son have this season brought out a line which embraces a great number of genuine novelties. The line comprises a large assortment of rustic boxes and vases with natural chickens, birds, rabbits, &c. One design shows a singing-class, with an owl as the teacher and several little chickens as pupils. Another design represents the old hen in the character of the old woman in the shoe, "who had so many children that she didn't know what to do." The old woman has a night-cap on her head, and is evidently trying to soothe her numerous progeny to sleep. The effect is comical in the extreme. Mr. and Mrs. Fowl are shown in bed, with the baby on the footboard clapping its diminutive wings. The same characters are also shown in another design, christening the baby. There are also numerous designs of rustic crosses, rustic boxes for candies, decorated with grasses and ferns; also a large variety of Easter sachets, decorated with hand-paintings and appropriate emblems; Easter plaques of plush of various shades with floral decorations, handkerchief cases, &c.

The new line of Easter cards just introduced by L. Prang & Co. is exceptionally noticeable. One design has a white plush border, with a raised satin centre, containing a beautiful picture, showing a group of angels playing on musical instruments. Another card has a cushioned satin centre, of a gothic design, decorated with a cross and flowers. A very handsome cord has a painted rustic cross entwined with flowers, in rich colors. A number of other cards of a similar character have a variety of light and dark backgrounds, making a very pleasing effect in each case. L. Prang & Co. have also brought out an entire new line of cheaper cards, fringed, single and folding, and with innumerable subjects suggestive of the observance of Easter. This firm also exhibits its usual good taste in its valentine lines.

J. F. Sheehan has disposed of his interest in the firm of James McClatchy & Co., publishers of the *Bee*, Sacramento, Cal., the heirs of the late James McClatchy having bought the same.

Chas. J. Buffum, for two years past in partnership with A. W. Bee, Boston, will, on February 1, connect himself with Ward & Gay.

The Philadelphia Paper Box and Paste Manufacturing Company, Philadelphia, Pa., is offering to compromise with its creditors.

F. Goodman & Brother, dealers in wall-paper, Durango, Cal., have sold out to George Goodman & Co.

C. A. Stoop, dealer in stationery, &c., Odebolt, Ia., has failed.

P. E. Kies, stationer, Burton, Kan., has sold out to John Goodwine.

W. O. L. Crandall, stationer, &c., Olema, Cal., has been attached.

H. Thone, stationer, &c., Arkansas City, Ark., has been burned out.

J. N. Turner, bookseller, &c., Eldora, Ia., has been closed out by the sheriff.

Barrett & Co., bookbinders and printers, Montgomery, Ala., have dissolved partnership.

An assignment has been made by N. W. Taylor, wholesale dealer in wall-paper, Chicago, Ill.

Bert Stroud, photographer and stationer, Norristown, Pa., has been sold out by the sheriff.

Wm. H. De Mott, manufacturer of paper boxes, Utica, N. Y., has been burned out; fully insured.

The A. H. Hart Company, dealer in twines, &c., New York city, has been damaged by fire and water.

Selchow & Richter have just issued a catalogue and price list of valentines, &c. Their line embraces cheap goods as well as rich and chaste easel valentines, elaborate box valentines, elegant fringed card valentines, love albums, &c. This firm is also showing to the trade samples of playing-cards in various new designs. Those desiring the latest prices and novelties in games, toys, &c., will also be furnished circulars, &c., recently issued by the firm, on application.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

OBITUARY.

JOHN B. WOOD.

One of the best known and best liked of New York journalists, "Doctor" John B. Wood, while walking near the water's edge of West street at an early hour yesterday morning, made a misstep and fell over the string piece of Pier No. 3 and struck on the ice a dozen feet below. His fall was noticed, and he was at once picked up and cared for, but before the ambulance, which was sent for, had arrived, he died of shock and exposure.

"Doc" Wood, as he was familiarly and affectionately called by thousands of printers and writers, was for over thirty years prominent in journalism. He was an associate of Horace Greeley's when the New York Tribune was a sheet rapidly growing into fame. He came from New Hampshire when a mere boy, with a strong desire to become a journalist, and having great powers of application and a thoroughly conscientious devotion to, detail he made a broad and enduring mark in the profession.

His close devotion to work rendered him blind at one time, and his work as night editor of the Sun was for a long time done when he could not see a word of writing or print. His sight was recovered, however, after long treatment and a number of surgical operations, of which he told in a graphic newspaper article which went the rounds of the press some years ago.

His unbounded liberality and charity led to an expenditure of a large portion of his income in assisting his fellows. No printer or other attaché of the press was ever too worthless to touch his charity and pocket with any tale of distress.

His work on the Tribune, Sun, Herald and St. Louis Chronicle will long be remembered, and he will not be forgotten during the present or the succeeding generation of journalists. He was president of the New York Press Club for some years. His body was taken to the rooms of the club, No. 119 Nassau street, on Tuesday at noon, and remained there until Wednesday, when the funeral services were held at 11 A. M., the Rev. Dr. Talmage and the Rev. Robert Bruce Hull, of the Tabernacle Baptist Church, No. 166 Second avenue, officiating. The interment was made in the Press Club lot in Cypress Hills Cemetery.

James D. Whitmore & Co. are offering a very unique and useful novelty in the shape of a steno-graphic pen, which can be retailed at twenty-five cents, and parties who have used this pen state that it gives satisfaction and wears just as well as pens costing ten times the price. The pen is put up in an attractive box, which contains one dozen, and full directions are furnished as to the refilling and when the ink becomes exhausted. Very liberal protection is said to be given to dealers who handle the goods, and circulars for distribution will be furnished gratis to parties desiring to job them.

The world is a comedy to those who think, a tragedy to those who feel.—*Horae Walpole.*

A YOUNG MAN, WHO THOROUGHLY UNDER-stands the Stationery business, would like a position as Clerk or Book keeper, or would buy an established stand or part interest. Address, giving particulars, stock on hand, yearly trade, &c., Y. M., Box 722, Minneapolis, Minn.

WANTED — BY A DRUMMER, WELL AC-quainted with the trade in Texas, position to travel for Wholesale Stationery House in the East; two years' experience; at present traveling for Southern house; All references given. Address, with terms, DRUMMER, care of American Stationer.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JANUARY 31, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THERE is an agitation in the South in favor of abolishing the taxes on commercial travelers. The Savannah Morning News has been active in this behalf, and is outspoken against what it calls "an outrage on business men." Any distinction made between business men from different parts of the country and local houses is, we think, adverse to trade comity, and an infraction of constitutional rights and taxation of the sort mentioned is therefore invidious and unjust. The South would do well to abolish it.

AN international exhibition of a specific character is to be held at Budapest, Hungary, in 1885, conjointly with the general national exhibition to occur in that year. This international feature will include exhibits of motors, machines and tools for working in wood, metals, leather and textiles; also machinery and tools pertaining to other industrial interests, including printing, lithography, photography, type-founding, bookbinding and fancy work in leather and paper. The paper maker, *per se*, seems to be rejected. If any of our readers desire to take advantage of this exhibition, we shall be glad to tell them what parties they must address for necessary information.

THE "neck-or-nothing" race which is now being run in Europe for the world's commerce is nowhere more emphatically exemplified than in the intense interest taken by European nations in technical education. What the world of to-day owes to the old alchemists is as nothing to what the industrial world of the future will owe to technical study. Even now the man who invents a new design, pattern, dye or machine is more looked upon in the industrial centres of Europe than he who is born to rule a province or an empire, for by such inventions whole communities may be blessed with the labor opportunities which he makes possible, while the King or Kaiser only represents so much happiness and wages wrung from the impoverished people to support imperial display. For these reasons the city of Lyons is now justly proud at the inauguration of a school of applied chemistry, concerning which our vice-consul in that place supplies some information. The Lyons Chamber of Commerce has for a long time past been preoccupied with plans for organizing an establishment which would put their city on a par with other towns in regard to this branch of technical study. This is not an isolated instance of French ambition to excel; for petitions are circulating in France asking the government to establish numerous schools for technical education. In this country we depend too much, perhaps, upon native energy and intelligence. But in struggles of mind as well as of matter the stronger will prevail and the broader intelligence will attain supremacy. This is essentially an age of investigation and education. We are improving upon old mod-

els, but have not yet discarded all that is effete. It will be much to our industrial advantage if abundant means shall be provided for securing technical education without waiting to acquire it experimentally at the cost of lost time and money.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

Does the "oldest inhabitant" know when a winter like unto the present occurred? The weather is such a common topic nowadays that any one visiting around can't help but experience and hear something of it. To be in the fashion I must mention it.

A wedding is shortly to come off in this city which will, I am sure, elicit from many of the readers of THE STATIONER congratulations and glad wishes. There has been rather a dearth of such events in the trade of late, and I am glad to see that there is to be resumption. May we have many of them and happy ones.

A great deal has been done in the advertising way and many surprising things have been evoked from the intellects of advertisers. Perhaps the following will illustrate the proximal stage of the art. It is only fair to say that it is supposed to be nearly one hundred years old:

Perdited or furated, on an inauspicious nocturnal hour subsequent to the day lately authoritatively devoted to humiliation and penitence, from the foerritean dome of the hyscriptoralist, a leucophated quadruped of the jumentan order, equestrian genus, feminine gender; capitialy fuscated; asterically marked in cinctuput; in stature-according to equinal admeasure-ment—fourteen-and-a-half clenched fists; in the quin-decimal year of existence; tolutates with celerity; succusates with agility in a course conceited as elegantly graceful, and ali in the superlative degree. Whoever from the proceeding iconism, by percontation, deambutation, perscrutation or otherwise, shall gain intelligence of the nonpareil and will apport the same to me shall become reciprocal of a remuneration adequate to the emolument from

JOHN HOPKINSON.

It doesn't really require much "gumption" to get at what John Hopkinson meant, but it may be remarked that some of his "langwidges" are peculiar.

The daily papers contain a telegram, dated January 29, to the following effect; "A dispatch from Matamoras, Mexico, says that the Rev. Father Damazo Soto, of Concordia, in the State of Vera Cruz, has discovered the key to the Aztec writings." This is very interesting to archaeologists, venders of bric-a-brac, &c. It has not been generally known that there are any Aztec writings and still less has it been known that they have been kept locked up. But there is a suggestion in this for publishers.

It is alleged that one of the members of a committee which went to Washington to attend the meeting of representatives of different commercial bodies sent his card to every member of Congress of whom he had ever heard. One of his colleagues remarked that the next thing for him to do was to visit the lunatic asylum, where he could dispose of an additional quantity of cardboard. This incident is only mentioned to call attention to the fact that

there is certainly one man of culture engaged in business.

A whole-souled, generous man and journalist has been laid to rest. John B. Wood, as is probably well known to many of your readers, is dead, and was paid the last honors by the Press Club, of which he had been president. "Doc." Wood's indefatigable work in the newspaper field can only be understood and appreciated by men who know what the "grind" is. The general public did not know until it had been told what capacity of work and genius—for genius it was—which made one of the best paragraphists—if not the best—of the day. Liberal and hard-working, "Doc." Wood will certainly wear a crown in the journalistic Wall-halla.

An important department of French industry is threatened with extinction. The chief municipal authority of Paris has forbidden the casting out and gathering of piles of refuse in the streets of that city, and as the Paris police enforce municipal regulations much more vigorously than the New York constabulary, we may be sure that the regulation will be effectively carried out. This deprives the *chiffonniers*—rag-gatherers—of their sources of supply and of their incomes. What an uproar would ensue in New York if our picturesque (?) Italians of different sexes and ages were deprived of the opportunity of wielding their sceptres which they flourish so effectively through our streets and over our ash-cans and garbage-boxes. And, were the old and familiar sound of "rags, rags, any rags; bot'ls to sell" prohibited, New Yorkers would lay themselves down and die.

I haven't had a chance to look at the shop-windows and show-cases lately. There are many new attractions to be seen, I am told.

By the way, how do the trade like the suggestions which certain correspondents of THE STATIONER have thrown out about commercial travelers? Why don't the traveling gentry say something. Some of the out-of-town trade—perhaps many—would like to come to New York once in a while. Do the city houses think that it is better that they shouldn't come?

ANSWERS TO CORRESPONDENTS.

Henrico asks who is the manufacturer of Bushnell's patent knuckle-joint standing press?

Ans.—G. H. Bushnell & Co., Worcester, Mass.

C. O. P. & Co. want names of some manufacturers of shelf-paper in New York city.

Ans.—L. H. Rogers, 75 Maiden Lane; Adam Gottlieb, 323 E. Houston street, and New York Ornamental Paper Company, 60 Clinton street.

W. P. & Co. want to know who makes the latest, best and most perfect shipping tag machinery in the market.

Ans.—We cannot answer the inquiry specifically. Any good machinist can produce machines for making tags, but the question of patent rights may intervene. Martin Rau, 39 Centre street, is said to be competent in the production of good machines.

W. & H. ask if we know of a trial balance book with short leaves, to save re-writing of accounts. Thinks it is made by Collins.

Ans.—No, we do not, and have not found anyone who does.

J. & W. Co. want present address of W. C. Cook, publisher, formerly 243 Broadway, New York.

Ans.—No. 334 East Seventy-seventh street, New York.

ANOTHER ENVELOPE MANUFACTORY.

Worcester has for many years been noted as one of the centres of envelope manufacturing. The business is to have a considerable extension by the organization of a new company, now fitting up a shop covering two floors of No. 16 Union street, an area of 10,000 square feet. A similar enterprise was started rather more than a year ago by the Logan & Lowe Envelope Company, the senior partner of which had been the selling agent and correspondent of G. Henry Whitcomb & Co. Six months ago overtures were made to him to return to his old position, and the new firm was dissolved, and its machinery, stock and employes were transferred to Whitcomb & Co.'s shop. It is said that the arrangement was that a corporation should be formed on January 1, to succeed the firm of G. Henry Whitcomb & Co., and Mr. Logan, together with several other employes who had been with the firm a great many years, were to have an interest in the new company. The proposed arrangement not being consummated in accordance with the desires of those who were to come in under the new arrangement has re-

sulted in their withdrawal and a new firm has been organized.

The new firm is known as Logan, Swifts & Brigham. It will include besides James Logan, who will be the salesman, D. Wheeler Swift and Henry D. Swift who are said to be inventors and patentees of the envelope folding machinery owned and operated by Whitcomb & Co., and who for the past twenty years have had the charge of the mechanical department of their shop, D. Wheeler Swift having started the first machine in 1864, also John S. Brigham who was for many years bookkeeper, and who during the whole of the seventeen years that he has been in the employ of Whitcomb & Co., has been in charge of the order department.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, January 30, 1884. }

THE MONEY MARKET.—The money market is extremely easy on acceptable collateral, with a gain in the supply of loanable funds. Call loans, @2½ per cent., with exceptions on Governments as collateral at 1 per cent. and prime mercantile paper and acceptances @5 to 6 per cent. There has been a sudden and quite remarkable change in the tone and temper of the stock market. From extreme depression it has suddenly become decidedly buoyant, with a general advance all along the line. This favorable turn in the market is said to have been due to the report of an adjustment of the Western railway difficulties, relief from the financial pressure which has lately weighed down the ex-Villard's. Railway mortgages have been much more active, and generally at higher prices. Government bonds are firm, but less active. The market for sterling exchange is stronger, owing to the continual scarcity, and the posted rates have been advanced one-half cent on the pound. Continental bills are also a trifle firmer.

THE PAPER MARKET.—Although there is very little of an encouraging nature to be said of the present movement of paper, the prospects of an improvement as the spring season advances are quite promising. In some instances, dealers report trade so far this month as in excess of the corresponding month of last year, yet business is being done in a slow and spiritless manner, and the abnormally low prices of nearly every grade of paper failed to stimulate the demand. Buyers generally are supplied against current wants and are unwilling to lay in quantities for which they do not see an immediate or early outlet into consumptive channels. Competition, it is asserted, was never at any time so sharp in every branch of the paper trade as at present. Print papers hold to a very steady line of values and the same can be said of manilla wrappings. Straw wrappings show less irregularity than they did a month or six weeks ago, the product being somewhat under better control.

THE STATIONERY MARKET.—There is not much activity perceptible in the trade in staple goods, but business is quite fair, and, if anything, shows an improvement over the week previous. Few dealers are in town, the most of the business done being in orders received by mail. In valentines a good business is doing still, but orders from distant points have somewhat fallen off. The season has been a good one for these goods, notwithstanding a very much overstocked market. There continues to be an active demand for Easter cards and novelties, and out-of-town dealers are buying heavily of these goods. Birthday cards and fine art novelties in the shape of lithographic prints on paper and satin are showing quite an active trade for this season, probably a slight increase over last year. The envelope trade has no new developments. Prices continue firm, while business has not improved. The profit is so small that a further decrease would be death to scores of dealers and manufacturers. The trade in file-boxes and various kinds of goods of this character is very good, and will probably continue so throughout the season, as the numerous novelties in this line are certain to gain popularity as they become better known to consumers.

A DOUBLE FAILURE.

The Cleveland Paper Company, Cleveland, Ohio, made an assignment on Saturday last, N. W. Taylor, president of the company and the heaviest stockholder, having made an assignment on the previous day.

The assignee in the case of the company is E. J. Foster, of Cleveland, who has secured permission from the court to run the paper mills belonging to the company in order to fill contracts and to keep the hands employed. The liabilities of the company are stated to be from \$250,000 to \$300,000, while the assets, if properly disposed of, are expected to realize \$500,000. The company has issued a circular letter to its creditors, stating that the accumulation of bills payable which it was unable to meet at maturity forced it to turn over all of the assets for the benefit of creditors. The assignment is complete, and without a single preference. The company owns valuable real estate, consisting of three mills in Cleveland, one at Monroe Falls, and one at Canton, a large building at No. 128 St. Clair street and another on Merwin street, Cleveland. The assignee says that the failure of the Chagrin Falls Paper Company, recently reported, had entailed loss on the Cleveland company and helped to hasten the assignment. This proceeding is said to be only temporary, and it is also asserted, that the company's liabilities are likely to be settled in full.

The personal assignment of N. W. Taylor, president of the company, was made as the result of liabilities incurred in taking over the stock and guaranteeing the liabilities of the firm of George H. Taylor & Co., of Chicago, which failed on February 8 of last year, and compromised with its creditors for 40 cents on the dollar.

The history of the series of failures which led up to this latest assignment are as follows: On February 26, 1883, Lucius Clark & Co., owners of the South Bend (Ind.) paper mills, failed for \$100,000. The Clark Brothers, seven in number, were also interested in the Mishawaka paper mills, Mishawaka, Ind.; the A. Gaylor Paper Company, of the same place; the Black & Clark Paper Company, of Yorkville, Ind.; the Fox River Paper Company, near Yorkville, Ind.; the Logansport (Ind.) Paper Company, and the Black & Clark Paper Company, of Marseilles, Ind. Their failure embarrassed many others in consequence of these connections. The mill operated directly by Lucius Clark & Co. was known as the Beach Mill. This firm failed five years ago, and the stock was purchased by George H. Taylor, son of N. W. Taylor, in trust for George H. Taylor & Co., and the firm of Lucius Clark & Co. was given a one-third interest. In October, 1882, Lucius Clark wished to purchase outright, and organized the Lucius Clark & Co. Paper Company, with a capital of \$200,000, on paper, Lucius and Robert Clark and Henry Smith taking all the stock. Their title was made conditional upon their placing the stock at par and paying George H. Taylor & Co. for the plant. This they did not succeed in doing. This firm was quoted at \$100,000 and the South Bend firm at \$200,000. The day following the failure of Lucius Clark & Co., Paul D. Hayward & Co., a firm at No. 125 Lake street, Chicago, failed, with liabilities of \$30,000. Hayward had, one week before, purchased the stock of Lucius Clark, who had until that time run the place as the Chicago salesroom of Lucius Clark & Co. Hayward failed in consequence of Clark's failure. On February 8 George H. Taylor & Co. failed, under judgments of \$200,000, confessed

by them in the Superior Court. The liabilities of George H. Taylor & Co. were about \$325,000. This failure was a sequel to the South Bend suspension.

The property of these different bankrupt firms was taken by N. W. Taylor, who expected to reimburse himself therefrom the amounts paid or to be paid by him on his guaranty for Geo. H. Taylor & Co. Instead of deriving profits, the mills are reported to have lost somewhere near \$30,000 in nine months. In addition to this, ill-health and too great a diversity of interests are said to have prevented Mr. Taylor from giving necessary attention to business details.

Two individual assignments have been made by N. W. Taylor. One is to Edward Mill, of Cleveland, Ohio, and the other to Wm. H. Longley, of Englewood, Ill. These assignments are without preferences, and include all of Mr. Taylor's property both real and personal, comprising an interest in the buildings at 140 to 146 Monroe street, Chicago, the stock of paper in the Chicago store, the paper mills at South Bend and Mishawaka, an interest in the paper mills at Canton and Massillon, and the controlling interest in the Cleveland Paper Company. Mr. Taylor's liabilities are estimated to be \$150,000, and it is thought that, with good management, the assets will more than cover the claims against him.

The assignment of the Cleveland Paper Company was made solely to avoid complications which might be expected to arise when the fact that its president had made a personal assignment became known. The company dealt in as well as manufactured paper, buying supplies from a number of the Eastern mills. The Whiting Paper Company and Massasoit Paper Company, of Holyoke, are creditors for something less than \$1,000 each, and the Hampshire Paper Company, of South Hadley Falls, Mass., has a smaller claim. Perkins, Goodwin & Co. and Boorum & Pease, New York, are also creditors.

TRADE NOTES.

The Acme Stationery and Paper Company is extremely busy, its factory being run on full time, with a large force of hands. The Knickerbocker blotter tablets, which were only introduced to the trade last fall, are having a large sale, and, in fact, the general line of productions of the firm has become very popular. It may be of interest to state that the Acme Company was started six years ago by Samuel I. Knight. There were then only two or three concerns that bought paper expressly for the manufacture of pads, and even these concerns did not make pads of a fine quality. At that time large numbers of pads were made by bookbinders as a means of utilizing waste material. The public had been supplied to a limited extent with that class of pads, which were used for scratch and memorandum purposes generally, but not for fine stationery. Mr. Knight concluded that a business might be built up in the manufacture of pads from uniform qualities of fine writing paper, and with this belief started the Acme Stationery and Paper Company, making the manufacture of fine stationery pads a specialty. The demand for the products of the company rapidly increased. To-day it manufactures pads from all grades of paper, from the cheapest news up to the finest qualities of linen and plated papers.

Justice Hoyt H. Wheeler, of the United States Circuit Court, has just made a decision in two suits brought by Marie A. Reay, executrix, against Samuel Raynor & Co. and Berlin & Jones Envelope Company. In 1863, Mrs. Reay's husband patented the Reay envelope machine, and in 1880 he had patents reissued on certain improvements, but not upon the original machine. Other machines, such as the Leader and the Ball, were made and used by other makers, and Mr. Reay's patents, it is alleged, were infringed upon, but he took no action. On his deathbed he told his wife to bring the suits. She had her machines made by a machinist in Centre street, and at first he never made one without her written orders. She found that he was making the machines for other persons without orders, and he refused to stop doing so. Her application for an injunction was denied, and she then brought suit against Samuel Raynor & Co. and Berlin & Jones Envelope Company, to test her patents. The case has been in progress for four years. Justice Wheeler has decided that Samuel Raynor & Co. infringe upon three and Berlin & Jones upon one of her patents. These firms propose to at once appeal to the Supreme Court. They will give bonds, and the machines will go on working as usual. It will be four years more before a final decision can be reached.

THE STATIONER has received from Thomas G. Thrum, stationer, newsdealer and printer, Honolulu, H. I., the Hawaiian Almanac and Annual for 1884. This is a pamphlet of eighty-two pages, being, in addition to an almanac, a handbook of information on matters relating to the Hawaiian Islands, and hence a work of great value to merchants, planters, tourists and others. The book comprises a table of inter-island distances by sea in sea miles, overland distances, names and number of sugar plantations on the Hawaiian Island, comparative table of import values at the islands from various countries, comparative view of the commerce of the islands from year to year since 1845, postal statistics, list of government officials, general and local, with salaries, &c.; average monthly meteorological table from 1873 to 1879 inclusive, description of Hawaiian woods and forest trees, marine casualties, &c. Besides, there are given

a number of interesting articles under the following respective heads: "Mountain Climbing on West Maui," "Hawaiian Names of Relationships of Consanguinity and Affinity," "The Haze from Java," "Hawaiian Hospitality," "Retrospect of the Year 1883." There are also a chronological table of noted voyages, travels and discoveries in the eastern, northern and southern Pacific, tables and matter giving custom-house regulations, port charges, &c., and much other information of value to merchants and business men as well as travelers.

Marcus Ward & Co. have now ready for the inspection of the trade their line of Easter cards for this season. These cards come both single and double fringed or plain, as desired. A card with a dark-blue centre, containing a tasteful floral design, has a bordering in a delicate cream shade, making a very pleasing and harmonious contrast. A number of very pleasing designs are shown on a square card with floral decorations and appropriate scriptural quotations. A card with a dark cream-colored background has a blue bordering and a floral decoration in the centre. A number of designs consist of gilt and silver crosses, with richly-colored flowers, the latter forming a very fine contrast with the coloring of the crosses. There are many other designs, all of which show much taste and are very pretty and artistic. The goods are made of the best material and will undoubtedly have a large popularity with the trade.

A NEW BINDING.—A new style of binding recently patented is an elaborate mosaic, brilliant in color and attractive in pattern, covering the outside of each book, back and front. The bindings are of calf or morocco, into which, by the most delicate and careful processes are set small squares, circles and crosses of the same materials, richly colored and giving a unique and charming effect. The work has been done with such consummate thoroughness that it is absolutely impossible to realize that it is a mosaic and not a choice bit of hand-painting; while the colors are imperishable, and the jointures imperceptible. In each book cover there are from 120 to 150 separate and individual bits of inlaid material, in geometric patterns and of various colors, producing an artis-

tic and picturesque effect, which, with the delicate gold-tooling of the edges and the fine finish of the inside covers, recalls the dainty work of the old French bookbinders.—*Printers' Circular.*

PRINTING ON GLAZED SURFACES.—It is well known that printing-ink, when used on glazed and enameled paper, dries rapidly and pulverizes easily, so that the work is more or less rubbed off. This is due to the fact that the paper absorbs up, to a certain point, those elements or substances which enter into the composition of the ink, and whose function it is to bind together the solid elements. In consequence of this absorption, the color or lamp-black rests like dust on the enamel, and rubs off naturally with great facility. To obviate this inconvenience, recourse is had to two different methods—either to modify the paper used, or to add some ingredient to the ink which will cause it to adhere better. This is the preferable course, for it is the simplest. For printing on glazed or enameled paper add a varnish rich in resin, such as is used for bronze-work. This causes the color of the ink to be somewhat deteriorated, but if care is taken there is not much to fear.—*Exchange.*

Gilt frames are liable to become spotted and look bad, while it is, as a rule, difficult to remove the spots. Rubbing does not answer, for the stain sticks tighter than the gilding itself, and washing is liable to loosen the gilt if put on with gum or dextrine. The *Papier Zeitung* recommends the following method of renovating gilt frames: It consists in applying with a camel's hair pencil a gum solution to which has been added gold bronze having the color of the frame. Before mixing with the gum water the bronze must be washed with water until it runs off perfectly clear. If one application does not suffice it may be repeated until the spot entirely disappears, but of course one coat must be dry before the next is applied. Spots treated in this way look very well at first, but it will not last, for it is not able to resist the moisture in the air unless it is specially prepared. For this purpose an ordinary bristle brush is rubbed with a piece of yellow wax until it is somewhat sticky, then it is passed very lightly over the spot several times as when dusting it. This gives it a very thin coat of wax that hardens in two or three days; in the mean time it must be protected against dust.

SCHULTZ TIE ENVELOPE,

For Mailing Third and Fourth-Class Matter.

The most reliable and most convenient. Has only to be sealed, as an ordinary envelope.

FLORAL DECORATIONS.

Nowhere in the world, says *Harper's*, has the luxury of floral decoration risen to such a height as in the cities of the United States. At last, wearied of the artificial arrangements so common a few years ago, the entertainers have concluded to come back to simplicity. Now dinner-tables are spread, as they might be in the country, with roses, long stem and foliage attached, laid simply in a line on the table-cloth. For a corsage bouquet nothing is so desirable as a bunch of white clover with leaves, which with its fresh, delicate odor offends no one, and certainly looks very well on a velvet dress. It is as expensive in winter as it is cheap in summer, which is a recommendation to some; but the florists find it a good grower, and remunerative, which cannot be said of the dandelion or the buttercup, both of which summer weeds have at times, like the daisy, attracted the notice of fashion. The daisy is no longer in vogue. It was lifted, like many a rural beauty, into a disastrous elevation, and its downfall has been great. It never had the necessary charm of fragrance, without which no bouquet maintains its prominence long. The white clover is said to be a great favorite with the Princess of Wales, who always has good taste. There is one flower, however, that is splendid in color, the yellow water-cress, which is being largely grown for the corsage and which has the admirable quality of not wilting easily. This flower has no perfume and is a country cousin, but it certainly brings in a most desirable yellow tint. There is a possibility of too many flowers on a lady's dress, too large a corsage bouquet, and it is not very certain that natural flowers, when in excess, are any more becoming than artificial ones too profusely heaped upon the figure. A wreath of natural violets disposed on a lady's skirt may be pretty in itself, but the wreath looks too heavy. Moreover, it fades easily and is then very ugly. Nothing improves so much under the hands of the florist as the rose, and nothing is this winter so fashionable. The pink rose "Gloire de France," with its natural fragrance, is a great favorite. The long buds of the Niphetos, the new Bennett rose, the old but beautiful Bonseline, the Mermets—these are the favorite decorations for the table, the hand bouquet and the dress. At the Vanderbilt ball two immense rose bushes grew on either side of the fireplace, with over 2,000 roses on their boughs. Nature has been found to be better than art, so art is trying to outdo nature. Among the new decorations at the Vanderbilt ball were two immense Japanese fans, twelve feet tall, hung with the floral favors of the german, which were Leghorn hats filled with flowers and pretty little Indian baskets of fragrant grass, also filled with flowers, and tied with beautiful ribbons. These immense fans made a floral screen for the door of the grand gallery, and a fragrant fence for the german.

It is a question where all the new roses come from—whether they are made, and who makes them. They come from England and France principally, although America can claim the invention of a few. Nothing can be finer than the natural roses of our own Southern States, and the wild Cherokee rose. A simple and single rose is being now largely cultivated here for decoration; it is beautiful on the corsage.

Our old friend the smilax is giving place to ivy and to Japanese ferns. The ivy lasts better and is a deeper green, and the Japanese fern is more delicate. The new smilax, which looks exactly like a marabout feather, and is a species of asparagus, is a popular novelty just now; but

the gardeners do not think that it is destined to be a great favorite. Tulips are in vogue for table decoration, if ladies desire a centre-piece; but the latest fashion is against the centre-piece.

Robert H. Ingersoll, dealer in stationers' novelties, 92 Fulton street, New York city, has recently issued a catalogue and price-list of solid rubber types, dates and figures, and rubber stamps, including new rubber type printing outfits, rubber dating combinations, the "Noiseless self-inker," patent round and square and self-inking pocket stamps, &c. All the latest novelties in this line are included, and dealers

in these goods would do well to inspect Mr. Ingersoll's stock before making their purchases.

The Silicate Book Slate Company is making up some very nice goods in the shape of menu and dance order cards, souvenirs, &c., all of which have the ivory surface, thus making them acceptable for memorandum purposes, and making them less liable to be thrown away or destroyed. The same material is also made up in advertising cards.

Cooke & Cobb have taken the sole agency for the Diamond Rule and Level Company, Providence, R. I.

THE KERNER PEN.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a flexible air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with Iridium. Price, \$1 and upwards, according to mounting. Send for Circulars.

THE KERNER STYLOGRAPHIC PEN CO., 25 Bond St., NEW YORK.

SANBORN'S' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

AMENDING THE PATENT LAWS.

The following bill (H. R. 3,925) was passed in the House of Representatives, January 21, under a suspension of the rules.

Be it enacted, &c., That in any suit hereafter brought in any court having jurisdiction in patent cases for an alleged use or infringement of any patented article, device, process, invention, or discovery, where it shall appear that the defendant in such suit purchases the same in good faith for his own personal use from the manufacturer thereof, or from a person or firm engaged in the open sale or practical application thereof, and applied the same for and to his own use, and did not purchase or hold the same for sale, or to be used in or for any manufacturing process, if the plaintiff shall not recover the sum of \$20 or over, he shall recover no costs, unless it shall also appear that the defendant at the time of such purchase or practical application, had actual knowledge or notice of the existence of such patent, or unless the defendant puts in issue the plaintiff's right to recover anything in the suit. *Provided,* That nothing herein contained shall apply to articles manufactured outside of the United States. *And provided further,* That said purchaser or user upon request by the owner of the letters-patent alleged to be infringed by him shall make known the vendor, and time, and place of purchase of the article or articles for use of which complaint is made.

Sec. 2. That in all suits hereafter brought as aforesaid against a defendant other than a manufacturer or seller of such patented article, device, process, invention, or discovery, the plaintiff shall, at the commencement of such suit, give a bond, to the approval of the clerk, with sufficient surety, to be conditioned that the plaintiff will pay all costs and attorneys' fees that may be adjudged against him; and if the defendant shall finally prevail in such suit, the court shall allow costs, and a reasonable sum, not exceeding \$50, for counsel fees to the defendant, which shall be recoverable by suit, in the name of the clerk, upon said bond, or by fee-bill on execution. A failure by the plaintiff to give such bond shall, on motion, be ground for the dismissal of the suit.

The following bill (H. R. 3,934) was passed by the House of Representatives January 22 by a vote of 111 ayes to 6 noes:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no damage or profits shall be recovered either in law or equity from any defendant for the infringement of a patent, when it shall appear upon the trial that he was a mere user for his own benefit, and not in the manufacture of an article for sale, of any article or device purchased for a valuable consideration in open market, without notice, and the same was subject to the patent sued on; but in all such cases the manufacturer or vendor only shall be liable for damages or profits; *Provided,* That any such user shall be liable for damages and profits for infringement of such patent from and after the time he shall have received notice that the article was subject to such patent if he continue to use the same.

Sec. 2. That when in any case the use complained of was an article or device made by the defendant or his employe for his own use and benefit, and not in the manufacture of an article for sale, the measure of recovery shall be a license fee. If in such cases a license fee shall not have been established under the patent or patents sued on, then in any action at law the jury, and in any action in equity the court,

shall ascertain what, under all the circumstances of the case, would be a reasonable license fee: *Provided,* That nothing herein contained shall apply to articles manufactured outside of the United States: *Provided further,* That nothing herein contained shall apply to machinery held for sale or to be used for any manufacturing process whatever.

The report of the committee was read, as follows:

The Committee on Patents, to whom was referred sundry bills numbered 419, 1134, 311, 1956, 1250, report the following bill as a substitute for all:

Much complaint has grown up in the country from the practice of persons owning patents, or pretending to own them, allowing the use of an article, sometimes for years, and then sending an agent around and demanding damages from the holders of the article. Great annoyance has been the result.

The committee have drawn the substitute so as to protect the innocent purchaser of a patented article, purchased in good faith in the open market, from such annoyance. The manufacturer and seller of a patented implement is the party that ought to be held liable, and not the user of the article, who bought and used it innocently, or in other words who did not know he was infringing a patent.

The committee recommends the passage of the substitute.

Many of the members were absent at the time of the passage of both of the above bills, and not a single voice appears to have been raised in protest against these ruthless attacks upon the industries of the country. — *Scientific American.*

AN EARLY CHAPTER IN THE HISTORY OF STEEL PENS.

The subject of the identity of the inventor of steel pens has lately been broached in one of the Birmingham papers, in connection with which attention has been drawn to the statement, made some years ago, that the first steel pens were made by Daniel Fellows, of Sedgley, an old sportsman, intimate in his younger days with the then Lord Dudley, of Himley. D. Fellows also made gold pens and claimed to be the inventor of them, but this was disputed by a Dr. Wise, of London, between whom and Fellows a paper war was carried on respecting it some seventy or eighty years ago. The writer of the above statement was asked to give further details, names, dates, &c., and he then stated that the "paper war" was by rival hand-bills; that he had been at Fellows' house in 1806 and seen "Thomas Sheldon, his apprentice, making steel pens;" that Fellows began to make steel pens about 1793, that he himself paid Sheldon £100 in 1822 for pens, and more than that amount in 1823, but that soon after the machine-made pens of Mitchell & Gillott took the place of the barrel-made pens. Another contributor ("T. S.") wrote that in 1815 Sheldon's pens were sold at 18s. per dozen, less 10 per cent. for cash, that they were the barrel-shape, and that with bone handle and cover to protect the pen, for pocket, the price of B. Smith & Co.'s steel book was 36s. per dozen, discount 25 per cent. quarterly, or 5 per cent. for prompt cash. The writer added that he had in his possession a metallic pen, of Dutch make, the date of which was provable as sold in the year 1717.—*Printing Times and Lithographer.*

Consider pleasures as they depart, not as they come.—*Aristotle.*

ARTIFICIAL IVORY.

The *Chronique Industrielle* gives the following description of a new process for making artificial ivory from the bones of sheep and goats and the waste of white skins, such as kid, deer, &c.

The bones are macerated for ten or fifteen hours in a solution of chloride of lime, and afterward washed in clean water and allowed to dry. Then they are put with all the scraps of hide, &c., into a specially constructed boiler and dissolved by steam so as to form a fluid mass, to which is added 2½ per cent. of alum. The foam is skimmed off as it rises until the mass is clear and transparent. Any convenient coloring material is then added, and while the mass is still warm it is strained through cloth of appropriate coarseness and received in a cooler, and allowed to cool until it has acquired a certain consistence so that it can be spread out on the canvas without passing through it. It is dried on frames in the air, and forms sheets of convenient thickness. It is then necessary to harden it, which is accomplished by keeping it for eight or ten hours in an alum bath that has not been used before. The quantity of alum necessary for this operation amounts to 50 per cent. by weight of the gelatine sheets. When they have acquired sufficient hardness, they are washed in cold water and let dry on frames as at first. This material works more easily and takes as fine a polish as real ivory.

Another method of making a durable artificial ivory is described in the *Zeitschrift des Apothekervereines*: A solution of casein is made first with 200 parts of casein in 50 parts of ammonia and 400 parts of water, or of 450 parts of albumen in 400 parts of water. To either of these solutions are added 420 parts of quicklime, 150 parts of acetate of alumina, 50 parts of alum, 1,200 parts of gypsum, and 100 parts of oil. The oil must be added last of all. If dark-colored articles are to be made of it, 75 to 100 parts of tannin may be substituted for the acetate of alumina.

After the ingredients are thoroughly kneaded together to form a homogeneous paste, it is passed through rollers to form tablets of any desired size. These are dried and then pressed into molds that have been heated, or they may be finely pulverized and then put in hot molds and exposed to powerful pressure.

When the articles are finished they are put in a bath made by dissolving 1 part of white glue and 10 parts of phosphoric acid in 100 parts of water. The object is then dried, polished and varnished with shellac.

The Savannah *Morning News*, Savannah, Ga., has recently taken a new departure. J. H. Estell, the proprietor, announces that hereafter a mammoth eight-page Sunday edition will be sent to every subscriber to the daily edition. The *News* is showing marked enterprise under its present management, and to those interested in Southern politics, business and social information, a subscription will prove a good investment.

The "Nineteenth Century Almanac" is the title of a neat cloth-covered volume published in Philadelphia. It contains about 200 pages, and, as its name indicates, gives a complete calendar from 1800 to 1900. The book will be found very useful to the banker, merchant, lawyer, and everybody who wants to know "about the time that was, the time that is and the time that is to come." THE STATIONER is indebted to Charles J. Cohen for a copy.

TAXING COMMERCIAL TRAVELERS.

A growing disposition is apparent on the part of the business men of the South to do away with the system of taxing commercial travelers which has obtained there to so great an extent. This is as it should be. The mistaken system has been in operation too long already, and has done the cities of the South much harm at a time when every influence making for increased commercial and industrial prosperity should have been enlisted in their favor. The taxes on commercial travelers are in theory repugnant to our political and economic system, and should have no place in it in practice. They are based on ideas which are among the few surviving relics of the dark ages. One of the controlling reasons which led to the adoption of our present Constitution was the general desire to unify the whole country commercially. Whatever may be thought about the policy of endeavoring to protect the country industrially and commercially against other countries, there can be no two opinions about the attempt to protect one city or one section of the country against another city or section. Such a notion, if generally adopted, would bring us back to the condition of the degenerate age of feudalism, when every petty subdivision of a country levied its toll upon commerce. Trade is a sensitive thing in its way, and it is not a very difficult thing to drive it from a particular locality by taxation. It is, of course, implied in what we have said that, as an attempt to get revenue, the system of taxation under discussion must be regarded as worse than futile. The source of the revenue being driven away, the revenue itself will not be forthcoming. In short, no valid reason can be urged in behalf of the system, and the cities of the South would do well to abolish it without delay.

THE DEAD-LETTER OFFICE.

Four million three hundred and seventy-nine thousand one hundred and ninety eight letters strayed into the Dead Letter Office during the last year; 3,346,357 of these were not called for at the post-offices to which they were sent; 78,865 were sent in from hotels, because the departed guests had left no addresses for forwarding their mails; 175,718 were insufficiently paid; 1,345 contained forbidden articles, lottery tickets and the like; 230,137 were erroneously or illegibly addressed, and 11,979 letters bore no address whatever. Of these letters 15,301 contained money amounting to \$32,647.23. Besides that, 18,095 letters contained drafts, checks, money-orders, &c., to the amount of \$1,381,994.47. Moreover, 66,137 letters contained postage stamps, and 40,125 contained receipts, paid notes and canceled obligations of all sorts.

With this remarkable showing of more than \$1,000,000 gone wrong, too much cannot be said in caution to those who confide letters and packages to the mail. The money thus collected at the Dead-Letter Office is turned into the Treasury. The goods and merchandise from the packages are sold at auction, and the Christmas and fancy cards are done up in packages and sent to the children's hospitals and the orphan asylums of Washington.

A whole history of possible anguish and heart-burnings is wrapped up in the collection of 36,160 photographs that come to the Dead-Letter Office in a year, and injured and resentful swains, angered relatives and friends, may know where some of their treasures have gone to. The photographs are preserved, and this portrait gallery of the Post-Office Department numbers up into the millions, beginning with a miniature that was lost in the mails fifty years ago.—*St. Louis Globe-Democrat.*

GILDING ON GLASS.

The process of gilding upon this material is as follows : Draw out upon a sheet of white paper the letters or ornament required, and fill in the sketch so made with black paint, so that the pattern is visible upon both sides of the paper. Reverse the paper and fix it by its edges to the back of the glass with paste. Thoroughly clean the glass upon its face with wet whiting and a silk handkerchief, place it in a slanting position if possible, and commence to gild. The mordant used for fixing the gold leaf to the glass is made thus : Take some fine isinglass (as much as will cover a sixpence) and put it in a tea-cup, fill the cup half full with boiling water and stir ; pour in while the water is still warm enough alcohol to fill up the cup, and then strain the mixture through a clean silk handkerchief. Wash on this mixture upon the parts to be gilded with a camel's hair brush, wait until the surface is sticky, and then apply the gold leaf as in all gilding. Cut the gold leaf to the size of the gilding before applying, unless the surface to be gilded is not wider and higher than three or four inches ; when so small as this, lay on the gold in squares without troubling about the shapes of the ornaments and letters. Gild from the top of the glass, placing the first piece of gold at the highest part of the design, and be careful each succeeding sheet overlaps the one last laid. Any gaps left in the putting on of the gold leaf will show when the work is finished, and therefore the worker must put on plenty of gold leaf and see that no space, however small, is left undecorated.

Press the gold leaf gently to the glass with a cotton-wool pad, and leave the glass in a dry and warm room until the gilding is dry, which is known by its looking burnished and no longer crinkly and dead. Rub it in this state with cotton wool to increase its burnished appearance, and to remove the loose pieces of gold leaf between the letters and ornaments. The gilding will now show many imperfections, and the various joints where the gold leaf has been cut will be visible. These will require to be manipulated. Resize the whole of the gilding with the isinglass mordant, putting that on with great care, so as not to remove the gold leaf, and, when it is "tacky," regild the whole, following out the process of the first gilding in every detail. When the gold is quite dry put on from two to four coats of size (letting one dry before applying another), in order to increase the brilliancy of the gold. The longer the gold leaf is left in this stage upon the glass the more firmly will it adhere. A damp sponge will remove it the first day, but after two months the alcohol will have caused it to adhere so firmly that it will be most difficult to detach it. A week should be allowed to elapse between the gilding and the painting. The outline of the ornament, &c., must be transferred to the gold surface as the next stage. To do this, rub dry whiting over the front side of the paper pattern, place this face downward upon the gilding, and go over every outline with a pointed and hard pencil. The whiting will stick to the gold where it has been pressed down by the pencil, and upon removing the pattern and blowing off the loose whiting, clear white lines will remain upon the gilding.

The next process is to paint the back of the gold over with Japan black, such as is used by coach builders. For this purpose use a sable writing pencil, and keep the paint within the white outlines, but quite up to them. If on looking on the right side of the glass the black paint should show through the gilding another

coat of size must be put on before the black paint is applied, as these size coats prevent the paint from penetrating through the gilding. When the black paint has thoroughly dried, wash off all the gold leaf not required with a sponge and warm water. The ornaments and letters gilded upon the glass can be straightened and rendered sharp at their edges, if they look ragged, by being scraped with a knife or sharp chisel, after the black paint is dry. Colored painting, such as broad shadows to letters or additional foliage to ornaments, paint on the

glass after the black background to the gilding is dry; use ordinary oil colors thinned with oil and a very little turpentine for these, and keep the edges of the shadows straight and clear by the help of a straight edge and a pointed stick, cutting the edge sharp with these while the color is wet and wiping away with a rag the superfluous color. Paint backgrounds on the same glass in oil colors, using a large brush when the ornamentation is dry. Mix varnish with the colors or buy them ready prepared.—*Druggists' Circular.*

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XV.---NO. 6. NEW YORK, FEBRUARY 7, 1884. WHOLE NO. 450.

THE QUESTION OF COUNTS.

Perhaps nothing has been more talked of in the stationery and paper trades than the subject of "counts." There has been a great deal said, but nothing has been done to ascertain what are the views of the trade generally on putting up paper 500 sheets to the ream, or of making and selling blank-books by the page and not by the quire. Whatever has been said in this country on these two important issues has hitherto been of a cursory character, and lacking that definite expression of opinion which might be said to reflect trade sentiment.

In some of the European countries trade organizations have discussed and considered the propriety of putting up paper 500 sheets to the ream, and in some instances have decided in favor of so doing, but in America, as remarked, nothing has been done.

For the purpose, therefore, of getting at some distinct idea of trade feeling, the publisher of THE STATIONER sent to the readers of this paper a blank in the following form :

Will you please vote YES or NO to the following questions :

Are you in favor of putting up all Paper 500 Sheets to the Ream and 25 Sheets to the Quire ?

Are you in favor of Blank-books being made and sold by the 100 Pages ?

This form was accompanied by a circular, which read substantially as follows :

NEW YORK, January 7, 1884.

Calling your attention to the inclosed blank form, we ask you to fill same out, answering the two questions submitted YES or NO. We are desirous of obtaining a general expression of opinion from our subscribers on these two important subjects, and will also value highly any ideas or suggestions with which you may favor us. * * *

Yours respectfully,

HOWARD LOCKWOOD.

As is usually the case in connection with circular inquiries, the foregoing request did not meet with a full response, but those who are familiar with such things will probably be surprised to learn that about one-third of the number of persons addressed returned the blanks, voting either "Yes" or "No," many of them supplementing their votes by explanatory remarks or other expressions of opinion.

In order that all who are interested may acquire an insight into trade opinion and the actuating reasons therefor, a number of the communications in reply to the questions are appended, being arranged for convenience by sections of the country. The total vote returned was 2,342, and a tabulation of the canvass thereof will also be found under.

TRADE OPINIONS.

Eastern States.

BOSTON, Mass., January 15, 1884.

Yours received asking us to vote on the question, 500 sheets to the ream or 480, and would say that if the change could be adopted all at once by every mill in the country, we should say, yes, but there is another question that comes up. Of course, increasing a ream twenty-five sheets each would give a slight increase to production, but nine parties out of ten would probably not increase the weight of their paper when they ordered, consequently it would take them 5 per cent. longer, or about that, to use it up. We know of several mills who are opposed to it on this very question, that on ruled goods particularly the production of the paper mills would be increased, that is, the nominal production of the paper mills would be increased 5 per cent., and, everything being considered, we do not think it advisable to make the change from 480 to 500 sheets.

CARTER, RICE & Co.

BOSTON, Mass., January 14, 1884.

In reply to questions on the printed slip, we would vote "No" on the first, and "Yes" on the second. (1) Because, misnomers ; no benefit ; manufacturers and jobbers will get their pay in full, but retailers will probably have to throw in extra sheets to customers. (2) Because of present shortages on quires. Also, would suggest that sizes of blank-books be expressed by inches (10x12, &c.), instead of octavos, quartos, &c., or in addition.

THOMAS MARSH & Co.

BANGOR, Me., January 14, 1884.

In addition to inclosed, we would make a suggestion that the time-honored custom of embossing figures, &c., in upper corner of paper be dropped. We find, from experience, that the plain sells better, also that the experiment be tried of making paper in half sheets, the money being put in quality instead of quantity. From the ever-increasing sale of blocks, we should say that a half sheet paper of fine quality would take. We should be pleased to have the matter discussed.

BANGOR NEWS COMPANY,
FARNHAM, Manager.

FITCHBURG, Mass., January 21, 1884.

In regard to the sale of paper by 500s and of 25s, it seems to me that the 24-sheet quires are the most convenient for the retailer. When a large portion of his sales are by the quire, as in my own case, it would necessitate the folding of 5 instead of 6 sheet folds, one-fifth instead of one-quarter quires.

In blank-books, I am heartily in favor of it, as the way in which books are now made, any number of sheets from 12 to 24 may mean a quire, and not one-half. The consumers knows what he gets for his money if the figures on the back indicate so many quires and the price is low enough; that is all he knows or cares. I refer more especially now to cheaper books—long cap, 4-to and blotters.

J. E. THOMPSON.

NEW HAVEN, Conn., January 15, 1884.

Your inquiry in regard to putting up paper and blank-books is at hand, and in reply I would say

that the agitation is a good thing. Inclosed please find my vote on both articles, which is "Yes." Hoping that the subject will be settled for the best interests of the trade.

JOHN R. REMBERT.

WORCESTER, Mass., January 15, 1884.

It gives us pleasure to answer "Yes" to your "two important questions."

We would like to add that for fifteen years we have made our blank-books with even hundred pages, and for four or five years have used a price-list figured for twenty-five sheets, and have found it invaluable for figuring our costs, particularly on job-work.

PUTNAM & DAVIS.

BOSTON, Mass., January 16, 1884.

We inclose herewith our vote, voting "Yes" on each question.

There was formerly more trouble to dealers in books arising from short quires than at present, and the practice of stamping the back of a book with a certain number, which was always taken to indicate the number of quires, and discovering afterward that the books of some other more honest manufacturer, bearing like numbers, contained more pages, was the cause of considerable trouble. It was, of course, a fraud, because it purported to be something it was not, and the intention was to deceive. It seems rather ridiculous that a manufacturer should find it necessary to explain in his price-list that the quires in the books in this or that catalogue contain 20, 18, 16, 14 or even only 12 sheets, when the standard table of paper packages has not changed.

In either case 500 sheets to the ream, and reckoning books by the 100 pages, the more convenient plan and perhaps more honest representation to the consumer will be effected. Some manufacturers have adopted both plans.

AARON R. GAY & Co.

BOSTON, Mass., January 14, 1884.

We inclose your blank with our affirmative answer to both questions. We are decidedly in favor of 500 sheets to the ream, and all our fine book and plated papers have been so made and put up for us for the past five years. Blank-book we have little to do with, but think if paper is put up 500 sheets to ream books had better be sold by the 100 pages.

J. H. BUFFORD'S SONS.

BOSTON, Mass., January 16, 1884.

In answer to your inquiry we submit the following:

If folded papers should be put up 500 sheets to a ream, to be of same thickness as the present standard weights, a 3-pound note (48 oz.) should weigh 50 oz.; a 4-pound note (64 oz.) should weigh 66 $\frac{2}{3}$ oz.; a 5-pound note (80 oz.) should weigh 83 $\frac{1}{3}$ oz.; a 6-pound note (96 oz.) should weigh 100 oz.; a 7-pound note (112 oz.) should weigh 116 $\frac{2}{3}$ oz. This would not be desirable for either the manufacturer or dealer, for papers should weigh even pounds to the ream. A paper thinner than that now sold, therefore, would be put up for a 5-pound note, &c.

In our opinion, this would have a tendency to induce consumers to use heavier weights of paper

than they are now using and more or less disturbance would undoubtedly be created by the change.

Five folds would constitute a quire. What would the small retailers throughout the country do when a half quire was wanted? Give 12 or 13 sheets?

We are inclined to the opinion that 480 sheets of folded papers ought still to constitute a ream. There is not, perhaps, equal objection to 500 sheets constituting a ream for flats.

As to the second question, we are inclined to answer "Yes," if universally adopted.

WARD & GAY.

Middle States.

NEW YORK, January 14, 1884.

We inclose our vote on the two questions as requested.

As you also ask for ideas or suggestions, we would say that we can see only unimportant, slight or occasional advantages to be gained by the changes suggested, whereas such changes would occasion very great inconveniences, labor and misunderstanding.

For printing purposes and in some branches of manufacture, it is desirable to have paper put up 500 sheets to the ream, and it can be, as it is, so put up when so ordered.

But in the case of writing-papers and blank-book papers, 480 sheets to the ream is preferable to 500 sheets.

The making and selling of blank-books by the 100 pages instead of by the quire, seems to some, on the face of it, as more simple and fairer, but a little consideration will show that the advantages are only imaginary.

Concerning both questions it may be said that one way is as good as the other, and unless there are great advantages in a new way over the old one, the established way, is the best. J. O. PREBLE & Co.

NEW YORK, January 16, 1884.

We inclose our answer to your questions as requested. Our reasons are many. In the first place, while we are at all times only too glad to make innovations which we consider improvements, we do not consider this at all necessary, and it would be an innovation that would cause an endless amount of trouble to the manufacturer without any good arising whatever. Paper, both flat and cut, has been and is always put up by the prominent English manufacturers 480 sheets to the ream. French papers are put up 500 sheets. Many of our American paper manufacturers only put their writing papers 480 sheets; and if the flat papers are delivered 480, and 500 are demanded when cut up, it will add considerably to the cost. Who will be the gainer if put up 500 sheets? The consumer buys by the quire, and expects to get 24 sheets to the quire, so that the retailer, when he has sold 20 quires will have twenty sheets left, and then will want the house he deals with to give four more sheets so he may pocket another quire. Papers for printing are, I believe, always put up 500 sheets and the reasons are plain, but this branch we know nothing about.

MYERS BROTHERS.

NEW YORK, January 16, 1884.

Inclosed we hand you our vote upon the two questions submitted. We vote "Yes" on the second, because we are favorable to all plans tending toward a decimal system.

Four years ago we adopted the decimal system in our pad business, putting our manilla writing papers into 100-sheet pads and ten pads in package, making 1,000 half-sheets to the ream, listing them by the 100 (pads) instead of by the dozen or gross, which, we think, should be abolished. Our four years of experience has satisfied us that this is the simplest and most satisfactory plan, hence we are favorable to all suggestions looking toward the universal adoption of a decimal system.

THE ACME STATIONERY AND PAPER COMPANY,
SAM'L I. KNIGHT, Proprietor.

NEW YORK, January 18, 1884.

In answer to the inquiries propounded in your circular, we say "Yes." In connection with same would state that, as far as practicable, we endeavor to induce our customers to order blanks printed by the number, instead of per ream.

Blank-books we have sold for several years, per book, instead of per quire. SLOTE & JONES.

NEW YORK, January 18, 1884.

The late Mr. Daniel Slote, my brother, many years ago advocated very strongly and urged upon his colleagues, the wholesale blank-book dealers, the adoption of a uniform system of selling blank-books by the 100 pages. It would be a difficult matter to bring around, no doubt, but, in the end, I believe, would simplify business very much. I hope yet to see it accomplished.

HENRY L. SLOTE.

NEW YORK, January 15, 1884.

We long since found a very great convenience in having our papers 500 to the ream in place of 480. Evolution—progress, hundreds in place of quires—a thousand pages one ream, i. e., 500 sheets paged on each side.

GEO. H. JONES,

Of Berlin & Jones Envelope Company.

NEW YORK, January 15, 1884.

Inclosed is slip received from you and which I voted in the affirmative on the first question. Have often thought of this way of putting up paper and hope to see it successful.

I do not vote on the second question as I do not handle blank-books, and will leave it entirely with those who do.

C. S. NATHAN.

NEW YORK, January 14, 1884.

I am decidedly in favor of the two propositions put before me. In having paper made for me it is always put up 500 sheets to the ream, and blank-books, to avoid fraud, should be estimated in pages.

WM. C. MARTIN.

ROCHESTER, N. Y., January 14, 1884.

For flat papers, we strongly favor 500 sheets to the ream, but, for folded, think 480 sheets and 24-sheet quires preferable.

SCRANTON, WETMORE & Co.

ELMIRA, N. Y., January 12, 1884.

In inclosing our reply to your inquiry about quires of 25 sheets and reams of 500 sheets, we would make our suggestion.

We would preserve the term "quire" as now in use, and let the count remain, substituting another term, say "fold" for 5 sheets and "folio," or a similar term, for 25 sheets. The blank-book men are accountable for many sins of omission, and chief of them is the quire misnomer.

Call a ream an M; call a half-ream a half M; call a quire a folio or a quarter, being a quarter of 100 sheets; call a one-fifth quire a fold.

PRESWICK, MORSE & Co.

ALBANY, N. Y., January 14, 1884.

In reply to both of your questions please record our vote as "Yes" in both cases. We have always considered the idea of selling blank-books, or rather manufacturing them, in and by quires, an imposition and a fraud. For instance, we pick up in stock two 4-quire blank-books of equal size, and find that one contains 256 pages while the other has only 232 pages. In 6-quire books we find that one contains 360 and the other of the same size 384 pages. Envelopes being put up in one M., half M and quarter M. boxes it would certainly be very proper to do up its partner in like or similar quantities.

HENZEL BROTHERS.

PHILADELPHIA, Pa., January 12, 1884.

My opinion on the paper and blank-book question is of no account, as I have not been in the stationery business for several years. I have answered the questions based on an experience of about fourteen years with the late Willy Wallach. To the "paper" question I say "No." With a jobbing house there would be no difficulty with 480 or 500 sheets to the ream, as packages are not broken (I refer, of course, to cut papers), but, with a retailer, I think it a nuisance. Twenty-four sheets have been a quire too long to change it now to 25.

As to blank-books I say "Yes." In this line 24 sheets don't make a quire, and, I presume, some cheap lines contain anywhere from 12 sheets up to a quire. In fact, "a quire" in a blank-book doesn't seem to mean much of anything. I cannot see any good reason why the number of sheets should be based on the quality of paper or any other rule. If a full quire is made up, the price can as easily be

regulated by quality of paper used as now. If that can't be done, why say "per 100 pages."

CHAS. R. KIMBALL.

PHILADELPHIA, Pa., January 12, 1884.

Replying to your circular we inclose our answer, though we are not interested in blank-books, not handling them. We think, too, it would be far better to adopt the decimal system throughout; paper in cartons of 100 and goods generally put up in tens in place of dozens.

ROSENBAUM & Co.

PHILADELPHIA, Pa., January 12, 1884.

For the accommodation of printers and envelope makers, 500 sheets to ream is preferable, and if the blank-book makers will agree to sell books by the 100 pages, I would be in favor of 500 sheets to the ream, and so put up by all paper makers; quires altered accordingly, if possible.

H. L. LIPMAN.

WILKESBARRE, Pa., January 14, 1884.

We are in favor of putting up all paper 24 sheets to the quire, and 20 quires to the ream, and all blank-books should be made up with 24 sheets to the quire, and let blank-book manufacturers charge accordingly.

WM. PUCKEY & BROTHER.

MIDDLETOWN, Pa., January 12, 1884.

We vote both "No" and "Yes." Our objection to 500 sheets to ream is, it will cost us more per ream and have to sell at same as now, 480. Again, we sell 6 sheets for 5 cents, and if they are put up in 5 sheets in place of now 6 sheets, we will in selling 5 cents' worth, always be put to extra trouble to make the 6 sheets for 5 cents.

But the selling books by 100 pages meets our views exactly.

SCHAEFFER BROTHERS.

JERSEY CITY, N. J., January 12, 1884.

Answering your inquiry herein, which applies to all paper, we think classification should be made to apply only to papers made for and to be used in book form.

JERSEY CITY PAPER COMPANY,

J. TOMPKINS, Secretary.

DOVER, N. J., December 7, 1883.

I am not prepared to answer definitely. I do not know what effect it might have to the wholesalers, but to the small retailers (of whom I am one), it would appear to work disadvantageously. A quire of paper is put up in four packages of 6 sheets. If there were 25 sheets to the quire, one of those packages would require 7 sheets, which would be very inconvenient, or if more or less than 6 sheets were folded together, it would not be so convenient. Therefore, from my standpoint, I would prefer to see it remain as it is. As to blank-books. When I first started in the stationery business, about ten years ago, I tried to familiarize myself with the whole business, which I fairly succeeded in doing, except blank-books. I undertook that branch, but finally gave it up and have ever since "gone it blind." I know there are 12, 4, 15, 16 and 18 sheets to the quire, which means, say, in an 8 quire book, a difference of perhaps 100 pages. This is certainly not convenient for the retailer, however it may be for the manufacturer, and I should like to see the system changed, so that all might understand.

S. H. BREESE.

Western States.

ST. LOUIS, Mo., January 14, 1884.

For putting up all flat papers, 500 sheets to ream, "Yes." For selling blank-books per 100 pages, "No." We do not favor putting up folded papers 500 sheets to ream. Can get as much money for one ream legal cap of 480 sheets as we can for one ream of 500 sheets, and the ream of 480 sheets is used up sooner.

GEO. D. BARNARD & Co.

CINCINNATI, O., January 14, 1884.

If all the manufacturers and jobbers in the United States will vote to adopt 500 sheet count per ream instead of 480 sheets, and will do so on all grades of paper made, viz., news, book, flat writings, &c., we will vote "Yes," but we would vote "No," unless the change was made in all grades. Some jobbers have already adopted that count in news and book papers, but in nothing else, and we don't think well of it. We are not interested in the second proposition, but

if adopted would necessitate a change from 480 to 500 sheet count in all grades, ledgers, flat writings, &c.
LOUIS SNIDER'S SONS.

NEW ALBANY, Ind., January 14, 1884.

In reply to the two important questions, I will state that I am most positively in favor of them both, but just longing for the general introduction of the first. It seems to me the introduction of the first would in time cause the adaptation of the latter.

JNO. R. NUNEMACHER COMPANY,

WALTER C. NUNEMACHER, Manager.

DAYTON, Ohio, January 14, 1884.

I inclose my vote on the two propositions. On the latter I vote "No," for the reason that under the present system the jobber can make more money than under the proposed one, in my judgment. I wish that you had, in addition, asked an opinion on abandoning gross and dozens and substituting the decimal system.

Take an instance. An article at \$4.32 per gross compels you to use a pencil to calculate the price of each. If they were quoted at \$3.00 per 100, no such difficulty would occur.

R. A. ROGERS.

DENVER, Col., January 16, 1884.

We are not certain that we can answer your queries intelligently.

The basis was made under the old regime, and prices have been established on that method.

Without investigation or settled conviction, would incline to favor the change.

STONE & CO.

KEOKUK, Ia., January 16, 1884.

We vote "No" to both questions asked. We see no good reason for changing.

BROWNELL & CO.

CHICAGO, Ills., January 15, 1884.

We are this day in receipt of your circular and slip, "Two Important Questions," and cheerfully answer in the affirmative, "Yes," as we consider 500 sheets to the ream the best possible shape that paper can be put up, both for printers and publishers. Our establishment consumes between 250 to 300 tons of paper monthly, and in laying out sheets for newspapers or books, we find 500 to the ream facilitates our work very much and consumes much less time.

J. L. REGAN & CO.

BURLINGTON, Ia., January 14, 1884.

In voting on the question of putting up all papers 500 sheets to the ream and 25 sheets to the quire, we vote "No," but would qualify it by stating that as far as flat papers used by printers and bookbinders are concerned, we should vote "Yes." The senior member of this firm, an old paper maker who served seven years as an apprentice to learn to make paper by hand (commencing the business over thirty years ago), is opposed to any innovations on a custom that has existed from time immemorial, believing that it would cause endless confusion without any apparent good results.

In regard to blank-books, we should also qualify our statement, believing that all books of first-class made from ledger papers and of the best grades might be sold by the 100 pages to good advantage to all concerned.

E. & W. M. OSBORN.

DUBUQUE, Ia., January 14, 1884.

Inclosed please find our vote. We vote "Nay" on proposition to change from quires to hundreds, as we see no special advantage in the change. Houses that have tried the "hundred" plan have gone back to the "quires," finding it the simpler and better way, and, it occurs to us, that their experience ought to be something of a guide to other manufacturers.

GROSVENOR & HARGER.

CINCINNATI, Ohio, January 14, 1884.

Inclosed find our "Yes" to your two propositions. A few years ago we were disgusted with long discounts, short counts in blank-books. We made our discounts so that there would be a fair margin between the jobber and small dealer, and so that in one line of our blank-books meant 100 pages full, selling the books so much per 100 pages. We found the trade did not like the small discount, and would not take the honest blank-book—they, the average dealer, want short count and long discount.

Our motto is, "Give us an honest count."

VAN ANTWERP, BRAGG & CO.,

A. HOWARD HINKLE.

SAN FRANCISCO, Cal., January 23, 1884.

We are in favor of putting up paper in reams of 500 instead of 480 sheets, and for the past seven years have had our leading line of ruled and flat stock put up in this manner. We think well of the plan of selling blank-work by the 100 pages.

A. L. BANCROFT & CO.

F. A. COLBY.

DE SOTO, Ia., December 7, 1883.

I am not aware of any particular advantage to be gained by changing reams of paper to 500 sheets, except that of having 500 or full 1,000 copies when having printing done by the 1,000 copies. Hence, rather than have the immense stock of paper now on hand subject to an unnecessary trouble, I vote "No."

On the blank-book question, I see no better plan to avoid the present system of short quires and imposition on parties not posted, than the 100-page system. Therefore, vote "Yes" very heartily.

E. H. HAYCRAFT.

CARSON CITY, Nev., November 30, 1883.

The arrangement of putting up 500 sheets to the ream is all right in flat papers.

I don't see how a quire of folded note or letter can be put up in one-quarter or one half quires if put up 25 sheets to the quire.

JOHN G. FOX.

SAN FRANCISCO, Cal., November 28, 1883.

I do not care whether paper is sold 480 or 500 sheets to the ream.

I would prefer to have blank-books by the quire, but would like them to be made 24 sheets to the quire; don't believe in putting up 12, 14 or 16 sheets to the quire and calling a book so many quires any more than I would believe in selling a ream of paper and having it 20 quires and counting it 12, 14 or 16 sheets to the quire.

J. K. COOPER.

COLUMBUS, Ohio, November 30, 1883.

We vote "No" on the two important questions presented. Will give the following reasons. The putting of 500 sheets in each ream we would have no objections, but to the 25 sheets per quire we would object, and can show you. First, the world well understands that a book-manufacturing quire is 80 pages. The reason of this is, that there being a loss on each book made in ruling, some sheets will be lost. Then the waste papers. While you make 25 sheets per quire you leave nothing for the loss, which will be more or less owing to the complication of each book. Sometimes we have had one-half of paper that was necessary for book, owing to the book being of various rulings. We have thought some time when a change might be made in manufacturing books for the trade should be 80 pages to the quire and regulated by Congress, so that 30, 40, 50 pages will not constitute a quire, as now, by some manufacturers. We rather object to having stock or any books sold by the 100 pages, as we do not think it practical, for the reason that a party might want a book, as now, 240 pages, but would not want the extra 60 pages, and so on. If made parts of a fraction pages, then we are no better off than now, and if made fraction pages it would make it more complicated for all in selling.

Will vote "Yes" for putting up blank-book paper 500 sheets in packages and 80 pages to the quire.

SIEBERT & LILLEY.

Southern States.

WASHINGTON, D. C., January 14, 1884.

Inclosed you will find my answer to your questions. I really am glad you have agitated this question, and well know what the result of the vote will be, for I am every day asked how a two-quire book contains at the most only 126 pages, when they think, as it should have, 196, and we have to give all kinds of answers. Now, please press this thing, so as to make a uniformity, and you will greatly bless any retailer.

JOHN C. PAREER.

BALTIMORE, Md., January 14, 1884.

We vote decidedly "No" in answer to your questions, and are at a loss to understand why such questions should be agitated.

To make such changes would certainly entail a great deal of trouble and expense on the part of the manufacturers and dealers in making prices to cor-

respond, and in regard to putting up paper 500 sheets to ream would make the business more complicated than it is at present, besides setting aside the legal requirements of 480 sheets for a ream.

MARCUS W. WOLF & CO.

BALTIMORE, Md., January 14, 1884.

Our opinion is that "Uncle Samuel" is the boss liar of this country, and perhaps printers come next. For the first named there is no excuse, as 85 cents will not make 100 no matter how you cipher. In the latter we can put it where it belongs—on the paper maker—and say like Adam of old, "Eve gave it to me," but nevertheless it is a swindle, long tolerated, to sell a customer 480 sheets of paper, note-heads, bill-heads and what not, for 500, when 20 sheets are lacking. It don't matter much on one ream, but when it comes to 20,000 or 30,000 it does; still the principle is the same. What does a customer know about 960 sheets being considered a 1,000 by "the trade?" He orders 1,000 note-heads and gets 960. What if those sheets represented pennies? We have no more right to deduct them than we have to abstract 40 cents from his coat-tail pocket when he takes it off and lays it on our desk to fight us because we insist on the money for his bill before he takes the goods. A nice kettle of fish we would get into if we had to swear before the squire on an assault and battery case (which might grow out of the row) that the bill we were trying to make him pay was a lie on its face, and there were 20 short on every 500. For the last fifteen years or more (since we have been convinced there was a hereafter) we have given ten hundred sheets for a thousand, but it has caused endless trouble and annoyance all around, and leaves us broken packages of all sizes.

HAMMOND & JONES.

WASHINGTON, D. C., January 14, 1884.

Referring to the two important questions upon which you ask for votes, it seems to me that the trade should, with united voice, demand that these long-felt wants should speedily be supplied.

C. C. PURSELL.

NATCHEZ, Miss, January 15, 1884.

I vote "Yes," because, 1, the quire will correspond with pack of envelopes; 2, almost all of my customers buy blank-books by the number of pages in the book. If you tell how many quires in book they ask how many pages it has. I will look with interest for the result.

F. M. SWAN.

NEW ORLEANS, La., January 17, 1884.

On the first question, as to whether it would be advisable to put up all papers 500 sheets to the ream, I can conceive of no objection to its being done, while many arguments might be brought forth in its favor; and while I vote in the affirmative on the second question, I am willing to concede, there are some valid objections thereto. I hope both propositions will be unanimously carried and will go into effect.

F. F. HANSELL.

KANSAS CITY, Mo., January 15, 1884.

Your second question in many cases would deserve a "Yes," but we answer "No," possibly because we are a little "old fogey."

WM. B. HALL,

Editor *Daily R. E. Record*.

DEMOPOLIS, Ala., January 15, 1884.

I cannot see that it amounts to a great deal whether writing paper is sold 500 sheets to the ream or 480. The price would be increased sufficient to cover extra cost of paper, and retailers could not increase their sales any by having it so put up. It would perhaps be an advantage to printers. I have always thought that blank-books should either be sold by the 100 pages or by the quire, full count. I never understood why a manufacturer of blank-books should throw out a half-dozen sheets, and charge for full quires.

WM. H. WELCH.

ST. LOUIS, Mo., January 14, 1884.

Quite an extended experience in commercial job printing has taught me that few persons outside of the printing and paper trades know how many sheets there are in a quire or ream, but everybody knows what 50 and 100 mean; and when a man buys a ream

of paper to fill an order for 500 copies of a job, he sometimes has considerable trouble in convincing a customer that 480, less the spoiled sheets, counts for 500.

The less "explanations" one has to make in business the easier business is transacted.

C. W. CRUTSINGER.

MEMPHIS, Tenn., January 14, 1884.

While the 25 sheets to quire is a good idea, the 100 pages to blank-books is immense, and the only way to sell them in order to avoid confusion. It's a hard thing to persuade customers that 10 quires of 18 sheets is more than 10 quires of 14 sheets, they thinking a quire is a quire anyway. Stir the blank-book manufacturers up, and receive the thanks of the trade.

R. M. MANSFORD.

St. Louis, Mo., January 15, 1884.

We inclose our ballot, but cannot say that we fully agree with THE STATIONER as to the importance of the questions voted upon. If fairly argued the pros and cons would nearly balance.

We presume the object aimed at is to simplify, and upon this point we would say that every stationer should be master of his own business.

The innumerable details that make his business seem so intricate so outsiders are a part of his stock-in-trade. A stationer is under no moral or legal obligation to give away information that he knows will be used against him in every competitive bid, any more than a lawyer is to give away points of law that would enable his client to act as his own attorney.

If everything in the stationery business could be reduced to right angles and straight lines—or better still, sold by the pound and each class of goods have but one price, the few prices could be

easily remembered by tradesmen and consumers, but what would these prices be?

BUXTON & SKINNER STATIONERY CO.

SAVANNAH, Ga., January 14, 1884.

Inclosed please find my answers to "two important questions." They are to both emphatically "Yes!"

I visited, several years ago, in Germany, a well-known blank-book factory, and examined its products. I asked one of the firm, while examining a book, "How many sheets to the quire?" He looked at me in amazement, astonished at my supposed ignorance, and answered, "Why, 24 sheets to the quire." I explained to him that American manufacturers marked books with 12, 14, 16, 18 and 20 sheets to the quire. He was very much surprised at my answer, and said it was "a la Yankee." When I told him that slates were sold at discounts of 60, 10, 10 and 10 per cent., he wanted to know how much was left of the price. Will you please give me the reasons why manufacturers do not use regular prices? No one ever could give me an honest or sound reason.

H. L. SCHREINER.

CHATTANOOGA, Tenn., January 12, 1884.

Our reasons for voting "No" to putting up paper in reams of 500 sheets is that retailers have ten customers for half and quarter quire where they have one for a whole quire in ruled goods. Printers' stock undoubtedly would be quite as well put up 500 sheets to ream.

Blank-book quires are too elastic, running from 12 to 20 sheets. This confuses small dealers and consumers, and the latter, in sending mail orders, usually state the number of pages they want to the book.

T. H. PAYNE.

St. Louis, Mo., January 15, 1884.

I would be glad if manufacturers were compelled

to mark their books just what they really amount to at 20 sheets per quire.

S. G. BURNHAM.

NASHVILLE, Tenn., January 14, 1884.

"No" to first. Six sheets make good fold; 6½, 12½ or 25 sheets do not. We like the 500-sheet feature, but 24 sheets to quire is more essential.

"Yes" to second. One hundred pages indicate something. A quire as now listed means any of twenty-four numbers, and some manufacturers would like to make it less than a sheet if possible, and take off an extra discount.

Do you think you can reform them? Didn't Mr. Slote try, and fail in his efforts?

WHEELER & OSBORN.

RICHMOND, Va., January 14, 1884.

We cheerfully answer "Yes" to both questions. The idea suggested itself to our minds before, and we approve of it.

W. E. SIMONS & BRO.

BALTIMORE, Md., November 30, 1883.

Five hundred sheets of paper to the ream would be more convenient than 480. It seems absurd to sell 12, 15 or 16 sheets to the quire.

THOMAS G. DOYLE.

BALTIMORE, Md., November 30, 1883.

We consider it decidedly preferable for a ream of paper to contain 500 sheets, but do not think well of the 100-page business. In that respect leave well enough alone.

W. L. STARK & CO.

LOUISVILLE, Ky., November 30, 1883.

We are and have for a long time been in favor of all papers being put up 25 sheets to the quire and 500 to the ream. We are not in favor of selling blank-books by the quire or by the 100 pages. If a 10-quire medium ledger is worth \$1.50 per quire, a precisely

similar book of 4 quires would be worth \$2 per quire. We would therefore sell by the book.

Blank-books are always made up in sections of 3, 4, 5 or 6 sheets, 4 pages to each sheet; hence, a book can be put up with quires of 100 pages each.

Again: Eighty pages to the quire was chosen because (we judge) there are always fly-leaves required in a book, and because more or less of the paper is spoiled in ruling, &c., and a binder must get 20 so-called perfect quires from a ream of paper.

MAXWELL & Co.

NEW ORLEANS, December 3, 1883.

I think 500 sheets of paper should make a ream, as it can be counted, divided and handled better. I think blank-books should be made by the 100 pages, for it will stop one species of deception in calling a book 4 quires, when only 14 or 16 sheets are made up. At least 20 sheets should be used, and charged accordingly. I think 144 pens should constitute a gross; 480 sheets of blotting, a ream; 4th and 5th sortings of paper ought not to be put up in first-class wrappers. Drummers should not make drafts on their firms without some authority to draw. Drummers should not take up the time of the merchant in looking at samples, unless he is certain his order will be inspected. That discounts should be nearly as uniform as possible, and only graded by the amounts sold and not by the commercial rating of the buyer. That the manufacturer and jobber should protect the retailer, by keeping his goods out of the reach of the consumer.

JAMES A. GRESHAM.

GREENVILLE, S. C., December 14, 1883.

I am in favor of the 500 sheets to the ream; but what will you do with the quire? How divide it, as 25 sheets cannot be divided into bunches of six sheets—which I usually sell for 5 cents each?

About the blank-books I am not so sure, and so do not answer at all.

H. J. FELTON.

Dominion of Canada.

TORONTO, January 15, 1884.

We answer "No" to your query re blanks, for the following reasons: In our Canadian market blank-books are sold at the same price per 100 pages for all sizes. It costs nearly as much to bind a thin book as a thick one. The result of this is that we really lose money on all small-size or thin books. If prices were graded according to thickness of book, it would be better.

W. J. GAGE & Co.

MONTREAL, January 14, 1884.

Yes! Yes! to your questions, and would suggest that all reams be stamped so.

Also, stamped guaranteeing full weight.

The writer has done all he can for these four points, in Canada. I refer to the Manila trade in particular.

Canada wrapping trade is completely demoralized as far as count for weight goes, and the seller wriggles out of his difficulty by invoicing "1 package demy 100." What is a package? What is demy? What weight. What count? GEORGE S. WILSON, J. C. Wilson & Co.

MONTREAL, January 14, 1884.

The question of yes or no has often troubled many men and many more women who have often been compared to cats on a fence, not knowing which way to jump for fear of getting down on the wrong side.

The little word "Yes" or "No" very often seals the destiny of a man or woman in this world as well as in the next; and in many subjects would advise caution. But, in your case, I don't hesitate to give my note, "Yes," as I consider it an improvement on the old system.

JOHN PARSLow.

The returns of the votes cast in response to the inquiries stated come from a wide range of territory and represent every section of the country. They are shown in the table on the preceding page.

THE KERNER PEN.

\$1.

IT is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platinum alloyed with iridium. Price, \$1 and upwards, according to mounting. Send for Circulars.

25c. A GENUINE STYLOGRAPHIC.

This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address GOLLNER MFG. CO., 222 Centre St., New York.

Correspondence.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE OF THE LOCKWOOD PRESS,
49 Federal Street,
BOSTON, February 6, 1884.

Fashion is a fickle dame. When she tires of one thing she only sounds her edict, and another looms up to command her attention. Her thousands of votaries pay humble submission to her vagaries, and readily obey her mandates, because it is the "rule of fashion." Fashion now proclaims that polite correspondence must be sealed with wax and bear the imprint of one's monogram, as in days long gone by. In obedience thereto the Dennison Manufacturing Company is presenting to the trade an elegant line of the finest perfumed wax, representing upward of twenty distinct colors. It is packed in handsome and unique cartons, forty sticks to the pound (ten sticks in a tray), and selling to the trade at \$2 per pound. An extensive line of seals, embracing the full alphabet, sentiments, &c., is also ready to accompany the demand for sealing wax. Now that the fashion for sealing epistolary correspondence is set, the demand for these goods will become quite popular, and so society stationers must be prepared.

Whenever I get tired of the monotony of the street, I like to while away a little time in the sample-room of Ward & Gay and feast my eyes upon the artistic novelties which cover the walls and counters. Here one finds displayed cards of every description, for all purposes, and from all of the celebrated publishers. Neatly arranged upon the walls and upon counters are samples of the extensivelines, with their prices, giving the buyer a bird's-eye view of the entire stock, and enabling him to quickly compare prices and to make choice selections. Mr. Gay reports that the valentine trade has been very good and that during the coming week he will close out the entire line, which he is offering at very low figures. Among this lot I noticed a very pretty fringed card in the shape of a fan, presenting a frosted scene, which has had quite a demand, as it is appropriate either for a valentine or a birthday souvenir. For the Easter trade an extensive line of rich novelties is shown, together with a special line of low-priced fringed goods. Dealers will soon be making inquiries about Easter goods, and the early buyers will get the best selections. Some dealers there are who never stock up until the last moment, waiting for cheap job lots. But the most successful dealers, those who cater to the better class of customers, can't afford to buy nothing but job lots; they must enter the market while the stock is fresh and when the greatest novelties are offered. Such dealers read THE STATIONER and keep posted upon matters in which they are interested.

Stationers' rubber goods, manufactured by the Davidson Rubber Company, are well known to the trade everywhere, and most favorably known, too. Every article bearing the company's name is a guarantee of its quality. Its patent "velvet" rubber, prepared from the best of stock, is recognized as the standard "eraser." Such a hold did it have in the market, that others sought to reap the benefits of its popularity, but, after expensive litigation, the courts have decided in favor of the Davidson Rubber Company. The company is now giving some attention to the manufacture of rubber bands, presenting an article that will stand more than one ordinary stretch and with which the trade can find no fault concerning quality. These

bands are put up in neat two-ounce boxes, eight of them in a larger box, making a pound package, and the goods are marked "Davidson Rubber Company." Dealers will find this system of handling bands very convenient. If assorted sizes are wanted in pound lots, such orders can be filled. Rubber pencils and pen-holders in endless variety are among the company's specialties.

I had a very pleasant chat yesterday with Mr. Marble, the energetic manager of the Cross Pen Company, from whom I learn that the business of the company has wonderfully increased during the past year. The facilities for manufacture, though somewhat extensive, are hardly equal to the demands of the trade; but the company is still pushing its goods, and waiting for a little dullness in business that the factory may catch up on orders. Hawthorne said, and he did write (right):

"I will make the man immortal
Who will give me a good pen."

And straightway the Cross Pen Company proceeded to achieve immortality, and a large amount of prosperity also, by presenting a fountain pen, constructed upon the principle of a stylograph, but having a regular gold pen point, by which one's individuality in handwriting is retained; and it is named "The Hawthorne." Among the extensive line of pencils manufactured by the company is a new pencil, having a propel, repel and expelling action. It is pronounced the greatest hit in pencils since the automatic, being every way much superior. These pencils are made of French enameled wood, to imitate rubber, and are mounted with gold stock-plate. They are very durable, practical, and have an artistic finish. They are having a big run. A gold-plated pencil-lead sharpener—a very convenient article for one using the patent pencils—is also manufactured by the company. It makes a novel watch-charm, and so becomes ornamental as well as useful. Don't imagine, now, that I wrote these lines with "The Hawthorne" pen.

Though the poet might promise immortal life
For a pen that suited his will,
The price is too high for a common scribe—
I must stick to the old-fashioned quill.

Stephens' ink, manufactured by H. C. Stephens, an English chemist, is a writing fluid for which Thomas Groom & Co. are building up quite a trade among the counting-rooms and stationers of this city. It is claimed for this ink that perfect copies of letters can be taken as well a month after writing as when first written. It does not act upon pens nor penetrate paper, and when it becomes thickened by evaporation, the addition of a little water is all that is required to restore its fluidity. When once used it holds its place both upon the paper and upon the attention of the writer. Dealers, where custom calls for a good writing fluid, should have Stephens' ink in stock.

In my rambles during the week I stumbled into the busy quarters of J. L. McIntosh, in Federal street. A dozen or more operatives were hard at work attending as many different machines, some of which were numbering, some paging, and others perforating and cutting. Files of calendars, show-cards, pamphlets and tickets were observed upon the tables, sent in by stationers and printers for some special finishing touches; show-cards and calendars to be eyeleted, and tickets to be numbered and perforated. Within the past three years the demand for such work has surprisingly increased. Many of the machines examined were invented by Mr. McIntosh for special use in his business,

and they show considerable ingenuity, designed as they are for overcoming some obstacle and for saving labor. When Mr. McIntosh embarked in this business some few years ago his friends predicted a failure because they read not the signs of the times; but instead of failure the gentleman has won success, and done it by strict attention to business and good work.

"Eye-let" you know of his quarters,
"U let" Mac have a show;
"To let" will ne'er be placarded
Upon his door below.

A. L. D.

PITTSBURG POINTS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, January 31, 1884.

A number of your New York periodicals have dwelt at length upon the slush and filth upon your streets. If they are one-half as bad as the Pittsburg thoroughfares they surely must be horrible. A heavy rain last evening washed away considerable of the stuff, and the retail dealers generally think that cleaner streets will be the means of bringing out more purchasers.

The trade last fall among stationers, news-dealers, &c., was exceedingly quiet, owing probably to the glass and iron strikes. About ten days before Christmas, or, better, say a week before, people rapidly filled the stores, and trade was very active. No particular branch was patronized, but all received a full share of patronage. Books, and a great many fine ones, went fast. Christmas and New Year cards showed no depreciation from former years, but from some cause our dealers seem to be of the opinion that the card trade from now on will wane. Fancy letter-paper, desks, colored photos of the celebrities and ideals, and, indeed, the full line of a general news, stationery and book establishment, were largely purchased. Since the holidays the trade generally has been of a healthy and satisfactory nature; in fact, most of the trade report a good paying business, and the contented expressions of their faces show such to be the truth.

Probably, most of your readers know that this "Iron City" depends to a very great extent, indeed, almost entirely, on the iron, steel and glass business. When those industries are actively conducted and generally prosperous, the whole community is wreathed in smiles and the pocket-books grow pléthoric. The immense number of skilled workmen receive much larger wages than is generally supposed. Boss rollers, head hammermen, and boss glass-blowers and workmen often make from fifteen to twenty-five dollars a day. It is a well-known fact that no class of men are as liberal and free with their money as the ones just mentioned. The long and disastrous window-glass strike was ended this week, and last week the large "Bessemer" Steel Works again began operations. Our manufacturers, therefore, being fully operated, and with every indication of their continuing so for some time, I am of the opinion that the stationery trade, in all its branches, will be brighter, and predict an increased business over last year. Your jobbers will be quite safe to sell as large orders in Pittsburg as they can, and "top of the morning" to the man who takes the largest orders.

Stevenson & Foster, stationers and publishers, commended themselves to the people by the quick work of getting out a full and complete report of the evidence, attorneys' arguments and judge's charge in the famous Nutt murder trial. In one day after the trial the work was finished and on the counters of the various news

stands in the city. It is in pamphlet form, and neat and clean in appearance. The Pittsburg News Company and the American News Company each ordered 5,000 as a starter. Edward J. Donnelly reported the trial, and each morning the proceedings of the day previous were in Stevenson & Foster's hands. Hence one cause for the quick publication.

W. W. Edgar, one of the leading stationers (news and book dealers) in our city, is again at his place of business, after almost five weeks' confinement at his home, wrestling with pneumonia. He reports his business as being in excellent condition, and trade fairly active. His Christmas windows were very artistically arranged, and was the best advertisement he ever made. The first day the "Official Report" of the Nutt trial was out, Edgar sold nearly four hundred copies.

Robt. S. Davis & Co., say "All's well," and trade still good. The *Evening Leader* moving its office from the rear of the Davis store leaves too much space, and it is rumored that Davis will rent the old *Chronicle* building in the spring.

The name of Henry Miner is well known to the trade, and has been for thirty years. Geo. W. Hzena, administrator of Henry Miner, deceased, sold the Miner book and stationery store to Henry Meyer and the similarity of his name to his predecessor causes too many to address their cards, &c., to the old name. Let the trade notice this.

Through the courtesy of Jos. Eichbaum, of the firm of Jos. Eichbaum & Co., stationers, printers and blank-book makers, I had the pleasure of going through their finely arranged establishment. Their place of business is on Fifth avenue, near Wood street, and the building is one of the most imposing in our city. The basement is used for keeping goods in stock. The ground floor is in two departments, front and rear. The front contains as fine stationery and fancy goods as any in New York; many say too fine, but Mr. Eichbaum says he knows very well to the contrary. In the building, printing and lettering rooms, the most improved and best machinery is used. Five J. H. Cranstons' cylinder presses and nine job presses are placed on the rear (first) floor. Between eighty and one hundred men and women are employed and their tidy appearance is well in keeping with the really remarkable order and neatness of this house. Mr. E. says their holiday trade in albums, fancy Christmas cards, &c., was by far the largest they ever had and, indeed, their entire line of business is brisk. I might add that no cheap work is done at this establishment and consequently no poor work.

G. W. H.

CINCINNATI FLOATINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, February 5, 1884.

Business appears to be a little better than it was a fortnight ago. There are signs of briskness that were not apparent at that time. Over and above these indications is the testimony of business men themselves. In the darkest prospect there was no grumbling, no loss of heart among business men in Cincinnati. They admitted the dullness, but firmly believed this present depression was not permanent. Now that the clouds are clearing away, and some light is visible, they are naturally cheerful. But the fact is that orders are coming in more briskly than they did even a fortnight ago. Those barometers of trade, the manufacturers of commercial stationery, are

selling stock and getting orders for manufacturing work in a way that indicates that the good time coming is almost here. How good it is to be, no one will venture to predict. Of course, all this little spurt of good feeling and briskness shows that merchants in general are expecting more vitality in trade, and that very soon.

In general business here, outside of the stationers' lines, there is manifestly an increase of stir and life. The shoe manufacturers are employing larger forces. Their business this winter has been almost dead, but it is growing brighter—only brighter, however. There are very extensive preparations in progress in Cincinnati for building during the coming season. Several capitalists have plans for putting up buildings ten stories high. Men with money at command are not in the habit of getting ready to invest it in that way when they thing everything is going to smash.

Manufacturing stationers here say that their January business is equal to and in many instances greater than that of January last year. Material is cheap, and with any sort of fairly good orders manufacturing stationers should make money. Manufacturers of material say "Never mind; you will see the price of paper boom, and that before long, just as you saw it boom in 1879. When you speak of present prices you make a dealer, especially in news paper, look sour, and nine chances out of ten you will throw him into a fit of crabbedness and set him to scolding like Hecate that any mention should be made of prices. I would give a specimen of this sort of scolding if I were not writing so late at night, but I shall have to reserve it for another time.

John Holland, the gold pen manufacturer, has returned from the East, where he spent a week breathing the salty air, for all of which he looks the better.

Charles Stewart is busy as a bee and merry as the day is long, notwithstanding, or perhaps in consequence of his long daily rides between the aristocratic suburb Clifton and his place of business.

Louis Snider's Sons keep things turning at their establishment on Walnut street. Since they have doubled the size of their ware-rooms they seem to be about twice as busy as they were before, and there never was a time when they didn't appear to have as much business on hand per man as ought to be required in reason of any two or three ordinary mortals.

Snider & Hoole have a lively winter trade, better in their Chicago branch than in their Cincinnati house. In fact, the branch seems to have grown larger than the main trunk, and it keeps on growing:

William B. Carpenter suffered a bereavement last week in the loss of a child three years old. Everyone who knows him will sympathize with him in this bereavement. PRINCE WILLIAM.

TORONTO TROUBLES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., January 30, 1884.

That old man who never saw a January without a thaw and 'sposed he'd seen a thousand, is dead.

It has tried twice this month, I think, to do it, and ignominiously failed.

The old man wasn't here to encourage it.

Venor and the other weather profits who predicted a very open winter, have crawled into their holes.

Which is the best place for all such humbugs.

And the old Indian, too, who said it would be

a very open winter because the chipmunks, beavers and bears had made no provision for winter, can't be found.

I saw a bear hanging up in front of a restaurant yesterday. I suppose that he couldn't bear it any longer.

And there are other bears who feel much in the same way.

But they might object to be hung up by the heels.

What's all this got to do with business? you say. Right you are.

Well, business for this time of year is very good, at least all the leading houses say so.

How in the world could it help to be, with the roads blocked east, west, north and south.

I am told that the snow is six feet on the level, more or less.

That you couldn't find a road in the country with a microscope.

That the country people have to take to the fields when they are obliged to dig out.

Trains on the main lines are nevertheless on time. Not the new standard time. Sometimes they pause for thirteen hours or more in a snow bank, to the great enjoyment of passengers. At other times they manage to get up to even a mile an hour, which is good.

We have got from a weekly to a tri-weekly mail.

There is no telling what we may reach in the near future.

We are a people of unlimited energy and push.

The question of the hour is cold versus heat. Boreas has the start.

I heard a man say that he woke the other morning and found the sheets of his bed actually frozen to his person.

I'm afraid that he exaggerated a little.

"C. H." greets "Lounger;" but he is so much like an icicle just at this moment that he can't say much more than that he is not "on his ear," but on the other end, and that end is in close proximity to a steam register in full force.

He hopes that he may fare better than the rooster which a scientist who had a theory that people could be frozen and laid aside for future use. He failed to secure a human subject, and tried the rooster; but, unfortunately, the poor bird, when he was set on the table and thawed out, was found to be dead.

When we melt we shall be heard from.

Of which our friends will please take notice.

C. H.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS. }
LONDON, E. C., Jan. 19, 1884. }

The clerk of the weather has been at his old tricks again, giving us spring weather in what should be mid-winter, and placing blankets and overcoats at a discount. There has been neither snow nor ice seen since October; we have walked about with our coats unbuttoned, and have had considerable difficulty in getting up any enthusiasm about Christmas. Still, on the whole, we are not inclined to grumble. If ice has been dear, coats and beef have been cheap, and the bitter cry of outcast London, which was heard in low mutterings in the early winter, has been hushed since, instead of deepening into a threatening roar, as it might have done if the homeless and workless had been doubled in number and in desperation by the appearance of frost and snow.

Altogether, the year has begun somewhat more promisingly than might have been expect-

ed, owing largely to the causes just mentioned, but also to that fortunate reaction which is as natural in trade as is the abnormal buoyancy of spirit which characterizes the man who has just recovered from a fit of the blues. Moreover, who can help feeling hopeful when, entering one after another of the big wholesale houses, he sees everything looking so smart and tidy; rooms swept and garnished, stock put in order, shelves newly filled with the articles on which there is to be a run, attendants looking the picture of enthusiastic yet dignified expectancy? I am not, generally speaking, vain of my countrymen, but on this occasion, I may be permitted the indulgence in a little pardonable pride in the way in which the preparations have been made for welcoming the propitious goddess Fortune in 1884. If I might be permitted to award the palm in this matter, I think I should have to cut it into pretty equal halves and bestow it in fair proportions between the establishments of Eyre & Spottiswoode and of Charles Reynolds & Co., although, certainly, our friends from the other side of the pond, Lawrence Brothers, would run the above-mentioned hard in their newly enlarged and improved show-rooms, in which they mean to do an even bigger business in those manufactures and notions, for which they are responsible, either as producers or agents, than they have done in the past. Deservedly so, too, for it is beyond question that the American goods put in the market by this firm are such as no citizen of the republic need be ashamed of, being not only novel and taking in style and ingenious in construction, but good, honest value for the money, and the public are not slow to recognize their worth.

There are evident signs that valentines, which were no great blessing to retailers last year, will be of still less importance this season. Fewer firms have gone in for them than hitherto, and those who have, not to the same extent. It is said that the youth of to-day looks upon valentines as spooney nonsense, and that the modern young lady prefers a locket or bracelet, or even an umbrella, to the finest production in colored paper. Still S. Hildesheimer & Co., Schipper & Co., and Raphael Tuck & Sons, have some very nicely printed and well finished goods, and an especial word of praise is deserved by the first-named firm for their exquisite specimens of printing in colors on satin.

Raphael Tuck & Sons' specialty is their terra-cotta plaque valentine, which consists of one of their well-known circular plaques ornamentally boxed, and having a valentine card inclosed with it. This is a capital line, and at a time when utility is demanded as well as beauty, is sure to go well.

The same firm is also busy getting out new patterns in its now famous four-fold stove-screens, the best thing yet produced in this line of goods, to my mind, but susceptible of some slight improvement, which the Messrs. Tuck's ingenuity will doubtless effect.

Easter cards have of late years grown to some considerable importance, and form a set-off to the decreasing popularity of valentines. The sale of these articles is principally among the religious portion of the community, and more especially the high church party, but is growing general among all denominations. Some exceedingly beautiful cards of this kind have been produced for this year's sales; indeed, for chasteness of design and excellence of printing, I have seen nothing to surpass those of S. Hildesheimer & Co. and one or two others.

There is a great rage for new materials on greeting cards just now; some of the substances used are appropriate and tasteful, such as the

seaweed and pearl cards alluded to in a former letter; but in some cases, except eccentricity, there is nothing whatever to recommend these "novelties." Of such, to my mind, are the mosaic cards of R. Canton, which appear to consist of narrow strips of paper rolled up and pressed into various shapes, bearing a remote resemblance to flowers. These are mounted on card and offered as veritable achievements of ingenuity and artistic skill.

I wonder if any man living knows how many fountain or reservoir pens there are now before the public in England and America. On an average, one appears here about once a month, but we don't hear much about most of them after the first week or two. I think the old favorites hold their own pretty well; but I hear great things of our new pen, with which I must make my acquaintance and report.

The run on plush-covered articles continues, but I should think will give in when it is generally known that brackets of this material can be got at the drapers for $\frac{3}{4}$ d.

An admirable selection of new designs in menu, programme, invitation and memorial cards is now shown by the Artistic Stationery Company of Dyer's Building, London, E. C. Its articles are of very pleasing design and are excellently printed on good stuff—sound board or linen-bodied card, and have a considerable amount of favor shown them here. This company has done much in the way of catering for the improved tastes of the people in matters of stationery and printing. W. F. C.

NATIONAL BANKRUPTCY LEGISLATION.

Advices from Washington state that the following are the changes which have been submitted to the Senate and House committees by the committee of the Bankruptcy Convention:

Commissioners—States entitled to six or more members of Congress shall not have exceeding one-half the number of commissioners as members of Congress.

Involuntary Bankruptcy—Limit "involuntary bankruptcy" to "traders," and define more fully and concisely what persons are not "traders," and thus not subject to this section. Make "dealings in futures" (under limitations stated under head of "Discharge of Bankrupt") a valid objection to bankrupt's discharge. Require that the petitioning creditors shall represent not less than \$500 instead of \$250 indebtedness; also that the bankrupt's total indebtedness shall exceed \$1,000 instead of \$500. Amend that petitioning creditors shall not be required to give bonds. Provide that a petitioning creditor shall be liable in damages to the debtor if the petition against said debtor was not made in good faith for the rights and interests of all the creditors.

Choice of Trustee—A majority in value of all known creditors may authorize the Committee of Direction to appoint a trustee or trustees. Commissioners shall act as trustee in all small bankruptcies where the estate does not exceed \$1,000.

Powers of Court in respect to Trustees—That the judge may refuse to confirm a trustee; may remove for cause; may punish a trustee who disobeys a lawful order of the court, and upon the request of one-fourth in value of all known creditors; the judge may appoint a trustee when there is a failure to elect one or a refusal to accept the trust; may add trustees to those chosen, and may fill vacancies.

Committee on Direction—The Committee on Direction, or a majority, may give in writing directions as to the manner in which the estate

is to be administered by the trustee; and it shall be the duty of the trustee to conform to such directions unless the court for some just cause otherwise orders; and the trustee may in all cases appeal any instructions of the committee to the judge.

Exempted Property—From property exempted by State laws, the bankrupt may select and hold to the value of and not exceeding \$1,000.

Discharge of Bankrupt—An objection to a bankrupt's discharge shall be valid if made insolvent by speculation outside his regular or legitimate business.

Composition—Permit three-fourths in number and value of the creditors to provide that not exceeding one-third of the payment to general creditors may be without collateral security.

BOOKSELLERS AND STATIONERS' PROVIDENT ASSOCIATION.

The Philadelphia members of the Booksellers and Stationers' Provident Association held a meeting on Tuesday evening, January 29.

After some discussion as to the objects of the organization and the advantages to arise therefrom, it was decided to form a permanent organization, which should be known as "The Philadelphia Branch of the Booksellers and Stationers' Provident Association." The following named officers, to serve for one year, were elected by unanimous vote: Edward Meeks, with E. Claxton & Co., president; Charles E. Butler, of Charles E. Butler & Co., secretary; and John H. May, of Porter & Coates, treasurer.

Mr. Kelly, with the Central News Company, proposed the appointment of a local committee of three for the purpose of visiting all establishments within the limits of the association, to solicit membership and make the object of the association generally known. This brought about an interesting discussion, in which nearly all the members joined. It was finally agreed to, and D. N. Morrison, with J. B. Lippincott & Co.; F. B. Lovett, with the Central News Company, and H. N. Claxton were unanimously elected to serve on the committee.

Charles E. Butler, of Charles E. Butler & Co., called the attention of the members to the fact, that this was the first meeting ever held in Philadelphia by the members of the Booksellers and Stationers' Provident Association, and that this meeting was somewhat informal, and called more for the purpose of organization and bringing the members together, thus making them personally acquainted, than for the transaction of any important business. The motion was made and carried that the association meet every three months, on the Monday previous to the Wednesday meeting of the New York Board, so that the report of the association could then be presented and read. The meeting adjourned to Monday evening, March 24.

THE SMALLEST SAVINGS-BANK.

The smallest savings-bank in the world, the directors of which are the smallest directors in the world, is the Irving Penny Savings Bank of Brooklyn, established in Public School No. 9. It has, according to its last annual report, 144 accounts, and the total amount in bank was \$267.33. The bank pays 4 per cent. interest on sums over \$5. Each depositor has a tiny bank-book. The officers of the bank are boys and girls. The accounts are audited quarterly by the trustees of the school. The bank receives one cent deposits.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

PAPER-WEIGHT CLOCK.

The frequency with which new designs in paper-weights are put on the market would almost seem to preclude the production of anything that is surprisingly novel in this line, but it will probably be conceded that the device herewith illustrated combines the features of novelty and utility in an unusual degree. As will be seen, it is a clock movement inclosed within a heavy japanned iron case, $3\frac{1}{4}$ inches long, 2 inches wide and $1\frac{1}{2}$ inches high. The top is of thick beveled glass. The clock movement is an escapement and the winding up and setting are done from the back, a peculiarly shaped key being provided for the purpose. As a paper weight it is perfectly adapted to the purpose for which it is designed and the usefulness of the time-keeping feature "goes without saying." This novelty can be had of the Merriam Manufacturing Company, Durham, Conn.

A NEW STYLOGRAPHIC PEN.

Most people are familiar with the merits of the stylographic pen, but it has not been adapted for common use outside of large cities owing to its high price. The accompanying engraving shows a new stylographic pen which, besides the merit of practicability, claims that of cheapness. It is called the Gollner Stylographic pen. It is a reservoir pen, which when once filled with ink will write for days without refilling. It can be carried in the pocket like a pencil, is always ready for use and is constructed in a simple but scientific manner and is thus not liable to get out of order. The reservoir consists of a drawn glass tube, one end of which is brought to a smooth point forming a perfect stylus with an aperture finer than a needle for the passage of the ink. The lower end of the tube is filled with filtering cotton to prevent the stopping up of the point by sediment, while the upper end is fitted with a rubber air valve and a cushion giving it the elasticity of a gold pen. The tube is fitted by means of a telescopic screw in a polished nickel case, as shown in the engraving. The point owing to the peculiar construction of the pen is strong and durable, non-corrosive and if by accident it should break, it may be replaced the same as in an ordinary pen.

This pen is made both with a nickel and gold-plated case. It is a perfect thing owing to the simplicity of its construction. It is very neat and finished in appearance though very cheap and durable. The manufacturer is the Gollner Manufacturing Company, New York city.

COMBINATION LOCKS FOR CASH BOXES.

Among the new things in the market, and which will attract attention, are the new combination locks for cash boxes just brought out by the Merriam Manufacturing Company, Durham, Conn. These are dial or keyless locks which are said to afford greater security than any similar lock heretofore shown, having more numerous combinations which can be very readily changed with special ease and

PAPER-WEIGHT CLOCK.

A NEW STYLOGRAPHIC PEN.

rapidity of operation. These locks have solid knobs which cannot unscrew or get loose; the dials are of improved pattern with very dis-

tinct figures and notches, and the locks entire are remarkably compact and of light weight. The attractive appearance, excellent construction and other features of these locks commend them to public approval. The Merriam Manu-

THE LIBRARY POST-OFFICE BOX.

The popularity which the library letter tray, illustrated in a previous number of THE STATIONER, attained, led the manufacturers to devise and bring forth the library post-office boxes shown in the accompanying engravings. These are intended to go with the library letter trays, being made and finished in the same style as the latter.

As will be seen the library post-office box is made with either single or double compartments. The material, like the letter trays, is walnut or ash nicely finished.

INCOMBUSTIBLE WOOD.

Consul-General Weaver, Vienna, reports "for the information of American manufacturers and industrialists," the invention by Professor Hoff, of Galicia, of an "incombustible wood." If the advantages claimed by the inventor, and apparently supported by experiments of experts, can be realized, great practical advantage, it would seem, should be derived from the invention, and humanity be benefited by it. The process of preparing is as yet kept a secret, but the qualities claimed when prepared are: Incombustibility at high degrees of heat (temperature when glass melts), whereby it neither burns with a flame nor brightly glows, generates no suffocating gases or smoke, and gives out but little heat; a glow on the surface in the open air, as well as in a strong current, without burning or igniting thereby, but extinguishing momentarily. When exposed to great heat for a length of time there remain no ashes, but a compact coal which does not burn. At the same degree of heat

wherein the incombustible wood shows the above-mentioned properties zinc sheets melt in seven seconds; slates break into pieces, tiles become glazed, and felt for roofs burn with a bright flame. The chemicals necessary for the

production of the incombustible wood consist of the cheapest refuse of industrial establishments. The process of manufacturing is simple and cheap, whereby its price will be raised only a small part of a fraction, and it may be produced of all dimensions. The color of the wood suffers no change, nor are its durability, firmness, and tenacity impaired. It cannot, in this respect, be distinguished from ordinary wood, since harmless and indifferent ingredients are employed in its preparation. General Weaver, on informing himself of the value of the invention and that the claims made for it were sustained by experiments, in view of its beneficial results in the safety of life and property, considered it of sufficient importance to merit a special report from him.

It is the design to patent it and introduce the material in the United States, where it is expected to become available for articles of ornament as well as of utility

THE LIBRARY POST-OFFICE BOX.

facturing Company has shown laudable enterprise in this and other of its lately devised novelties.

A new series of fancy leather goods, got up in imitation of old carved ivory, has been brought out in England. These goods are said to be a close approach in color and style to mediæval ivory carvings, many of them being reproductions of quaint designs by fourteenth and fifteenth century artists, and full of life and spirit.

THE A. B. SEE LETTER OPENER.

One of the most simple and handy devices for opening letters yet put before the trade, is shown in the accompanying engraving, which illustrates the "A. B. See Letter Opener." This opener, as is shown in the cut, is a miniature paper-cutting machine. It is so constructed that in opening an envelope it cannot destroy any paper or inclosure which it may contain. In other words, the knife is so gauged that it cuts only a hair's-breadth of paper off the end of the envelope. The machine is very ornamental in appearance, while at the same time it is so solidly and massively built that it will last a lifetime. It will be found a useful implement in all offices receiving large mails, and even in smaller offices it will be found of great convenience, and will be valued for its perfect and expeditious operation. R. R. Watson, New York city, supplies the trade.

WATER-TUB AND HOLDER.

Herewith is presented an illustration of a new water-tub and holder, designed and introduced by Samuel C. Tatum & Co., of Cincinnati, Ohio, who are well-known to many readers of THE STATIONER by reason of their copying presses. It will be seen that the holder, which is an entire innovation, is screwed to the under side of the table or stand on which the copying-press is placed and the projection on the tub simply slips into the holder, like a bolt. It is there securely held, but can readily be removed to be refilled by merely pulling it out of the holder again. The brush can be laid on top of the tub when not in use, and both being out of the way (yet within easy reach), there is no slopping over on the books or stand so frequently seen. As an article of utility and convenience, it can be commended to the trade.

NEW PATENTS.

No. 290,906. Spring Ball Fastener for Pocket-books.—John Menahan, New York, N. Y.

A ball-clasp in which the balls are adapted to rotate.

No. 290,921. Folding Hammock Support.—James Francis Pluche, Watertown, N. Y., assignor to George J. Porter and C. H. Tubbs & Co., all of same place.

No. 290,945. Combined Measure and Scale.—Artemas B. Upham, Peoria, Ill., assignor of one-half to Henry W. Wells, same place.

No. 290,938. Pencil or Crayon Holder.—Ephraim S. Johnson, Jersey City, N. J.

No. 291,002. Printing-Press for Printing on Wood.—Geo. W. Prouty, Boston, Mass., assignor of one-half to Thomas S. Nowell, same place.

1. In a printing-press, an adjustable platen and platen head or support arranged to be secured in a fixed position, and adapted to enter freely the interior of a box with one side wall of the box between the platen and the type-bed. 2. The combination, in a printing-press, of an adjustable stationery platen, a type-bed arranged to be moved toward and from the platen, and one or more adjustable gages arranged and adapted to receive and support a board of wood

fed thereto in a horizontal direction. 3. The combination of a platen and platen head or support arranged and adapted to enter the interior of a box, and an adjustable table adapted to enter the interior of the box and to gauge the position of the box vertically. 4. In combination with a

WATER-TUB AND HOLDER.

type-bed and platen arranged and adapted to be moved one toward the other, and means for supporting a board or other piece of wood to be printed, a connection made in two parts, and adapted to transmit the impression and to yield when the pressure is increased beyond a predetermined point.

THE A. B. SEE LETTER-OPENER.

No. 291,030. Printer's Dry-Rack.—George A. Clapper, Wooster, Ohio.

No. 291,056. Apparatus for Checking and Registering the Number of Games or Deals Played at Cards, &c.—Geo. F. Howard, London, England. Patented in England May 25, 1883, No. 2,612; in Germany, June 21, 1883, and in France, June 22, 1883, No. 156,182.

A checking and registering apparatus having a lid or cover, the opening of which serves to release a lever and thereby to actuate a pawl which operates a registering counter or counters.

No. 291,079. Envelope.—George B. Post, New York. No. 291,099. Wall-Paper Exhibitor.—Francis H. Shepherd, Davenport, Ia.

No. 291,103. Automatic Advertising Device. Joseph A. Stansbury, Chicago, Ill.

No. 291,145. Slate Cleaner.—John Burling, Milburn, N. J.

A slate cleaner consisting of a hollow, comparatively thin, and flat receptacle supplied

with a water-exit and covered with a suitable soft water-absorbing material.

No. 291,155. Machine for Planing and Printing Wood.—Wm. A. Compton, Liberty Corner, N. J.

The combination in an organized machine, of a wood-planing mechanism, as a rotary cutter-head, a cleaning mechanism, and a printing mechanism, the whole being combined to plane, clean and print the surface of the wood in a continuous operation.

No. 291,179. Press-Platen.—James Ferguson, Bridge-water, Mass.

No. 291,221. Suspending Attachment for Piaques, Frames, &c.—George R. Osborne, New York, N. Y.

No. 291,235. Pencil Sharpener.—Willard E. Sibley, Weston, Mass.

No. 291,237. Paper-File.—Margaret Smith, New York, N. Y.

No. 291,293. Paper-Perforating Machine.—Israel C. Carpenter, Cherry Creek, N. Y.

No. 291,297. Pencil.—Richard M. Collard, New York, N. Y., assignor to Leroy W. Fairchild, same place.

A holder and a presser tube, with a spring located in the former, are constructed and arranged in such relation to each other that a stub of lead may be conveniently ejected from its carrier.

No. 291,339. Bill-Holder.—Peter Hand, Glen, N. Y.

No. 291,349. Game Register and Trump Indicator.—George W. Hyatt, New York, N. Y.

No. 291,380. Drafting Implement.—Nevin Milloy, Cincinnati, Ohio.

No. 291,401. Shell Ornament.—John M. Reynolds, Chicago, Ill.

No. 291,415. Scholar's Companion.—Mary J. Spencer, Brooklyn, N. Y.

No. 291,416. Pen-Holder.—Albert H. Spencer, Boston, Mass.

A pen-holder formed of two paper tubes, one within the other, the space between them being about the thickness of a pen.

No. 291,429. Graduated Scale.—George F. Tuttle, Newark, N. J.

A Graduated scale having a zero one linear unit or part thereof, of any standard measure, from each end, and having the space between the zeroes,

and also the end linear units, divided into different and independent subdivisions on one and the same edge of the scale.

A Cleveland dispatch says that Edward W. Fell, of that city, after experimenting for two years, asserts that he has succeeded in perfecting an invention which takes absolutely permanent pictures upon any substance whatever having a smooth surface. This is done instantly by the action of electricity upon a sensitive coating, and at an expense not exceeding one cent per picture. A reporter who called upon the inventor was shown some photographs on pieces of wood, which were not only perfect in outline and finish, but possessed a peculiar softness not obtainable by any other process. "The importance of this discovery," said Mr. Fell, "and its varied uses, can hardly be estimated. It opens an entirely new field in the art of photography, and will work a revolution in various branches of business into which it will enter more or less."

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.*Second.*—Larger, better spaced, and more readable type in all cheap and medium grades.*Third.*—Latest and most attractive variety of side stamps.*Fourth.*—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

Illustrated Catalogue, containing full description, prices, &c., mailed on application.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

L. PRANG & CO.'S

1884. EASTER CARDS. 1884.

FOR THE COMING EASTER SEASON we have prepared a line of Cards and Silk Novelties, which we are confident will compare favorably with our previous efforts, and will meet with a ready sale. The following Artists are among the contributors to our line:

Miss FIDELIA BRIDGES,
Miss L. B. HUMPHREY,
Mrs. O. E. WHITNEY,

Miss L. B. COMINS,
Mrs. E. T. FISHER,
Miss ALICE C. SWAN,
Etc., Etc.

W. HAMILTON GIBSON,
WALTER SATTERLEE,
F. SCHUYLER MATHEWS,

Among the Cards of the regular line we would mention the following series as of special merit and attractiveness:

- No. 705.—TRIANGULAR FLOWER CARDS, by MRS. O. E. WHITNEY.
- No. 711.—MOVABLE SHAPED CROSS (figure design), by MISS L. B. HUMPHREY.
- No. 712.—BIRDS, by MISS FIDELIA BRIDGES. A very attractive series.
- No. 713.—FLOWERS ON PURPLE GROUND, by MRS. O. E. WHITNEY. A gorgeous series.
- No. 714.—FIGURE DESIGNS, by WALTER SATTERLEE.
- No. 715.—BUTTERFLY DESIGN, by W. HAMILTON GIBSON. This is emblematic of the Resurrection, and we think one of the most Striking Easter Cards ever published.
- No. 716.—EASTER LILIES, by MRS. E. T. FISHER. A very chaste and appropriate card.
- No. 717F.—WISTERIA EASTER CROSS. A fitting companion card to our last year's Water-Lily Cross, which proved so popular.

— BESIDES THESE, SPECIAL ATTENTION IS CALLED TO OUR —

SATIN ART PRINTS FOR EASTER,

Consisting of appropriate Flower and Figure designs. Our Satin Art Prints are put up in the following styles:

"A" STYLE.—A richly fringed tinted Mount, with cord and tassels for hanging.

PLUSH MOUNTS.—Fine mounts, made of rich plush of various appropriate colors, with easel back.

"B" MOUNT.—An exquisite Satin Mount of various colors, with extra fine quality shaded triple fringe, satin ribbons and bow, cord and tassels for hanging.

"C" MOUNT is a fine combination of rich plush and satin in contrasting colors, with cord and ribbon, easel back.

"D" MOUNT is similar to the "C" Mount, with the addition of extra fine quality scalloped silk fringe trimming and satin bow, easel back.

The sale of our Satin Art Prints have heretofore been very large, and our specialties in this line for Easter will, no doubt, meet with a ready sale. Sample Books are now in the hands of our Travelers.

We would urge our friends to send in their specified orders as soon as possible, to avoid delays in the filling of orders.

Our extensive line of BIRTHDAY CARDS has received several attractive additions, and we have also issued SEVERAL new series of SCRIPTURE TEXT-CARDS.

 PRICE LISTS OF EASTER CARDS ARE NOW READY.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

George Jones, stationer, &c., Toronto, Ont., is dead.

R. M. Watts, printer, Elmira, N. Y., has been burned out.

Philo Bush, newsdealer, &c., Howell, Mich., has been burned out.

Charles L. Downes, pen dealer, New York city, has been attached.

J. L. Terry, publisher of the *New Era*, Longview, Tex., has sold out.

C. W. Allen, stationer, &c., Malone, N. Y., has made an assignment.

E. J. Wood, dealer in paper-hangings, Palmer, Mass., is advertising to sell out.

Ben. Tavares, bookseller and stationer, Galveston, Tex., has been attached.

William Keith, bookseller and stationer Brockton, Mass., has been attached.

Mrs. A. M. Lease, dealer in toys, &c., Hanover, Pa., has been closed out by the sheriff.

William Keith, bookseller and stationer, Brockton, Mass., is reported to have left town.

Ellis Wheat & Son, dealers in picture frames, &c., Detroit, Mich., have removed to Toledo, Ohio.

J. F. Copehart, publisher of the *New Era*, Lake Valley, N. M., has sold out to B. F. Smythe.

An assignment in trust has been made by A. Mortimer, blank-book manufacturer, Ottawa, Ont.

E. A. Stillman, bookseller and stationer, Westerly, R. I., has sold out to the Westerly News Company.

A stock company has been formed at North Lansing, Mich., for the manufacture of wooden toys, its specialty being the Lewis toy gun.

F. Sibell, of the firm of F. Sibell & Co., this city, has been confined to his residence for the past two weeks by illness, but will probably be out again in a few days.

Franklin Hill, manufacturers' agent for paper, at No. 66 Reade street, New York, has made an assignment to Isaac B. Potter and William Woods, with preferences for \$2,899.

The Milton Bradley Company, of Springfield, Mass., has been incorporated with a capital of \$40,000, to make tags, games, &c. It succeeds Milton Bradley & Co. G. W. Tapley is president, Milton Bradley treasurer, and these two, with Lewis Bradley, are directors.

Birmingham & Co., medical publishers, 20 Union Square, New York, who made an assignment on January 19 for the benefit of their creditors, have resumed business. The creditors found ample assets to cover the liabilities and gave the extension of time which was needed to set the firm on its feet again.

Warren J. Robinson & Co., printers, Boston, Mass., are reported failed. The liabilities are \$5,400, of which \$1,000 is secured by a mortgage on machinery which cost \$10,000, but which would bring only \$3,000 or \$4,000 at a forced sale. The unencumbered assets consists of accounts which nominally aggregate about \$819.

A statement of the assets and liabilities of H. G. Razall & Co., Milwaukee, Wis., the insolvent bookbinders, was filed last week. The assets aggregate \$29,711.90, divided as follows: Bills and accounts receivable, \$2,975.41; stock, \$6,311.01; machinery, fixtures, &c., \$18,738.36. The liabilities are stated at \$15,078.64. The creditors whose claims amount to more than \$1,000 are as follows: J. G. Shaw & Co., New York, \$1,244.16; Bradner Smith & Co., Chicago, \$1,587.94; Marder, Luse & Co., \$10,585.05; National Blank-Book Company, New York, \$1,613.94; Liebenroth, Von Auw & Co., New York, \$2,116.05. The statements are verified by the members of the firm and by the assignee. The business house of the firm was burned twelve days ago, and the next day the firm failed. The insurance was contested, and an effort was made to show that the fire was the work of an interested incendiary. The insurance people will probably fight the matter in the courts.

The creditors of Joseph Stelwagon's Sons, paper manufacturers and dealers, had a meeting at Philadelphia on Monday, and considered a proposition to pay dollar for dollar on an extension of time. The liabilities are reported to be between \$50,000 and \$60,000. The firm proposes to settle in five annual payments, the first payment to be made two years hence. This would require six years to effect the final payment. A committee was chosen to consider this plan. There are sixty-five creditors, and although the majority of those attending the meeting were inclined to favor the proposition, the sentiment was not unanimous. Another meeting of creditors will be held, and should the terms mentioned not be conceded, the property of the firm will be at once disposed of at sheriff's sale.

John E. Clark, of the Dickinson & Clark Paper Company, Holyoke, Mass., and C. W. Ives, of New Haven, Mass., have formed a partnership to carry on a wholesale cotton and woolen rags, paper stock and metal business at Long Wharf, New Haven. Mr. Clark was engaged in the business sixteen years before starting at Holyoke, and Mr. Ives has had seven years' experience. Mr. Clark will have the general supervision of the business of the new firm, but will not leave Holyoke or the management of his local interests. The firm will pack standard grades of rags.

The Nonotuck Pocket-Book Company has brought its machinery and tools to New York city, where it has engaged quarters at 47 and 49 Greene street. It will continue operations at Northampton, Mass., where several hands will be kept busy making the old-fashioned "Yankee" pocket-book.

The firm of Isaiah Roggenburger, manufacturer of paper boxes, Philadelphia, Pa., has been dissolved on account of the death of the proprietor. Abraham and Nathan Roggenburger continue the business under the style of I. Roggenburger's Sons.

Moritz and Julius Rottenberg, comprising the firm of M. Rottenberg & Son, dealers in blank-books and stationery, at No. 313 East Houston street, New York, have made an assignment to Louis W. Spangehl, giving twelve preferences for \$6,059.69.

The attention of parties wishing to buy a good printing and stationery business in Philadelphia is called to an advertisement to be found in another column.

E. P. Coby & Co. have a neat pad calendar, well mounted.

J. C. Myers, publisher of the *Journal*, Attica, Ohio, is dead.

Alexander Roberts, wholesale dealer in rubber stamps, St. Louis, Mo., is dead.

W. E. Boese, stationer, San Francisco, Cal., has applied for relief in insolvency.

Mrs. James Johnson, dealer in stationery, &c., Vassar, Mich., has lost \$800 by fire.

B. Cowell, dealer in wall-paper, Peoria, Ill., has been burned out. Insured for \$11,000.

The stock of M. Truby, bookseller and stationer, Elkhart, Ind., has been taken under chattel mortgage.

George L. Pease has been confined to his residence during the past week from indisposition, caused by a heavy cold.

Bingham & Dodd, lithographers, Hartford, Conn., have dissolved partnership. William H. Dodd, continues the business.

M. T. Buchanan has resumed business as a dealer in paper, binders' boards and paper stock at No. 40 Rose street, New York.

Alston & Fitts, booksellers and stationers, Tuscaloosa, Ala., have dissolved partnership. Fitts Brothers succeed to the business.

The firm of Gunn, Curtis & Co., printers, Boston, Mass., has been incorporated under the style of Gunn-Curtis Printing Company.

The *Spectator* Printing and Publishing Company, of Hamilton, Ont., has bought the plant of the *Tribune*, which was offered for sale by tender.

F. G. Hancock, wholesale dealer in paper and blank-books. Atlanta, Ga., has admitted C. A. Collier to partnership. The style of the firm is Hancock & Collier.

F. H. Drake & Co., Toledo, Ohio, are agents for the sale of Raymond's labor-saving trial balance sheet, to which they invite the attention of the trade.

R. M. Watts, printer, Elmira, N. Y., was, with other occupants of the buildings located at 109 to 113 Lake street, in that city, burned out on January 29. Loss, \$6,000.

The extensive lithographic works of Pfeil & Golz, in Camden, N. J., were totally destroyed by fire on Monday evening, involving a loss of \$60,000, covered by insurance.

Newbury & Shreve, proprietors of the Royal Printing House, Philadelphia, Pa., have dissolved partnership. William T. Newbury continues the business under the same style.

The firm of Adair & Brown, booksellers and stationers, Peoria, Ill., has been merged into an incorporated company, under the style of the Adair & Brown Company, with an authorized capital of \$32,000.

Wyllis S. Abbott, proprietor of the *United States Monthly Magazine*, of Chicago, has been closed by the sheriff on confessed judgment for \$2,602. He bought out the concern about a year ago and claimed to have \$10,000 invested in the business.

Hackett & Ogilvie, printers and stationers, Brooklyn, N. Y., have dissolved partnership, John B. Hackett retiring. George L. Ogilvie, having bought Mr. Hackett's interest, will continue the business and settle the outstanding accounts of the late firm.

C. H. Smith & Co., stationers, &c., St. Stephen, N. B., and Calais, Me., make the following statement of their affairs: Assets, nominal, \$23,972; good, \$21,718; liabilities, \$21,247, or a slight excess of available assets over liabilities. The firm has issued a circu-

lar to its creditors stating it expects to submit an offer which will be satisfactory.

George Ridley, bookseller, Canon City, Col., has sold out to Frederick H. Whipple.

D. R. McKay, bookseller and stationer, Seneca, Kan., has sold out to Edward Butt.

J. J. Smith & Co., printing-ink manufacturers, Toronto, Ont., have assigned in trust.

Ben. Frank & Co., proprietors of the *Maxwell Star*, Maxwell, Cal., have sold out to Hodgen & Felts.

C. W. Evers, publisher of the *Sentinel*, Bowling Green, Ohio, has sold out to A. W. Rudolph.

Blascow, Miller & Co., manufacturers of hammocks, Milwaukee, Wis., have dissolved partnership.

V. G. Fisher, bookseller and stationer, Washington, D. C., has obtained an extension from his creditors.

The M. R. Wright Printing Company, Kansas City, Mo., has been incorporated with a capital stock of \$12,000.

The Garrison-Chappell-Pirie Paper Company, St. Louis, Mo., has been incorporated with a capital stock of \$50,000.

The Kansas City Press Publishing Company, Kansas City, Mo., has been incorporated with an authorized capital of \$10,000.

L. D. Cardwell has succeeded the firm of Cardwell & Corlan, publishers, Union City, Tenn., the late firm having been dissolved.

Bumstead, Corum & Co., publishers, Colorado Springs, Col., have dissolved partnership. Bumstead & Corum continue the business.

Alfred E. and George A. Paillard, dealers in musical boxes, New York city, are doing business under the style of M. J. Paillard & Co.

A dissolution has taken place in the firm of Hill, Griffin & Co., publishers, Norfolk, Va., H. R. Griffin having retired from the business.

Petche & Krumhaar, dealers in picture frames, Cleveland, Ohio, have dissolved partnership. Henry E. Petche succeeds to the business.

A dissolution has taken place in the firm of Perkins & Humphreys, picture frame dealers, Columbus, Ohio. The business will be continued by Humphreys.

The limited partnership of Stirn & Lyon, wholesale dealers in toys and fancy goods, New York city, has been renewed to January 31, 1887, with a special capital of \$25,000.

John I. Shaw & Brother, dealers in photographic materials, &c., Pittsburg, Pa., have dissolved partnership. Bide C. Shaw retires, and the business is now carried on by John I. Shaw.

A dissolution has taken place in the firm of McCool & Armstrong, dealers in picture frames, &c., Oakland and San Francisco, Cal., T. S. McCool continues the business at San Francisco and B. A. Armstrong at Oakland.

Warren J. Robinson & Co., printers, Boston, Mass., have failed.

Lang & Marsh, publishers, Dalles, Ore., have been damaged by fire \$2,700.

H. M. Stewart, publisher, formerly at Audubon, Ia., has removed to Gray.

Dare & Collins, dealers in wall-paper, &c., San Antonio, Tex., are closing out their business.

An assignment has been made by Mackey & Miller, booksellers and stationers, Corsicana, Tex.

Edward Todd & Co., manufacturers of gold pens, New York city, have admitted Edward Todd, Jr., and Henry C. Potts to an interest in the firm.

The Globe Files Company is starting out with a very brisk trade for the new year. The demand for the Globe files during the past month has been unprecedented.

The combined copy-press stand and blacking case made by Samuel C. Tatum & Co., Cincinnati, is a very convenient piece of office furniture. It is meeting with a good demand.

Marcus Ward & Co.'s new line of birthday cards, which has just been introduced to the trade, is sure to take well, being made up of the best materials and in the most popular designs.

Norman Wright, 420 North Third street, St. Louis, Mo., is manufacturing a polish or finish for reviving the lustre of varnished or polished surfaces. This is said to be very useful for application to shopworn copying-presses and similar goods.

George H. Sanborn & Sons will add a new specialty to their line of printers' and bookbinders' machines in a short time. It will be a binder's shears which will have several important improvements not possessed by similar machines at present in the market.

The National Publishing Company, Philadelphia, has in course of construction a complete and beautiful price-list of family bibles and photograph albums. It will be ready for distribution this month and will be mailed to the trade. By its use, dealers will have a correct idea of the design on the bible they are ordering, each style being accompanied with a representation of its particular side, as well as a description of its contents and price.

C. E. Reed, newsdealer, &c., Augusta, Kan., has sold out to Lane Brothers.

A. A. Lovell, manufacturer of fancy boxes, Medfield, Mass., is offering fifteen cents on the dollar.

A dissolution has taken place in the firm of Wallace & Hall, booksellers and stationers, Paola, Kan. McLaughlin & Hall succeed to the business.

Kearney, Hunt & Co., booksellers and stationers, Little Rock, Ark., have dissolved partnership, C. S. Hunt having withdrawn from the firm.

L. Prang & Co. report a very brisk trade in valentine and Easter goods. The general line of art productions of this firm is also having a large demand.

H. J. & J. A. Burns have been admitted as partners of John Burns, dealer in paper-hangings, Boston, Mass. The style of the firm has been changed to John Burns & Sons.

R. R. Watson has just brought out his catalogue of stationers' specialties for 1884. Dealers who wish to keep posted regarding the latest novelties should not fail to send for one.

Brown & Besly, 114 Monroe street, Chicago, have been licensed to exclusively manufacture and sell Brown's patent letter indexes, files, &c., the license heretofore given to Culver, Page, Hoyne & Co. having terminated.

A corporation has been duly organized in this city under the name of the *Independent Record* Publishing Company, for the publication of the *Independent Oil and Drug Journal and Paint Review* under the name of the *Independent Record*. The general manager of the paper is John F. Riday.

James D. Whitmore & Co. have now on exhibition at their sample rooms, and are offering for the inspection of the trade, through their traveling representatives, one of the most elegant and attractive lines of Easter souvenirs ever shown. The line consists of some fifty different designs, each bearing some appropriate motto relative to the day, and, as a whole, constitute a line which must add greatly to the retailers' display. These goods will vary in price, and show great taste and skill in their preparation. Novel and striking gifts are offered in satin and plush, hand-painted flowers and porcelains, elegant combinations of lace and silk, and purchasers should inspect this line before placing their orders.

NEW YORK.

PER JUPITER.

Some twenty years ago, Professor Kirkwood, of Indiana, showed that the disturbing influence of Jupiter ought to produce gaps in the asteroid system at certain well-defined distances from the sun, and that such gaps actually exist in the indicated places. In 1868 he showed that the principal division in Saturn's ring could be accounted for in a similar manner by the disturbing action of the satellites, provided that the ring is really (as is now universally believed) a mere aggregation of separate masses, like a swarm of meteors. Dr. Meyer, of Geneva, has carried the principle still farther, and finds that, including the principal division (known as Cassini's), there are seven places where all or several of the satellites would exert considerable disturbing influence upon the members of the ring system. One is where the period of revolution would be one-fourth that of Mimas. This marks the inner limit of the inner ring. Another is where the period is one-third that of Mimas, and marks the inner limit of the bright ring. Similarly with the division of Cassini, and with that of Encke in the outer ring. In fact, the correspondence between fact and computation is so remarkable throughout as to make it practically certain that the received theory of the constitution of the rings and Kirkwood's explanation of the divisions in the ring are both correct.

A commercial traveler, having left a shirt at an inn, wrote to the chambermaid to forward it to him. This produced the following:

"I hope, dear sir, you'll not feel hurt.

I'll frankly tell you all about it:

I've made a shift with your old shirt,

And you must make a shift without it."

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, FEBRUARY 7, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

FALSE or short weights and counts and loose credits are demoralizing business against the consent of the greater number of the trade. Why should a weak and wicked minority rule? We urge the trade to institute and insist upon reforms in these particulars.

READERS of THE STATIONER will find in this issue a very interesting summary of trade opinion on the "question of counts." It has been no light task to gather and tabulate the vote which we present, and we think that the trade will agree with us, that it is one of the most important reflections of trade opinion which has ever been made public.

BESIDES giving a tabulation of the entire vote on the two questions offered, we print some of the letters, which indicate the reasons which actuate the writers in expressing their opinions. These, we think, may be properly taken as a fair index of the ideas of all who have given special thought to the inquiries thus brought before them, and probably outline the views of others who may not have debated the questions with themselves, but have taken their positions on what are commonly known as "general principles."

It is remarkable that so large and wide a response should have been made, and this in itself is indicative of the great interest taken by the trade in all investigations relating to shortages, whether in counts or weights, and it ought to show manufacturers that there is a general sentiment of opposition to everything calculated to confuse or deceive purchasers of goods. Simplification of business methods, it will be found, is a predominating idea, and this, whether carried out in the counts of paper or in any other detail of commercial life, will be recognized as something which is being sought in all lines of trade, and which is acquiring strength and influence.

THERE is almost a unanimous consent to putting up flat papers 500 sheets to the ream, and the objection to extending this rule to folded papers comes from that portion of the trade which finds that its convenience and the demand of its customers are best subserved by the ream of 480 sheets and the equal and usual subdivisions thereunder. On this point we quote a few expressions. One man says that "the 24-sheet quires are the most convenient for the retailer, and when a large portion of the sales are by the quire," as in his case, "it would necessitate the folding of five instead of six-sheet folds." Another remarks on the thickness of "present standards of weight," and says that if this thickness should be kept up a confusion of weights would result. Some blank-book manufacturers assert that for writing and blank-book papers 480 sheets to the ream "are preferable." Some dealers object that they would have to "pay more for 500 sheets and retail the paper at the price of 480

sheets," and that selling six sheets for five cents they would be inconvenienced to make up six-sheet packets if the paper was put up in five sheets. But, per contra, another retailer advocates twenty-fivesheets to the quire in five-sheet sections, so as to make the quantity conform to the number of envelopes in a package of the latter. Some succinctly state on both propositions that they see no good reason for changing, or that prices having been established under the old method, it would not be desirable to disturb them.

FOR printers' use it is conceded by many that 500 sheets to the ream are desirable. Several announce that they have established this practice in their own business, and are satisfied of its "great convenience." One firm has adopted the decimal system in the pad business, and finds it to be the "simplest and most satisfactory plan." A well-known printer has his paper made for him "500 sheets to the ream," and is "decidedly in favor of the two propositions." A firm of paper manufacturers and dealers "will vote Yes" if "all manufacturers and jobbers in the United States will vote to adopt the 500-sheet count on all grades of paper," and thinks that the adoption of the second proposition would compel "a change from 480 to 500 sheets in all grades of ledgers, fine writings, &c." Turning from the review of opinions as to how many sheets should constitute a ream, we are brought to the consideration of ideas on quires in blank-books. This inquiry has evoked enthusiasm and decided expressions of opinion. One correspondent is "heartily in favor of making and selling blank-books" by the 100 pages. An Eastern firm says that it has made its "blank-books with even hundred pages for fifteen years, and takes pleasure in voting in the affirmative as a result of its experience. "To avoid fraud, blank-books should be estimated in pages," says one, and reference is made by others to the fact that a well-known and esteemed blank-book manufacturer, now dead, tried to effect the same thing as a measure of reform. "Stir the blank-book manufacturers up and receive the thanks of the trade" is the exclamation of one correspondent. Another says: "I see no better plan to avoid the present system of short quires and imposition on parties not posted, than the 100-page system," and he therefore votes "Yes, very heartily." A well-known Western blank-book house says: "Our motto is, 'Give us an honest count,'" and asserts that when, a few years ago, it tried to make honest blank-books, the trade did not take them. This could not be said if all of the blank-book makers adopted the "motto" of this house.

WE have briefly reviewed the suggestions made by our correspondents, and we ask the trade to carefully read and consider all that has been presented. It is for the trade to act if they would get rid of a deceptive system, radically wrong and injurious. Short counts in quires for blank-books are "cal-

culated to deceive." Why perpetuate them? The vote which we have canvassed is a strong expression on this point. It has been no easy work to collect this; but we shall be glad if our labor has brought the trade a step nearer to a reform which must sooner or later become a rule, inflexible, unalterable.

A CIRCULAR, having blotting-paper for its text, has been pushed around through the trade of late. It has been sent out by a New Haven firm of paper makers, which has thought it best to make some comparative tests of blotting. The prompting motive of this circular is undoubtedly the desire to meet the competition of a house located at Richmond, Va., and which has been making its influence felt with a rival brand of blotting. The circular sets forth that for the purpose of making comparisons, a New Haven chemist was called into action. The result of his labors appears in a statement of weights, measures, burning and absorbing tests of the two brands of blotting known respectively as "Treasury" and "Climax." It is, of course, well known to the trade that the first is a more expensive paper than the latter which enters into competition, as to price, with a cheaper brand known as "Commercial," which does not, however, appear to have been made the subject of the different tests indicated. According to the report of the chemist, the "Treasury" weighs more per ream than the weight claimed by its manufacturers, and at which they have been wont to sell it. The chemist's conclusions as to weight were derived from weighing four sheets each of "Climax" and "Treasury" on a paper scale, and computing therefrom the weight of a ream of each. Under the next test it was decided by measurement that a ream of "Treasury" is a little thicker than a ream of "Climax." The circumstance of how the reams were made up or selected is not noted. Under the two succeeding tests, it is stated that 324 lbs. of white "Treasury" produce, after burning, one pound of ash, but that the same weight of ash is obtained by burning 71 lbs. of the buff "Treasury." This affords an idea as to which is the purer of the two kinds of "Treasury." But, in contradistinction to this, it is shown that the buff "Treasury" absorbed 739 milligrams of ink in five seconds, while the white of the same grade only absorbed 498 milligrams or the difference between 100 and 67.38 per cent. This reverses the order again, and indicates that the buff is a better absorbent. But in all of these tests the name of "Commercial" blotting appears only once, and does not, therefore, help to explain the differences which may exist between the brands of the competing houses. On the last page of the circular all of the weights of the two grades of "Treasury" and "Commercial" are enumerated. We see in connection with "Treasury" the figures 60, 80, 100 and 120 preceded by the # sign, which to so many people in the

trade has stood for pounds, and then the 140 lbs., and these figures are repeated in connection with "Commercial" without the # but followed by the word pounds. Nowadays people understand these hieroglyphics, and the manufacturers have frankly stated that "Treasury" blotting # 60, # 80, # 100 and # 120 only weighs 54, 72, 90 and 108 pounds to the ream respectively. But it may be asked what all this exhaustive analysis of "Treasury" blotting and its comparison with "Climax" may mean. It is for those who read to decide; but it was obviously intended as a bombshell which should annihilate all competition. The shot is thrown, but the missile seems to have been filled with the wrong mixture. Again, the circular states: "Our aim is *not* to make *cheap*, but the *best* that can be produced." On another page of the same document it is stated: "In 1869, to meet the demand for a *cheap* blotting, we began to make 'Commercial.'" There is an apparent difference here. To-day, "Commercial" forms the larger part of the product of this mill. Why was not this cheap blotting, which it seems was not intended to be cheap, made the subject of this contest? We don't see that the tests alleged to have been made are conclusive. In the first place they are *ex parte*, and open to objection on that account; and further, they do not cover the real ground of competition. The manufacturers of "Climax" have only to go on putting a good absorbing medium, guaranteed full weight, on the market to meet the encouragement which their enterprise deserves.

ROUNDOABOUTS.

BY THE TRADE LOUNGER.

Great is the value of advertising! I have always had faith in advertising. Some little experience of it has taught me that while it may, at times, bring its annoyances, the benefits to those who advertise with discretion—modesty forbids me to say "scientifically"—are incalculable. One cannot expect to derive these benefits, as a rule, "all in a heap," but the unexpected sometimes happens. This is illustrated in a little incident which I will narrate.

The following advertisement appeared in the New Haven *Morning News* recently: "Boy wanted. Good references required; steady employment. Apply to G. D. R. Hubbard, printers' warehouse, 379 State street."

Two days later the same paper received the following notice: "Born—In this city, January 4, a son to Mr. and Mrs. G. D. R. Hubbard."

This may be called a "special interposition." The references were, of course, satisfactory, and the boy, I have no doubt, is taking care to keep himself steadily employed.

Who wouldn't advertise?

Dealers in fine stationery are complaining that buyers who send orders by mail are in the habit of forwarding samples torn from the wholesale dealers' sample book. This is unne-

cessary. It mutilates the sample book, and should the buyer want to duplicate his order he is sometimes at a loss or finds it inconvenient to make out his order. It also gives trouble to the dealer who is asked to hunt over his orders and find out just what is wanted. Sample books are generally provided with a system of numbers, and all that is required in ordering goods is to mention the number of the sample, and everything is "serene."

I saw a sample-book this week which it would be a shocking shame to mutilate. No one could go astray in ordering by the numbers from this book and only a donkey would tear out the sample. Moral: Don't be a donkey!

Several cases of defalcation among trusted employes have lately been the subject of newspaper gossip. Why will young men let a desire for foolish pleasures carry them away and spoil their chances for life? These repeated warnings ought to impress men, but don't seem to. Defaulters are sure to come to grief in one way or another. Apropos of this let me give a little thing which I find floating through the papers.

"Where are you taking me to?" said a criminal to the detective who had just arrested him. "To the police office," was the reply. "I wish to observe in this case, then," said the culprit, "that it is the office which seeks the man, and not the man the office."

"I'm not exactly engaged, but I'm going to be," said 'Tilda Squeers, when she had definitely fixed upon Nicholas Nickleby. 'Tilda must have had leap-year opportunities in view. How many of the "Innocents" are to be slaughtered this year? Beware, young man!

A writer in one of the magazines asks: "How shall we utilize the Indians?" The *Norristown Herald* says that it is a difficult question to answer, but thinks that perhaps the best plan would be to petrify them and sell them for cigar-store signs. It thinks that this idea is worthy of consideration. So do I. The *Herald* man would be just the fellow to send out to put the thought into execution. The petrification might result all right, but—which?

In the winter time prepare for the summer. All of the concomitants for making life endurable during the heated term and for helping toward enjoyment of the country must be reviewed. A new portable hammock-frame suggests a great convenience for people who cannot always get trees just where they want them to make the hammock swing comfortably.

Brass goods are still in demand. There have been suggestions as to some charming screens with brass decoration. Perhaps we shall see these freely offered during the year. Prices must not be high and need not be. Many beautiful things can be done in brass and not cost much money.

The proposals to furnish paper for the public printing were opened at Washington last week. Notwithstanding that the newspapers were denied the privilege of reporting the bids, I observe that *The Paper Trade Journal* had a pretty full account of who were the lowest bidders. One thing is worthy of remark in this connection, and that is that the lowest bids were not much at variance with current market prices of paper. This seems to indicate that the paper trade have "struck bed-rock."

THE TAPLEY FILE.

UNIQUE! CONVENIENT! ECONOMICAL!

The Tapley Self-Indexing Letter File is the best ever made for the average business office.

It occupies no valuable space, is simple in operation, and costs less to operate than any other.

Buying Goods Through Travelers.

PORT HURON, Mich., January 30, 1884.

To the Editor of The Stationer:

I have just read Sam C. Wescott's letter in your last issue about "dating bills ahead."

He expresses my views in reference to buying goods through drummers. I have long felt that too much money was paid out to sell the goods through travelers. I may buy just as cheap as I could from houses that do not send out men, yet that does not prove that goods could not be sold cheaper if all of this expense was saved.

Any man who understands his business can order all of the goods he wants nowadays by letter, and he has to go to market once or twice a year anyway, to keep posted.

R. S. PATTERSON.

ANSWERS TO CORRESPONDENTS.

W. & H., who asked for trial-balance books last week, are informed that F. H. Drake & Co., Toledo, Ohio, say that they can supply something like those which are sought, in any number of accounts from 800 to 5,000. C. C. Hall & Co., Syracuse, N. Y., also state that they are general United States agents for these trial balances.

C. & B. want to know who manufactures envelopes for filing away papers, deeds, &c.

Ans.—F. S. Hasbrouck, 66 Duane street, New York, makes "document" envelopes, and the Cincinnati Paper Novelty Company, Cincinnati, Ohio, makes an excellent envelope for the purpose.

R. & E. want the Baltimore address of the Mackinnon Pen Company.

Guggenheimer & Weil were the Baltimore agents of the company, and we presume that they still handle the pen.

Subscriber asks if there is any chemical test that will readily detect the difference between No. 1 engine-sized and loft-dried papers.

Ans.—We do not know of any.

D. J. S. asks for addresses of some dealers in lithographic materials.

Ans.—Robert Mayer & Co., 27 Barclay street; Fuch & Lang, 29 Warren street; J. Bickner, 139 William street, and H. Kohnstamm & Co., 126 Chambers street, all in New York.

H. S. & Co. want address of manufacturers of "fluted" straw board, such as is used to envelop bottles.

Ans.—Budde & Westermann, 50 Vesey street, New York.

Subscriber wants to know where Hicks patent inkstand is to be obtained, and who is the manufacturer.

Ans.—We do not know. The inkstand does not seem to be known here.

S. & F. ask: Who are manufacturers of "local card tickets besides —?"

Ans.—The American Bank Note Company, New York.

O. says: We use a great deal of all kinds of paper for printing and ruled forms. Would like instructions as to cheapest way of purchasing, and in what quantities to secure lowest price; also where best qualities of paper can be had.

Ans.—We can't make distinctions as to "best" makes here. Some of the mills do a great deal of ruling for forms, &c. You can get any kind of ruling to order, but do not think that you can order from mills in large enough quantities to

make it to your advantage. Some paper-dealing houses have got this class of goods down fine, and it would probably be better for you to consult such firms as Wilkinson Brothers & Co., Henry Lindenmeyr and C. W. Barnes & Co., in this city.

L. C. asks: Is there any paper now published, either monthly, quarterly or half-yearly, which gives illustrated descriptions of novelties and oddities in typography? If such a paper exists can you furnish me with the name and address of the publisher or editor?

Ans.—*Printers' Register*, 15 North Third street, St. Louis, Mo.; *Typographic Advertiser*, McKellar, Smiths & Jordan, Philadelphia, Pa.; *American Model Printer*, Bartholomew & Co., New York; *Paper and Printing Trades Journal*, 50 Leadenhall street, E. C., London, England; *Typographic Gazette*, Cleveland Type Foundry, 147 St. Clair street, Cleveland, Ohio; *Baltimore Index*, Baltimore Type Foundry, 7 Bank Lane, Baltimore, Md.; *Typographic Messenger*, James Conner's Sons, Centre and Duane streets, New York; *Chicago Specimen*, Chicago Type Foundry, Chicago, Ill. Besides these, Farmer, Little & Co., New York, issue a nice specimen sheet, and Geo. Bruce's Son & Co., 13 Chambers street, New York, also get out a specimen sheet.

THE WONDERFUL SPIDER.

Professor Wood says that the spider's thread is made up of innumerable small threads or fibres, one of these threads being estimated to be one two-millionth of a hair in thickness. Three kinds of thread are spun: One of great strength for the radiating or spoke lines of the web. The cross-lines, or what a sailor might call the rat-lines, are finer and are tenacious, that is, they have upon them little specks or globules of a very sticky gum. These specks are put on with even interspaces. They are set thickly along the line, and are what, in the first instance, catch and hold the legs or wings of the fly. The third kind of silk is that which the spider throws out in a mass, by which it suddenly envelops any prey of which it is afraid, as, for example, a wasp.

A scientific experimenter once drew out from the body of a single spider 3,480 yards of thread or spider silk—a length a little short of three miles. Silk may be woven of spider's thread, and is more glossy and brilliant than that of the silkworm, being of a golden color. An enthusiastic entomologist secured enough of it for the weaving of a suit of clothes for Louis XIV.

It is also asserted that the spider spins from 4,500 holes, or teats, at once, the ordinary thread being made up of 4,500 threads joined together. The spider spins four webs only. After that, if she wants another, she takes it by force from the nearest neighbor.

A JACK-KNIFE ARTIST.

William Yoke, of St. Louis, claims to be the champion jack-knife artist of the day. He is making what he calls the Missouri Pacific and Strasburg Cathedral Automatic Wonder, with the golden ark of the covenant. It will contain over 180,000 pieces and will have 1,100 moving figures. All around Yoke's whittling shop are piles of cigar-boxes and lathes, and myriads of nicely carved little pieces of wood, apparently portions of models of buildings. The whittler is a small man, with keen eyes and ready tongue, and about thirty-six years of age. In the course of an hour's conversation with a reporter besaid in substance: "I didn't know that I was anything extra of a whittler until about 1869, when in a small way I made some models. I was in Texas

working at millwrighting. The first large piece I ever made was a model of a Bermuda castle. Afterward I made Balmoral Castle, Bingen Castle, Miramar Castle, the steamer Bristol, Solomon's Temple and the Texas State capitol at Austin. Solomon's Temple contained 12,268 pieces, and had 1,369 windows. It is now on exhibition in Texas. The Austin capitol building has 62,844 pieces and 561 moving people. Every room and department in the building was given, with all the officers and legislators. Everybody was represented, down to the man sawing wood for the furnaces. All the figures were moved by a wooden engine, which was run by sand falling on an overshot wheel. I made this piece at odd moments in 1881."—*Exc.*

NEITHER WRITTEN NOR PRINTED.

Perhaps the most singular curiosity in this book-world is a volume that belongs to the family of the Prince de Ligne, and is now in France. It is entitled "The Passion of Christ," and is neither written nor printed. Every letter of the text is cut out of a leaf, and being interleaved with the blue paper, it is as easily read as the best print. The labor and patience bestowed in its completion must have been excessive, especially when the precision and minuteness of the letters are considered.

The general execution in every respect is indeed admirable and the volume is of the most delicate and costly kind. Rudolph II., of Germany, offered for it, in 1640, 11,000 ducats, which was probably equal to 60,000 at this day. The most remarkable circumstance connected with this literary treasure is that it bears the royal arms of England, but when it was in that country and by whom owned has never been ascertained.

OBITUARY.

RICHARD L. CAMPBELL.

Richard L. Campbell, the well-known paper manufacturer and dealer, and the senior member of the late firm of Campbell & Smith, died at sea on board of the White Star steamship Britannic on Sunday last. He sailed for Europe on the steamer Republic on December 6, and was returning by the Britannic when his death occurred. Upon the arrival of the steamer his body was removed to his late residence, 4 East Thirty-fourth street.

Mr. Campbell was about forty-five years of age at the time of his death. About a year ago he was married to the only daughter of the late Charles A. Coles, who bequeathed her a fortune estimated at \$3,000,000. Mr. Campbell leaves a wife and two infant children, twins, only two weeks old. His funeral took place on Wednesday, in Calvary Church. The funeral services were attended by a large number of his friends and acquaintances in the paper trade.

An intimate friend, in speaking of him, says: "He was by nature modest and retiring and avoided as much as possible all public notice. During upward of twenty years' connection with the paper trade, he was noted for his urbanity and integrity of purpose. He was a thorough business man, and possessed a high character for honor and uprightness in business as well as in private life. With a kindly disposition, he won the confidence and esteem of all with whom he came in contact. His acts of benevolence and kindness were numerous, and he was ever ready to relieve distress and suffering, and his death has caused many sincere expressions of regret."

Mr. Campbell was of Scotch descent, and the paper business established by his ancestors is said to be the oldest now in existence, having been located for upward of half a century at 110 and 112 Nassau street. His father, John Campbell, retired from the firm of Campbell, Hall & Co. in 1860, and was succeeded by the deceased, who first learned the paper business in his father's store. The firm of Campbell, Hall & Co. continued in existence up to about three years ago, when it was succeeded by Campbell & Smith, of which firm Richard L. Campbell was a member until its dissolution on January 1 last, when he withdrew on account of ill health, the firm being succeeded by Augustin Smith & Co.

The Milton Bradley Company, Springfield, Mass., is busy filling orders for the Tapley File, which is said to be increasing in favor under the management of the company, the demand being now larger than at any other time. This company has in hand a new spring game which is to be known as "Enchantment." It is entirely new and is expected to become very popular. It is not modeled on any of the well-known lawn games, but is said to be of a character as interesting as any of them, being specially adapted to both sexes, and being graceful and provocative of light physical exercise.

market. As a result of the steady outgrowth of the improved feeling during the past two weeks, outside investors, it is said, are beginning to come in once more. Government bonds and railway mortgages are firm. Bankers' sixty days' st rling exchange is half cent per £ lower, owing to the advancement in the rate for money at London. With this exception the market is unchanged and quiet.

THE PAPER MARKET.—The condition of trade with dealers is very much the same as has been reported for the past fortnight or more. Although no great activity is perceptible in any special grade, the relation of demand and supply has not widened, and values, weak as they have ruled for some time past, are held fairly steady, all things considered. While the quotations of paper may be far from satisfactory, it must be borne in mind that the production is large, competition is very sharp, and profits are accordingly small, yet the situation might be a great deal worse. This may not be encouraging for manufacturers, but at the same time there are more hopeful features to be seen in the paper trade at present than there are in some other lines of manufacture. Failures in general trade have been unusually large recently, and some have occurred in the paper trade, but they have been comparatively few. The mills have little to interrupt running to their full capacity, and generally they are said to be well employed.

THE STATIONERY MARKET.—The condition of trade this week has not been very uniform, there being some complaints of dullness while, on the other hand, many dealers report an improvement over the preceding week. A few report an increase of business of 10 to 20 per cent. compared with the corresponding period of last season. Among dealers in fine stationery, the feeling is much better. Manufacturers are showing a disposition to stiffen up on prices, and a very marked indication of a healthier trade is the fact that they are not so ready as they were a few months ago to allow a discount on large orders. In blank-books practically nothing is doing. Sales are very slow and a sluggishness prevails, quite unusual even for this early period. The envelope trade shows rather more activity, and there are good prospects of a speedy increase of business in this line. Orders are not only larger and more numerous, but a great number of dealers are sending for estimates, &c., and otherwise showing a disposition to buy. There continues to be a steady demand for Easter goods, but orders for valentines have fallen off somewhat. On the whole, trade, generally, is very fair for this season.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, February 6, 1884.

THE MONEY MARKET.—The money market continues easy, the supply of loanable funds being largely in excess of the demand, though the latter is increasing. The discount rates for prime mercantile paper and acceptances are $4\frac{1}{2}$ to $5\frac{1}{4}$ per cent. and 6 to 7 per cent. for second rate paper. Call loans are freely put out at $2\frac{1}{4}$ to $3\frac{1}{4}$ per cent. There is continued improvement in the tone and temper of the stock

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

GEO. H. SANBORN & SONS, Book-Binders', Printers', and Paper-Box Makers' Machinery,

No. 51 BEEKMAN STREET, NEW YORK.

Manufactory: Standard Machinery Company, Mystic River, Conn.

L. L. BROWN PAPER COMPANY,

ADAMS, MASSACHUSETTS, U. S. A.

Manufacturers of First-Class

LINEN LEDGER AND RECORD PAPERS

WHICH WILL STAND THE SEVEREST TESTS OF ERASURE AND RE-WRITING

being double Sized and Loft Dried. These Papers possess unusual strength and beauty, and contain a sizing that resists the severest erasure and re-writing tests. Every ream is Water-Marked with Name, and put up with Binders' Boards, trimmed perfectly square, and ready for Ruling Machine.

"OTTO" GAS ENGINE.

PAPER TRADE REVIEW.

Consists of Sixteen pages, size of this Newspaper.

EVERY THURSDAY, Post Free, \$3 a Year

Remit Greenbacks or Post-Office Order. EDITOR
AND PROPRIETOR W. JOHN STONHILL.

PAPER MARKETS:—Mill News—Trade Gossip—Samples of Paper—Technical Articles—Record and Illustrations of New Patents—Descriptions of Factories—Letters every week from Paris, Berlin, Vienna and other countries—Market Prices—Gazette.

STATIONERY:—Novelties Illustrated and Described—Technical Articles—Stationery in the Provinces—American Notes—Colonial Reports—Industries of the Trade—Reviews—Gazette.

PRINTING:—Doings of the Craft—Printing in the Provinces—Colonial Intelligence—Foreign News—Criticism on Specimens—New Machinery—Type Specimens—Original Trade Technical Articles—Descriptions and Illustrations of British Establishments—Letters from our Correspondents, and every item of news concerning the trade during the preceding seven days.

The B. and C. P. and S. has corresponding representatives in North and South America, Canada, East and West Indies, Australia, New Zealand, Tasmania, India, China, Japan, Constantinople, Turkey in Europe and Asia, Russia, Austria, Germany, Italy, Spain, Holland, Belgium, and France; letters from whom appear periodically.

"The amazing industry and excellent tact of the conductor, Mr. Stonhill, is apparent even on a superficial glance over its pages."—*Mackellar, Smiths & Jordan (Phila.)*.

"The recognized organ of the Paper and Printing Trades."—*Belfast News-Letter*.

"It has features of enterprise unusual to European Trade journalism."—*American Stationer*.

"The notes upon Trade cover the entire country and the Colonies."—*London Figaro*.

"There is an American touch about the paper."—*Leigh Chronicle (Eng.)*.

"In the matter of printing it is PERFECT."—*W. and A. K. Johnston (Edinburgh)*.

"The very best journal of its class that finds its way to our table."—*James D. Whitmore & Co. (N.Y.)*.

Advertisers will see that it is better for them pay fair charges to a Journal which covers the whole of the commercial world, than to pay less sums for advertisements in journals whose circulation is limited to one country, one town, or possibly one parish.

☞ When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,497,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

TRADE NOTES.

The Robinson Engraving Company, Boston, has got out a handsome sheet calendar, the centre containing a panel with a fine specimen of its engraving work.

The first number of the *Free Lance*, an eight-page, three-column monthly, published by Spence & Co., Toronto, Ont., made its appearance during January.

J. L. Shoemaker & Co., Philadelphia, have got out a new sample book of marble and book-lining papers. It contains a handsome assortment of patterns, and ought to be in the hands of all interested.

Hard & Parsons are ready to receive the trade in their new quarters at the corner of Beekman and William streets. They have opened up a fine line of Easter and valentine goods, and buyers would do well to drop in on them.

Geo. R. Ousey, 1 Church Court, Old Jewry, E. C., London, England, offers to export tracing cloth at lowest prices, and solicits inquiries for special prices, with statement of quantities that can be taken. He will also buy bookbinders or stationers' goods on commission.

A new fountain pen has lately appeared in the market. It is the production of the Harvard Pen Company, of this city. The "Harvard" is a flexible gold pen affixed to a fountain or reservoir holder. It has no air tubes, wires, springs, &c., which are the great obstacles to the efficient working of all fountain pens.

An entire new line of Easter goods will be put on exhibition in the salesrooms of the Palmer Art Company in a few days. These goods are made up in the most tasteful and appropriate designs. The line embraces several novelties in

mounted cards, also some very handsome things in satchels. The Palmer Art Company has gained a very wide reputation, both in and out of the trade for first-class art goods, and its productions this season are well calculated to sustain it.

John R. Edwards, blank-book manufacturer, Baltimore, Md., will occupy his new quarters as soon as the spring trade season is over. Mr. Edwards has lately put in his bindery a lot of the latest improved machinery.

Proposals for supplying paper for the public printing during the year to end February 28, 1885, were opened by the "Joint Committee of Congress on Public Printing" on Thursday, at Washington. There were twenty-five bidders on the different grades of paper called for. The awards have not been announced. The lowest bidders were the Essex Paper Company, Jessup & Moore, J. G. Ditman & Co., A. Balfour, Winona Paper Company, J. B. Sheffield & Son, Seymour Paper Company, Tileston & Hollingsworth, Buckley, Dunton & Co., C. W. Thorne & Co. and Woolworth & Graham. Some of the contracts may be divided on equal figures made by bidders. A. Balfour is the lowest bidder on about 2,000 tons of different classes of paper.

A millionaire's widow has commenced a suit in the United States Circuit Court for the Eastern District of New York against the *World Publishing Company*, New York city. The action is for alleged libel, and the damages are fixed at \$150,000. The plaintiff is Mary E. Paige, the widow of Simon B. Paige, the wealthy lumberman of Wisconsin, who was found dead in bed from a pistol shot on March 11, 1883, in the hotel at Davenport, Ia. Mrs. Paige at present resides at Oshkosh, Wis. The article which the *World* published and

which Mrs. Paige alleges is libelous and defamatory, was entitled, "The Career of 'Pop' Mary," and was given to its readers on December 16, 1883. It was copied from the Cincinnati *Commercial-Gazette*, and duly accredited to that paper. Mrs. Paige has begun similar suits against the *Commercial-Gazette* and several other Western papers.

I., B. & W.

—ROUTE—

THE GREAT THROUGH ROUTE

Between the **EAST, WEST, NORTH and SOUTH.** This Great Through Route is now completed and in full operation, **RUNNING THROUGH PASSENGER TRAINS DAILY** as follows:

Three solid trains each way between Columbus Indianapolis and Peoria; two trains each way between Columbus, Indianapolis and Decatur; two trains each way between Sandusky, Indianapolis, Peoria and Decatur; two trains each way between Sandusky, Dayton and Cincinnati; three trains each way between Sandusky, Springfield and Columbus; four trains each way between Columbus, Springfield, Dayton and Cincinnati; two trains each way between Columbus, Springfield, Indianapolis and Chicago—with Sleeping and Reclining Chairs on Night Trains; and elegant Parlor and Modern Day Coaches on Day Trains.

Its track is laid with **HEAVY STEEL RAILS**, thoroughly ballasted, with easy grades and few curves. Traversing as it does the heart of the three great States of Ohio, Indiana and Illinois, uniting in close business relationship the capital cities of the first and second, with the second city of the third, and passing through a large number of the most important cities and towns in each, and with all its central location makes it the **Shortest and Most Desirable Route** between the East and West.

THROUGH TICKETS and BAGGAGE CHECKS to all principal points, **NORTH, SOUTH, EAST and WEST**, can be obtained at any ticket office of the I., B. & W. R'y; also via this Route at all railroad offices throughout the country. Rates always as low as the lowest.

Don't purchase tickets to any point without first consulting the Agents of the I., B. & W. R'y.

Particular advantages offered to Western Emigrants. **LAND and TOURIST TICKETS** to all points reached by any line.

The new line of satin Easter and valentine cards, which has been undergoing the processes of preparation during the past few weeks by J. H. Bufford's Sons is now ready for the inspection of the trade. It embraces a line of satin cards decorated with crosses and anchors constructed of pressed and specially prepared natural flowers, ferns, grasses, &c., the colors of which are remarkably bright and fresh. The goods are finished with good taste, and are really novel. An oblong card is made of cushioned satin of a pink shade. A floral cross is in the centre. It is composed of budding and blooming roses, "Forget-Me-Nots," and delicate ferns and grasses and has a base of a rare species of moss. Resting against the lower portion of the cross is a white card inscribed with the words, "Christ is Living." Several smaller cards have beautiful floral crosses and anchors. They also come in various pretty shapes. The firm is making a satin dove card in some very tasteful and attractive designs; also several pretty things in satin card wall-pockets, cards with satin borders, &c.

The "Novelty" paper-weight is one of the things which sell when other goods are a drag on the market. This ingenious little implement is a combination paper-clip and weight. The upper part can be raised five-eighths of an inch from the base, and a spring inside forces it down with a firm grip on the ends of the papers. R. R. Watson supplies the trade.

MASKS AND COSTUMES.

The masquerade season has been very extensively observed this year, and dealers say that the use of masks for balls and various social festivities has increased considerably during the last few years. Not long ago, masked balls were confined in this country to a few German societies, whereas now they have become very general, masquerade balls, surprise parties, skating parties, carnival festivities, &c., having become fashionable among all nationalities. In France, Germany and Italy, however, people have shown more conservatism in the use of masks, confining themselves to the regular annual fetes and other social and religious observances, which have been celebrated in these countries from time immemorial.

In this country, only a few years ago the use of masks was known only in large cities and towns, and even in these places it was limited to the more fashionable people; but now masks have come into such general use that there is scarcely a town or village in the country, making any pretension to keeping up modern social observances, which does not have one or more masquerade balls during the winter season. Hence, the sale of masks may now be reckoned up by the thousands, where a few years ago it was comprised by a few hundreds. It was a long time before it assumed any business importance, dealers only carrying a stock just barely sufficient to meet the demand, and importing only a few varieties each season. To-day, however, masks are imported by the thousands and the variety carried by dealers is unlimited.

"Where do masks come from?" a reporter of THE STATIONER asked of one of the largest importers of these goods a few days ago.

"Some are made in this country," he replied; "but the largest number come from France and Germany. The production is so cheap in those countries that they have practically the monopoly, for even with a duty of 40 per cent. added, nobody in this country has been able to successfully compete with France and Germany in the production of the class of masks imported. Masks made in this country are called dominoes—that is, masks made of cotton cloth and satin with curtains. In addition to this, many masks representing various animals are made in this country, mostly to order. In Germany and France the manufacture of masks is carried on extensively. Most cheap paper masks come from those countries.

"The making of a mask is not such a simple matter as it seems to be. Of course, the principal things used in their construction are ordinary paper and a plaster-of-paris or composition mold. In making half-masks—that is, masks which simply cover the face—the labor is very small compared with the construction of the full head masks. The paper is simply pasted on the mold in layers, a very tedious operation, requiring no little skill and several days to complete one mask. The construction of the mold is a very difficult task, requiring the finest artistic taste; but this is done by a class of artists who make a specialty of it. Each mold costs \$100 or more. Many dealers in this country have molds made from photographs, and sent over to the makers in France and Germany for use in the production of characters represented by them. The large full head masks require a series of molds. Masks of this character are made in parts, and then put together to form the completed character it is intended to represent. If the masks were made by a single mold, as in the case of

the half-masks, it could not be removed without breaking."

"Masks have not changed in general character for the past fifty years or more. Each season the variety has increased by the representation of some character not shown before, usually some new comical or mythical character, foreign notability hitherto overlooked, or, it may be, some distinguished personage in our own country. We have masks representing Pope Leo XIII., Napoleon, Bismarck, Kaiser William, the Crown Prince, Beecher, Ben Butler, Blaine, Conkling, General Grant, Garfield, President Arthur, Carl Schurz and others. Among the newest masks this season are those representing John Kelly, Peter Cooper, Talmage, &c. The general line of masks is endless as to variety. There are faces representing old women, young women, babies, fat boys, the typical Irish, Dutch, Yankee, English, negro, Chinese and other characters. Then we have Santa Claus, skeletons, winking masks, masks with movable jaws, noses, half faces, &c., besides numerous animal masks, representing bears, wolves, monkeys, cats, frogs, and almost every other kind of animal; caricature masks, harlequins, clowns, &c.

"A large sale in masks is derived from their use for amateur theatrical purposes. Costumes are made up with them representing the various characters in Shakespearean and other plays of historical or scriptural character. We have 'make-ups' of Booth, Jefferson, Raymond, Emmett, Sarah Bernhardt, and other famous actors as they appear in their respective master-pieces. Masquerade costumes vary greatly, according to the tastes of each particular individual, and the prevailing fashion in dress. Frequently, when historical costume is chosen, it is used as a sort of groundwork and modified or elaborated by us in any way the fancy of the wearer may dictate. In choosing costumes, gentlemen as a general rule adhere closely to the style of the original. Ladies, on the contrary, want the costume modified, according to the prevailing fashion. For instance, if it is the fashion to wear puffs on the side, or if sashes are worn, the gentle sex want the style in their masquerade cos-

tumes. If a gentleman, however, orders a costume worn three hundred years ago, he sticks to it. It is funny, but it is so. Most costumes are simply fantastic, without regard to any of the historical styles shown in the earlier ages. Costumes are in many cases made to order, but generally they are hired for special occasions from regular costumers who keep a great variety of styles on hand, and each season add others, which the changing fashion may require. Often costumes are made to order for a special occasion and taken back by the customer afterward, and hired by less fashionable people for other occasions. As I said before, costumes change with the fashions each season—even in respect to colors. Formerly masquerade suits were simply trimmed with fancy braids and ribbons; now they are ornamented with gold and tinsel embroidery, thus adding to the labor and consequent expense of their construction."

The custom of wearing masks at various social gatherings, it is said, originated in the harvest festivities of the Grecian peasantry of the most ancient times, and appears subsequently to have been associated with the representation of satyrs, Silenus and Bacchus in the orgies of Bacchus. Greek tragedy having originated in close connection with the worship of Bacchus, masks were employed in it from the first, but it is uncertain when they were introduced in comedy. The masks used varied very much in form and character. They were often provided with metallic mouth-pieces for the purpose of increasing the power of the voice, this being rendered requisite by the immense size of the ancient theatres, the whole use of the masks being specially adapted to such vast buildings, and to a style of dramatic representation in which the ideal prevailed, and the reality of individual impersonation was far less thought of than in modern times. The use of masks in the modern theatre originated in the Italian *commedia dell'arte*, which may itself be traced back to the ancient Roman mimes and pantomimes, and has always been confined to that class of entertainments, in which the very names of the characters, "Pantoloon, Harlequin," &c., have been borrowed from Italy.

HOW MUSIC-BOXES ARE MADE.

"That is undoubtedly," said a dealer in musical boxes recently, "the most perfect mechanical music-box in this country."

The box was of the shape and dimensions of a small trunk. The dealer placed a key in a hole in one end of it, gave a few turns, and raising the lid with a confident air, awaited the result. After the lapse of several seconds a brass cylinder, the surface of which was covered with minute projections, not unlike the bristles of a chestnut burr, began to revolve in the interior of the box. Each projection or bristle touched, in the order of its arrangement, a steel comb, causing a succession of harmonious sounds, such as those produced by a band of trained musicians, only much more sweet and subdued.

"This box," the dealer continued, "was made in Sainte Croix, Switzerland, under several recent devices, which make it much superior to instruments of this kind as ordinarily constructed. The price, too, is very low—only \$1,500. Is that the highest-priced instrument we have? Yes, we do not keep high-priced instruments in stock. We only make them to order. We have got as high as \$6,000 for a box, but the music procured was not as perfect as this, because the instrument lacked the patented improvements which this has. This has a regular set of reeds with a mechanical arrangement producing an almost perfect imitation of a combination of human voices, together with bells, drums, castanets and the harp, all of which are used with the finest orchestral effects. Besides, by means of interchangeable cylinders, the number of tunes may be increased to any extent the owner may desire, so that if he tires of one set of tunes by a trifling expenditure, he can get another—in fact, as many additional sets as he chooses, embracing tunes of his own selection or the dealer's, whichever he may prefer. This plays forty-eight airs without change of cylinders. Rather high-priced music, you think? Not at all, when you come to consider the quality and amount of labor involved in the construction of these instruments, the mechanism of which is as intricate, in expensive boxes, as that of the watch. Indeed, about the same amount of mechanical skill is required in their construction as is needed in making and putting together the delicate machinery of a fine watch. Our different grades are the ordinary box with no accompaniment and those with bells, castanets, drums, zither, &c., producing the finest results in expression and harmony. Indeed, the character of harmony produced by some of our expensive boxes reaches the sublime in point of musical expression.

"We are the oldest manufacturers of mechanical musical boxes in this country. We employ in our factory in Switzerland about 800 skilled artisans. Our instruments are shipped to all parts of the world, the instruments playing the favorite airs of each country to which they are sent. We manufacture both small and large boxes. Prices range from \$1 up to \$6,000, or more, if the purchaser desires. The musical mechanism of these boxes is also placed in many fancy articles, made chiefly in France and Germany, such as albums, work-boxes, cigar-cases, writing-desks, clocks, jewelry cases, &c. In clocks the air is played when the hour strikes. We place the mechanism also in chairs, which play when you sit down on them, automatic figures, mechanical toys, &c.

"The mechanism of our boxes, though requiring the finest skill in its construction, is quite simple in the ordinary. It consists of a

brass roller with projecting points, a steel comb, the teeth of which give the sounds, a spring to give the revolving motion to the cylinder, and a fly-wheel or fan to regulate the revolving motion. The rough parts used in the construction of the boxes, such as the bed-plate, the blank roller, the main-spring, the comb, the running gear, &c., are made in large machine shops in Switzerland, which furnish these parts to all the box manufacturers there. There are only two of these shops which turn out really good works in the shape of rough parts. The music has first to be arranged for the boxes by a thorough musical artist. The cylinder is then given to a person, usually a woman, who, with the aid of the music and a very ingenious machine, marks the places on the cylinder where the points are to be inserted. Another person then drills all the little holes and another inserts the points. The cylinder is then filled with molten cement, and then placed on a lathe and revolved very quickly. The cement adheres to the inside surface, holding the points, and is then allowed to cool, leaving a hole in the centre for the axis. On another machine the points are filed down so as to be of equal length. The comb is then given out to be tuned, the tuner having first to file the teeth to give the proper flexibility. The tone is lowered by filing near the base and heightened by filing near the points of the comb. The cylinder is set on the bed-plate, and opposite to it the comb is fastened so that the points of the cylinder and the teeth of the comb exactly meet. These are the main features of the ordinary music-box. Of course, the construction and adjustment of the various accompaniments in the larger boxes is more complicated.

"We make large and expensive music-boxes of various shapes. One style resembles a handsome writing desk, elegantly inlaid with ornamental woods and having a desk attachment, something a journalist (laughing) might gain inspiration from when driving the quill. Another style has the form of a beautiful side-board. It is made of ebony and has four panels of porcelain, with artistically painted flowers in bronze and ordinary colors. The top is made of plate-glass, so that the works can be seen without opening the box. In fact, we make boxes to order in many novel shapes. Of course, our trade is more largely with wealthy people, although the price of our cheaper instruments bring them within the reach of the very poorest. A box, which used to cost \$25, now only costs \$5. All of our boxes are intended solely for private amusement, the music produced by them being too soft to be used on public occasions."

ELECTROTYPING HANDWRITING.

To produce electrotypes or stereotypes of letters, signatures, ordinary written matter, drawing or sketches, coat a smooth surface of glass or metal with a smooth, thin layer of gelatine, and let it dry. Then write or draw upon it with an ink containing chrome alum; allow it to dry exposed to light, and immerse the plate in water. Those parts of the surface which have not been written upon will swell up and form a relief plate, while those parts which have been written upon with the chrome ink have become insoluble in water, after exposure to light. The relief may be transferred to plaster-of-paris, and from this may be made a plate in type metal.

Contact with the world either breaks or hardens the heart.—*Chamford.*

SELF-INKING PAD,

The cut shows the design of a self-inking rubber stamp pad, manufactured by Robert H. Ingersoll, 92 Fulton street, New York, which is expected to supersede all other means of inking rubber stamps, as having all of the advantages, with none of the disadvantages of the old combination, viz.: A pair of pads, a bottle of ink, box, &c., which have been necessary heretofore in connection with rubber stamps. It is claimed to be the most economical, effective and handy ink pad for every office, store or manufactory.

It is said that this pad will keep in perfect working condition for from one to three years, according to usage, without trouble or expense to the owner, always giving remarkably fine and clear impressions. It is made of composi-

tion in which are condensed, in the form of a jelly, the strength and properties of a large quantity of ink, over which is spread a thickness of fine cloth, which is constantly fed by the composition below.

Mr. Ingersoll also manufactures a large line of rubber type, rubber stamps and every device pertaining to the business. He has just issued a new catalogue, which will be sent to parties applying for it.

DIFFERENCE IN "STANDARD" ENVELOPE SIZES.

The *Stationery Trade Review* of London, England, in its last number devotes considerable space to the subject of envelope sizes and deplors the fact that there are no standard sizes made by manufacturers of envelopes in England—that is to say, that there is such a lack of uniformity in the sizes of envelopes there, that dealers labor under a great disadvantage. What is a No. 6 envelope, commonly so called, is one maker's No. 7. Thus the size 6, 7 or any other number, is an unknown quantity, the sizes of the envelope indicated varying with different manufacturers.

According to recent interviews had by a reporter of *THE STATIONER* with leading manufacturers in this city, the same trouble that is complained of on the other side of the water exists, in a measure, in this country. The difficulty is not so marked, however. In other words, the variations in the sizes of envelopes, commonly considered standard with the trade, are so slight with different manufacturers as to be scarcely noticeable. That there is a slight variation, however, is without a doubt, and just so long as it exists, no dealer ordering a certain number of envelopes can always expect to get an exactly uniform size unless, in every case, he orders from the same manufacturer.

In regard to the matter complained of, Mr. Jones, of Berlin & Jones, said:

"The envelope business is not an exception

to other branches of American industry. It started like other industries, when our country was in its infancy, and not knowing its future wants in its early manufacture there was necessarily no standard system of sizes adopted, until the wants of the country gradually brought into use the present envelope sizes, of which there are some fourteen standard numbers recognized by the trade to-day. The first sizes made were used for letter and legal-cap paper. Then came the size used for note-paper. Among the so-called standard sizes made, I should say there was about one-sixteenth or one thirty-secondth of an inch in the same numbers of different manufacturers. But No. 6 is known as a No. 6, and No. 5 as a No. 5, and so on, all of the standard numbers being exactly identical in size, with the exception of the slight

variation mentioned. This variation undoubtedly arose from a desire on the part of each manufacturer to economize in the cutting up of paper. Our standard No. 5 is 5-7-16 by 3½ inches; No. 6, 5-15-16 by 3¾ inches. Outside of the standard sizes there are a great many irregular sizes made by every manufacturer. These are used for circulars, pamphlets, cards, pictures, &c., for each of which, of course, no envelope of a uniform size could be made."

William I. Martin, of the firm of Samuel Raynor & Co., said: "No two manufacturers have sizes exactly alike. There is a slight variation in standard numbers as made by different manufacturers. To a certain extent this is a disadvantage to the trade, but the variation is so small that it is scarcely noticed. Different manufacturers make different sizes to suit their respective trades. Sometimes they under cut sizes to economize on paper. Our regular No. 6 envelope is 5½ by 3¼ in.; No. 5, 5½ by 3½ in."

"I have noticed for some time," said the manager of a large firm dealing in envelopes, "that all manufacturers do not make envelopes of a uniform size. Not only is there a difference in the standard sizes of one manufacturer, as compared with those of another, but I have noticed recently that the 'standard' sizes of many manufacturers have been increased somewhat. For instance, where one manufacturer once made a No. 6 envelope 6 by 5½ of an inch in size, he now makes it 6 by 5-1-16, thus, as you see, decreasing it slightly in width. In 5s, about the same difference is shown. What has caused this change I do not know, but it is quite evident that it was done for the sake of economy."

From the interviews presented it will be seen that in this country the trade has a very slight cause of complaint respecting the lack of uniformity in so-called standard envelope sizes. Between two leading manufacturers there is a difference in the length of what is called a No. 5 envelope of one-sixteenth of an inch, while in the No. 6 envelope of the same manufacturers there is a difference in length of one-sixteenth

of an inch, and in width a difference of three-eighths of an inch. This, to be sure, means that a dealer gets an envelope nearly half an inch less in width of one manufacturer than the same number of envelope of the other manufacturer. But this variation seems to be an exception to the general rule, as it is not so marked in other numbers. One thing which has a tendency to obviate any disadvantage arising from the lack of uniformity in the size of standard envelopes is the fact that every manufacturer has a printed scale of numbers, with the corresponding dimensions of the different sized envelopes, so that every buyer knows exactly what he is going to get when he places his order.

The next thing to excellence is to love excellence; and to love its opposite, is to be its opposite. To hate excellence is to be at its opposite pole.

FOR SALE.—RARE OPPORTUNITY.—ONE OF the leading Stationery and Printing Establishments in the best locations in Philadelphia, occupying four floors, on a corner; doing a good and profitable business; satisfactory reasons for selling; not over \$5,000 cash required. Address Philadelphia office of the American Stationer, 150 South Fourth Street, Philadelphia.

INGENIOUS TOYS.

"The toy manufacturers are taking a holiday now," said the head of a leading firm engaged in this industry to a reporter of THE STATIONER a few days ago. "There is always a depression in our business after the holidays, because the busy season is virtually ended then. The only thing that concerns us now is the getting up of novelties for next season. There is a constant demand for something new. Of course, the goods we turn out each season are not absolutely novel, because there is a line of staple articles that always sell well; but many new things are needed each season to sell staple goods. What is new this year? That point we do not care to talk about, for if we did we might find some of our ideas forestalled by rival manufacturers. The main feature of all toys in our line is their comical character. Our toys are made principally to be used as show-window pieces, and, of course, are what are known as mechanical toys. They are simply combinations of figures, which by an automatic arrangement, or rather clock-movement, are made to enact various amusing scenes, such, for instance as an officer trying to catch someone who has offended the law, the fleeing culprit being made to dodge behind dry-goods boxes, into alleyways, through windows, &c. Toys of this character are used as show-window attractions, not only by stationers and fancy goods dealers, but by confectioners and other dealers in the retail trade. The majority of our toys do not bring more than \$15 apiece. The most expensive show-window toy that I know of cost \$500, but it was not made in this country. Aside from musical toys and dolls, few expensive toys are imported. Imported toys lack the novelty and ingenuity of American productions. They are very finely made, however, and in this respect are superior to domestic toys. French and German toy makers excel in making perfect and finely-finished toys, but Americans make more ingenious and comical toys, and these are mostly demanded by the trade. Besides, the cost of imported toys is another drawback to their popularity.

"There are two kinds of moving toys—automatic and mechanical. Here is a mechanical toy. It represents the first act in a circus, but is very simple, depending upon its movement by the simple law of gravitation. The ring containing the revolving horses is elevated on a wire, and, of course, descends by its own weight, a spiral arrangement giving it a revolving movement. But an automatic toy is of a more ingenious and novel character, its movement depending on an arrangement of springs, wheels, &c., on the principle of a clock. About the most ingenious small automatic figure is the street musician. It represents a figure arrayed in a French costume playing upon five different instruments at the same time. The musician is seated in a chair with a brass drum between his knees. A cymbal is in his left hand, and another is attached to the upper side of the drum. A triangle is in close proximity to his left foot, and a bell or gong near the right, while a wind instrument is in his mouth. Winding the toy up causes the figure to beat the drum with his right hand, the cymbals with his left hand, and the bells and triangle with his feet, and in addition to this, produce music on the wind instrument.

"Here is an entertainment that never fails to amuse and instruct." The speaker took a key and wound up a new version of Punch and Judy. "There is," he continued, "in this a miniature stage, which has a proscenium arch of red paper cut with a border of aesthetic design. The scene

is laid in an upper room of Mr. Punch's hotel. There is a bed in one corner, in which somebody is snoring, and a series of folding-doors open at the back of the stage. Mr. Punch suddenly steps out on the stage through a pair of folding-doors which fly open as if by magic. The sinister expression on his face and the glare in his eye leave no doubt as to his identity. While he is standing waiting for the appearance of that much-abused woman, Judy, a second pair of doors fly open and she pops out. She is very spry, but shows some timidity, caused by the habit her husband has of cracking her unmercifully over the head. The third to appear is a colored gentleman with a high collar and white eyes. When Judy sees this dusky personage she takes fright and falls plump back through the doors behind her. Thereupon, Punch disappears in the same manner. A policeman comes to quell the disturbance. He falls back out of sight after carefully surveying the scene. Next, Mephistopheles is thrust in at a window. He has a red face, two knobs or horns on his forehead and a satanical grin. This scene, as you see, is frequently repeated, causing no end of amusement."

"The spring placed in mechanical toys usually operates from three to twelve wheels. The movement depends on the length of time that a toy is desired to operate, the power needed for the movement, &c. Some very ingenious toys have a very simple movement.

"We make only the rough parts of toys in our factory. The fine work, such as dressing the figures, painting the faces of the characters, adjusting the movements, and, in fact, putting together and finishing the toy is done by various artisans at their homes at so much per piece. Some do one portion and some another, while others put together toy and others again pack it for shipment. Each person handling the toy is responsible for the perfection of the work he or she does. If any part proves defective, even after shipment, it is returned to the workman through whose hands it passed during its construction or adjustment."

Show-window toys have a large sale, not only in this country, but in South America, Australia and a few are sold in Europe. We begin manufacturing about the 15th of February, so as to be ready for the export trade, which commences about the 1st of March.

A POLISH FOR BRASS.

To polish the new lacquer or brass repousse work there are three methods employed, the first leaving the brass its natural color, the second somewhat changing it to a richer gold, and the last being the process of lacquering. In all cases, the brasswork to be polished should be heated moderately over a charcoal fire. For the first method, take an ounce of alum and boil it thoroughly in a pint of strong soap; wash the

brasswork over, and when dry, rub with fine whiting and soft cloth. Second, reduce some sal ammoniac to a fine powder, moisten with rain water, and rub on the ornament; rub dry with bran and whiting, using a soft leather. Third, put two drams of saffron, two of anatto, and one ounce of turmeric into a pint of alcohol; let it be shaken once or twice daily for a week, then filter into a bottle and add three ounces of seed lac, which should be shaken daily for fourteen days, when it is ready for use. This being heated, lay on this solution with a fine soft brush as evenly as possible, and leave it to dry.

TWELFTH YEAR OF PUBLICATION.

Erie & Chicago Line

PASSENGER ROUTE.

THE SHORTEST, QUICKEST, AND SAFEST ROUTE to all points EAST. Two trains to the East daily, leaving Chicago at 5.40 P. M. and 11 P. M. The only route running PULLMAN PALACE HOTEL COACHES between

NEW YORK and CHICAGO,

LEAVING CHICAGO AT 5.40 P. M.,

Returning leave New York at 8 P. M.,

Making direct connection at Chicago for all points beyond.

You should travel by the E. & C. LINE,

BECAUSE its trains run through from New York to Chicago, avoiding the dangers of transfers, the risks attending the changing of cars, and the possibility of missing connections.

BECAUSE the PALACE HOTEL COACHES run in connection with its trains, furnish Meals as good as can be had at any first-class hotel, and allow passengers to eat with as much comfort as at their own homes.

BECAUSE not one passenger has been killed or even injured on its trains since the opening of the line five years ago. Nor has an accident of any kind occurred.

BECAUSE the great variety of scenery on this line renders the journey pleasant and profitable.

BECAUSE provision has been made for running the trains from Mansfield, "Special" to destination, whenever they arrive after departure of train forming regular connection. This insures a continuous passage between New York and Chicago.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot. Each sheet is water-marked with name and date.

CINCINNATI DRIFTINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, February 11, 1884.

As I write, the Ohio River lacks only nine inches of being as high as it was during the great flood last February. When this gets in print, if it reaches you in time for this week, the river will be about at its maximum. I venture to predict, writing this, Monday, February 11, long before daylight, that it will not stop short of 68 feet, and may go up to 70 feet, even if no rains follow those of last night. Without these rains, which will not be felt here for twenty-four hours, it would have gone to 67 feet, which is 8 inches above the rise of last year. Cincinnati, like nearly all other cities on the Ohio, was prepared for a rise equal to that of last year, but not for a greater one. It took two feet more rise this year than it did last to shut down the gas works, and it will take four feet more to stop all of the pumping engines at the water-works. The flood will have to be two inches above the maximum of last year's flood to stop the last pumping engine at the water-works. Then there will be five days' supply of water in the reservoir. But all uses of water for machinery and manufacturing will be stopped, and that will put the city on half rations, allowing water to be used for domestic purposes only.

That this preparation for a flood the equal of that of last year was so nearly universal, was not known until the present one demonstrated that fact. At the present stage of water last year the destruction had been very great. This time it is relatively nothing. Then the suffering was serious. Now it is trifling. Two elements of this flood will be peculiar to it—its amazing height and its long duration. These elements are what will cause distress and destruction. After the river passes 66 feet 4 inches, the maximum of last year, and the height provided against, the danger will begin, and it will increase in geometrical progression with every half foot of rise above that. At the present stage of the flood last year, railroad and telegraphic communication was almost entirely cut off. This year railroad communication is badly crippled, but the mails go and come regularly with little delay and the telegraph has had scarcely any trouble at all.

The large cities on the Ohio River will suffer least. In a distance of 1,000 miles from Pittsburgh, where the junction of the Alleghany and Monongahela rivers forms the Ohio, there are on the banks of the now flooded river about

200 cities, towns and villages, or one for every five miles, where steamboats land. The population of these cities, towns and villages will aggregate about a million and a half population. Every one of these cities is now in a state of enforced idleness. The loss of time by this flood, counting the fixing up after it, will not be short of a month. Then the direst losses from it during this week will begin, and they will be immense. I am writing a prediction, and I cannot see how, with the prospect before us this February 11, calamity, involving loss of life, can be avoided. After the last flood the health of the city was better than before it, and it is presumed that this great wash will again do the whole country good in a sanitary way. But that remains to be seen.

Cincinnati stationers located between Third street and the river, anywhere on Water, Front, Second or Pearl streets, will get badly drenched, while the cellars used by those located on Third street will be full of water. Of course, there is nothing at all doing here except to supply the every-day local demand and look at the flood. The newspapers have plenty of paper, and paper mills are accessible by rail. The only roads not abandoned on the Ohio side of the river are those which go north up Mill Creek in the direction of Dayton. There is no demoralization, no trepidation, no wringing of hands, no gnashing of teeth. There is no grinning and bearing it even. There is bearing it, indeed, but it is with a broad, cheerful laugh and an invincible, self-reliant resolution.

PRINCE WILLIAM.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE OF THE LOCKWOOD PRESS,
49 Federal Street,
BOSTON, February 13, 1884.

Rain, snow, mud and slush!
Did you ever see such weather?
One at a time is bad enough,
But think of 'em all together!

Like Silas Wegg, I sometimes drop off into poetry. But the muse can hardly do justice to the subject. The long weeks of gloomy disagreeable weather, with its daily variations, may possibly afford the weather clerk an enjoyable pastime, but he is getting himself very much disliked in these quarters. One day last week a luminous body was observed in the heavens and the good people betook themselves to the house-tops and began to marvel much at the strange phenomenon. Some of the old inhabitants told strange stories of how in days of old a similar body was wont to shine out daily from the heavens, giving light and heat, and sometimes pros-

trating men with a case of sunstroke. But such things have long since passed away, no case of sunstroke having occurred for months. By night the great electric lights illuminate the streets, and what is left over helps us to navigate by day. Under such circumstances, trade is "stationary." Buyers from the neighboring towns are not visiting the city very numerously, nor do the city folks turn out in great numbers. And while the legion of clerks look weary, they inwardly wear a smile, for they are having a rest; but "Old Dividend" is sorely troubled, and suggests a "cut-down" unless the state of things soon changes. Let us hope for a change in the weather.

The enterprise displayed by THE STATIONER upon "The Question of Counts," as published in its last issue, is very highly complimented by the trade here. The expense involved, the amount of labor required to formulate and tabulate the returns, are matters that I hear frequently discussed. "Only a live journal, one having the interest of its patrons at heart, and laboring for needed innovations in the trade would have made such a movement," observed a manufacturing stationer to your correspondent, "and such enterprise deserves recognition."

Winkley, Thorp & Dresser claim a very large amount of business for January, much better, in fact, than for the same month of last year. Although February opened up with not much encouragement, a great deal more trade is being done than was expected, and the month promises considerable activity in the way of orders. During the next two months the firm will get ready a new line of autograph and scrap albums. The success of the past ventures of the house in the album line has been of much encouragement, and something unique and original may be expected this season. Some of the designs were shown me, and I would like to note them, but it is a little too early in the season "to give them away."

The Hub Card Company is busy as usual, although for the past two weeks more orders have been filled than during the previous month. The line of autograph cards carried in stock is very extensive, and some twenty-five new floral designs have been just added. These cards are being quite freely used by business concerns for advertising purposes.

Henry A. Young & Co., not depending very much on transient trade, but more to their New England travelers, don't complain about the gloomy variations of the weather, but fill all orders with promptness and dispatch. Their trade is confined principally to the New England States, and in this section considerable

business is done by the house. Besides its wholesale trade in general stationers' supplies, the firm is engaged in book publishing. Some of the publications, such as "Kindergarten Songs," "Children's Hour" and "Exhibition Days," are very popular among the schools of the country, and are found upon the shelves of the bookseller everywhere.

Phelps, Dalton & Co., proprietor of the Dickinson Type Foundry, of this city, are distributing to the trade copies of their new specimen book. Among the faces of type displayed I notice the "New Manuscript," which is becoming so popular for circulars, invitations, &c. A number of labor-saving devices, designed especially for printers' use, are also described in the circular. Progressive printers might find a copy very useful. Send for it.

Notwithstanding the numerous brands of writing-fluid in the market, Maynard & Noyes' inks still hold a leading place with the trade. These inks have stood the test of years' use, and the same standard of excellence is maintained in their preparation. Under the same trademark the firm is presenting its mucilage. This branch of manufacture is a late addition to its business, but large orders have already been filled, and Maynard & Noyes' mucilage is becoming as standard an article as its celebrated inks. The advance in gum arabic is having some little effect on the price of mucilage, and dealers are stocking up a little earlier than usual, as further advance will certainly be made in mucilage.

William A. Davis, who since boyhood, some twenty-one years back, has been engaged in the book and stationery jobbing trade, being connected with such firms as Wm. H. Hill, Jr., Samuel F. Nichols, Nichols & Hall and Noyes, Holmes & Co., but in late years conducting business on his own account as a manufacturing stationer and printer, has sold his interest in the stationery and printing business to C. H. Woodman, who, for the past three years, has been associated with Mr. Davis as salesman. Mr. Davis will still continue as the manufacturer of the celebrated U. S. Treasury mucilage, black and colored writing inks. Some three years ago Mr. Davis began to manufacture this mucilage for use in his own business, using for the purpose a common wash-boiler at his own residence. The trade finding his mucilaginous preparations of unusual good quality, requested Mr. Davis to supply their demands. From that time the business has grown extensively, and now Mr. Davis finds it necessary to devote his entire time to ink and mucilage, and so sold his stationery and printing business as before mentioned. His line of inks and mucilage are now used in the various departments of the government at Washington and by the trade in all sections of the country. He reports business as exceedingly good, and has now numerous large orders booked for early delivery. A. L. D.

WILMINGTON WHITTLINGS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., February 9, 1884.

A talk about the weather is always in order, so I will begin my letter with it.

January closed a season of unprecedented cold weather, the longest within the knowledge of the oldest inhabitant. The few pleasant days at the beginning of February were followed by thaws and incessant rains, and these have cleared our streets of ice and snow, but giving in exchange a limitless supply of mud.

Such a protracted spell of cold and storm has

had a depreciating effect on business, and our merchants are complaining. "All quiet along the line" is the general report. Though trade has been slow, dealers are not despondent, but bravely "hold the fort," trusting that clearer weather will revive things. Valentines are now offered, but the demand for them is not very active. Our dealers were very cautious in placing orders for these goods, and the result will doubtless prove that their wisdom was not at fault. It is evident that their popularity is waning, and that the custom is growing into disuse, in this section at least.

I promised in my last to give you a definite account of the newly patented book-case attachment. Calling upon the inventor, William A. Smith, a few days ago, I received a cordial welcome. Stating my errand, I was invited into the library, where one of these appliances has been in use for some time on cases containing 700 volumes. It consists of as many horizontal metallic bars as there are shelves in the case, and they are joined to as many parallel bars of the same size as there are uprights in the case. These parallel bars have small jamb-nut bolts, which fit into cast-iron sockets secured to the uprights. On the face of each bar are neatly-fastened handsome strips of molding, in keeping with the furniture of the room. To the top of the book-case light brass springs are attached, to which are fastened wire cords, each passing over a small pulley. These springs aid in raising and lowering the frame, which is accomplished by means of a lever near the centre of the case, or by a wire cord passing over a pulley at the end. The whole frame can be made to either rise or fall to lock the books in the case, the horizontal bars passing about to the centre of the books to secure them.

When many books are out of the case, a few sham ones, made of light wood, or tin, are inserted to prevent sliding a book out on its side.

Letters patent for the attachment are in the hands of Mr. Smith, who will probably dispose of it to some enterprising manufacturing firm.

Among the well-established firms of our city is that of C. F. Thomas & Co. This firm is the successor of Boughman & Thomas, and, like its predecessors, the younger firm has advanced with the city's growth, and displays commendable enterprise in catering to the public need. For a number of years C. F. Thomas & Co. have furnished our public schools with general supplies. This firm's store is the recognized emporium for the standard literary productions of the day. Among its specialties are found Roger's Groups. Connected with this establishment is a well-managed job printing and blank-book manufactory.

The firm of Porter & Co., 405 Market street, is well known to many of your readers. It keeps abreast of the times, and has a well-selected stock of staple and fancy stationery, blank and school books, &c. Steadily this firm has increased its business until it reached such proportions as to necessitate, about a year ago, the enlargement and remodeling of its store. That these improvements have been fully appreciated by the public the continued growth of the firm's business evinces.

The James & Webb Printing and Stationery Company has a large plant here, and gives employment to quite a number of hands. It has always been the aim of this house to spare neither time, trouble nor expense in producing first-class work. With this object in view, it has lately increased its efficiency by the introduction of new machinery and type, and an entire remodeling and rearrangement of the in-

terior of its building. It reports plenty of work in all of its departments.

A host of agents have visited the trade during the past few days. You have them below: F. S. Van Vleck, John R. Edwards, Baltimore; J. G. Robinson, from E. E. Robinson & Brother, Philadelphia; John F. Harrison, W. D. Wilson & Co., New York; Chas. B. Gordon, Guarantee Chemical Company, Philadelphia; E. H. Longmire, Chas. Moritz, Philadelphia; John B. Gildea, Central News Company, Philadelphia; E. Megargee, of I. N. Megargee, Philadelphia; Chas. H. M. Stoeve, J. G. Dittman & Co., Philadelphia; W. C. Thomas, A. G. Elliot & Co., Philadelphia; A. H. Hoyt, Scott Paper Company, Philadelphia; N. H. Furness, Richmond Paper Manufacturing Company, and last but not least, John Aikenhead, of John Gibson, New York.

TRACY.

NEWSPAPER MAKING IN INDIA.

Rev. T. L. Hauser, in a recent number of the *Continent*, gives the following interesting facts concerning journalistic work in India.

The making of a paper in India would seem a strange process to an American printer. The native compositors who use type sit on the floor with their cases about them; in fact, most of the work is done on the floor. Many of them who set type for English papers do not know the English language. They become very expert, and set type day after day without understanding more than the few words they have been able to pick up in the course of their work. The advertising is chiefly of foreign goods imported into India. The native people are too cautious to expend much money in advertising. Newspapers in the vernacular are mostly lithographed. Type has been adapted to the vernacular characters, and is less difficult to read than lithographed works; but a finely lithographed newspaper or book is as much superior to type as the painting of a master is superior to a chromo. The press-work is done by hand, as native labor is cheaper than engines and great presses.

Illustrated papers are rare. Head and tail pieces in conventional flower and geometric designs are often very fine, but representations of places or persons are little more than outlined, and without proportion or perspective. The mission presses have introduced many European and American cuts, but they are only a little more interesting and intelligible to native readers than their pictures would be to us.

In the names of newspapers the people of India, in a most marked manner, exhibit their poetic, aristocratic and affectionate natures. The "Friends," "Benefactors" and "Well-wishers" of various classes and causes exceed all others. Various "Lights" stand next, as "Light Reflector," "Mountain of Light," "Glittering Sun," "Rise of the Full Moon" and "Woman Enlightener." Other titles can be but mentioned, "Diffuser of Sweet News," "Pleasure of Hearts," "Victory of Islam," "Strewing of Roses," "Preventer of Early Marriages," "Light of Morality," "All Producing Tree," "Ocean of Knowledge" and "Sea of Medical Knowledge."

Nepal claims to have the smallest paper in the world, issued monthly, but they are evidently not acquainted with the amateur press of America.

The name of the government gazette of the Royal Palace of Bangkok, Buddhist in teaching, and sent only to the officials in the capital and provinces, strikes one as good to sneeze by—*Rahcha-kech-chahum-bake-sah*.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (4) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

L. PRANG & CO.'S

1884. EASTER CARDS. 1884.

FOR THE COMING EASTER SEASON we have prepared a line of Cards and Silk Novelties, which we are confident will compare favorably with our previous efforts, and will meet with a ready sale. The following Artists are among the contributors to our line:

Miss FIDELIA BRIDGES,
Miss L. B. HUMPHREY,
Mrs. O. E. WHITNEY,

Miss L. B. COMINS,
Mrs. E. T. FISHER,
Miss ALICE C. SWAN,
Etc., Etc.

W. HAMILTON GIBSON,
WALTER SATTERLEE,
F. SCHUYLER MATHEWS,

Among the Cards of the regular line we would mention the following series as of special merit and attractiveness:

- No. 705.—**TRIANGULAR FLOWER CARDS**, by MRS. O. E. WHITNEY.
- No. 711.—**MOVABLE SHAPED CROSS** (figure design), by Miss L. B. HUMPHREY.
- No. 712.—**BIRDS**, by Miss FIDELIA BRIDGES. A very attractive series.
- No. 713.—**FLOWERS ON PURPLE GROUND**, by MRS. O. E. WHITNEY. A gorgeous series.
- No. 714.—**FIGURE DESIGNS**, by WALTER SATTERLEE.
- No. 715.—**BUTTERFLY DESIGN**, by W. HAMILTON GIBSON. This is emblematic of the Resurrection, and we think one of the most **Striking Easter Cards** ever published.
- No. 716.—**EASTER LILIES**, by MRS. E. T. FISHER. A very chaste and appropriate card.
- No. 717F.—**WISTERIA EASTER CROSS**. A fitting companion card to our last year's **Water-Lily Cross**, which proved so popular.

— BESIDES THESE, SPECIAL ATTENTION IS CALLED TO OUR —

SATIN ART PRINTS FOR EASTER,

Consisting of appropriate Flower and Figure designs. Our Satin Art Prints are put up in the following styles:

"A" STYLE.—A richly fringed tinted Mount, with cord and tassels for hanging.

PLUSH MOUNTS.—Fine mounts, made of rich plush of various appropriate colors, with easel back.

"B" MOUNT.—An exquisite **Satin Mount** of various colors, with extra fine quality shaded triple fringe, satin ribbons and bow, cord and tassels for hanging.

"C" MOUNT is a fine combination of rich plush and satin in contrasting colors, with cord and ribbon, easel back.

"D" MOUNT is similar to the "C" Mount, with the addition of extra fine quality scalloped silk fringe trimming and satin bow, easel back.

The sale of our Satin Art Prints have heretofore been very large, and our specialties in this line for Easter will, no doubt, meet with a ready sale. Sample Books are now in the hands of our Travelers.

We would urge our friends to send in their specified orders as soon as possible, to avoid delays in the filling of orders.

Our extensive line of **BIRTHDAY CARDS** has received several attractive additions, and we have also issued **SEVERAL** new series of **SCRIPTURE TEXT-CARDS**.

 **PRICE LISTS OF EASTER CARDS ARE NOW READY.**

ENGLISH HAND-MADE PAPERSORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWSKENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

DIPPER INKSTAND.

Another new thing in inkstands is illustrated. It is known as the "Dipper," and its peculiarity is in the balanced cup or dipper, which is turned down into the ink when the inkstand is not in use. This dipper, being connected with the

DIPPER INKSTAND.

handle or cover, is filled with fresh ink whenever the cover is opened and emptied whenever the cover is closed, and as it does not reach the bottom of the bowl, it will not dip sediment. The dipper, being made of soft metal will neither corrode nor injure the pen, and being shallow, the pen can be inserted only to the proper depth, and it is impossible to smear the holder or the upper part of the pen. As the opening in the top of the stand is always closed, either by the dipper, on the under side, or by the cover, the evaporation of the ink is practically prevented, the only ink exposed being that in the dipper. This inkstand is controlled by the Dipper Inkstand Company, 19 Park place, New York.

NEW PATENTS.

- No. 291,447. Purse.—Nellie J. Wheeler, West Winfield, N. Y.
 No. 291,489. Paper-Bag Holder.—Albert Brown, Mendocino, Cal.
 No. 291,499. Combined Paper-Holder, Calendar and Blotter.—Cornelius De Vos, Battle Creek, Mich.
 No. 291,521. Printing Machine.—Wellington P. Kidder, Malden, assignor to the Kidder Press Manufacturing Company, Boston, Mass.
 No. 291,548. Toy Whistle.—Henry C. Swan, Swanville, Pa.
 No. 291,574. File-Box.—Edward W. Byrn, Washington, D. C.

The combination, with a file-box, of an end-piece pivoted or hinged at its bottom, a cord-holding device fixed to one end of the box, and an adjusting cord or its equivalent passing through eyes in the side edges of the hinged end piece, and extending therefrom parallel with the sides of the box and connected with the box, the cord being of such length as to adapt it to be deflected down to and around the holding device on the end of the box to close the latter, or be thrown up to allow the hinged end-piece to fall back.

- No. 291,575. Electrically Actuated Sheet-Stop for Printing Presses.—Andrew Campbell, Brooklyn, assignor to John McLoughlin and Edmund McLoughlin, New York, N. Y.

Provides an electrically actuated means for holding down the sheet after it has been presented to the front guides and before it has been seized by the grippers, in order that the tremor or jar of the machine may not shift it and destroy the register.

- No. 291,597. Pencil Sharpener.—Joseph Hoffman,

New York, N. Y., assignor to Henry Berolzheimer, same place.

- No. 291,604. Inkstand.—Thomas B. Knowles, Toledo, assignor of one-third to Robert Moffett, Cleveland, Ohio.

The combination, with an ink-well having an opening surrounded by a circumferential collar, of a cover having an inclined concave recess provided with an opening at its lower end, a convex plate or cover secured above the recess and having an opening at its front end, and a ball arranged in the recess, and adapted to automatically close the opening in the same.

- No. 291,614. Envelope-Machine.—Henry A. Mann, Jr., Ballston Spa, N. Y.

- No. 291,615. Paper Box.—Theodore Marburg, Baltimore, Md., assignor to Edward B. Munson and Harvey S. Munson, both of New Haven, Conn.

- No. 291,639. Sliced Picture.—Walter Stranders, New York, assignor to Edward I. Horsman, Brooklyn, N. Y.

A sliced picture composed of series of sections which are decorated on both sides, there being for each section a complementing section, which is adapted to take its place in either of the scenes which can be represented by the sections, all the sections being adapted to produce one picture, in which changes can be effected by interchanging the complementing sections.

- No. 291,698. Astronomical Apparatus.—John Davis, Alleghany, Pa.

- No. 291,722. Apparatus for Drying Photographic Paper.—Benjamin F. Hale, Rochester, N. Y.

- No. 291,723. Pen-Holder.—John Smith Halsey, Buena Vista, Col.

- No. 291,752. Letter or Bill File.—Oscar C. Mackenzie, Chicago, Ill.

In a letter or bill file, a box or case having a retaining pin or stud recessed in its rear side, in combination with a series of index separating-sheets, each of which is provided with a projecting tag having an elongated hole.

- No. 291,800. Fountain Stylus Pen.—William W. Stewart, Brooklyn, N. Y.

- No. 291,805. Paper Box.—John W. Tatum, Chester, Pa.

A paper box having a series of end flaps folded in succession around the box, the end of each flap being retained by the body of that on the side adjoining and at right angles thereto.

- No. 291,817. Percentage Calculator.—Sylvester J. Tucker, Richmond, Va.

- No. 291,829. Paper-Feeding Device.—James Arkell, Canajoharie, N. Y., assignor to Arkell & Smiths, same place.

- No. 291,839. Lead and Crayon Holder.—William L. Butterfield, Providence, R. I., assignor to Henry Berolzheimer, New York, N. Y.

The combination, in a lead and crayon holder, with the lead-grasping jaws of a movable clamping-sleeve, a spring which normally holds the sleeve in a position where it will not clamp the jaws upon the lead, and a detent by which the sleeve can be locked in clamping position on the jaws against the stress of its controlling-spring.

- No. 291,843. Printing-Press.—Merritt Gally, New York, N. Y.

The combination, in a printing-press, of a distributing table in a different plane from the plane of the bed, of ink-distributing rolls arranged to move over the table in lines oblique to the table and oblique to each other, and suitable operative mechanism.

REISSUE.

- No. 10,430. Wall-Paper.—Henry Lobdell, Troy N. Y. Original No. 232,541, dated August 7, 1883.

There are houses where people are unsafe without mistrusting it; there are others where people are stupid in spite of themselves.

ANALYSIS OF JAPANESE BRONZES.

An examination of some specimens of Japanese bronze by J. Tadnari Matsudaira, B. Sc., a student of Rutgers College, N. J., gave the results recorded in the following short paper, contributed to the "Transactions" of the college. Bronze, as is well known, is an alloy of copper and tin. The relative amounts of its constituents vary according to the purpose for which it is intended; sometimes lead, zinc, gold and silver are added, with the intention of giving it a greater brilliancy or fusibility. Modern bronzes differ from the antique ones in composition and manner of manufacture. The bronze coin of Alexander the Great (335 B. C.) contained 86.72 per cent. of copper, and 13.14 per cent. of tin. A Roman bronze coin (500 B. C.) contained 66.04 per cent. of copper, 7.66 per cent. of tin, and 29.32 per cent. of lead. Many of the modern French bronzes are composed of copper, 91 parts; tin, 2 parts; zinc, 6 parts; lead, 1 part. The Japanese word corresponding to bronze is "karakane," meaning Chinese metal. Brass is called "shin-chu." The bronze industry in Japan is very ancient. Copper has been produced in Japan since the eighth century, but even before that period the manufacture of bronze had reached a certain stage of perfection, the copper or its alloys having been imported from China. Giyoka, a priest and the introducer of the potter's wheel, planned the erection of monster statues to the god Buddha, and the plan was carried into execution by the Emperor Shomw in A. D. 724-749. Three of these statues still exist. They are about fifty feet in height, and are said to contain a small percentage of gold. The modern bronze castings are employed for many useful and ornamental purposes, such as statues, bells, vases, knife-sheaths, candlesticks, &c., and are generally made in the simple and curious style of the old and celebrated Chinese bronzes, or are embellished with the characteristically grotesque vagaries of Japanese art. The bronze objects are cast in clay molds, formed upon models made of a mixture of wax and resin, which is melted and poured out of the molds previous to running the metal in. The melting furnaces are generally of small dimensions, and consist of an iron pot lined with clay. The surface of the casting is then finished, and the design corrected by chiseling. Frequently gold and silver are inlaid to produce artistic effects. This work is known as "zogan," and is principally carried on in the provinces of Kagan and Techin. Frequently the surface of the bronze is deadened and darkened by the application of a solution of sulphate of iron and other chemicals. I have examined two of the best known kinds of brass. One is called "shibuich." Its surface is of a light, brilliant gray color, but a scratch reveals a red metal. The object from which I took the sample for analysis was a knife-sheath. The analysis gave:

Copper.....	per cent. 74.11
Silver.....	25.81
	99.92

The other sample was also from a knife-sheath, and was the metal known as "shakudo." The surface was a dark rich brown. It contained:

Copper.....	per cent. 98.95
Silver.....	.63
Iron.....	.05
	99.63

If all men were to bring their misfortunes together in one place, most would be glad to take their own home again, rather than take a portion out of the common stock.

NEW LINE OF CARDS!

HAND CUTTER.

SEND FOR CIRCULAR AND PRICE LIST

HAND-CUTTER, WITH STEAM FIXTURE.

OIL PORTRAITS ON PORCELAIN AND PLAQUES, &c.

BY ELECTRIC LIGHT.

Do you want to make money? If so, we now offer you the opportunity to do so *without risk*. We want a general and exclusive agent in every city and town, and offer you this agency for your town.

Our portraits are all painted in the *best French and American Oil Colors*, and are as durable as *any other oil painting on canvas*. They are painted on Porcelain and Wooden Plaques, and may be washed without injury. The retail price being for the Porcelain Portrait \$6.00, and the Portrait on Wooden Plaque \$5.00. The wood is of cream tint and highly polished, and very solid; the porcelain being snow white.

Our plan is to furnish you with a sample outfit, consisting of one or both styles, including *easel, cabinet size photograph* of the same portrait, to prove the faithful production of the likeness, and an attractive show-card with portrait on, which will be printed on heavy cardboard to hang up in your window. The circular lines are the size of the plaques, and the engraving in the circle is the size of the Oil Painting on the plaque.

Your profits will be \$2.50 and \$3.00 on each order. *You take no risk*, because you must require a deposit on each order of \$2.50, which covers the entire cost to you. The common custom of photographers is to collect their entire bill in advance. If you prefer this plan, adopt it.

We have established in New York City over 50 agencies. One of these agencies, 5 Ann street, has sent us, the first month, thirty-three orders for portraits. We consider that you should do even better than this, and clear from \$50 to \$100 per month on the agency, as you will have no competition, and be our only agent in your town.

We do not wish to make a cent of profit on the first sample outfit to take orders from, and therefore offer to send you a complete outfit, as described above, on receipt of acceptance of agency and inclosure of \$1.00 for sample portrait on the *wooden plaque*, or \$1.50 for porcelain portrait, or \$2.50 for sample of both styles. Let it be distinctly understood, however, that neither of these samples will be sent to you for less than \$5.00 and \$6.00 each, unless you accept agency, for the reason that should you not follow up the business of receiving orders from the sample, it would be a cash loss to us.

Our general agents employ canvassers in their respective territory, and divide commissions, thus greatly increasing their incomes. Should you desire your own or family portraits, they will cost you respectively \$5.00 and \$6.00 each, according to style of plaque.

This advertisement will not again appear in this paper. Also Designing and Engraving on Wood in all its branches. Send Photograph sketch or model for estimates. Satisfaction guaranteed or money refunded.

Truly yours,

G. W. FOSTER & CO.,

No. 21 Park Row and 25 East 14th Street, New York.

THE KERNER PEN.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The feed is rigidly fixed to a **FLEXIBLE** air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Price, \$1 and upwards, according to mounting. Send for Circulars.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.*Second.*—Larger, better spaced, and more readable type in all cheap and medium grades.*Third.*—Latest and most attractive variety of side stamps.*Fourth.*—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

C. M. Hane, printer, New Paris, Ohio, has sold out.

George I. States, lithographer, New York city, is dead.

W. S. Abbott, publisher, Chicago, Ill., has been closed out by the sheriff.

The *Tribune* Publishing Company, Deming, N. M., has been incorporated.

Magnus Shewan, stationer and fancy goods dealer, Toronto, Ont., is dead.

Alphonso Brunell, bookseller and stationer, Portland, Me., has gone into insolvency.

Luther Dock, of the firm of Finley & Schlichter, manufacturers of twine, &c., Philadelphia, Pa., is dead.

The estate of James Crothers, dealer in paper hangings, Philadelphia, Pa., has been sold out at administrator's sale.

Brayley & Howarth, wholesale dealers in paper and paper bags, Toronto, Ont., have dissolved partnership. Howarth & McMichael have succeeded to the business.

A dissolution has taken place in the firm of Dart & Buckhart, publishers of the *Winnipeg Stiftings*, Winnipeg, Man., the business being continued by Harry A. Dart.

Max Salamonsky, manufacturer of Easter and fancy cards at No. 210 East Seventy-fifth street, New York, made an assignment on Tuesday to Louis F. Doyle, giving seven preferences.

James C. Smith, paper-stock dealer, Richmond, Va., has admitted Joseph H. Williams to an interest in his business. The style of the firm has been changed to James C. Smith & Co.

The State Line Paper Mill, owned by the Stark Paper Company, at North Bennington, Vt., was partly destroyed by fire on Tuesday morning, causing a loss of \$40,000; insured for \$20,000.

Gertrude Otis, daughter of the late Newton S. Otis, formerly of the Acme Paper and Stationery Company, has bought the Oxford Circulating Library, at 707½ Fulton street, Brooklyn. Miss Otis will also carry on a stationery business at the same place.

Joseph Stelwagon's Sons, manufacturers of roofing paper, Philadelphia, Pa., are advertised to be sold out by the sheriff on the 16th inst. Sheriff Stahlnecker will sell the stock, fixtures and machinery of the firm's manilla paper mill at Roseglan Station, Pa., on the main line of the P. and R. Railroad, on Friday, February 15, at 12 o'clock noon, on the premises.

Richard A. Saalfeld, music publisher at No. 12 Bible House and at No. 1175 Broadway, made an assignment on Thursday last to John H. Brown, giving preferences for \$5,982, the largest being to E. O. Saalfeld for \$5,000. He has been in the music publishing business on his own account since December, 1877. He opened a fancy goods bazaar at No. 775 Broadway in August, 1881, but wound up there, in May, 1882, at a loss, and then commenced the publication of cheap music for the wholesale trade. He had a store in Chicago, and in May last rented the store No. 1175 Broadway for fancy goods, stationery, jewelry, soda water, &c.

Something new in check-books has just been introduced by the Sprague Check-Book Company, New York city. It is an improvement over the ordinary check-book, the awkward shape of which is completely remedied, resulting in a neat as well as simple and convenient book of account with the bank. The book is the invention of a practical bookkeeper. The width of the book is only the length of a check. When open the spread is only fifteen instead of thirty-five inches, making a book of ordinary "cap" size, when the checks are arranged four deep. The book has pages, some of which are arranged for keeping account of deposits at the bank and checks drawn, including the numbers of same, date, to whose order paid, for what purpose drawn, &c., while other pages show balances in bank. Thus, the balance on deposit is always kept in view, while at the same time a regular Dr. and Cr. account is kept with the bank. The arrangement of the book is so simple, yet perfect and convenient, that it explains itself. The book is also gummed on the balance page, so that checks, which have been canceled may be conveniently attached to this page and thus filed for reference. On the whole, the book is admirably adapted for the use of bankers, merchants, and all business men. Theodore S. Spinning, 32 Warren street, this city, is the agent for its sale.

Lewis R. Saylor has purchased an interest in the *Morning Chronicle* (Pottstown, Pa.) newspaper and printing establishment, and the firm will be hereafter known as A. R. Saylor & Brother.

Cassell's Family Magazine for March is replete with interesting reading and useful information. Its illustrations are numerous, and the reading matter is adapted to a variety of tastes.

The Woodruff Publishing Company, publisher of the *Hartford Evening Herald*, Hartford, Conn., has sold out to the *Hartford Herald* Printing Company.

Barclay, Short & Ragon have succeeded to the business of Thomas & Ragon, publishers, &c., Greenville, Ky., the latter firm having been dissolved.

The *Dry Goods Bulletin* Publishing Company, publisher of the New York *Dry Goods Bulletin and Textile Manufacturer*, New York city, has sold out to Howard Lockwood.

Sawyer & Abbott, stationers, &c., Waterbury, Conn., have dissolved partnership. Victor L. Sawyer continues the business.

Pfeil & Colz, lithographers, Camden, N. J., have been burned out. Loss estimated at \$60,000; reported fully insured.

The *Inter-Ocean* Publishing Company, Denver, Col., has been incorporated with a capital stock of \$15,000.

M. A. Root & Co., stationers, Denver, Col., have dissolved partnership. The firm is now Root & Foster.

L. A. Goodwin, bookseller and stationer, Somersworth, N. H., is advertising to close out his business.

James M. Ramskill, toy pail manufacturer, Swansea, N. H., has been burned out; partly insured.

M. T. Hemsworth, bookseller and stationer, Brantford, Ont., has made an assignment in trust.

George L. Shivler, bookseller and stationer, New Brunswick, N. J., is advertising to sell out.

Rosenthal Brothers, dealers in picture frames, &c., Poughkeepsie, N. Y., are closing out.

Jean White, music publisher, Boston, Mass., is dead.

Wood & Strickland, engravers and stationers, San Francisco, Cal., have dissolved partnership.

A. H. Jefferson, news dealer, stationer, &c., Anderson, Ind., has sold out to George W. Shreever.

A dissolution has taken place in the firm of Rebisso, Mundheuk & Co., dealers in art pottery, Cincinnati, Ohio.

Sanders & Bly, publishers, Fulton, Ky., have dissolved partnership. H. W. Sanders has succeeded to the business.

The St. Charles Novelty Manufacturing Company, St. Charles, Mo., has been incorporated with a capital stock of \$6,000.

M. Margonisky & Brother, paper-box manufacturers, New York city, have dissolved partnership. Moses Margonisky continues the business.

John Doolan, the South Hadley Falls (Mass.) paper-stock dealer who was burned out recently, is soon to engage in the same business in Holyoke.

Carter, Dinsmore & Co. expect to move into their new factory on the first of March next in order to be in time for the opening up of the ink trade.

The Cheshire & Edwards Book Sewing Machine Company, Cincinnati, Ohio, has been incorporated with an authorized capital stock of \$50,000.

The marriage of Mary Louise Embree, daughter of Effingham Embree, to Walter S. Pope, occurred on February 6. Congratulations are extended.

G. A. Spooner & Brother, booksellers and stationers, Leavenworth, Kan., have dissolved partnership, G. A. Spooner having succeeded to the business.

The stock of the estate of Willing & Williamson, booksellers and stationers, Toronto, Ont., has been sold to A. G. Williamson at fifty-five cents on the dollar.

C. F. A. Hinrichs has recently brought out a new design in Easter egg novelties. It represents a porcelain egg in a basket, the former being mounted with bisque figures of chickens. The polka-dot glassware introduced to the trade by this firm this season has taken well, which is nothing more than can be expected, as it is a fine quality of goods.

Edward Posen & Co. are having large sales in their line of albums, which are taking well wherever introduced. There is a brisk demand for fine-art albums, the popular taste running in both fancy exteriors and interiors. A leading novelty of this firm is the "Ceramic" album, the leaves of which have numerous fine-art decorations showing the progress of art in various countries during several centuries.

At a meeting of the creditors of W. J. Robinson & Co., printers, Boston, Mass., recently reported failed, the investigating committee proposed that the debtors should settle by paying either 50 cents cash on the dollar or 60 cents on the dollar—20 cents to be cash, 10 cents in 4 month notes, 10 cents in 6 month notes, 8 cents in 8 month notes and 10 cents in 10 month notes, the notes to be secured by a mortgage on the printing-office property, or, if he could not settle by either of the above methods, he should go into insolvency. The debtor offered to settle by the second proposition if the first payment was made 15 cents on the dollar instead of 20 cents. It was voted to allow him a few days to see if

he could not arrange to make the first payment 20 cents on the dollar.

Hopcraft & Co., lithographers, New York city, have dissolved partnership.

S. N. Todds, bookseller and stationer, Piqua, Ohio, has sold out to E. A. Todds.

L. S. Watts, bookseller and stationer, Danville, Ind., has sold out to Charles Morris.

John M. Carricabe, leather-board manufacturer, North Shapleigh, Me., has been burned out.

Peters & Bell, booksellers and stationers, Lonsport, Ind., have been succeeded by George W. Bell.

George Hofstetter has been admitted as a partner in the firm of Hofstetter Brothers, stationers, printers and manufacturers of blank books, Philadelphia, Pa.

The Joint Committee on Public Printing has awarded the contracts for the supply of paper for the Government Printing Office during the ensuing year as follows: For 20,000 reams of printing paper, 24x38 inches, to the Essex Paper Company, of Philadelphia, at 6 1-10 cents a pound; nearly all of the book paper, A. Balfour, Philadelphia, at 7 3-10 cents a pound; for writing paper, A. Balfour, at an average of 7 5-10 cents a pound, and the Holyoke Paper Company, Holyoke, Mass., at 7 3-10 cents; cover paper, Tilleston & Hollinsworth, Boston, at 8 cents a pound. Instructions have been given to the Public Printer, that whenever a contractor does not fill an order within the time specified, or the paper is not up to the standard, to reject it and to purchase at once in open market, bringing suit against the contractor and his bondsmen for any additional price paid.

George Parsons, toy dealer, at No. 12 Park place, New York, made an assignment to Oliver S. Ackley on Wednesday, February 13, giving preferences for \$12,033. Mr. Parsons states that the liabilities approximate \$35,000, the nominal assets \$40,000, and the actual assets \$20,000. First preference is given to Mrs. E. S. Barrett, of Boston, for two promissory notes, one of which is dated October 23, 1882, and is for \$3,000. The other bears date January 23, 1882, and is for \$1,000. These notes were given for money borrowed of Mrs. Barrett. First preference is also given to James A. Roosevelt, of this city, for \$1,250 for rent of premises at 12 Park place, due February 1 of this year. Preferences are next given to A. Gothelf & Sons, of this city, for \$712.50 for goods purchased during January; Edward C. Schoonmaker, New York, for a promissory note, given for borrowed money, dated January 8, 1883, and amounting to \$2,500; Charles Story, of Syosset, N. Y., for a promissory note of \$2,500, dated January 8, 1883; Julius Brunner, New York city, for \$738.60, \$500 of which is for a promissory note dated November 14, 1883, and given for merchandise, the balance, \$238.60, being for goods bought during 1883. The last preference is given to James Finnegan, of this

city, for \$252.64 for goods bought in the months of January and February last. The balance of the assets, if any, the assignee is directed to use in liquidating any other outstanding debts and liabilities not enumerated. Mr. Parsons has been in business since 1840, and has always stood well in the trade. He attributes his failure to depreciation, dull times, and inability to collect outstanding debts. He had expected to form a firm under the style of George P. Parsons & Co., to begin business on February 15, but the parties who were to become partners did not put up the money, and the matter fell through. Mr. Parsons owed about \$12,000 in Europe, and paid off considerable there lately.

Gunn, Curtis & Co., printers, Boston, Mass., are reported to have compromised at 35 cents cash on the dollar, and have formed a stock company under the style of the Gunn-Curtis Printing Company. The liabilities were \$140,000.

The La Belle Manufacturing Company, manufacturer of copy-books, Chicago, Ill., has been succeeded by P. E. Table.

Henry S. Bell, proprietor of the Southern Toy Company, Baltimore, Md., has made an assignment.

R. M. Smiley, stationer, 96 Spring street, New York, has removed to 98 Spring street, first floor.

Baird & Metcalf, booksellers and stationers, Ogdensburg, N. Y., have dissolved partnership.

C. W. Greene, publisher, Deming, N. M., has sold out.

S. D. Cone & Co., printers, Hamilton, Ohio, have sold out to A. E. Pangle.

Thomas T. Patton, late publisher of the *Vindicator*, Youngstown, Ohio, is dead.

John Quisenburg, bookseller and stationer, Slater, Mo., is selling out at auction.

The *Critic* Publishing Company, now *Critic* Publishing Company (Limited), Pittsburg, Pa., has a paid-in capital stock of \$1,000.

Abercrombie & Metcalf Brothers have formed a partnership at Eau Claire, Wis., for the prosecution of a book and stationery business. The Metcalfs were lately of the firm of Baird & Metcalf, Ogdensburg, N. Y.

The Acme Paper and Stationery Company has just received another one of those prodigious orders for which this company is noted. The order is for 150,000 of the Acme tablets and must be filled within two weeks. Consumers of pads may therefore look for a decline in prices after that time.

The bankers' shears and trimmers which were introduced to the stationery trade a few months ago by Henry Seymour & Co. have taken exceedingly well. They are especially suitable for the stationery trade and are giving satisfaction, being of a handsome pattern and made of the best material. The company named is being favored with a large export as well as home trade in these goods.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; E. H. Lowry, Pres. Nat'l Bank of the Republic; F. D. Tappan, Pres. Gallatin Nat'l Bank; C. F. Timpson, Cashier Continental Bank; I. G. Ogden, Cashier New York Co. Nat'l Bank; Chas. Dennis, Vice-Pres. AN AUTHOR HIS OWN PUBLISHER.

Mark Twain's use of his pen is professional, of course, but his making of books is quite mercantile. He is one of the very few authors who do not divide with publishers the profits derivable from their brains. Circumstances have favored his independence of ordinary methods of publication; and yet all that he has done other successful writers might do. Being the first of his peculiar kind of fun-maker, and possessed of a naturally droll delivery, he made a small fortune early in his career as a lecturer; and then he married a larger one. Having thus become considerable of a capitalist, he was saved from the necessity of turning his manuscript into daily bread. He could afford to devote three years to the traveling and writing for "Innocents Abroad," and when the manuscript was ready he was not hurried by any stress of finances to turn it over to a publisher of the ordinary monopolistic sort.

Mark Twain abounds in self-conceit quite as characteristically as he does in humor, and he never doubts the merit or reception of his matter. With unshakable faith in the success of that first book, he saw no reason for desiring the name of a well-known publishing firm on the title page. And above all, he had no intention of accepting the usual conditions, which are that the author shall assume all the risks of loss, and take only about 10 per cent. of the receipts. His book was, therefore, printed in Hartford under his own supervision, and sold through peddlers. The plan worked admirably, and he has followed it in nearly all of his subsequent ventures. The consequence is, that instead of getting 10 cents out of every dollar which people pay for his volumes, he receives nearly 50 cents. He looks after the details of manufacture and sale; he fights his own battles of copyright; he has a profitable side business in a scrap-book of his own invention; he is an example for all authors who discontentedly see publishers grow rich, while to themselves comes only fair livings at best.

Above all, he has hit upon a way to protect his works in England. It is perfectly feasible and simple. Our laws do not permit other than citizens to copyright their books here; but England, more just in that respect, extends copyright to foreigners, with the sole proviso that the work shall be first published in her country. Mark Twain, therefore, publishes his books in London a day before they are issued at home, and so protects himself in both markets. Canada bothered him at first, but he has straightened out the red tape up there, and is now the only author who controls his writings throughout the English-speaking world. The same device, substantially, is used by Dion Boucicault to protect his plays. He has them acted somewhere in England, usually by amateurs before a handful of audience, prior to their production in America. Or course, you can write a book that will sell to the extent of 100,000 or so; and now that I have told you how to save all of the profits to yourself, you may as well set about it.—*Exc.*

Poverty is hard, but debt is horrible. A man might as well have a smoky house and a scolding wife, which are said to be the two worst evils of our life.

CANFIELD "DIVIDED" (Formerly "Acme") ERASER, of Rubber as pure as can be profitably used, with brush-like ends: has surprising erasive quality; never soils paper or abrades its surface; improves by use. Postpaid, 15c. The trade supplied. CANFIELD RUBBER CO., Middletown, Conn.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, FEBRUARY 14, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

PEOPLE are again waiting to see what sort of a thing the tariff manipulators will incubate. The bill in the hands of the Ways and Means Committee is likely to meet with a great many changes and we do not believe that any tariff legislation will be effective this year. But for all that, people wait and trade has another drag to its progress.

THE presentation of trade opinion on the subject of counts of paper, which appeared in THE STATIONER last week, has, we are assured, excited lively interest. Doubtless there are those who, failing to reply to the invitation to express their views, now wish that they had done so, but such persons need not think that they are debarred because of their negligence. We say negligence advisedly, because we do not believe that the trade are indifferent to investigations which concern their interests and may lead to changes which will effect a revolution in methods of business. THE STATIONER invites further expressions of opinion from its readers and asks them to review the points suggested by the different writers in its last issue. This is a subject for reflection which must command argument, if, indeed, the argument is not on one side only. We do not expect excuses for short counts in blank-books. For these there can be neither apology nor excuse of sufficient quantity or strength to justify the departure from common standards. Nor can it be held that new standards have been made and accepted by the trade; for if such a defence is made, the reply is that they are false measures, fictitious standards, calculated to deceive and not of common acceptance. Let us hear more from the trade on the issues presented.

It will interest readers of THE STATIONER to make some comparisons which will enable them to judge of the possible or probable advantages to accrue from a reciprocity treaty with Mexico. The table given under shows the extent of our exports of paper and stationery of domestic production during the last four years to countries with which we have near communication:

EXPORT OF AMERICAN PAPER AND STATIONERY.

To Mexico—Population, 9,787,629.			
1880.....	\$61,402	1882.....	\$176,372
1881.....	100,718	1883.....	180,538
Total.....			\$519,030
To Cuba—Population, 1,521,684.			
1880.....	\$153,639	1882.....	\$223,814
1881.....	213,477	1883.....	192,030
Total.....			\$782,960
To Porto Rico—Population, 731,648.			
1880.....	\$33,810	1882.....	\$54,703
1881.....	65,316	1883.....	45,030
Total.....			\$198,859
To the Sandwich Islands—Population, 57,985.			
1880.....	\$27,365	1882.....	\$40,284
1881.....	41,010	1883.....	50,058
Total.....			\$158,717

PER CAPITA Consumption of American Paper and Stationery during a period of four years.

Mexico.....	\$0.05½	Porto Rico.....	\$0.27
Cuba.....	0.51	Hawaii.....	\$0.24

It will be observed that the per capita

consumption of paper and stationery is greatest with that country with which a commercial treaty exists, and when our relations with Mexico become more intimate, through facile communication by rail from New York to the Mexican capital, which will be completed in May, we are likely to derive a larger share of trade from that source. This trade, if limited to certain products, will affect all lines, and the initiation of reciprocal commerce will only be the opening to a freer interchange and the further removal of restrictions. If, too, Cuba and Porto Rico, as is proposed, shall be added to the countries with which we shall have reciprocity of trade, we may be assured that the paper and stationery interests of the country will find a greater outlet for their productions than most people may imagine.

ROUNABOUTS.

BY THE TRADE LOUNGER.

I have been told that it is the resort of a vacant mind to talk about the weather. I want to ask the man with the biggest pile of brains if that isn't enough to talk about at the present juncture. Having said thus much, I leave it to the readers of this column to imagine the rest, merely remarking that I am in the same frame of mind as the Philadelphian who hired a boy to give expression to his feelings and obtained relief by deputy.

* * * *

The dipper at the well has been utilized to shape a device that is intended to take well with the trade. I am told that more may be learned of this through other columns of THE STATIONER. For that reason I forbear to remark further thereon.

* * * *

There are several other new things in the market, not perhaps of striking importance, yet of sufficient novelty to invite remark. THE STATIONER keeps itself au courant of everything of this sort, and its readers are not kept in the dark on anything that seems to really deserve the attention of the trade.

* * * *

That was a remarkable piece of work and exhibition of enterprise in your last week's paper. It has been freely commented upon, and has served to show how much the trade are interested in all matters relating to shortages, either in counts, weights or anything else which pertains to trade policy. THE STATIONER is to be congratulated upon the good work that it has done and is doing in this regard. You may be sure that your efforts are appreciated by the trade, and persistent hammering at abuses will in time effect changes and—let us hope—permanent reform.

* * * *

Here is a story for our missionaries. The Bismarck Tribune says that in playing a game of seven-up with a young lady from St. Paul, a wicked commercial traveler told her that every time she held the jack of trumps it was a sure sign that her lover was thinking of her. Then the impenitent fiend watched her face at each deal, and every time that she blushed and looked pleased he led out and caught her jack.

* * * *

It isn't usual for the C. T. to play seven-up, and when he goes for jack it is usually in

connection with something that he calls "pot." This fact indicates a weak point in the story. To many of your readers this story and the comment thereon will be unintelligible, but it is given for the benefit of the high-and-low initiated.

Pardon these interludes, but they can't be helped. They must come in somehow. The *Boston Transcript* says that a glass of clam juice, strongly flavored with cayenne pepper, is recommended as a corrective for severe sore throat, with the additional advantage of being a powerful tonic. The "boys" should remember this and adopt the new substitute for "bug juice." It may make them feel better.

The "burning question" is now a gummy one. If we can't get gum-arabic we must look for substitutes. Where is all of that "British gum" of which we have heard so much. It scarcely seems possible that we are to be driven to the wall to stick fast there for want of African exudations. This will be the golden opportunity for the manufacturers of gelatine, fish mucilage, &c. But, hold! Is our mucilage made exclusively of gum-arabic?

Said a mucilaginous man, the other day: "This work of El Madhi makes me so Mad I would like to wage a holy war on him." This is the worst thing of the season. Don't you think so?

Some of the latest novelties in the trade consist of single and double inkstands, smokers' sets, vases, card-receivers, candlesticks, match-holders, paper-weights, cigar-ash receivers, and a great variety of other fancy articles made of anthracite coal. The material is finely polished and its jet-black color makes it equal in appearance to lignum vitæ or ebony.

Some of the tradesmen in this city are very much alarmed concerning the floods along the Ohio River. They apprehend that they will injure trade in the West. But as this section contains only a comparatively small portion of the Western trade, they may take comfort.

The annual dinner of the Stationers' Board of Trade is to be a Delmonico affair, on Friday night. That gives 'em two days to get over it, doesn't it?

ANSWERS TO CORRESPONDENTS.

W. W. & S. want names of some good manufacturers of tissue manillas.

Ans.—J. C. Weeden & Co., Lambertville, N. J.; Union Mills Paper Manufacturing Company, Lambertville, N. J.; Robertson Brothers, Hinsdale, N. H.; John Robertson, New London, Conn.; Hand & Elsworth, 51 Beekman street, New York; Ivanhoe Manufacturing Company, Paterson, N. J.; Jersey City Paper Company, Jersey City, N. J.

J. L. M. wants address of parties manufacturing the Morgan mucilage stand.

Ans.—The Morgan Envelope Co., Springfield, Mass.

W. & H. are further informed that the Buxton & Skinner Stationery Company, St. Louis, Mo., and the Omaha Republican Stationery Company, Omaha, Neb., offer to supply trial-balance books with short leaves.

The truest wisdom is resolute determination.

The scarcity of gum arabic is embarrassing the mucilage manufacturers very much. It is said that not a pound of the product has arrived at Trieste, from which point it is shipped direct to this country, within the past three weeks. Already mucilage has risen in price 20 per cent., and it is expected that it will advance 50 per cent. within the next month. Many manufacturers are being greatly inconvenienced from a want of material with which to meet the de-

mands of their trade, and experiments are being made to supply a substitute for gum arabic in the manufacture of mucilage.

Ackerman, the envelope maker, expects to have a patent for his new sample envelope in time to introduce the goods about the first of March.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, February 13, 1884.

THE MONEY MARKET.—The money market is characterized by a continued accumulation of loanable funds and extreme low rates. The discount rates for prime mercantile paper is 4@6 per cent. Call loans are available at 1½@2 per cent. The temper of the stock market is still, on the whole, bullish. Many have confidently predicted since the improvement set in, a fortnight or three weeks ago, that the advance was merely temporary and would not hold, yet the market remains strong, any special weakness being but temporary, and succeeded by an advance. The market for sterling was quiet, but as yet there is no outward movement of gold reported, although those who do not insure could now send gold to London at a profit. Commercial bills continue scarce. Government bonds were firm and ¼ higher for the 3's. Railroad bonds were active and strong.

THE PAPER MARKET.—Trade is reported by most dealers as having been a little better this week, although not as brisk as it usually is at this time in a year of prosperous business. While no sudden improvement is looked for, as the season advances, there is quite a feeling of hopefulness of a gradual enlargement of the volume of trade. The probabilities favor a large distribution of paper during the spring, and there are also some indications that prices may be on a little more satisfactory basis, but before much improvement can be expected, it is evident that the supply and demand for paper must be somehow brought into closer relations. The most discouraging feature of the present situation of general trade is the continued large number of failures. Those of last week, for the whole country, are stated on the authority of one of the mercantile agencies to be the largest number for a single week for years, if indeed it has ever been equalled in the history of the country. The fact that nearly 90 per cent. of these failures were of small traders, is regarded as indicating, in the absence of any business or financial crisis, that, in a large number of instances, dishonest debtors have taken advantage of loose and imperfect laws to defraud their creditors. Print papers, although ruling at very low figures, continue to be quoted steady and no concessions are made unless on large and desirable orders. Manila wrappings hold their own with some degree of firmness. Straw boards are very weak and nominal, No. 1 steam-dried being marketed at \$30 to \$35 per ton.

THE STATIONERY MARKET.—Trade is rather more quiet than a week or two ago, the continued bad weather having had a depressing effect on business generally. There have not been so many buyers in town and the heavy-floods have embarrassed business very much by delaying shipments, especially to points along the Ohio River. A few dealers report no falling off in the movement in Easter novelties, but trade generally in these goods is not so heavy as a week ago. Better business, however, is expected as soon as the weather settles. There is nothing doing in toys, fancy goods, &c., with the exception of masks, in which a fair amount of business is still doing. The trade in spring goods in the line of toys, such as marbles, balls, bats, &c., has not started up yet, being a little backward. There is quite a fair trade being done in fine art albums this season. Those in fine leather, plush and morocco covers, with interior decorations, are most in demand. A revival in the ink trade is expected to take place the first of next month, when manufacturers will begin to ship. The trade in fine stationery, envelopes and staple goods generally is very quiet.

AN IMPROVED PHONOGRAPH.

One of the most interesting exhibits at the late Vienna Electrical Exhibition was Gentilli's glossograph, a little instrument by which speech is automatically reproduced as soon as it is uttered. A small apparatus is placed in the mouth of the speaker—in contact with the roof of his mouth, his tongue and his lips—and on being connected with an electro-magnetic registering apparatus, the sounds are committed to paper. It is constructed in such a manner as not to cause any inconvenience to the speaker; neither is it necessary that the voice should be raised, as it reproduces a whisper as exactly as a shout; the only condition is a correct articulation. According to the inventor's calculation, it will be possible to write four or five times as fast by means of the glossograph as has hitherto been possible even by the quickest writer. At first sight it appears as if this invention was but an improvement upon Edison's phonograph; it is, however, of a much older date. It rests, unlike the former, on an acoustic principle, and does not reproduce the sounds in a microscopical form. The chief obstacle to the introduction of the glossograph will be the difficulty in deciphering the characters; but it is not impossible that, with the help of a second automatic apparatus, the characters produced by the glossograph may be translated into our common type-writing. The orthography would doubtless appear strange, but in these days of phonetic spelling this might not long be a hindrance.—*Pall Mall Gazette*.

SCHOLAR'S COMPANION.

This is a substitute for the metallic boxes heretofore employed by school-children for containing their pencils, pens, erasers, rubbers, and sponges. The box heretofore made for this purpose has been called the "scholar's companion," and is generally known by that name. In use, noises are made by the careless deposit of the box upon the desk, or by allowing it to fall, or by the rattling of its contents. Such noises are disturbing in school, and it is the object of this invention to prevent this cause of disturbance. To that end a case for containing scholars' implements is made of flexible material—such as cloth or thin leather—and parallel, elongated pockets are provided for separately containing pencils and pens, together with a pocket for containing rubber and chalk, and a water-proof sponge-pocket for containing a sponge of considerable size, the pockets for containing the pencils and sponge being so arranged that a flap at one side of the structure can be folded over their mouths, and the case can then be rolled up upon an axis parallel with the longitudinal axis of the pencils and pens contained in the elongated pockets.

The advantages of this article are, that it can be rolled up into comparatively small compass, and can then be handled or let fall without causing noise. At the same time there is provided in it the large sponge-pocket, which is water-proof, and the guard-flap which folds over the mouths of the sponge and pencil pockets, and prevents the pencils and pens from falling out.

N. Y. SILICATE BOOK SLATE CO., 191 Fulton Street, cor. Church St., New York City.

ADVERTISING LETTER-PAPER AND ENVELOPE.

The object of this invention is to provide a new and improved form of letter-paper sheets provided with advertisements, &c., which can be removed before the letter is folded and mailed.

The face of a sheet is divided by lines into a series of square spaces or fields for receiving advertisements, &c. At the middle of the upper part of the sheet a blank space is left, which is not subdivided into squares, and is provided with rulings. The letter is to be written on the blank space. The rows of squares at each side of the blank space are separated from the adjoining rows, and the rows at the bottom are separated from the blank by perforated lines, the lower ends of which are connected by a transverse perforated line extended along the bottom of the blank space. A perforate line extends across the top of the sheet a short distance from the upper edge, which line extends to the upper ends of the perforated lines, and from the upper ends of the perforated lines inclined perforated lines extend to the middle of the upper edge of the sheet. The rear side of the sheet is also divided into advertisement squares or blanks, with the exception of a space, provided with a small square for receiving the postage-stamp upon which space the address is also to be written. Advertisements, time-tables, and other information are printed on the spaces or squares on both sides of the sheet. The letter is written on the blank space, which is then, with the adjoining fields or squares, torn off along the perforated lines, whereby a flap will be formed on the upper end of the letter part. The side squares connected with the blank part are folded on the same, and then the part is folded. The tongue or flap is folded down over the folded sheet and gummed to the same, and the address is written on the space left therefor, forming the outside of the combined letter and envelope.

COMBINED PAPER-HOLDER, CALENDAR AND BLOTTER.

This is a combination of a base or tablet, a spring-clasp, a hinged blotter holder and carrier, and a perpetual calendar.

The base-piece, in the form of a tablet, is preferably made of stiff paper board. It may vary in size as desired, and can be covered with cloth, leather or any suitable book-cover material. The blotter holder and carrier is also preferably made of paper board and suitably covered. Common paper clips or fasteners are stuck through the paper board near its ends in such a manner that their ends can be readily bent over the ends of one or more sheets of paper blotters. The board is shorter than the base or tablet, and hinged to one of the edges of the tablet by means of a flexible strap, similar to the manner in which two sections of a book-cover are connected.

A spring-clasp (preferably made of spring wire) of common form is fixed to the top and centre of the tablet by means of rivets or in any suitable way.

A rectangular block, preferably made of wood, has a section cut out from its centre to adapt it to receive and retain a clasp fixed to the block and tablet in such a manner that sheets of paper, when placed upon the tablet and under the spring-clasp and holder that projects below the block, will be brought square relative to the tablet by abutting

against the fixed block and a wooden bar, fixed to the edge of the tablet. There are vertical slots in the block, through which the arms of the spring-clasp extend. A groove or channel is formed in the top surface of the block to receive a slide. An adjustable slide, preferably made of paper-board, extends through the channel, and has numbers, or series of numbers, corresponding with the number of days in a month printed thereon. A veneer cover is fixed on the top of the block. It has a slot through which the figures on the slide are visible. At the side of this slot, and in regular spaces corresponding with the size of the numbered spaces on the slide, the names of the days of a calendar week are printed or fixed upon the surface of the cover.

A number of letter-sheets are placed squarely upon the tablet, and under the spring-clasp and holder, and one or more blotter-sheets in the hinged blotter holder and carrier, and when the surface letter-sheet has been written upon the hinged blotter-carrier is turned upon it to bring the surface of the blotter in contact with the freshly-written page, to absorb superfluous ink and to prepare it for folding and removing.

To utilize the device as an advertising medium business cards, &c., may be printed or pasted upon the back of the blotter-carrier, and also advertising matter upon the blotters.

To utilize the lettered and numbered block and adjustable slide as a calendar, the slide is adjusted each month so as to bring the number 1 parallel with the name of the first day of each month printed at the side of the slide, and then it is moved one space each succeeding day of the month, so as to indicate the name and number of each day in the month during the passage of the month.

THE HOUSE STENOGRAPHER.

John J. McElhone, the chief of the official stenographers of the House of Representatives, has been in the service of that body as an official reporter since 1847. He was an expert stenographer when a mere boy. When he was eighteen years old he was reporting the official debates. Mr. McElhone explained to me the other day his method of working. It will probably be a revelation to the average reporter. He pays no attention to the mechanical part of his work. He writes the Pitman system in the simplest forms. When he is reporting a speaker, he follows his every sentence, criticising it and taking in fully a bit of exquisitely trained mechanism. The result is that he has never yet met a speaker who can talk too fast for him. When he meets a man that can think faster than he can, then only will McElhone be at a loss. He says that in the last House the three hardest men to report were Thompson, of Iowa; Blackburn, of Kentucky, and Ranney, of Massachusetts. The hardest piece of reporting ever done by McElhone was during the exciting incidents of the count of Hayes by the House of Representatives. When Beebe, of New York, immortalized himself by jumping upon his desk, perfect Bedlam appeared to have been let loose. To report what was said, with twenty or thirty members apparently talking at once, must have

seemed almost an impossibility. In less than a second, McElhone saw that his reputation as one of the greatest of living reporters was at stake. He seized his note-book and dashed right into the centre of the excitement. The voice of every member was familiar to him. Without turning his head, he stood erect amid the wildest confusion, and caught with rigid accuracy the words of the most distant speaker. He was very nervous over the result, because, if any member at that time had by chance been omitted from the page of history of that day, McElhone would have been the subject of a row. None of the members believed that he had been able to get them all, yet when his report came out in the *Record* next day not one had a single word of fault to find. In fact, it is the only perfect picture of that exciting period. It was one of the greatest feats of stenographic reporting ever done in Congress. When McElhone had finished he was bathed in perspiration from head to foot, and was as weak as if he had been running in a ten-mile match.—*Washington Post*.

The Paper and Printing Trades Journal.

(QUARTERLY.)

Subscription: Two Shillings per annum, post free. Postage Stamps received in payment.

EVERY Printer, Stationer, Papermaker, Bookseller, Author, Newspaper Proprietor, Reporter, in fact, everyone interested directly or indirectly (and who is not?) with Printing and Paper ought to subscribe. Useful Trade Tables, Trade Information, Heaps of Wrinkles, and Amusing Gossip in every issue.

WHAT SUBSCRIBERS SAY.

I could not do without it.—J. SPRINGER, Iowa City, U. S. A.

We are delighted with the Journal.—S. F. CHERITT, Grahamstown, South Africa.

In my establishment the Journal is devoured with avidity.—J. JENNINGS, Glos'ter.

It does not take a long time to see that it is worth its price.—S. B. SCHANTZ, Bethlehem, Pa.

Imparts the right sort of information, and every printer ought to have it.—B. PRICE, Bilston.

The Journal has a wonderful knack of making one understand what good printing is.—W. PERRETT, Glasgow.

Thanks to the invaluable services of the Journal to the world of typography.—W. WINGET, Torquay.

WHAT ADVERTISERS SAY.

CROWN POINT PRINTING WORKS, LEEDS.
Piles of applications for samples resulting therefrom.
ALF COOKE.

OXFORD WORKS, CHELTENHAM.
Your capital notices have brought in a large number of orders from printers.
THOMAS HAILING.

3 KING ST., FINSBURY SQ., LONDON, E.C.
From the first advertisement, I had over two hundred inquiries, most of them leading to good orders.
J. D. CARTER.

4 FALCON STREET, LONDON, E.C.
From one advertisement alone I had over thirty orders for wood letter and metal type.
F. WESSELHOEFT.

Bookkeepers' Labor-Saving Trial Balance Books, with short leaves, saves rewriting of names of accounts. Dealers in all kinds of Stylographic Fountain Pens.

OBITUARY.

WM. H. LANTHURN.

Wm. H. Lanthurn died on the 13th ult., at his residence, Dayton, Ohio. Mr. Lanthurn was born at Ellicott's Mills, Md., August 17, 1828. In 1855 he entered the ministry in the United Brethren Church. After ten years of pastoral work, a part of which was in the First United Brethren Church of Dayton, Ohio, he was compelled by lung trouble to give up preaching, and he entered the book business as partner in the firm of Lanthurn & Zeller, in Richmond, Ind., in 1864. In 1867, Rev. W. J. Shuey, the agent of the United Brethren Publishing House, in Dayton, Ohio, invited him to take charge of their extensive book business as superintendent of the retail department. In the fifteen years he occupied this position their retail business increased greatly, and his wide reading, great cultivation and admirable taste were seen in the high character of the books in their stock. More than this, he was recognized by all who dealt with him to be a man of perfect integrity, of lovely spirit and gentlemanly manner. He made friends of all his acquaintances, and retained them to the last. Application to his work made him a model bookseller. He loved good books and felt it to be a noble calling to promote their circulation.—*Publishers' Weekly*.

TRADE NOTES.

The Powers Paper Company has an elegant line of Easter cards, which the trade will do well to inspect. They can be seen at the New York office, J. L. St. John, agent, 62 Duane street.

John Gibson's trade in fine art Easter and birthday cards shows considerable of an increase over last year when it was exceptionally good. The line of fine art cards of Julius Bien & Co., which Mr. Gibson also carries, is having a large sale.

John B. Davids & Co. have received a patent for a combination inkstand and pen rack, which will be ready for the trade in a few days. It is a novelty that is likely to become popular with consumers.

The trade should write to Charles J. Cohen, Philadelphia, for the No. 51 sample book of "Kent Mills" linen and "Magnus" wedding papers. Samples of each quality, tint and color are shown with full descriptive price-list.

A late novelty introduced to the trade is a miniature stereoscope in the form of Brooklyn Bridge. A lens is in one end and a slide for views in the other. A set of views accompanies the novelty, which is made of brass, finished in fine gilt.

J. H. Bufford's Sons are about to add to their attractive line of fine art Easter and birthday cards several exceedingly rich and tasteful designs, comprising wreaths of roses and pansies. The firm's line of satin art prints is greatly admired by the trade, and it has met with the most flattering reception in the shape of a large and profitable business. A leading design in the satin prints is a large, oblong card, showing a cross entwined with beautiful flowers printed on a blue background. This card is elegantly finished in silk cord and a bordering of white satin and rich fringe. The design is very pretty and it is made up in the most neat and tasteful manner. The dove card, introduced a short time ago by the firm, continues in popularity. It is made up with satin and in several cheaper forms. Considering the fact that J. H. Bufford's

Sons only introduced their satin prints this season, they have reason to feel encouraged.

The National Publishing Company, Philadelphia, has made arrangements with Frank H. Coffin, and he will hereafter be one of the representatives of its well-known line of family and pulpit Bibles on the road. Mr. Coffin was for many years connected with the J. G. Shaw Blank-Book Company, New York, and his experience and extensive acquaintance with the trade will be of great advantage in presenting the merits of this well-established line of quarto Bibles. Many new and magnificent styles have been added to the assortment and the trade should examine Mr. Coffin's samples before placing their orders.

T. Sinclair & Son, Philadelphia, have just published a series of eight chromo cards representing the principal characters in the opera of "The Beggar Student." These cards have been artistically designed by W. W. Denslow, and are in great demand. The management of the McCaull Opera Company used them as an advertisement during the performances of this opera. T. Sinclair & Son have also issued a series of eight cards, called the "Base-Ball Players," which are very funny. Another series of four cards in bright colors, representing boys and girls flirting, designed by E. B. Bensell, are meeting with success. The same firm has printed four cards (5 inches by 7) of country boys and girls playing. The designs of these cards are made in Paris specially for T. Sinclair & Son.

THE RAISBECK ELECTROTYPE CO.

Electrotypes & Stereotypes,

24 and 26 VANDEWATER STREET.

Electrotypes Mounted on Wood or Metal.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

GEO. H. SANBORN & SONS, Book-Binders', Printers', and Paper-Box Makers' Machinery,
No. 51 BEEKMAN STREET, NEW YORK.

Manufactory: Standard Machinery Company, Mystic River, Conn.

L. L. BROWN PAPER COMPANY,

ADAMS, MASSACHUSETTS, U. S. A.

Manufacturers of First-Class

LINEN LEDGER AND RECORD PAPERS

WHICH WILL STAND THE SEVEREST TESTS OF ERASURE AND RE-WRITING

being double Sized and Loft Dried. These Papers possess unusual strength and beauty, and contain a sizing that resists the severest erasure and re-writing tests. Every ream is Water-Marked with Name, and put up with Binders' Boards, trimmed perfectly square, and ready for Ruling Machine.

"OTTO" GAS ENGINE.

OVER 10,000
IN USE.

Working without Boiler, Steam, Coal,
Ashes or Attendance.

STARTED INSTANTLY BY A MATCH, IT GIVES
FULL POWER IMMEDIATELY.

WHEN STOPPED, ALL EXPENSE CEASES.

No explosions; no fires nor cinders; no gauges; no pumps; no engineer or other attendant while running. Unsurpassed in every respect for hoisting in ware-houses, printing, ventilating and running small shops.
SIZES: 1, 2, 4, 7, 10, 15 and 25 horse-power.

SCHLEICHER, SCHUMM & CO.
PHILADELPHIA, PA.

PLASTIC MATERIAL.

A plastic material, applicable to many uses in the production of articles sold by the stationery trade, is made in the following described manner:

Eight pounds of bone, ivory, horn, fish-scales, quills or other materials of a similar nature, as thoroughly dehydrated as possible, are reduced to the form of an impalpable powder. Comminuted bone is said to produce the best result; but the other materials may be made use of, and the result will be a useful one, although not as satisfactory as that where the comminuted bone is employed. To the eight pounds of pulverized bone or other material, two ounces of phosphate of ammonia (or the elements of phosphate of ammonia—to wit, phosphoric acid and ammonia—are added in such proportions that they produce the same effect as they would if combined to form a phosphate before being mixed with the bone). Two pounds of powdered shellac, as nearly desiccated as may be practicable, are then added, and the elements are annexed thoroughly together. The compound will then be ready to be introduced into molds, and will be inserted in powdered form without further manipulation.

The molds may be of any desired configuration of the form usually employed in the manufacture of articles of plastic material. They will be heated to a temperature due to a pressure produced by, say, from sixty to eighty pounds of steam, the pressure being about one to two tons to the square inch.

Another method of producing a plastic composition consists in taking chemically-pure phosphate of ammonia, as nearly dehydrated as possible. The second and principal ingredient is bone comminuted and desiccated to form an impalpable powder. In the preparation of the comminuted bone care will be taken to have it as free as possible from foreign matter, which may be accomplished readily by means which are well understood. The ingredients having been prepared, about eight pounds of pulverized bone are added to about two ounces of phosphate of ammonia, mixing the two in any convenient way. The powdered material thus formed is introduced into the molds and completed by pressure. The molds are of the kind usually employed, and are heated to a temperature due to a pressure of, say, from sixty to eighty pounds of steam, the pressure being from about one to two tons to the square inch.

Instead of using phosphate of ammonia, the elements of which it is composed—namely, phosphoric acid and ammonia—may be used, so as to produce, when combined with the pulverized bone, the same result as they produce when they are brought together to form a phosphate before they are introduced.

The composition formed as described is to be regarded as in the nature of a base, to which an appropriate water-repellent or suitable pigments or other agents may be added, according to the character of the article it is desired to produce.

Still another form of composition is made by either of two formulas, viz.: Sixteen parts of bone are ground to an impalpable powder and thoroughly mixed with four parts of solid extract of logwood made into a solution, and then one part of sulphate of iron made into a solution is added. From the compound thus formed the moisture is expelled by evaporation at, say, about 120° Fahr., after which the material is ready to be submitted to the dies for giving form to it. The degrees of heat and pressure

to which the dies are subjected in molding the material will vary of course according to circumstances; but when a pressure of about, say, two thousand pounds to the square inch is continued from five to ten minutes, under a heat equal to about seventy pounds of steam, a very satisfactory result is secured. The second formula, the employment of which produces a result the same in all essential respects as that given above, is as follows: Two parts of tannate of iron are combined with eight parts of bone-dust, following the steps of the formula above given. The resultant product of either formula is a solid black material susceptible of a high polish and practically waterproof. The chemical combination of the ingredients of either formula makes tannate of iron and gelatine. In the first formula the tannic acid present in the logwood combines with the gelatine of the bone and the iron in their proper proportions.

In lieu of bone-dust the dust of horn, ivory and other like materials may be used, although bone-dust is preferred. Pigments or other substances of an appropriate nature, in quantities which will not prejudicially affect the result, may be added to those above mentioned.

LETTER OR BILL FILE.

A box or receptacle of the usual and well-known form is provided with a series of sheets of heavy paper, having index-letters upon their edges, between which the bills or letters are placed, and also with a spring clamp, adapted to hold the sheets firmly in place or to be turned back out of the way at the pleasure of the user. It has been usual to place these separating sheets in the box, and secure them by passing them over a pin or stud fixed in the bottom of the box near its rear side. This, however, throws the letters or bills out a short distance from the back and allows them room to swing, thus allowing the corners to project beyond the index leaves and getting creased and soiled, and their edges are defaced by contact with the stud. This difficulty is overcome as follows: The back of the box is formed with a vertical recess in which a retaining or stud pin is placed. This pin is pivoted or hinged at the bottom of the box, and its upper end is held in place by an open slot in a small plate, which is provided with a hinged or pivoted latch, adapted to be thrown across the open end of the slot in front of the stud or pin. The separating-sheets are each provided in the centre of their rear edge with a tag of any suitable material, having an elongated hole formed in them, through which is passed a small sleeve or tube, which fits over the retaining stud or pin and is formed on its upper end with a projection or flange.

The operation of the device is as follows: Being properly placed in the box, the letters and bills are placed between the separating index-sheets till the whole is filled, being firmly held in place and prevented from twisting by the rear edges of the sheets abutting against the back of the box, and their tabs extending into the recess and over the sleeve and its hinged pin. The holes in these tabs being elongated allows of the sheets being freely turned back to gain access to the contents. When the file is full, the latch is thrown up, the hinged retaining-pin pulled outward at its upper end, and the separating sheets removed, together with the sleeve or tube and placed in a similar box for storage, the sleeve serving to easily and quickly guide the tabs to their place upon the retaining-stud, and then being

withdrawn for use again in the original box, which is supplied with a new series of index-leaves. This is quickly placed in position, and the stud is then turned up into its recess and secured by the latch, where it is out of the way

and cannot be injured by being accidentally struck when the file is in use.

Poetry is the apotheosis of sentiment.—*Mme. de Staël.*

COMMERCIAL.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand-printing. Price, \$2.50; per dozen, \$16.00.

THE GEM.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$8.00.

Send for Catalogue of New and Useful Goods.

PAD.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $\frac{3}{4} \times 4\frac{1}{2}$, 50 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

Price, \$7.50 per dozen. Discount to the Trade.

SLATE-CLEANER.

The object of this invention is to provide a device for cleaning slates, of increased simplicity of construction and general adaptability for the purpose.

The device consists of a tin water-receptacle, the mouth of which is provided with a perforated cap or spout, adapted to allow an exit of the water in small quantities. This receptacle is preferably flat, so that it may be carried in the pocket with convenience, and so that a broad surface shall be presented to the slate. The mouth or water-exit is placed in the edge of the receptacle. The tin receptacle is inclosed with cloth or other suitable erasing material, so that the slate may be cleaned thereby. The cloth is preferably stretched tightly over the tin to provide a firm erasing-surface, and sewed. The rubbing or cleaning surfaces of the covered receptacles are free from metallic parts or other matter that would tend to scratch the slate or interfere with a proper cleaning of the same. The peculiar property or nature of the tin adapts the receptacle to the rough treatment which it is necessary for it to withstand without allowing of any leakage.

Within the receptacle may be secured a spring, having its ends bearing against the opposite sides, tending to separate the sides, so that after the sides have been compressed to eject the water, the spring will cause the sides to return to their normal condition.

ABACUS ATTACHMENT.

As is well known, an abacus is a calculating machine used in school-rooms to facilitate arithmetical computation, or, in other words, a machine for expressing the properties and relations of numbers with objects. This method is often used in common schools to aid the "primary" in grasping the first principles of addition, subtraction, &c., but is usually on a large machine that is rolled about the school-room or upon one in the hands of the teacher.

A recent device consists in providing a neat and uncumbersome attachment to slates, whereby every scholar can be provided with an abacus.

The frame of the abacus attachment is made of any kind of wood or any material, in one or more parts, into any desired shape, either somewhat in the form of an inverted bow, or other wise, and of length either of the width of the slate or of its length. Extending between the two arms or shorter sides of the frame is a wire or wires, upon which are strung a number of balls or counters which are adapted to slide back and forth on the wire. The object of the balls so strung is to help the pupil to add, subtract, divide, or multiply. These balls are unnumbered, and have no characters whatever upon them, they being plain, as by the use of balls or counters having numerals or representations upon them the scholar confuses the character on the balls with the number of balls—that is, between the quantity desired to express a number with the symbol which stands for that number. Thus in calculations the presence of characters on the balls is confusing when by a mental effort they have to be disregarded. Children also may acquire the trick of reading the number on the last ball of a series, and thus give a correct answer without at all appreciating the quantity expressed by the numerical character they make use of in their reply, which would not be the case if they could arrive at their conclusions only by counting on unnumbered balls. By these means it will be seen that the use of counters without characters on them is a great

improvement in object-teaching. Across the bottom of the two arms of the abacus attachment is a piece or portion to which are secured, by screws or otherwise, "spring-brass" clips or clamps, by which the attachment is fastened to the slate-frame, and is adapted to be put on and taken off at will.

IMITATION STAINED GLASS.

The object of this invention is to provide a substitute for stained glass which will be comparatively inexpensive in manufacture. It consists in imitation stained glass made with a glass plate having imitation leads applied to one side and the surface of the glass between the imitation leads coated with transparent colored varnish or lacquer or any like substance, either simple or compound and either transparent or translucent. The imitation leads and the varnish or lacquer may be covered by a second glass plate, which serves as a protection plate, whereby the imitation leads and the varnish or lacquer will be protected from injury either by the weather or other causes.

By this method glass plates are prepared at a comparatively small expense, having the appearance and producing the effects of genuine stained glass by forming upon plates of plain glass an imitation of the colors of stained glass, and also of the leads by which the pieces of stained glass are usually held in position.

This device is carried out by forming upon paper or other suitable material any design which is to be embodied in the glass plates, which design represents the leads of genuine stained glass. A glass is then placed upon the design, and a small stream of a melted mixture, colored to represent the leads of an ordinary stained-glass plate is applied on the glass over the lines of the design. This mixture, when poured upon the surface of the glass, quickly cools and hardens and firmly adheres thereto, and produces upon the glass a representation of the design traced upon the paper resembling the leads of a stained glass plate from which the pieces of stained glass have been removed. The mixtures found best adapted for this purpose are composed of cements, sealing-wax, beeswax, Burgundy pitch, and, in short, any one of or a compound of the various waxes and cements found in the market for kindred purposes. "Chacer's Cement," so-called, is said to be a good composition if made somewhat less brittle by melting with it 3 per cent. of Burgundy pitch. These substances may be used singly or compounded one with the other, according to the judgment of the maker, and depending somewhat upon the wear, temperatures, shock, &c., to which the glass will be subjected. These ingredients and a suitable quantity of coloring matter to give the desired color to the mixture, are melted in a vessel or instrument of suitable form to allow the melted mixture to be slowly and regularly poured or discharged therefrom, or heated to the desired extent, if already fluid or partially fluid. After the mixture has become sufficiently hard, there is then poured, flowed or otherwise applied on the surface of the glass plate and between the raised lines of imitation leads transparent varnishes or lacquers, or other like substances, and of the colors which it is desired to have in the completed plates, so as to produce such a combination of colors as is seen in a genuine stained-glass plate, or any other desired combination of colors. With this construction the imitation leads prevent the variously-colored varnishes, lacquers, &c., from coming in contact with each other.

In applying the varnishes or lacquers, &c., to the glass plate, care should be taken that the said plate is not clouded, and for this reason it is better not to apply or touch the varnishes or lacquers with a brush, but to leave the varnishes or lacquers in thin coatings or layers, such as can be produced by flowing them over the surface of the glass. Suitable colored varnishes and lacquers are found in the market, and from these and from others similarly prepared and colored to any desired shade the desired colors or shades of colors can be produced upon the glass. Any transparent or translucent varnish or similar substance that will not be affected by the weather can be used. After the varnish has dried, if the glass plate thus prepared is held toward the light, it will be found to have the appearance of genuine stained glass. The imitation stained glass thus prepared can be set in frames, and can be placed in position with either side exposed to the outer air; but it is preferred to arrange them with the smooth sides of the plates outward.

Any material may be used for the imitation leads which may be caused to adhere to the surface of the glass and which projects beyond or above the surface of the glass, thereby producing sunken recesses in which the varnish, lacquer, &c., shall be applied, as stated. It may be applied to both sides, the leads being coincident in location on the glass, and the colored varnishes, &c., may be applied to one side only or to both, and the protecting coat of varnish hereinafter mentioned may be applied to both sides, if desired.

In order to protect the leads, colored varnishes, &c., and also for the purpose of binding the whole together it is preferable to cover the ornamented surface with a heavy coat of varnish preferably, although not necessarily, colorless.

SOAP VARNISH.

This varnish, owing to its cheapness, complete resistance to water, and considerable elasticity, is of value for many purposes. The following recipe for making it is given by the *English Mechanic*: Boil good tallow soap with soft water until dissolved, and filter while hot through cloths; heat again, add an equal volume of water and a boiling solution of alum as long as an alumina salt is precipitated. Let the stearate of alumina settle from off the water, and wash the precipitate thoroughly, then dry and heat on a water bath until transparent. Finally, stir the preparation into turpentine heated nearly to boiling, until a solution is made of the consistency of thick varnish, which can afterward be thinned with more turpentine if required. Johnson's waterproof varnish for paper and cloth is made by dissolving copperas in water, adding soap solution thereto, and straining off the precipitated stearate of iron. If this be dissolved in bi-sulphide of carbon, or benzole, a waterproof varnish is obtained. For a white varnish, use alum instead of copperas. Varnish for gilding is made as follows: 50 parts soda is dissolved in 100 parts water in a copper vessel, heated to boiling, and 100 parts powdered rosin stirred in and boiled for two or three hours until perfectly clear. Let cool, pour off the supernatant water from the heavy, viscous rosin soap, add 100 parts fresh water and 15 parts steeped glue, and heat till the whole is dissolved. This makes quick-drying varnish; for a slow-drying varnish add 10 to 20 parts glycerine of 28° B. The above rosin soap, mixed with about 5 per cent. ammonia, forms a very cheap and durable vehicle for paints.

A LONDON PUBLISHING HOUSE.

In the year 1763 a young Scot, named John MacMurray, received a commission as second lieutenant in the Royal Marines. He had for a friend a certain William Falconer, who in the same year published a celebrated poem called "The Shipwreck." Most readers of "Don Juan" are unaware how freely Byron "annexed" from Falconer. Seven years later, by a strange and inscrutable fate, Falconer himself perished by shipwreck. This was the very year in which Millar, of the Strand, brought out the unfortunate author's "Marine Dictionary." From Brompton (Chatham) Barracks, Lieutenant MacMurray, in 1768, wrote to Falconer at Dover that he had been introduced to William Sandby, bookseller and publisher in a small way of business. He had been recommended by some of his friends to purchase this, at the sum required—four hundred pounds. He asked Falconer to join him in the same speculation, backing his request by the canny Caledonian inducement—"especially as so many blockheads in the trade are making fortunes." Falconer declined the offer, and MacMurray took the whole responsibility of the concern upon his own shoulders. He dropped the Mac-Scots were not very popular in London so soon after the administration of Lord Bute and the publication of Wilkes's "North Briton"—and set up shop as John Murray, at the sign of the Ship, opposite Saint Dunstan's Church in Fleet street. He went to work with true Scottish pluck and tough determination. Ere long he commenced to purchase some very good and paying things. Among others, Lord Lyttelton's "Life of Henry II.," Langhorne's "Translation of Plutarch," Mitford's "History of Greece," a work which seemed written to propagate English Toryism under the guise of unrolling the scroll of Hellenic history, but to which Grote and Thirlwall have administered, even if Thucydides had not done so by anticipation beforehand. And let anyone similarly cajoled by Sir Archibald Alison, have recourse to Harriet Martineau's "History of the Thirty Years' Peace" (1815-46) as an antidote, corrective and healthy fumigant. The "Curiosities of Literature" of the elder D'Israeli (his son spelt his name the same way both on his title-pages and in his private correspondence until he was nearly thirty years of age; on his title-pages designating himself "D'Israeli the Younger") was the third and the culminating publishing attempt of the founder of the house, and the first of three John Murrays, grandfather, father and son.

The ex-Marine died in 1793, and his remains lie in St. Dunstan's God's Acre. His son, John Secundus, who was baptized by the second Christian name of Samuel, was born in 1778. During the minority of the lad, his mother, who remarried, a Lieutenant Paget being her second spouse, carried on the business in the interest of her boy, being efficiently and loyally assisted by Samuel Chigley, the principal assistant. Or young John coming of age, Chigley became a partner, but would seem to have been bought out. This is not uncommon with great publishing houses. Thus how many names—Rees, Hurst, Orme, Brown and others—have appeared on, and after a series of years disappeared from, the title-pages of the Longmans. I well recollect old Mr. Brown, who was bought out something like a quarter of a century ago, retiring with a comfortable £100,000, there or thereabouts. He was a bachelor, and lived and died in lodgings over a shop in Ludgate hill. He was an ardent churchman of the evangelical type, worshipping his Maker every Sunday

either at St. Paul's or St. Dunstan's. He was a warm personal friend of the Rev. Prebendary Auriol, late vicar of this parish. And when old Mr. Brown, who might have sat for either of Charles Dickens's Cheeryble brothers, died, he left by his will something comfortable to Mr. Auriol and his family, and a much larger sum (£30,000, if I recollect rightly) to the Simeon Trustees for purchasing advowsons, to which Low Churchmen should be preferred, of whom Mr. Auriol was one. When Brown was bought out, according to the wont of the Longmans, another meritorious old servant was brought in. This was Mr. Dyer, who had been for many years the chief and senior representative of the firm "on the road." This gave *Punch* the cue for not a bad joke. It ran somewhat thus: "We did not previously understand how it was that Longmans had Brown and Green as junior partners. But now that we learn that there is a Dyer in the shop, the whole thing is explained."

But to return to Mr. Murray. Within a few years John the Second and Highley amicably dissolved; stock, &c., being divided according to arrangement and assessment. Highley took with him what had become a considerable medical business, and removed with his *impedimenta* to No. 24, young Murray remaining at 32. In the few succeeding years Murray made some capital hits. Very notable among those was Mrs. Rundell's *Cookery Book*. I may remark that, when the obscure individual now penning this gossip was a youngster, and began in a small way to flesh his virgin steel in the biographical way, which did not answer so badly, for his publishers, if not for himself (an old, and I dare say it will prove a perennial complaint of authors), an old publisher, and wary and knowing as a fox, otter or badger—and I hardly know which is the 'cutest of these three—saying to him, "the very best speculations are to write one of these, a cookery book, a school book, or a work on prophecy." And somewhat lengthened experience has told me that he was pretty near the mark. I am sure my trade readers in all the departments which this journal represents, and especially those whose avocations and predilections make them affect the *Booksellers' Circular* as their guide, and who come in contact more directly and immediately with the public pulse and the public purse (forgive the alliteration and quasi-pun, kind reader) than the printer and his many allies—will thoroughly bear me out. When Walter Scott commenced to flood the market and enrich his own coffers by the publication of his marvelous metrical romances, Murray secured the London agency, and he retained it through the still more successful and lucrative issue of the *Waverly novels*. He was—this favored child of fortune, or rather this energetic chip of a sterling old block—the publisher of Lord Byron, whose greater poetic success than Scott's impelled the latter to prose as the vehicle for his imaginings in his latter years. Success succeeded success. In 1809 came out the *Quarterly Review*, a success from the first; a fine property ever since and to this day. Three years later Murray number two moved to Albemarle street, where he and his son have been ever since.—*British and Colonial Printer and Stationer.*

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"54,914,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

THE MANUFACTURE OF GLUE.

Glue is an inspissated jelly, made of the parings of hides or horns of any kind, the pelts obtained from furrers, the hoofs and ears of horses, oxen, calves, sheep, &c. These are first digested in lime water, to cleanse them from grease or dirt, they are then steeped in clean water with frequent stirring, afterward laid in a heap and the water pressed out. They are then boiled in a large cauldron with clean water, skimming off the dirt as it rises, and it is further cleansed by putting in, after the whole is dissolved, a little melted alum or finely powdered lime. The skimming is continued for some time, after which the mass is strained through baskets, and suffered to settle, that the remaining impurities may subside. It is then poured gently into the kettle again, and further evaporated by boiling and skimming till it becomes of a clear darkish brown color. When it is thought to be strong enough, it is poured into frames or moulds about six feet long, one broad and two deep, where it gradually hardens as it cools, and is cut out when cold into square cakes. Each of these is placed in a sort of wooden box open in three divisions to the back; in this the glue, while yet soft, is cut into three slices by an instrument like a bow, with a brass wire for its string. The slices are then taken out into the open air and dried upon a kind of coarse network, fastened in movable sheds four feet square, which are placed in rows in the glue-maker's field. When perfectly dry and hard it is fit for sale. That is thought the best glue which swells considerably without melting by three or four days' immersion in cold water, and recovers its former dimensions and properties by drying. Glue that has got frost or that looks thick and black, should be melted over again. To know good from bad glue, the purchaser should hold it between his eye and the light, and if it appears of a strong, dark color, and free from cloudy or dark spots, the article is good.

To this account may be added some experiments on a glue made from the raspings and trimmings of ivory, the refuse pieces and shavings of the button-mold makers, and other pieces of hard bone, that cannot be turned to account in entire manufacture. Six pounds of button-mold shavings were put into a copper boiler with twenty-four quarts of cold water, and first let soak for two hours. The fire was then kindled and the liquor slowly brought to boiling, and kept at this heat for nine hours. After standing a night, fourteen quarts of clear gelatinous liquor were drawn off by a syphon, and two quarts more were obtained by pressing the residue. This was duly evaporated without addition, and when of the proper consistence was allowed to subside for half an hour, when it became firm enough to be cut into cakes, which being hung up for a fortnight in a barn, yielded about fifteen ounces of solid glue, or rather less than a sixth of the weight of the bone shavings originally used. A similar experiment made with ivory turnings yielded nearly the same proportion of glue. The jelly from these clean, white bones is at first very transparent and with but little color, but when concentrated by evaporation it always deepens in color, but if well made still remains transparent. A piece of this glue put into cold water swelled, as happens with common good glue, and in twenty-four hours had absorbed fifteen times its weight of water, but without dissolving, and by again drying in the air it returned to its original bulk and weight. It appears that at Paris there are three sorts of glue commonly sold. The best is

imported from England, and is of a deep red; the next in value is the Flemish, which is whitish and transparent, and the most ordinary glue of the country is black and opaque.

In using glue, the carpenters first break it and cover it with cold water, and let it stand for about twenty-four hours, by which, as already mentioned, it swells to many times its original bulk; after which the soaked pieces are melted, without more water, over a slow fire and kept simmering for about a quarter of an hour, with frequent stirring, and are then cooled. It is now a firm jelly, of such a consistence as very readily to be cut by any instrument, but too stiff to be tremulous. When wanted to be used, it is merely warmed, which renders it sufficiently fluid to be spread over the surface of the wood with a stiff brush. Wood joined by glue requires from one to three days to be perfectly cemented, which is known by the hardness of the portion that remains on the outside of the joining, and the force of cohesion of the best glue is such that boards as thick as any commonly used in furniture carpentering will quite as readily give

way to violence in any other part of the substance as at the joining. Glued boards will not set in a freezing temperature, the stiffening being owing to the evaporation of the superfluous water of the glue, which is prevented by great cold.

A variety of gelatinous cements of less firmness than common glue, and known by the general term of size, are made for the use of paper-hangers, gilders, book-binders, house painters in distemper, and many other trades, by boiling down in water the clippings of parchment, glove leather, fish skin, and many other kinds of skin and animal membrane. These are used either alone or mixed with vegetable tenacious substances, such as flour-paste, gum-arabic and tragacanth, and the like. The preparation of these jellies is very simple, the substance used (parchment shreds, for example,) being merely dissolved in water by boiling, strained and evaporated to a due consistence. Eel skins and the skins of other fishes make a cement which is much valued for its transparency and tenacity. —*Furniture Gazette.*

LEON ISAACS.

M. VOORSANGER.

LEON ISAACS & CO., No. 310 Chestnut Street,
PHILADELPHIA, PA.,

— MANUFACTURERS OF —

**GLUCINUM PENS.**THE **GLUCINUM PENS** are acknowledged the best series of Steel Pens in the market, comprising nine numbers. Send for Samples. This Trade-Mark and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

The annexed cut is a fac simile of one of

GILMAN'S

(Six Division)

**CHALLENGE
Letter Files**

Exhibiting a view of the File when open and affixed to the wall; also showing a view of the same when closed. As will be observed, this is an entirely new system of filing letters, from the fact that when the cover is raised immediate access is had to every one of the different filing divisions, thus obviating the necessity of pulling out drawers and raising springs or covers when wishing to file a letter or paper.

Our system saves time, and the price of our Files is from three-fourths to one-third less than other kinds. We place our

Cabinet Letter Files
ON THIRTY DAYS TRIAL.

Send for Circular and Price List.

ONE MILL RUNS CONSTANTLY ON EXTRA MACHINE-FINISHED BOOK PAPERS.

ANNUAL SALES, 4,000,000 BOTTLES.

CARTER'S INKS, MUCILAGE AND ARABIN.

THE LOUISVILLE EXPOSITION of 1883 awarded First Prize Medal, the highest given. This, with the medals previously received, make Twenty-Two Highest Awards that have been granted CARTER'S INK and MUCILAGE.

CARTER, DINSMORE & CO., Manufacturers and Proprietors.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

Correspondence.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE OF THE LOCKWOOD PRESS,
49 Federal Street,
BOSTON, February 20, 1884.

Jobbers are preparing for the Easter trade, and in their line many novelties are being displayed, some of which show considerable ingenuity in design and artistic taste in finish. There is possibly nothing tending more to elevate the tastes of the people to a just appreciation of the beautiful in their home decorations than this very card business. Every succeeding season, the people find the card souvenir even more beautiful and bearing touches of a higher art. And because of this improvement in souvenir novelties do they meet with such a continual demand. Now that publishers have created such a lively demand for their artistic productions, to hold this trade it will be necessary for them to further improve upon their novelties; presenting such as possess originality in design, and bearing the imprint of the best artistic skill. So long as this advancement is continued, just so long will the business be found profitable. For designers and artists the field is wide, and the people are ready for the advanced studies.

While on the subject of cards and art novelties, I would say a word in behalf of the legitimate jobbers, who complain a little of the business policy of some of the large publishers and manufacturers in their efforts to dispose of their goods. Said a prominent dealer: "My business is jobbing cards and art novelties; I make a specialty of that line of goods, and buy my stock from the manufacturers at such rates as they choose to make. I must stock up early in each season and be prepared for the number of small dealers who are placing orders. As the season advances, a representative of the manufacturer makes another call, my stock is light, and I order more goods; but because I want them, I must pay card rates, subject, of course, to the regular trade discounts. Now, so far, it is all right, fair trading, strictly business. But after the jobbers have taken all they think the trade will stand, the big dry-goods houses are kindly invited to lay in a stock of cards, and at figures that jobbers can't compete with. The dry-goods houses don't care whether they make anything on cards or not; they advertise special bargains in art novelties—prices way down—to get the people into their stores, in the hope that other purchases might be made at the same

time. The small dealers that the jobbers have supplied are left with their stock unsold, and we must store away our goods for next season. Now, if dry-goods houses want to sell cards, art novelties, groceries, boots and shoes, hardware, and everything else, let the manufacturers charge them as much as they do the jobbers, and not ruin the business in this way." Such are some of the complaints I hear, and it does seem as though the manufacturers ought to protect jobbers who are engaged exclusively in pushing their goods.

J. Baird reports that the valentine trade was very good, and that the outlook for Easter business is quite encouraging. In embossed pictures and shape goods this house carries an immense stock. This line of goods, not depending upon any particular season, has a ready sale the year round. Within the past year the business of the house has been fully doubled, and this increasing trade is not confined to the East, but extends far into the South and West. Travelers representing this house are now on the road, and orders are being booked in goodly numbers.

In fashionable stationery I notice that the grained morocco is taking the place of the alligator-skin paper. Ragged-edged paper still holds its place. This paper now bears upon the corner various artistic designs representing some odd fancy, or the monogram of the owner is seen stamped upon a sunken square. Another style displayed in ragged paper, has a fac-simile of one's handwriting scratched across the corner in gold, and this is the leading agony. Mourning note-paper shows a very elegant crape-finished border. Pure white paper still holds as the proper thing for invitations. For society correspondence fashion retains the square envelopes of moderate size.

It was at the Beacon street quarters of H. H. Carter that I found this display of fancy stationery. The genial proprietor finds trade very satisfactory, and is laying in an immense stock of novelties for the Easter season. His line of Easter cards embraces the productions of all of the prominent manufacturers, and they are put up in job lots of assorted designs, which are offered the trade at "bed rock" prices. In ruled papers and envelopes the house is doing a large business with job lots. Samples of the various grades, with prices, are sent upon application to any stationer in the country.

Paper-box makers and other users of paper boards will be interested to learn that Spaulding & Tewksbury, of this city, are supplying the trade with a new article in this line. The box-boards offered by this firm are made from a combination of straw and wood pulp, under a patent owned by the Patent Pulp-Lining Com-

pany. By this combination the boards are rendered more pliable and not so liable to crack. Every description of paper boxes known to the trade can be made from these boards. Of these boards—white, colored and manilla—the various fancy colored boards are meeting with a steady increasing demand, as by their use no extra covering is needed. This is quite a saving of itself, and when a further saving in the price of these boards is noted, their increasing demand is not surprising. The mill, for the manufacture of their patent lined boards, was started in December last, and the quality of the board is of a high grade. As such is it recommended to the trade by Spaulding & Tewksbury.

A. L. D.

LOUISVILLE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., February 16, 1884.

Sensational flood-news is abundant just now. Let us get at the facts. The Signal Service observer at this station measures the water at the head of the canal here, and his record shows that on January 29, less than three weeks ago, the depth was 7 feet 4 inches; on February 1 it was 13 feet 7 inches; on February 8 it had reached 40 feet; on February 15 the gauge showed 46 feet 7 inches. The head-lines of a local daily, beginning a week ago, were as follows: Invaded by Water—A Flood on the Way—Still Rising—Growing Worse—Build Your Ark—The Mad River—Surpassed!

On Thursday, the 14th inst., after eleven days of steady rains and unremitting gloom, the sun shone out and the weather turned cool and firm. Yesterday the maximum height of the water was reached, the same being 20 inches higher than the unprecedentedly high range of February, 1883. Last year, from the beginning of the flood to its climax on February 16, the rainfall between Louisville and Cincinnati was nearly the same, being respectively 7.67 and 8.18 inches. This year, however, the rainfall above Cincinnati was far greater than last year. The *Courier-Journal* states that the Ohio and its tributaries, from Pittsburg to Cairo, Ill., would make a river 4,450 miles long, and that when it is considered that they drain the entire Ohio valley, into which has fallen in the past twelve days enough rain to cover it to a depth of 8 inches, there need be no wonderment expressed at the flood resulting therefrom. Louisville's entire river front, seven miles, is submerged for varying distances inland. It is estimated that there are 5,000 people driven from their homes in this city, 5,000 in Jeffersonville, and 3,000 in New Albany, making 13,000 tem-

porarily homeless and partially helpless beings in the three Falls cities.

Owing to last year's experience, which served as a precaution and warning, the direct damage by this year's flood here is no doubt smaller. The indirect loss by suspension of railroad transportation owing to the flooding of tracks and a leading depot on the river front here, but more especially at other points and connecting roads, is considerable. Grain and produce receipts were greatly curtailed and general business was materially checked. The Southern channels of shipment, however, have been preserved almost perfectly and Louisville has moved a full volume of goods in that direction with only little interruption. The property submerged here is principally a cheap class of dwellings and a moderate number of saw-mills, foundries, pork houses and warehouses of heavy goods. The loss falls largely on the laboring classes in this city and in the adjacent cities of Jeffersonville and New Albany, Indiana, both through the damage to homesteads and suspension of work in the manufactories of which some of the most extensive are on the river front. It is thought safe to say that Louisville suffers comparatively less than any city in the inundated district. This city cared for all of the sufferers within her borders last year and will do the same in the present emergency. The relief committee will not solicit contributions from abroad and all aid received from outside will be applied by the Mayor to the relief of farmers and villagers in the bottoms who cannot secure corporate aid. The distress among small farmers must be especially great, as in most cases they have no neighborhood to draw on as have the dwellers in cities.

Notwithstanding the interruption by the floods there has been a fair amount of business transacted in general jobbing circles, and receipts of spring orders from Kentucky and Southern trade have been sufficient to mark a gradual opening of the new season's operations. Collections, where the roads and mails are in normal condition, are coming in with average promptness. The banks report a steady increase of idle balances, and borrowers can readily have their demands supplied at 6 and 7 per cent. on time paper and at 5 per cent. on collateral loans. The high price obtained for leaf tobacco is putting the rural districts in comfortable shape.

The Bremaker-Moore Paper Mills, which were invaded by the water last year, built a cofferdam about their entire plant on the advent of the present flood rains, and the water crept up at such an unprecedented rate that it was found necessary to build it higher early in the week, a desperate race ensuing between the dam-builders and the flood; but the perseverance of the Bremaker-Moore people was rewarded by a victory; pumps are at work keeping the water from accumulating in the sub-cellar, and their Falls City Mills do not suspend work this year.

Du Pont & Co., of the Louisville Paper Mills, have water in Tenth and Munro streets sides of their mammoth factory, but are prepared to evade much damage.

The waters began to recede to-day, and unless further rains ensue it will not take many days for the river to get back in its old bed and trade get back in the usual channel. BOURBON.

The *Pharm. Centr.* suggests the use of $7\frac{1}{2}$ per cent. solution of caustic lime as a solvent for many gum resins, the solutions mixing with water without precipitation. The following degrees of solubility have been noted: Ammoniacum, one part in four; myrrh, one in five; guaiacum, one in seven; opium, one in ten; catechu, one in ten; aloes, one in fifteen; asa-fœtida, one in fifteen.

MANGANESE AND ITS USES.

Manganese is one of the heavy metals of which iron may be taken as the representative. It is of a grayish-white color, presents a metallic brilliancy and is capable of a high degree of polish, is so hard as to scratch glass and steel, is non-magnetic and is only fused at a white heat. As it oxidizes rapidly on exposure to the atmosphere, it should be preserved under naphtha.

It occurs in small quantity in association with iron in meteoric stones; with this exception it is not found native. The metal may be obtained by the reduction of its sesquioxide by carbon at an extreme heat.

Manganese forms no less than six different oxides—viz., protoxide, sesquioxide, the red oxide, the binoxide or peroxide, manganic acid and permanganic acid. The protoxide occurs as olive-green powder, and is obtained by igniting carbonate of manganese in a current of hydrogen. Its salts are colorless or of a pale rose color, and have a strong tendency to form double salts with the salts of ammonia. The carbonate forms the mineral known as manganese spar. The sulphate is obtained by heating the peroxide with sulphuric acid till there is faint ignition, dissolving the residue in water and crystallizing. It is employed largely in calico printing. The silicate occurs in various minerals.

The sesquioxide is found crystallized in an anhydrous form in braunite, and hydrated in manganite. It is obtained artificially as a black powder by exposing the peroxide to a prolonged heat. When ignited it loses oxygen, and is converted into red oxide. Its salts are isomorphous with those of alumina and sesquioxide of iron. It imparts a violet color to glass, and gives the amethyst its characteristic tint. Its sulphate is a powerful oxidizing agent.

The red oxide corresponds to the black oxide of iron. It occurs native in hausmannite, and may be obtained artificially by igniting the sesquioxide or peroxide in the open air. It is a compound of the two preceding oxides.

The binoxide, or peroxide, is the black manganese of commerce, and the pyrolusite of mineralogists, and is by far the most abundant of the manganese ores. It occurs in a hydrated form in varvicite and wad. Its commercial value depends upon the proportion of chlorine which a given weight of it will liberate when it is heated with hydrochloric acid, the quantity of chlorine being proportional to the excess of oxygen which this oxide contains over that contained in the same weight of protoxide. When mixed with chloride of sodium and sulphuric acid it causes an evolution of chlorine, the other resulting products being sulphate of soda and sulphate of protoxide of manganese. When mixed with acids, it is a valuable oxidizing agent. It is much used for the preparation of oxygen, either by simply heating it, when it yields 12 per cent. of gas, or by heating it with sulphuric acid, when it yields 18 per cent. Besides its many uses in the laboratory, it is employed in the manufacture of glass, porcelain, and kindred wares.

Manganic acid is not known in a free state. Manganate of potash is formed by fusing together hydrated potash and binoxide of manganese. The black mass which results from this operation is soluble in water, to which it communicates a green color, due to the presence of the manganate. From this water the salt is obtained *in vacuo* in beautiful green crystals. On allowing the solution to stand exposed to the air, it rapidly becomes blue, violet,

purple, and finally red, by the gradual conversion of the manganate into the permanganate of potash; and on account of these changes of color the black mass has received the name of mineral chameleon.

Permanganic acid is only known in solution or in a state of combination. Its solution is of a splendid red color, but appears of a dark violet tint when seen by transmitted light. It is obtained by treating a solution of permanganate of baryta with sulphuric acid, when sulphate of baryta falls, and the permanganic acid remains dissolved in the water. Permanganate of potash, which crystallizes in reddish purple prisms, is the most important of its salts.

Manganese is a constituent of many mineral waters, and is found in small quantities in the ash of most vegetable and animal substances. It is always associated with iron.

Various preparations of manganese have been employed in medicine. The sulphate of the protoxide in doses of one or two drachms produces purgative effects, and is supposed to increase the excretion of bile; and, in small doses, both this salt and the carbonate have been given with the intention of improving the condition of the blood in cases of anæmia. Manganic acid and permanganate of potash are of great use when applied in lotions (as in Condry's Fluid diluted) to foul and fetid ulcers. In connection with the medicinal applications of manganese, it may be mentioned that manganic acid is the agent employed in Dr. Angus Smith's celebrated test for the impurity of the air.

It is the glassmaker's soap of glass manufacture, and is used to correct the green color of glass, which is owing to the presence of protoxide of iron. This it converts into the comparatively colorless peroxide. It is also used in the Bessemer and similar processes to decompose the oxide of iron. Spiegeleisen, an iron which contains a natural alloy of from 10 to 12 per cent. of manganese, is used for this purpose when conveniently attainable.

BRONZING COPPER.

Dissolve in 100 parts of acetic acid of moderate concentration (or in 200 parts of strong vinegar) 30 parts of carbonate or hydrochlorate of ammonium, and 10 parts each of common salt, cream of tartar and acetate of copper, and add a little water. When an intimate mixture has been obtained, smear the copper object with it, and let it dry at the ordinary temperature for twenty-four or forty-eight hours. At the end of that time the object will be found to be entirely covered with verdigris presenting various tints. Then brush the whole, and especially the reliefs, with a waxed brush, and if necessary, set off the high reliefs with hematite or chrome yellow, or other suitable colors. Light touches with ammonia give a blue color to the green portions, and carbonate of ammonium deepens the color of the parts on which it is laid. A variety of bronzing lacquers are to be found in the market, called usually water bronzes, and which are applied with a brush. Spon, in his "Workshop Receipts," gives following method: Dissolve in vinegar 2 parts of the verdigris and 1 part of sal-ammoniac; boil, skim and dilute with water until no more white precipitate separates. Meanwhile place the articles to be bronzed, properly freed from grease, in a pan and pour the boiling solution over them, letting it boil briskly. The resulting coloration is a bright reddish-brown; but the articles should be frequently inspected, and removed as soon as the desired shade is obtained. They should then be repeatedly washed and dried. The solution must not be too strong, as in that case the bronze will come off by friction, or turn green on exposure to the air.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

L. PRANG & CO.'S

1884. EASTER CARDS. 1884.

FOR THE COMING EASTER SEASON we have prepared a line of Cards and Silk Novelties, which we are confident will compare favorably with our previous efforts, and will meet with a ready sale. The following Artists are among the contributors to our line:

Miss FIDELIA BRIDGES,
Miss L. B. HUMPHREY,
Mrs. O. E. WHITNEY,

Miss L. B. COMINS,
Mrs. E. T. FISHER,
Miss ALICE C. SWAN,
Etc., Etc.

W. HAMILTON GIBSON,
WALTER SATTERLEE,
F. SCHUYLER MATHEWS,

Among the Cards of the regular line we would mention the following series as of special merit and attractiveness:

- No. 705.—TRIANGULAR FLOWER CARDS, by MRS. O. E. WHITNEY.
- No. 711.—MOVABLE SHAPED CROSS (figure design), by Miss L. B. HUMPHREY.
- No. 712.—BIRDS, by MISS FIDELIA BRIDGES. A very attractive series.
- No. 713.—FLOWERS ON PURPLE GROUND, by MRS. O. E. WHITNEY. A gorgeous series.
- No. 714.—FIGURE DESIGNS, by WALTER SATTERLEE.
- No. 715.—BUTTERFLY DESIGN, by W. HAMILTON GIBSON. This is emblematic of the Resurrection, and we think one of the most Striking Easter Cards ever published.
- No. 716.—EASTER LILIES, by MRS. E. T. FISHER. A very chaste and appropriate card.
- No. 717F.—WISTERIA EASTER CROSS. A fitting companion card to our last year's Water-Lily Cross, which proved so popular.

— BESIDES THESE, SPECIAL ATTENTION IS CALLED TO OUR —

SATIN ART PRINTS FOR EASTER,

Consisting of appropriate Flower and Figure designs. Our Satin Art Prints are put up in the following styles:

“A” STYLE.—A richly fringed tinted Mount, with cord and tassels for hanging.

PLUSH MOUNTS.—Fine mounts, made of rich plush of various appropriate colors, with easel back.

“B” MOUNT.—An exquisite Satin Mount of various colors, with extra fine quality shaded triple fringe, satin ribbons and bow, cord and tassels for hanging.

“C” MOUNT is a fine combination of rich plush and satin in contrasting colors, with cord and ribbon, easel back.

“D” MOUNT is similar to the “C” Mount, with the addition of extra fine quality scalloped silk fringe trimming and satin bow, easel back.

~ EASTER SPECIALTIES. ~

EASTER CAROL CARDS.—Peculiarly appropriate to the season, being printed in mediæval style in red and black upon hand-made paper

SERIES I., EASTER CAROL CARDS.—Printed in red and black.

SERIES II., BOOKLETS of four pages, with mediæval carols and cover of hand-made paper printed in red and black.

Our extensive line of BIRTHDAY CARDS has received several attractive additions, and we have also issued SEVERAL new series of SCRIPTURE TEXT-CARDS.

 PRICE LISTS OF EASTER CARDS ARE NOW READY.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 291,875. Air Cushions for the Reciprocating Beds of Printing Presses.—Andrew Campbell, Brooklyn, assignor to John and Edmund McLoughlin, New York, N. Y.

The two opposite air-bells are connected together, so that they can be made to approach or recede from each other simultaneously while the bed is running. By this means the depth of the air cushions can be adjusted equally, according to the speed of the press.

No. 291,879. Combined Pen-Holder, Pencil and Tooth-Pick.—Richard M. Collard, New York, N. Y., assignor to Leroy W. Fairchild, same place.

In combination with a shell or case, a pencil-point provided with a magic movement and adapted to be projected from one end of the shell or case, a tooth-pick point furnished with a simple screw movement and adapted to be projected from the opposite end, and a pen-slide encircling the screw movement and adapted to be protruded from the same end of the case as the tooth-pick.

No. 291,886. Pen and Pencil Case.—Leroy W. Fairchild, New York, N. Y.

No. 291,905. Press for Stencil Printing.—John C. Hill, Fayetteville, N. Y.

No. 291,912. Delivery Apparatus for Printing Machines.—Conrad Kahler, Chicago, Ill.

No. 291,921. Frame for Diplomas and Credit Cards.—Alexander W. McArthur, Arroyo Grande, Cal.

In a frame or mount, a sheet of paper or other suitable material, having perforations, and a second sheet adhering to the back of the first, said second sheet having perforations smaller than the first, so that a portion or rim of the second sheet shows through the larger perforations, in combination with a slip of paper or other suitable material of the size and shape of the larger perforation and adhering to the exposed rim of the second sheet, and a second slip of paper the size and shape of the smaller perforation and adhering to the back of the larger slip.

No. 291,925. Stylographic Fountain Pen.—Edwin W. Morton, White Plains, N. Y.

In a fountain pen using ink, the combination of a needle carrying an armature with a permanent magnet.

No. 291,939. Shelf Oil-Cloth.—Edward R. Riesenfeld, New York, N. Y., assignor to Charles H. Wight, same place.

As a new article of manufacture, a shelf-covering, consisting of a strip of enameled or water-proof cloth or other fabric, having a plain portion to cover the top of the shelf, and a printed decorative border on one side to overhang the edge of the shelf.

No. 291,964. Fountain Pen.—Walter H. Wales, Providence, R. I.

No. 291,969. Inking Attachment for Printing Presses.—Benjamin S. Whitehead, Newark, N. J.

An inking attachment for a printing press, consisting, substantially, of a collection of revolving inking disks arranged in parallel rows above the frame-work in or on which they revolve, the peripheries of the disks of adjacent rows engaging with one another.

No. 291,998. Pencil-Holder.—Bernhard Eybel, New York, N. Y.

No. 292,086. Easel.—Delbert K. Woodward, Lordstown, Ohio.

No. 292,093. Tag-Attaching Device.—Lorenzo Davis Bond, Washington, D. C.

An attaching tag or similar device consisting of a suitable tag proper, a cord, and rigid ring or loop.

No. 292,106. Calendar.—John Cussons, Glen Allen, Va.

No. 292,116. Mucilage Bottle and Holder.—Nathan B. Hubbard, Chicago, Ill., assignor of one-half to John Gray, same place.

No. 292,136. Lead and Crayon Holder.—Benjamin G. Platt, Bayonne, N. J.

No. 292,137. Fountain Attachment for Pens.—Geo. W. Price, Baltimore, Md., assignor to Bernard N. Baker, same place.

A fountain attachment for pens, consisting of a spiral wire and a holder for the same, having a back piece to shield the spiral coils, and a stiff piece, extending through the spiral coils, and adapted for connection with a pen-holder on top of the pen.

No. 292,162. Pencil-Sharpener Holder.—Walter Kirtledge Foster, Stoneham, Mass.

A pencil-sharpener holder composed of a handle and of two yokes extending therefrom, consisting of two wires bowed or arched at their middles, and bent toward and lapped on each other.

No. 292,181. Process of Making Relief Printing Plates or Blocks.—Proctor R. Shugg and George Boyle, New York, N. Y.

1. A sensitive plate composed of gelatine, albumen, glycerine, resin and bichromate of ammonia. 2. A method of hardening relief gelatine plates, consisting in treating such gelatine plates successively to baths of solutions of bichromate of ammonia, nitrate of silver, sulphate of iron, and ammonium hydrosulphite.

No. 292,190. Base-Ball Bat.—William Williams, Huntingdon, Pa.

As a new article of manufacture, a base-ball bat composed wholly or in part of pulp molded and condensed.

No. 292,204. Portable Hammock Support.—Egbert C. Cook, Chicago, Ill.

No. 292,270. Case for Holding Pencils, &c.—Hellmuth F. Werner, Milwaukee, Wis.

No. 292,312. Musical Game.—William L. Hofer, Manhattan, Kan.

No. 292,313. Lead-Holder for Pencils.—John Holland, Cincinnati, Ohio.

No. 292,350. Toy Work-Bench.—Adolf Pfaendler, Brooklyn, N. Y.

No. 292,392. Supplementary Cell for Type-Cases.—Philip W. Wiley, Raleigh, N. C., assignor to Golding & Co., Boston, Mass.

A supplementary cell for type-cases, consisting of a removable compartment provided with an integral spring bent below the upper edge of the cell, to form a stop.

No. 292,412. Book-Mark and Pencil-Holder.—Edward T. Covell, New Bedford, Mass.

A book-mark and pencil-holder consisting of two spring-impelled jaws hinged or pivoted together, and each provided with a finger-piece at one side of their hinge or pivot to swing the jaws on such hinge or pivot, one of the finger-pieces being bent into a tubular pencil-holder having a longitudinal free edge.

No. 292,456. Programme-Clock.—Theodore Wilmer, Milhausen, Ind.

1. The combination of a dial-plate or chart divided into a series of columns, and a series of concentric divisions adapted to be marked with one or more days of the week, with the recita-

tions for one or more days in their sequence, and with the time allotted for each, a pointer marked with the days of the week corresponding to those that may be marked on the dial-chart, and any suitable mechanism for moving the pointer over the dial-plate, so as to pass it from one column to the other, to indicate when the time for one recitation has ended and that for the next arrived. 2. The combination, with a clock to indicate the hours of the day, of a dial-chart or plate divided into a series of columns and a series of concentric divisions, adapted to be marked with one or more days in their sequence, and with the time allotted for each, a pointer marked with the days of the week corresponding to those that may be marked on the dial-chart, and mechanism for moving the hour-indicating hands of the clock to indicate the hour of the day, and in unison therewith the pointer over the dial-plate, so as to pass it from one column to the other, to indicate when the time for one recitation is ended and that for the next arrived.

TRADE-MARKS.

No. 10,855. Periodical Publications.—Henry C. Meyer, New York, N. Y.

"The words 'Sanitary Engineer,' the peculiar style of type or letter in which the same are displayed.

PAINTING ON ZINC.

According to the *Painters' Magazine*, painting on zinc is made easier by employing a mordant composed of one quart of chloride of copper, one of nitrate of copper, and one of sal ammonia, dissolved in sixty-four parts of water, and to this mixture is added one part of commercial hydrochloric acid. This is brushed over the plate of zinc, and after twelve or twenty-four hours it dries a dullish gray color. Painting upon this surface the colors will adhere in a perfect manner. Another method, according to the same authority, is as follows: Procure some muriatic acid of full strength, and drop into it some pieces of zinc until effervescence ceases. Add an equal quantity of water, and with a sponge tied to a stick wash over every part of the surface to be painted. This roughens the surface and takes off that sort of greasiness which prevents paint from adhering. After the acid has remained a short time wash it over with water or diluted vinegar, dry off and paint.

CONVICT LABOR AND PRINTERS.

Charles A. Bridges appeared before the Legislative Committee in Boston on 13th inst., to represent the Boston Printers' Union and the Central Trades' Union, to remonstrate against any action looking toward the printing of school text-books by convicts. He did not believe that such a thing is practicable, for the reason that the printing of text-books requires the utmost skill and cannot be learned under a five years' apprenticeship. Not one in twenty-five of the printers of Boston are capable of setting up correctly a page of algebra; or even of a common arithmetic. Owing to the competition among publishers text-books are increasing in excellence all the time. If the State should do all the work competition would cease and the books must either deteriorate in quality or the State must appropriate large sums of money to keep up with the times. There is not a printer in Boston who does not laugh at the idea of printing books at the State prison at anywhere near the cheap price they are now furnished at.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Robert Neale, plate printer, New York city, is dead.

C. F. Meacham, printer, Rockingham, Vt., has sold out.

Reuben Wood, dealer in toys, &c., Syracuse, N. Y., is dead.

The Antioch Ledger, Antioch, Cal., has suspended publication.

Sweezy & Livesey, publishers, Omaha, Neb., have dissolved partnership.

George W. Ely, dealer in paper hangings, &c., Palmer, Mass., has sold out.

High & Conklin, publishers, Socorro, N. M., have suspended and will go out of business.

W. A. Murphy has bought the stationery business of Sigel Ashman, Whitehall, Mich.

B. G. Landman, printer, Cincinnati, Ohio, has made an assignment to J. M. Fitzgerald.

Henry S. Tilton, dealer in pictures and picture frames, Andover, Mass., has been burned out.

George P. Steinbach, dealer in toys, &c., Baltimore, Md., is advertising to sell out his retail business.

A dissolution has taken place in the firm of Sullivan, Hayden & Co., printers and stationers, Boston, Mass.

G. S. Thayer has succeeded Thayer & Pratt, cardboard manufacturers, North Adams, Mass., the latter firm having dissolved.

The Russell Publishing Company, Boston, Mass., has dissolved. P. J. Andrews continues the business under the same style.

S. & G. Gump & Co., dealers in picture-frames, &c., Portland, Ore., have dissolved partnership. S. & G. Gump succeed to the business.

C. A. Coffin & Rogers, printers, 85 John street, New York, have taken another loft, the demands of their business requiring more space.

J. H. McKinnon & Co., booksellers and stationers, Waterbury, Conn., have dissolved partnership. J. H. McKinnon continues the business.

A dissolution has taken place in the firm of H. N. Brooks & Co., booksellers and stationers, Meriden, Conn. H. N. Brooks will continue the business.

Noah B. and Frank W. Price, composing the firm of Price & Co., manufacturers of mucilage, &c., at No. 84 Marion street, New York, made an assignment on Friday. The business was established several years ago, with a small capital.

The schedules in the assignment of Franklin Hill, paper dealer, at No. 19 Beekman street, New York, to Isaac B. Potter and William Woods, have been filed, showing liabilities, \$6,282.26; nominal assets, \$3,028.67, and actual assets, \$2,260.88.

W. N. Dickinson, formerly of W. N. Dickinson & Co., 75 Fulton street, and late manager of the wedding and stationery department of Tiffany & Co., is now with the Whiting Paper Company, of Holyoke, which has just started a new department for the production of envelopes and fine stationery.

F. Sibell & Co., stationers, at No. 206 Pearl street, New York, made an assignment on Saturday last to Walter N. Capen, of No. 142 Waverly place. The liabilities and assets are at present unknown, but it is thought that the liabilities are about \$4,000. The schedule will be prepared in a few days. First preference is given to Sarah S. Sibell for \$3,000, money loaned to Mr. Sibell, and for which he gave a promissory note. Preference is next given to C. W. Barnes & Co. for \$997.20; Henry Bainbridge & Co. for \$430.20; the National Blank-Book Company for \$381.80, all of which indebtedness is for goods sold to the firm on credit. The cause of the failure Mr. Sibell attributes to illness and the action of his partner, Mr. Hyer, who, he claims, has been making purchases on behalf of the firm, which he (Mr. Sibell) repudiated. The firm in connection with its stationery business did quite a large printing business. This was under the supervision of J. Monheimer. Immediately after the assignment was made, Mr. Monheimer issued a notice, stating that the business of the firm would be carried on by him under the style of J. Monheimer & Co. The new firm will also do a lithographing and blank-book business.

John Legget's straw-board mill, at Middle Grove, Saratoga County, N. Y., was burned on Friday night, February 15. Loss, \$30,000; insurance, \$17,000.

The Ripley Manufacturing Company, Unionville, Conn., is making a very good article of binders' board, which deserves the attention of the trade.

The stock of the establishment of J. J. Smith & Co., manufacturers of printers' ink, &c., Toronto, Ont., is advertised to be sold by auction.

T. F. Stoneham, window shade manufacturer, Montreal, Quebec, has admitted Joseph Sepling to partnership. The firm is now T. Stoneham & Co.

The Birnie Paper Company, Springfield, Mass., announces that Sidney A. Grant has not been in its employ since January 12.

William Newell, of the firm of Newell & Hawks, manufacturers of printers' rollers, San Francisco, Cal., is dead.

F. C. Boyd & Co., manufacturers of ink and mucilage, New Haven, Conn., are reported to have left that city.

Joseph Stelwagon's Sons, paper manufacturers and dealers, Philadelphia, Pa., have been sold out by the sheriff.

The capital of the Union School Furniture Company, Battle Creek, Mich., has been increased to \$85,000.

An assignment has been made by Carlton McCarthy & Co., booksellers and stationers, Richmond, Va.

L. Baumeister & Co., manufacturers of novelties, Bridgeport, Conn., have dissolved partnership.

Thaddeus Bell, newsdealer, &c., Darien, Conn., has been burned out. Partly insured.

Carleton McCarthy & Co., booksellers and stationers, Richmond, Va., have sold out.

M. A. Clark, bookseller and stationer, Paisley, Ont., has made an assignment in trust.

George W. Hopkins, stationer, &c., Topeka, Kan., has sold out to W. F. Monteith.

Marcus Ward & Co. report a brisk trade in their hand-made paper.

Joseph H. Rees, paper-hanger, Philadelphia, Pa., is dead.

A. P. Sandberg, engraver on wood, Chicago, Ill., is dead.

Edward Todd & Co., will shortly bring out a new gold pen.

J. M. Fitzpatrick, bookseller, &c., Hebron, Neb., has sold out.

J. S. Burton, dealer in school books, &c., New York city, is dead.

F. A. Manger, printer, Omaha, Neb., has been burned out; insured for \$700.

Conroy & Larkin, booksellers and stationers, Hartford, Conn., have dissolved partnership.

J. Scott & Co., newsdealers, &c., Albuquerque, N. M., has been succeeded by Scott & Bigelow.

The firm of Charles F. Foskett, dealer in wall-paper, &c., Olney, Ill., has been changed to Foskett & Gaffner.

Bailey Brothers, booksellers, &c., Martinsburg, Ohio, have sold out their other interests and will carry on a book business exclusively.

The factory for the manufacture of looking-glass and picture-frames, at Milford, N. J., employs twelve men and uses 12,000 feet of lumber each month.

Sheehan & Co., booksellers and stationers, Ann Arbor, Mich., have dissolved partnership. John V. Sheehan continues the business under the same style.

Charles Taber & Co., dealers in photographic materials, &c., New Bedford, Mass., have been damaged by fire about \$5,000. They are insured. They are able to fill orders for goods promptly.

A. C. Cunningham, tag manufacturer and dealer in tags, is offering a very extensive line of tags, pin tickets, gum labels, &c., to the trade. These goods come in different sizes, colors and shapes, and are made to order if desired.

The Palmer Art Company is this week showing a new line of Easter goods in plush and satin, in numerous pretty designs. A white, cross-shaped card is of plush with a beautiful cross on satin. A large, square card has a cross on a background of pink satin, with a bordering of plush and fringe. It is gotten up with the utmost good taste, being really rich and elegant in every way. There are also shown a number of very attractive things in crystal photographs with frames of swans' down, plush panel cards with birds' nests and wreaths of flowers ornamented with nickel anchor and appropriate Easter mottoes, bon-bon boxes and German favors, which come in the shape of panels, bellows, hearts, &c., with satin bags for confectionery.

The King Manufacturing Company, 135 E. 8th street, New York, has recently introduced a very fine line of Easter goods, which are especially noticeable for their freshness of design and novelty. The line generally consists of imitation hammered-gold paper, as well as satin and plush goods, with hand-paintings. The goods come in various novel designs, originated exclusively by this company. A pretty device is a folding card which, unlike the usual style of folding cards, opens diagonally from the upper and lower corners, showing a beautiful floral or other painting in oil or water colors. The hammered-gold paper cards are entirely new to the trade, and must prove very popular. Every variety of style is shown, from the ordinary square and panel card to the novel folding cards before mentioned. The company has a great variety of cards with plush backgrounds of different shades and beautiful floral designs in plush. The price of these goods is very reasonable. The King Manufacturing Company has

also a very fine line of plush and oxydized easels, which are first-class in every respect.

F. G. Richards, of the firm of Richards & Co., paper manufacturers, Gardiner, Me., is dead.

George S. Gibson, news and fancy-goods dealer, Clinton, Mass., is advertising to clear out.

Balsley & Lutton, wholesale and retail dealers in toys, Alleghany, Pa., are selling out at auction.

Francis Cartwright, of Francis Cartwright & Co., wholesale dealers in rags, Philadelphia, Pa., is dead.

Allen & Chamberlain, dealers in stationery, &c., Paterson, N. J., have dissolved partnership. Henry T. Allen continues the business.

Edwin Fitzgeorge has succeeded to the business of Fitzgeorge & Stuckert, printers, Trenton, N. J., the old firm having dissolved.

Collins & Cash, publishers of the *Winsted Argus*, Winchester, Conn., have dissolved partnership. E. R. Collins succeeds to the business.

D. W. Lapham has introduced to the trade a new stylographic pen. It is neat, practical and durable, simple in construction, easily understood and every pen is warranted to give satisfaction. The pen is made of hard rubber, nicely engraved, and it also comes in plain or gold-mounted styles. An illustration and description of the pen will be given in a future issue of THE STATIONER.

E. I. Horsman has issued an illustrated catalogue of novelties in children's blocks, games, toys, &c. The catalogue includes the latest devices in building blocks, story blocks, A B C blocks, illuminated picture-blocks, Mother Hubbard blocks, and many other blocks in a great variety of new and popular styles. In toys and games there are shown a full line of standard as well as new goods. Mr. Horsman has also issued a catalogue of lawn games, base-ball, ten-pins and balls for bowling-alleys, boxing-gloves, bicycles, &c.

The National Publishing Company, manufacturer and publisher of family and pulpit bibles and photograph albums, 728 Cherry street, Philadelphia, claims to offer to the trade the largest and most beautiful assortment of bibles and albums manufactured in this country. Its bibles, from the cheaper to the most expensive, are always kept up to a high standard in printing, paper and binding. They are bound in elegant designs, in the strongest and most durable manner. The covers of the bibles are all laced in with strong twine—in fact, cut in boards—and not bound like cloth books and glued into the covers, as other publishers bind their bibles. It is well known that durable bindings are important points to be considered in a well-made family or pulpit bible. The company's new spring catalogue just issued is a very handsome piece of work. The display of cuts showing the different styles of bindings is invaluable to the trade in making up their orders.

C. M. Ward, New York, agent for the Cincinnati Paper Novelty Company, reports a brisk demand for the patent reversible document and sample envelopes manufactured by the firm named. These envelopes are excellently adapted to the use of lawyers and business men for filing away legal documents and sending out samples to the trade. No stationer should fail to have them in stock. They can be ordered through Mr. Ward, who will supply them at the manufacturers' prices.

Hard & Parsons, 35 Beekman street, seem to be up to the times on Easter goods and Easter novelties. Knowing well the short season for selling, and the risk which the dealer takes in handling such seasonable goods, they have brought out a line of goods possessing artistic merit which the trade will fully appreciate, inasmuch as they can be sold at any season of the year. The line is wholly unlike any goods of this character heretofore produced and embraces some three hundred numbers. It is highly gratifying to this house that the trade have so well shown their appreciation in the way of fine orders, which now keep its factory running day and night to get orders out on time. Those of the trade who have not yet seen these goods would do well to communicate with the house.

Noah B. Price and Frank W. Price, composing the firm of Price & Co., mucilage manufacturers, New York city, made an assignment in trust on February 15 to Felix Jellenik, giving the assignee power of attorney to sell their property and collect all outstanding accounts of the firm and apply the same in liquidating such liabilities of the members of the firm, individually and otherwise, as may be found to exist.

The Standard Slate Company, 265 Broadway, manufactures a noiseless slate, which has been adopted by the Boards of Education of New York and Philadelphia. This slate has a frame of grooved metal rounded at the corners, firmly muffled and covered with a heavy braid which acts as a cushion. The company's factory is at Slatington, Pa.

Thomas & Bosse, wholesale dealers in paper at Philadelphia, have failed, with liabilities reported at about \$24,000. The sheriff has taken possession of the property on judgments for about \$9,500, and a sheriff's sale is advertised for February 23. They have been in business about two years.

Smith's bookstore, at Fergus Falls, Minn., was burned on February 18. Loss, \$10,000.

A. E. Fay, publisher of the *Arizona Champion*, Peach Springs, Ariz., has removed to Flagstaff.

Joseph H. Stevenson has returned from the firm of S. A. Perry & Co., dealers in picture-frames, San Francisco, Cal.

A dissolution has taken place in the firm of Scott & Co., dealers in pictures, &c., Hartford, Conn. R. A. Gorman continues the business.

The Harvard fountain pen is a flexible gold pen affixed to a fountain or reservoir holder. It is said to be one of the best things of the kind yet introduced.

W. H. Harrison, Jr., bookseller and stationer, Toledo, Ia., has admitted W. C. Smith to an equal interest in his business and the firm-name is now Harrison & Smith.

J. G. Ditman, Philadelphia, has just come back from Florida, whither he had been not only for the benefit of his health, but also to take a look at Southern trade prospects, visiting in the course of his trip, the principal cities and towns on the Atlantic seaboard. Mr. Ditman, who is an authority on trade matters, thinks favorably of trade prospects and of the business relations which he will form.

James D. Whitmore & Co. have secured the control of a new mailing package which is novel and convenient. It consists of series of pieces of wood with beveled edge, which being glued to the surface of a square of manilla paper, fold up in the form of a box. The advantage of this package is that it lies flat or "knock down" when in stock, and thus economizes room, and can be set up for use simply by turning the parts into position.

The Manufacturers' Paper Company has recently occupied its office in the *Tribune* building. The place is fitted up in very elegant style and in point of convenience is, perhaps, one of the best equipped and arranged business offices in the city. The company will act as the authorized agent for the Hudson River Pulp and Paper Company, the Montague Paper Company and Crocker, Burbank & Co., and will make a specialty in paper in rolls for web printing presses. The president of the company is A. Pagenstecher.

NEW STYLES IN WALL-PAPERS.

The improvement in wall-paper during the last half-dozen years has been marvelous, but the latest "spring designs" are artistically far ahead of anything yet shown. The finest papers and the choicest patterns run from \$1 to \$40 a roll, although the greatest variety is found in the papers which sell for less than \$15 a roll. The new styles show a creditable imitation of frescoes in the choice of ground tints, terra cotta, rick wine, odd blues and greens being much used; the fresco effect is heightened by using a velvet ground. The leading novelties are the fire-bronze, a remarkably brilliant ground-work when given the benefit of gas light, and the crystal or jewel paper which in a bright light glistens like frost-work. Gold, silver and dead bronze grounds are also used much. The new patterns are all of the so-called decorative order, large floral designs or bold conventional scrolls. Geometrical patterns are still used, mostly on less expensive paper. The floral designs, climbing rose-bushes in full bloom, remind one of the gaudy wall-paper of twenty years ago, but the workmanship of the paper now made is very different, even though the highest-priced papers are ornamented by hand. The old-style "border" has grown into the deep frieze, and the former notion that the wall-paper and the border must show the greatest possible contrast in color has given place to a taste for harmony between all the members of the decoration. Few people nowadays think of leaving the ceiling unpapered. A small light pattern is preferred for the field of the ceiling, while the stiling is commonly a simple flat tint, darker than the field, and the extension is darker yet, of a large pattern like the vogue in wall-paper. The frieze has come to be the character-giving element in the decoration; thus a nursery may have a comic design: a library a rich fresco-like design copied from some classic mural painting or group of statuary, and a concert-hall can be finished with a scenic frieze. For moldings, single gilt or black strips are not used, although they are often found combined. The newest moldings have bronzed and metallic surfaces, and some are as heavy and as rich as the average picture-frame molding. Besides paper, the imitation stamped leather and the embossed paper with metallic surface are used in a limited variety of decorations.

Silence is a wonderful power in human affairs.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, FEBRUARY 21, 1884.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WE have received an anonymous communication anent some remarks lately made by us. We do not care to reply to persons who try to conceal their identities while giving us the benefit of their criticisms, but merely wish to remark that had the writer of the communication referred to been more discreet, he would have had the words "Send it to St. Louis to mail," which were pencilled on the back of the envelope, and other marks obliterated, before he had his letter deposited in the post-office.

THERE were some interesting remarks made at the dinner of the Stationers' Board of Trade last Friday evening, for which we refer our readers to a report of the proceedings in another column. One of the speakers spoke of shams in trade, and falsehoods in manufacture and production. He was right in saying that business men are responsible for forming national character. There have been instances, well known and not needing particularization, where business customs and morals have so affected the public tone as to ruin a nation. Such instances can be found to-day.

CONGRESS is slow in getting to work, and still slower in making progress toward the completion of legislation bearing upon commercial or industrial interests. The bankrupt law seems to have been relegated to a back seat, and perhaps is not again to be brought forward at this session. The discussion of tariff measures continues before the Committee on Ways and Means, and the opponents of various changes proposed have, we think, been wasting both time and money in attending the meetings of the committee, inasmuch as it is generally conceded that a new tariff bill will be reported, and that it will be modeled pretty closely on the lines of that introduced by Mr. Morrison, and now in the committee, if, indeed, any changes are made in the pending measure. The minority will doubtless present their views, and if it is pre-ordained that the proposed reduction will go through the House, we cannot see the good of fighting it further. It would, in such case, be better to let the issue come up at once, giving each member of the House the opportunity to put himself right before his constituency, and so end the uncertainty at the earliest moment. Trade cannot afford to wait long upon declamation or submit to the delays of a protracted struggle which will effect nothing. If the tariff is to be changed it is better for us to know to what extent as soon as possible, and if its amendment is to fail we want to equally reach the climax at once. In the discussion of plans for the adjustment of interstate commerce there is said to be as wide a divergence of opinion as heretofore. This question appears to be divested of partisan interest and it is possible that a measure will be adopted which will help to an adjustment of difficulties oppressive to trade. But the politi-

cal excitements of the year are likely to defer all legislation which may arouse opposition to either political party, and we doubt very much if anything of a pronounced character in legislation may be expected. If we were concerned in interests which could be affected by any of the pending propositions of importance, we should go on in the old way as if no legislation was likely to go through which would change the situation. This is speculation, however, but perhaps as safe a speculation for the moment as any that could be suggested.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

The 22d of February will be a day sacred to more than one memory this year. The people of New York have been notified of the arrival of the bodies of the Arctic explorers who devoted their lives to the pursuit of knowledge for the world's enlightenment. The last honors will be paid to De Long and his comrades on Friday. Then, too, we commemorate the natal day of the central figure of the band of patriots who risked their lives and fortunes on the issue of freedom and broader civilization against feudal service and restricted rights. Let us not forget our heroes!

* * * *

It is asserted that the floods have depressed trade so much in certain parts of the West that no business can be done in that section, and some houses are ordering their travelers to return home and wait a spell. On the other hand, I have heard that where the country is not immediately affected by the floods, trade is good. What is the real status?

* * * *

An ink manufacturer, so called, has been arrested down East on the charge of being a swindler. He is said to have promised impossible things in the production of ink, and several persons have put up money for him. If it is true that this man has been defrauding too confiding parties, one can scarcely feel sorry for the victims. Perhaps the experience will be good for the losers.

* * * *

Mark Twain has been having something to say about the pending copyright-law. He is not at all sanguine of its passage by Congress, for he has written to a Boston man as follows:

* * * *

"I am forty-seven years old, and, therefore, shall not live long enough to see international copyright established; neither will my children live long enough; yet, for the sake of my (possible) remote descendants, I feel a languid interest in the subject."

* * * *

"Yes—to answer your question squarely—I am in favor of an international copyright law. So was my great-grandfather—it was in 1847 that he made his struggle in his great work—and it is my hope and prayer that as long as my stock shall last the transmitted voice of that old man will still go ringing down the centuries, stirring the international heart in the interest of the eternal cause for which he struggled and died."

* * * *

"I favor the treaty which was proposed four or five years ago, and is still being considered by our State Department. I also favor en-

graving it on brass. It is on paper now. There is no lasting quality about paper."

But the friends of international copyright seem to be determined to push it through Congress. There is an evident intention to cram it down the throats of the people of this country, if forcing the measure will do it. The issue is one of mixed quantities, and it is rather difficult to decide if conceding copyright to foreign authors in their own productions is, or is not proper. There is argument pro and con on this question, and it is puzzling to tell to which side of the free-trade-and-protection issue it tends. Can anybody place it?

Novelties in plush goods consist of cards made up with plush of various shades and having floral designs of the same material. The backgrounds are in dark shades and the ornamentation in lighter tones of color, producing a bold, but effective, contrast, and making an attractive article.

I have heard that the speeches at the dinner the other night, were on every subject except that of stationery in any or all of its divisions. How is this? Doesn't it seem to be something like the play of Hamlet with the principal character omitted?

That there are men who can talk intelligently and forcibly upon matters of trade interest I have no doubt. I have had occasion to meet them and many things said in private conversation if properly elaborated would be interesting in an after-dinner speech. There were some of these men at Delmonico's the other evening. Why were they silent or indifferent?

Surprise!

To the Editor of The Stationer:

Pardon a chronic fault-finder for contradicting your statement that many well informed persons would be "surprised" at the numerous replies to your late queries concerning the count of paper. "Considering that every query was accompanied by the stationery and stamps for the reply, I am mortifyingly "surprised" to learn that two-thirds of the dealers in question were capable of withholding such an unavoidable act of gentlemanly courtesy. It was like a captious chess-player wasting time by hesitating over a "forced move." My agreeable surprise is to see a man, like the originator of the queries, so willing to give his own time, work and money to promote the weal of others.

ONE OF THE COMPLAINANTS.

The Board of Trade Dinner.

NEW YORK, February 16, 1884.

To the Editor of The Stationer:

After a speedy recovery from the effects of last night's dissipation, I take the liberty of jotting down and sending you a few thoughts regarding the Stationers' Board of Trade dinner, in the hope the ideas expressed in connection with the remarks that are sure to be made by others, will serve as a hint to our board of managers as to some of the mistakes to avoid when the time comes around again to indulge in a board of trade dinner. The dinner, thanks to Delmonico, was like all Delmonico dinners, a success. But as a Stationers' Board of Trade

dinner it was not a success. I will not underestimate the pleasure which I derived from meeting socially so cultivated and intelligent a gathering of gentlemen. The anticipation of that pleasure was one of my reasons for my attendance; but I had also another reason which I am sure actuated many others. That was, that I might listen to the eloquence of some of our members and derive from their remarks some information about the welfare and progress of our honorable trade. In this we were disappointed. We heard an able and instructive speech about wood-pulp and wrapping paper, but few of our members know anything about or are interested in wood-pulp, and upon subjects in which they were interested they were compelled to go home hungry. This was not from any lack of talent, or material, for every branch of the stationery business was well and ably represented—writing paper, envelopes, pens, ink, pencils, blank-books, card-board, glazed paper, wall-papers and numerous other interests, the representatives of which were able—at least some of them—to have blown their horns to our mutual advantage had they been given the opportunity.

Of course this state of affairs was unintentional on the part of the management; but let us have no more nonsense about these dinners; they are expensive, and we should get something more than a head and belly full. Ministers, doctors and lawyers are very well to have on hand, to fill up or sandwich in between trade topics. We want at our trade dinners to hear mainly from the trade and about the trade, and hear from the professions as we should take wine, *occasionally*—not as some of us did take wine, and as all of us had to take the professions, continually.

In closing, let me say that I hope that I may never see the Board and our guests insulted as they were upon this occasion by the closing speech. Too much wine is a poor excuse for interlarding a speech with such a filthy story, and a man who, under such circumstances and speaking for "the Commercial Traveler" makes such remarks, disgraces the profession he claims to represent. I know it! I've been there.

A REFORMED TRAVELER.

ANSWERS TO CORRESPONDENTS.

T. W. B. wants the address of parties manufacturing metal shade pulls.

Ans.—H. L. Judd & Co., 87 Chambers street, C. Schmidt and Turner Seymour Manufacturing Company, 62 Reade street, New York. There is a firm in Philadelphia and another in Chicago in the same line, but we do not know the addresses.

Subscriber wants addresses of two or three manufacturers of pen and pill boxes.

Ans.—Dennison Manufacturing Company, Boston, New York, Philadelphia, &c.; N. W. Randolph, Richmond, Va., Spooner Manufacturing Company, New York.

H. M. C. wants to buy oroide pens with an ink-feeding attachment on the upper side, and asks for name of manufacturer.

Ans.—We do not know where the pens are to had or who makes them.

S. L. S. asks who makes first-class machines for ruling wood-cuts.

Ans.—Strong & Brinsley, 113 Fulton street New York; Baker & Co., southwest corner Monroe and Clark streets, Chicago, Ill.

The Booksellers' and Stationers' Provident Association reports an addition of forty-nine new members at its last meeting. At the

January meeting of the board of trustees a communication announcing the death of Harry G. Phillips, a member, in Montreal, on January 6, was read. Charles B. Draper, with the American News Company was unanimously elected a trustee for one year, to fill a vacancy.

The Globe Files Company has brought out lately a very excellent thing in board clips. It is made of walnut and tarboard for note, letter and legal-cap paper. It is very durable and finely finished. C. M. Ward is the agent and all orders will be promptly filled through him at the lowest trade prices.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, February 20, 1884. }

THE MONEY MARKET.—Money continues superabundant, but there was more activity and consequently a slight hardening of rates; call loans on stock collateral ruling 2 per cent. and 1½ per cent. on United States bonds. Prime commercial paper is in fair request and moderate supply. The stock market remains steady, the recent advance in prices of the leading securities having been fairly maintained, although the trading probably has been among the operators instead of among outsiders for investment. Government bonds are firm as are also railway mortgages. The market for sterling exchange was strong for short bills and steady for long. There is still a great scarcity of commercial bills and the probability of gold shipments is again receiving attention.

THE PAPER MARKET.—While most of the expressions of our city dealers as regards the condition of trade during the past week indicated very little change, the inclement weather has had a tendency to depress general business and keep buyers away from the city. Orders by mail have come in this week for goods in about the usual number of the past two or three weeks, fully up to aggregate expected for February. As regards prices, although no improvement for the better can be noted, it is somewhat a matter for congratulation that in view of the large unrestricted production and a demand far from active, that they can be held to that steady point at which they are ruling, and as sharp as competition is, that they have not been hammered down any lower. Print papers and manilla wrappings hold their own very well, although occasionally an order for super-calendered book is taken at 8c. on three and four months' time, but in these exceptional instances the quality corresponds with the price. Straw boards are still nominal and weak. There is a movement among the manufacturers of straw wrappings to place their trade on a better footing by shutting down the mills for three months from April 1, although this has not yet been fully determined upon. A meeting was held at Albany on Tuesday of last week, with a view of securing the necessary co-operation of the trade.

THE STATIONERY MARKET.—The condition of trade remains about the same as reported last week. Business, generally, is rather quiet. Dealers do not seem to be inclined to buy as much as usual at this season of the year. Many commercial travelers are returning from the West on account of the floods along the Ohio River. It is believed that business will be a month in recovering from the effects of the floods. Trade has not only been hurt along the Ohio, but a depression in Western sections remote from the floods is felt. The trade in Easter goods has assumed a more local character. Out-of-town orders are fewer, while the home trade is just beginning to show some activity. Dealers report a fair business doing in gold pens, not so good as before the holidays, but encouraging for this time of the year. The envelope trade is about as usual, with some prospects of an advance in prices before long. In the line of toys, the trade shows some improvement, particularly in tops, marbles, hoops, &c. A fair business is being done in fine stationery, though hardly so much as at this time last year.

PH. HAKE,

—MANUFACTURER OF—

Fine Envelopes, Papers,

AND WEDDING STATIONERY,

Cards and Card Board,

ORDERS OF DANCING,

Fancy and Bevel-Edge Cards.

The Stationers' Board of Trade.

ANNUAL DINNER.

There were 109 gentlemen who sat down to the ninth annual dinner of the Stationers' Board of Trade, given at Delmonico's on Friday evening, February 15.

The dinner was a success and much credit is due to the dinner committee, which was composed of the following-named gentlemen: David Scott, W. I. Martin, Alexander Agar, Chas. E. Runk, William Graham.

George L. Pease, the president, presided.

There was a fair representation of the most active and prominent members of the Board of Trade, together with a goodly number of guests. Among the guests seated at the tables were General Stewart L. Woodford, Hon. W. A. Russell, Isaac H. Bromley, Howard Lockwood, Dr. A. E. Macdonald, Montague Marks.

The tables were six in number, four of them being laid at right angles with the guests' table, which was on a low platform.

The party was prompt in arriving, and at 7.30 sat down to the following

It was a little after ten o'clock when the last course was served. A few minutes later the president introduced the first speaker W. A. Russell with the following remarks:

GENTLEMEN AND MEMBERS OF THE STATIONERS' BOARD OF TRADE—"It has been but a very short time since we laid aside our business cares to assemble with one another in these rooms and around these tables. I am, indeed, pleased to join with you in welcoming our guests and friends to this our ninth annual reunion. We are fortunate enough to have with us several gentlemen who have promised to speak on interesting topics. We will at once proceed with the speech-making, hoping that those who address us will bring forward many topics of interest to the trade."

Mr. Russell then responded to the toast: "Paper manufacturing, its relation to other industries and the protective tariff, the foundation of our national prosperity."

The speaker said: "I thank you, gentlemen, for this cordial reception. I am happy to meet

so many of the representative men in the industries with which I am so intimately connected. When I was requested to be present I accepted the invitation, and I thank your senator (Senator Miller) for his instrumentality in affording me an opportunity to address you on this subject, which refers to an industry of which I am much better prepared to speak than the one in which you are engaged. It is paper-making—paper-making proper, the various branches of trade connected with it, the capital employed in it and the very large number of men, which rank it among the leading industries of the country, the iron and steel industries being the first, cotton second, woolen third, and leather fourth, and, without considering the wheat and food products of the country, paper-making would come fifth. Paper-making proper employs about 25,000 men. In this connection I wish to make a slight comparison. In 1860, with thirty-one millions of population, we made \$21,000,000 worth of paper. In 1870, with thirty-eight millions of population, we manufactured but \$55,000,000 worth.

"I find that in 1860 the per capita consumption was 67 per cent. for each individual. In 1870 it was about 32 per cent. Now it is fair to conclude that the increased use to which paper was put that year should have caused the production of more paper. Therefore we should have had a product of \$70,000,000 worth of paper in 1870, while in fact the product was only \$55,000,000. It follows that there was a saving to the people of the country of \$15,000,000 for paper. What shall we attribute that to? I shall lay a very great share of it to the introduction of that notorious product, wood pulp, of which your Senator and I, perhaps, know more about than any person here, or anyone absent. The first introduction of wood pulp or ground wood was in 1869 or 1870. The first and perhaps the greatest prejudice, which was raised against its use was caused, not only by the paper makers themselves, but by the consumers of paper. Because of the great prejudice against its use, its introduction was very slow. In 1870 the consumption became very general and from the beginning of its introduction in 1869 it has run up, I think, to fully 150 tons of daily consumption. I am speaking now of the ground wood pulp. The chemical wood pulp was introduced about three or four years before that. This has been also very difficult of introduction, yet its consumption has increased from year to year. Were it not for the use of this wood fibre in the manufacture of paper we would be obliged to import from four to five hundred tons of rags daily, and with the consequent draft upon our wealth we can well conceive what price paper would be to-day. To the introduction of wood pulp and its successful use, I claim a large share of the world's success.

"It is said that the prosperity of our people can be measured by the consumption of iron and steel. Measured by that standard, the people of this country are the most prosperous people on the face of the globe, for we consume more iron and steel than any people in the world, not excepting England. England produces more iron and steel than she consumes. It is also said that the intelligence of a people may be measured by the consumption of paper. Measured by that standard the American people are the most intelligent of any people on the face of the globe, for we consume per capita more paper than any other nation. Great Britain in 1881 with 35,000,000 of people consumed 334,000,000 pounds of paper; France in the same year with 37,000,000 of people consumed 325,000,000 of pounds; Germany with 45,000,000 population

consumed 376,000,000 of pounds, but the United States with 50,000,000 of people consumed 864,000,000 pounds of paper or almost double the consumption of any other people. The census returns compiled by General Walker developed these facts and developed still more in detail matters, which establish the fact that the American people are the most prosperous people in the world. We are adding with every sundown \$2,500,000 to the credit of our aggregate wealth.

"Now we come to the second part of the toast presented—that is, the question of the tariff—and I don't think that I could do any better than to base what I am going to say on the foregoing statements. What greater evidence is there of the value of the economic system which we maintain than these facts, and I want to ask the business men of New York, here represented, if they could remove any political party in order to reverse this economic system, which has brought about this result. It is for the business men to determine that. Now, as I understand, after the revision of the tariff by the last Congress, there has been no pressure for a further revision, that is, unless I except Ohio; but there is certainly no call coming from the people from any section of the country for an agitation of this question. It is coming more through a desire of a body of men to make this an issue in the next Congress, and I hope that the business men of New York and the business men of the great centres of the country who are interested in this question, will stand out against this agitation, which has forced upon Congress the consideration of the tariff, and which is depressing business men. We had an opportunity a few days ago to hear from the wool manufacturers on this subject, and it was the general testimony that it was this agitation of the tariff which is making the consumer, the purchaser, the middlemen and all of the trade timid about taking any stock, and what we hear of the woolen business I have no doubt is true of every other business, and I believe that if business men would take this matter into their own hands it would be dropped. In a country like this, where various changes are going on in business, of course the tariff question or tariff laws will have to be changed from time to time; but I believe that it is the desire of whoever is interested in the tariff that it should remain as it is a few years, at least, until the industries of our country are better prepared for a change.

"I will refer to one more fact in this connection. Last winter, in preparing a speech relating to the tariff question, I took occasion to look into the condition of the workingmen of our country. I took as an illustration the workingmen of Lowell and Lawrence, in Massachusetts cities, which have about 100,000 people. They are supported entirely by the manufacturing interest, and by inquiring into their financial condition, I found that of the \$17,000,000 deposited in the banks of Lowell and Lawrence by the people of those cities, seven-eighths of the amount were credited to the wage laborers. By way of comparison, I would say that at the same period there was on deposit in the Bank of England \$8,000,000, which represented the savings of three times and a half of the number of the population of the cities before named, although it was less than half of the savings of the wage laborers of Lowell and Lawrence. I have no doubt that what is true of that class of laborers is true of every other class of laborers in this country. It is the best economical system that we can have. Germany, France, Belgium and other countries are adopting tariff laws, and labor has advanced in those countries,

but in England, on the other hand, it has fallen off."

General Stewart L. Woodford responded to the next toast which was: "Our country; its manufactures, trade and commerce."

General Woodford said: "When a toast of our country is proposed, to endeavor to talk against the star-spangled banner would be unwise. I have, Mr. President, great pleasure in meeting the paper men of New York and Massachusetts. I have a profound respect, though a poor lawyer, for the men who successfully make paper. For the most part we lawyers get our living out of men who do not succeed in making paper, and I remember once when in an evil hour I applied to my bank for a loan and the cashier said: 'Why don't you make some commercial paper?' After faithfully trying I found that I could not make any that was not discounted. What a wonderful factor in our civilization this paper is. If you could for a moment imagine the abstraction of paper from our civilization you would imagine an absolute blank. Paper in the morning press, paper on the wall, paper in the ballot, paper in law, paper everywhere. If your paper cost us lawyers one-half as much as the papers that we lawyers prepare, cost you, the trade would be less profitable to us and more lucrative to you. (Laughter.) I don't wonder that when a body of merchants and manufacturers meet you could give such a toast as you assigned me to-night, for whatever is progress of any kind under the sun to-day, paper is at its head, and it is only a cold fact and reminds us, as Mr. Russell suggested, that the average accumulation of intelligence of this land stands ahead of the nations of the world."

Mr. Russell (interrupting the speaker): "I said that, measured by the consumption of paper, the American people are the most intelligent of any people."

General Woodford (continuing): "Since the tariff has got lugged in by the ears I am going to say a word on that subject, though it be not responsive to my toast."

"I believe that this country owes more of its development than men are apt to consider to the tremendous influence for good which the protective system of America has had on our labor. I believe another thing—that industry should be protected until it is able to go into the markets of the world and fight for itself, and win its own success. I believe in protection for the child and in free trade for the man. Let every industry in this country of ours be protected for the benefit of the laborer, or, if the merchant or manufacturer is interested, let him be protected until he is able to compete with any foreign market, precisely as England contends here for the mastery of our market. I believe that protection should be intelligent, deliberate and fair, so that it may ultimately lead to the manhood of free trade, when the United States shall struggle for the markets of every other land upon equal credit and equal liberty. The tariff question seems to me to be a thoroughly practical one, to be determined always by practical opinion. I do not fear its discussion. I do not believe that the political parties will ever come entirely into line in respect to the tariff. They never got free trade in England as the result of one party standing for free trade and the other party against it. The conservative party in England, for the most part, were protectionists; the liberalists were, for the most part, free traders. I hope that the free traders of this country will not, in their battle against protection, strike at the real welfare of the country. The intelligent and thoughtful men

of all political parties will deal with this question as they should deal with a pure economic question—that is, stand for liberality in the tariff where liberality will best develop American labor and American manufactures, and that liberality which will do the greatest good to the greatest number.

"But to the toast. Paper manufacturers should bear in mind, that in proportion that they make the business of the country honorable they build up the national character. The man who is guilty of a sham in his manufacture or his trade is striking a serious blow at the welfare of his fatherland. Every deceit that is penned upon a sheet of paper, every falsehood that is put into manufacture or production is put forever into the character of our national life. You merchants and manufacturers can do as much in your place for national welfare as the preacher can do in the pulpit, the student at his desk, or the speaker on the platform, if you make your business honest; if you incorporate truth into the web and woof of your business life you will do more than any man can do toward assuring the permanent success of our country in the future."

The next toast was "Rags and their relation to intellectual development," to which I. H. Bromley of the *Commercial Advertiser* responded.

Rev. Mr. Baker, of Brooklyn, responded to the next toast, which was "Paper and the Progress of man." He said:

"As a clergyman I am very glad to respond to the toast, because it has always seemed to me that the use of paper and paper-making was one of those symbols which indicate the intellectual and spiritual progress of man. The use of paper, from my standpoint, seems to spring from a longing in man for immortality. Just so soon as man experiences the higher sentiments he begins to desire a remembrance of those who come after him. First he used stone on which to record his deeds; but stone is an unyielding substance, and working in it took all the enthusiasm out of him. Then he sought for a more ductile material. Parchment was next used in disseminating his deeds among men, but this was a very expensive material which could only be used by the rich. Then man sought for some cheaper material on which he might record his deeds, and out of this longing came the manufacture of paper, which laid the foundation of the art of printing. Out of printing and paper-making came great commercial and political movements. Out of man's longing for political freedom came the newspaper. Out of his tender sympathies and fraternal attachments came correspondence and the post-office, and so on, step by step, the use and manufacture of paper has created a higher and broader intellect in man and a desire for business and social progress.

"I went through a paper mill not long ago. I saw the rags, some of them clean and some of them very dirty, go through the process of sousing and scouring and come out beautiful pulp. I thought that this paper making was very much like the ministry, the only difference being that one treats rags while the other treats men. As you have some clean rags to deal with me, ministers have some clean men. We have some men in Brooklyn going through the process of pounding, sousing, scouring, &c., and if I should point out these men to you I could prove to you that we, as ministers, are successful there." (Applause.)

In response to the toast, the "Body," Dr. Macdonald said:

"I am surprised that this particular subject

has been reached quite so early in the evening. I thought that we would lead down gradually from the most important subject of paper to the least important subject of our bodies. We had paper first and our country second, and so on gradually until we came down to our souls and our bodies. (Laughter.) I have been sitting here quietly in the hope that I might have something suggested to me to speak about from the gentlemen who preceded me. Perhaps I had no right to think I should. I have only one thing to be thankful for, and that is that my particular toast is so well adapted to me. I have had a good deal to do with bodies—(laughter)—therefore I do not have the embarrassment that our friend General Woodford labored under. I had an idea on coming here that it was a dinner connected with the paper trade, you do not limit the gathering to those who make paper, but you bring in those elements which destroy paper after it is made (laughter). That is a very good element. I see you have type makers, you have manufacturers of pens—and, by the way, I am under particular indebtedness to the pen industry, because with the possible exception of the stylograph, I think it is causing more insanity than any other."

Dr. Macdonald spoke at some length and was frequently applauded.

Other remarks were made by William H. Parsons, George H. Jones, F. H. Hinrichs and Charles S. Plummer.

LAWN GAMES.

"Tell me something about lawn games," said a reporter of THE STATIONER, a few days ago, to a leading toy manufacturer. "Do lawn tennis and croquet continue to take the lead in this class of games?"

"Yes," replied the dealer, "they are the most popular. Next to them come archery, lawn pool and lacrosse. There are several new games, but they have not the widespread popularity of the games before mentioned. Croquet and lawn tennis are of English origin, and lacrosse is a Canadian innovation borrowed from the Indians, and lawn pool, which is partly an American idea and partly English, is the old game of croquet modified and improved.

"Croquet, though played in England perhaps for half a century, was first introduced in this country about eighteen years ago. A croquet set that at that time sold for \$10 can now be bought for \$1. The great reduction in prices has largely increased its sale, and although many dealers predict that croquet is gradually losing its popularity, I disagree with them. The game is down to so low a figure that everybody can buy it. It is more in demand now than ever and I see no reason for believing that it will be superseded by anything else very soon. Like base-ball, it will always be a leading outdoor amusement. Croquet sets are made mostly of maple, but many sets are made of boxwood and a few of lignum vitæ and rosewood. The cheaper and medium grades are mostly in demand. The medium grades range in price from \$4 to \$5. Many people buy the dollar sets to take in the country in summer. They are not worth bringing back, and when they have no further use for them, they give them away or throw them aside.

"Lawn tennis was first introduced about six or seven years ago. There has been little or no improvement in the game since it first appeared. A slight improvement has been made this season in the bat used. The old style bat has a bulge on one side. When the game first came

out bats were made with this bulge because it was thought that the ball could be struck with better effect by the player, but this is a notion which experience has shown to be erroneous. The new bat is symmetrical in shape and one side has a tendency to balance the other, thus improving it. Lawn tennis retails from \$4 up to \$50. The game is now probably at the height of its popularity. It is a more expensive game than croquet, but like the latter is much cheaper than when it was first introduced. It is not in so great a demand as croquet because it is a dearer game. A set of lawn tennis which we used to sell for \$20 we can sell now for \$10. Medium grades cost from \$15 to \$30. The \$30 set is just as good as a \$50 set only it is not so finely finished. Here is a lawn-tennis bat which alone sells for \$50. It is mostly used as a prize bat. Its high cost is due to the fact that the handle, as you see, is inlaid with rosewood, ebony, pearl, amaranth wood and other expensive woods.

"Next in popular lawn games comes archery. The principle of archery is as old as the hills. Bows and arrows were used by uncivilized races for killing game as well as a means of defense in warfare. But the use of bows and arrows as an amusement was first introduced in England. An archery sets ranges in price from fifteen cents up to \$100. Some come as high as \$200. The target is made of straw, no other material having been found better adapted for the purpose. Bows are made of the wood of the yew tree, which comes from various parts of Europe. A small portion of it comes from California. The cheaper grade of bows are made of lance wood and hickory. The former is imported, the latter is an American product. The price of an archery set, of course, depends on its size, the material it is made of, finish, &c. We make a bow that alone is worth \$30. Clearness from knots and straightness of grain make a bow very expensive.

"Lacrosse, which was introduced here a few years ago, is an old Indian game. It is a heavier game than croquet and lawn tennis, being more in the character of an athletic sport. The game has probably attracted more attention among young men than any other field sport that has been introduced. It has been adopted in Canada as a national game. It was used originally by the Indians, not only as a recreation but as a means of strengthening the body. The present game differs very materially from that originally played by the red man. The game is played with a crosse, or bat, and ball, the same as lawn tennis, and is played in a large field in order to afford plenty of room for the players.

"In addition to the games I have mentioned there are several other outdoor games which have become more or less popular, some of which are quoits, the magic hoops, and a game called the Fascinator. Quoits are made also with rubber covers for playing indoors. The magic hoop game is an arrangement with hoops of various sizes, with a post upon which the hoops are pitched in playing the game, each hoop being numbered. The Fascinator, though an outdoor game, is not strictly intended for the lawn. It consists of a long box containing a large number of marbles, two cues and two end wings. In the front side of the box are a number of arches, each provided with a swing trap door opening into a separate compartment. When arranged for playing, the lid is thrown up presenting over each door a number indicating the count of each marble that enters. It tests the skill of the juvenile wonderfully and never fails to amuse. A new lawn game is about to be introduced, but it is a little too early yet to give a description of it." The new game is

called Enchantment, and its implements are made by a well-known house in Massachusetts.

The *Magazine of Art* (Cassell & Co.) for March is out. It is handsomely and profusely illustrated and contains a number of interesting ar-

ticles, of which those on the new British Institute and the "Inns of Court," London, are specially noteworthy.

Simplicity, of all things, is the hardest to be copied.

THE KERNER PEN.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a flexible air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Price, \$1 and upwards, according to mounting. Send for Circulars.

A PATENT-INK SWINDLER.

Frederick C. Boyd, a young man about twenty-five years of age, has been arrested in New Haven for fraud. Boyd went there from Portland last June and advertised for a partner in a safe business. Charles Coe, at present in the employ of B. Booth, the State street auctioneer, answered the advertisement and bought an interest in Boyd's enterprise, paying about \$600 for it. To Coe, Boyd said he had a patent process for making cheap ink, and had received several big orders. Boyd went on the road selling the ink, while Coe did the manufacturing, Boyd's expenses being paid with Coe's \$600. Coe found that the business was not paying and sold his share to C. S. Moore, of the firm of Corey, Moore & Co., of Crown street, for \$250. Later, Boyd induced Moore to put in \$250 more. As the business was not good, Moore came to the conclusion that he was being swindled and wanted to sell out. Boyd agreed to buy his interest and gave him notes to the amount of \$500, which have not yet been paid. Boyd found a fresh victim in Octave Turcott, of 75 Lloyd street, Fair Haven, who put \$700 into the business. When Boyd had spent that sum, Turcott asked Boyd for an explanation. The latter not being able to give one that was satisfactory, thought best to skip the town. Turcott considered himself duped and decided to have Boyd arrested. The young man was traced to Boston, where all sight of him was lost. He returned to New Haven a few days ago.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

THIS MACHINE WILL

Form different size backs without changing the Machine.

Form backs of any thickness of board.

Form the largest back as quickly and easily as the smallest.

Form a dozen bands in the same time as one.

Form backs of any size book manufactured.

Form backs harder and better in every respect than any made by hand.

Form backs that will retain their shape and will not split or break.

Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat. Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

OBITUARY.

S. WELLES WILLIAMS.

Professor Samuel Welles Williams, LL. D., died at New Haven, Conn., on Saturday evening, February 16, aged seventy-two.

Dr. Williams was acknowledged to be one of the most eminent scholars in Chinese literature, geography and history, who was not of Chinese lineage. He was born in Utica, N. Y., September 22, 1812. He was graduated in 1832 at the Rensselaer Polytechnic Institute in Troy. In 1833 he went to Canton as a printer in the mission of the American Board of Commissioners for Foreign Missions. He then assisted in editing the "Chinese Repository," a monthly periodical begun the year before by Dr. Bridgman. In 1835 he removed to Macao to complete the printing of Medhurst's *Hokkein Dictionary*. In 1837, while on a voyage to Japan to return home some shipwrecked mariners, he learned their language and translated the books of Genesis and Matthew into it. He contributed about one-third to Dr. Bridgman's "Chinese Christianity," and published "Easy Lessons in Chinese" (Macao, 1842), "Chinese Commercial Guide" (1844), "English and Chinese Vocabulary in the Court Dialect" (1844). He visited the United States in 1845, and, to obtain funds for casting a font of Chinese type, delivered lectures on China, which were enlarged and published under the title of "The Middle Kingdom," (two volumes, New York, 1849). Soon after he received the degree of LL. D. from Union College. In 1848 he returned to Canton and took charge of the "Chinese Repository," which was discontinued in 1871 with its twentieth volume. He accompanied Commodore Perry's expedition to Japan in 1853-54 as interpreter and in 1855 was appointed secretary interpreter to the United States legation to Japan, and took charge of it until the arrival of the minister. In 1856 he published a "Tonic dictionary of the Chinese language in the Canton dialect" and an enlarged edition of the "Commercial Guide," both printed

at the mission press in Macao, which was burned with the most of the books in December, 1856. In 1858 he assisted Mr. Reed at Tientsin in the negotiation connected with the treaty and the next year accompanied Mr. Ward to Peking to exchange the ratifications. He visited the United States in 1860-61 and on his return to China in 1862 the legation was removed to Peking. The next year he published the fifth edition of the "Commercial Guide" nearly new written. In 1874 he published the "Syllabic dictionary of the Chinese language" (4to. Shanghai) containing 12,527 characters with the pronunciation as heard at Peking, Canton, Amoy and Shanghai. This has superseded all other Chinese-English dictionaries. A new edition of the Tonic dictionary, revised by Dr. Eitel, has been published by aid of the English authorities (Hong Kong, 1876). Dr. Williams returned to the United States in 1875. In 1876 he went to New Haven to reside, and in 1877 was elected professor of the Chinese language and literature in Yale college. His funeral took place on Tuesday last.

CINCINNATI DRIFTWOOD.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, February 18, 1884.

I ventured to make a prophecy about the stage the water in the Ohio river would reach, when I last wrote. You have seen that my prophecy fell short of the facts, but after I made it there was a little rainfall. Mine was simply a lucky estimate. The commercial traveler and such other readers of THE STATIONER as know Cincinnati will form some idea of the spread of the flood, when told that it came within less than 250 feet of J. R. Mills & Co.'s establishment on Walnut street, and that it almost touched the rear of the Grand Hotel where it borders Third street. At its worst, only one railroad could reach its depot in Cincinnati, and most of them were entirely cut off.

A beauty about it is that although the river reached 71 feet $\frac{3}{4}$ inch on February 14, 1884, against 66 feet 4 inches on February 15, 1883, the destruction of property by it was small in comparison with the destruction of property by the flood last year. Men got out of the way of it in time. There wasn't a foot of dry ground on all Pearl street on last Thursday. The destruction to houses in Cincinnati will be great. As I write the news comes in that a four-story row of brick houses on Central avenue and Second street have fallen down. Let them fall. The more the better, so that loss of life is not involved. Does anybody imagine the value of these lowlands as property will be impaired? He is much mistaken. The style of architecture on them will be changed and some kinds of business now transacted there will move up the hill. Does anyone want to know what stationers and printers in Cincinnati got ducked? The answer is: "Everyone on Pearl street, everyone on Second street, everyone on Water street, everyone on Front street, everyone south of Pearl on Broadway, Sycamore, Main, Walnut, Vine, Race, Elm, Plum, Central avenue, South, Mill and Wood streets, and everyone on any street between Freeman avenue and Mill Creek." By means of Lockwood's Directory and a directory or map of Cincinnati, anyone curious to know can make out the list for himself.

"But what effect will it have on business?" Someone may ask that question. Well, the effect of last year's flood was perceptible, and

that of this one will be felt still more perceptibly. Hundreds upon hundreds tens upon tens of thousands of customers of Cincinnati will be crippled and compelled to economize severely. That will tell upon business. Hundreds of thousands have been thrown out of employment for two to four full weeks and have earned no wages. That, too, will tell. Charity, or rather human helpfulness, is busy meantime supplying the wants of the needy and repairing the losses of the sorest sufferers. But all guess-work will come short of the actual facts. The suffering is nothing in comparison with that of the lesser flood of last year, simply because the machinery to alleviate it is so prompt and so perfect.

Of course, there has been no business but local business here for two weeks or more, but it will begin this very day, which, being tomorrow is Tuesday, February 19. In fact, the floods have stopped the wheels of trade ever since about February 1, but now they will move all the swifter.

The Globe Files Company have removed from 19 and 21 West Sixth street to 139 and 141 West Sixth street into far more commodious quarters.

Some of the printers on Second and Front streets moved up town just in time to escape the flood and have settled down in safer and dryer quarter. Now spring trade will begin to show what it is going to do. There have been hopes that it will show an improved condition of things. We shall see. Nobody here is dispirited by the flood. The exhibition of pluck attending it is wonderful. PRINCE WILLIAM.

Who bravely dares must sometimes risk a fall.

ABOUT OPERA-GLASSES.

What with sapient eye-glasses and owl-eyed opera glasses, the average playhouse audience has become an aggregate of petty masked batteries, each of which is trained on the others with merciless directness and continuity. Some facts as to the "great guns" in this raking fire were recently learned from a courteous salesman at Tiffany's. Said he:

"I should say that, judging from our experience, the sale of opera-glasses has increased threefold over sales of two years ago. Indeed, to meet the heavy demand, we imported as many as a thousand pairs for this season. Imported? Yes, for there are no opera-glass makers in this country known to the trade. Voigtlaender, of Vienna, and Chevallier, of Paris, are considered the best makers, though others, like Lemaire, and the firm of Bardou et fils, both of Paris, are not without reputation. London runs to the first two the same as New York. Besides stock from Voigtlaender and Chevallier, we keep glasses stamped with our own name and made for us in Paris; we consider these quite as good as the former, but sell them at a slightly cheaper rate. Tell you something about the materials used? Well, opera-glasses have either six or twelve lenses. The latter, as you may suppose, possess double power; they are also more achromatic—have less foreign coloring than the six-lens glasses. For the eye-pieces flint glass is used; also rock crystal, which is smoother and clearer yet. For the end-piece flint and crown glass is used, the first being made concave and the other convex. Of course, the quality of the glass varies, and then the grinding, focussing and adjusting are of importance, depending on the maker. We might look at the frames and mounting now. Our cheapest pairs have brass frames, lacquered black and mountings of seal leather. These range from \$5 to \$15, depending on the size and the number of lenses, six or twelve. Only one quality of glass is used in them. Those of the next higher grade range from \$15 to \$50, and have aluminum frames, the price varying with the quality of glass and the size. The aluminum frames have a silverish color, which never tarnishes. More of these frames are sold than of any other kind, their extreme lightness making them popular. Sometimes the silverish color is exchanged for black by means of lacquer. The next grade of opera-glass includes those with mountings of mother-of-pearl, of smoked pearl and of oriental pearl. The coloring of the last two is artificial. These same two have heavy frames (\$13 to \$50), and the light aluminum frames (\$30 to \$75). The mother-of-pearl frames cost from \$35 to \$70. In all three the heavy frames are gilded with French gilt.

"Now we come to what are called the 'fancy' glasses. Ivory and shell are no longer included in these, as the first discolors quickly, and both of them crack and break easily under atmospheric influences. The fancy glasses have frame and mounting alike, and are the enamelled, the gold, the silver and the aluminum. The enamelled glasses cost from \$100 to \$175; the plain gold from \$150 to \$260; the plain silver \$100; the etched silver \$130, and the aluminum plain \$75, enamelled \$85. Of course you know there are exceptionally high priced glasses also. See, here's one of gold inlaid with diamonds and sapphires, and costing \$500. We have had one inlaid with rubies and costing \$5,000. The novelties just now in this class of glasses are mountings of what is called Persian gold (a maroon color brought out of the gold by chemi-

cals acting on the alloy, and causing also an enamel effect), a mounting of white calf-skin and a mounting made entirely of aluminum. Here's a very striking one—ground of the silvery aluminum covered with lace-work of gold. It costs \$250. The Persian gold mounts cost

\$185 and \$350. For dress occasions, a frame of aluminum and a mounting of mother-of-pearl is popular. Are vest-pocket glasses still sold? I had a dozen two weeks ago and have only one left now. Voigtlaender makes these also, their price being \$18."—*New York Tribune.*

CORRESPONDENCE SOLICITED.

P. O. Address, FRANKLIN, Warren Co., Ohio.

25c. A GENUINE STYLOGRAPHIC.

This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address GOLLNER MFG. CO., 222 Centre St., New York.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,497,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

THE SHAPIRA MANUSCRIPT.

The history of the Shapira Manuscript may be said to have entered on a new phase with the arrival in London of Ch. Clermont-Ganneau, the learned French Orientalist and explorer, formerly French consul at Jerusalem. He has gone to England on a mission entrusted to him by the French Ministry of Public Instruction, to examine and report on Mr. Shapira's now famous manuscript. M. Ganneau, to whose energy and promptitude the French are indebted for the possession of the Moabite stone, has devoted many years to a long and careful study of Phœnician and Hebrew palæography, and is co-editor with M. Ernest Renan, of the "Corpus Inscriptionum Semiticarum," now in course of publication by the French Government. He is, moreover, thoroughly cognizant of all the Arab tribes east of Jordan, and especially those from whom Mr. Shapira states he has obtained the rolls and the skill with which he and Captain Conder unraveled the mystery of the Moabite pottery will be long remembered by archaeologists. The interest in the manuscript is gaining ground both in England and on the Continent. In Germany, Dr. Gule, a Hebraist, of Leipsic, is about to publish a monograph on this subject, having been one of the first to inspect the skins. It is now found that thirty leaves or more obtained by Mr. Shapira are portions of several manuscripts in various handwritings, but all in the lapidary style. They are not accurate copies of the same text, but present variant readings, some of which exhibit great carelessness in the script and text. The short examination of M. Ganneau has brought to light the fact that some of the sheets have been sewn together at one time, and have the orthodox margin of Hebrew manuscripts, while other fragments appear to have been merely fastened at the corner or rolled up. A writer in the *Daily News* remarks: "There is some evidence of a philological and scriptorial character which seems to favor the theory of the late, if not the forged, origin of Shapira manuscript, and it arises from a comparison of the latter with the synagogue rolls in vogue among the Jews. In the construction of these rolls it was the custom to observe very stringent rules as to the width of margin which they preserved, and to other details of precision. An examination of the Shapira fragments shows that although the text is manifestly written on the mode of a Hebrew synagogue scroll, yet these rules have been regarded in some cases, but violated in others, as if through ignorance of the great importance and value attached to their observance. It now appears that instead of the central fold and sewn edge succeeding each other in regular order, the folds are uneven, and have, in some cases, been cut with a clean sharp severance.

It moreover appears that all *scripta plena*, even in the case of plural forms, are omitted; a discrepancy which is in some respects in excess of that of the Moabite stone in the disregard of grammatical properties. When with this disregard is combined the use of late words found only in the Targums and the Talmud, such a combination is very naturally likely to originate as very grave consideration as to how such glaring neglect of philological and scriptorial canons is to be reconciled with the genuine character of the manuscript. Even Mr. Shapira seems to be changing ground, and losing at least so much of his primary confidence as to recognize the possibility of spurious production. His present contention is that if the rolls are forgeries they have been purposely made in order to damage or prejudice him in his busi-

ness as a collector of antiquities, as he alleges to have been the case with the Moabite pottery. It is very partially known that Mr. Shapira has brought to England a very early version of the Book of Job in Arabico-Hebrew, as well as

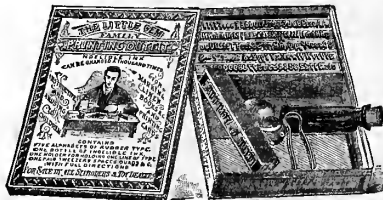

some Jewish works on medicine and some ancient commentaries. These are chiefly from Persia, Yemen, in South Arabia, and from Central Asia, and no doubt has been expressed or entertained of their authenticity.—*Newspaper Reporter*.

COMMERCIAL.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand-printing. Price, \$2.50; per dozen, \$16.00.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Each sheet is water-marked with name and date.

Correspondence.

PHILADELPHIA AT DINNER.

[FROM OUR REGULAR CORRESPONDENT.]

OFFICE OF THE LOCKWOOD PRESS,
150 South Fourth Street,
PHILADELPHIA, February 26, 1884.

The Book Trade Association of Philadelphia, composed of the representative publishers, printers, paper manufacturers, lithographers and bookbinders of this city, had its twelfth annual dinner on Saturday last, February 23, at the Hotel Bellevue. About sixty members and guests took seats around a horseshoe table, which was decorated in the handsomest style. For two hours the excellent menu absorbed the attention of the banqueters, and afterward Henry Carey Baird, the president of the association, who occupied the centre of the table, made a speech opposing the international copyright bill.

In the course of this speech he said :

"The granting of a twenty eight-year monopoly privilege in our market to British authors and publishers, whose books, made in Great Britain, would thus contain no American labor or materials, is a manifest injustice to our own producers, whose market has been created by the expenditure on education of hundreds of millions of dollars raised by domestic taxation, which cannot and will not for one moment be tolerated or entertained. Granting a long monopoly to an author whose book only exists in a foreign tongue is even more indefensible—it is simply absurd.

"Great Britain has long had treaties with various European nations by which books in foreign languages are, without republication, protected for two years from the date of publication, and what is the result? Scarcely any portion of the rich contemporary literatures of France and Germany is now translated and published in England. How different is it in this country, where these two great mines are now beginning to be worked, and with such great advantage, as well in the enjoyment as in the enlightenment of the American people; and not in the least to the detriment of the French and German authors, whose books are thereby being made known to the many American readers of French and German. It will not pay a publisher to give a royalty to the author of a book in a foreign language, and compensation to a translator in addition, and these books will, under the reign of monopoly, simply, not be translated."

Mr. Baird denied that American publishers

have given up the publication of English novels solely because of the unfortunate condition of the copyright law. "It is largely due," said he, "to the fact that English publishers now, through their own branch houses, or through American publishers, largely supply the American market with English editions, many American publishers preferring to buy 100 to 500 copies of an English edition to taking the risk of a set of stereotype plates or an American reprint edition of 1,000 to 2,000 copies. Since the close of the rebellion no branch of trade has undergone a more complete revolution than that in the works of English authors in this country; and there has never been a time in the history of the country when good salable American books were in greater demand, or were made more remunerative to American authors. One house, which I could name, has wholly abandoned the reprint of English books, and is sharply on the lookout and always ready to accept for publication every good book in its line which is offered to them; and in addition to these, they originate many, and yet the supply is quite inadequate. As a necessary protection to American authors in our own market, the day for international copyright has gone, never to return; and I affirm without fear of successful contradiction that the real end and aim of international copyright agitation by American authors is not for home protection, but that they may obtain complete copyright monopoly with or without publication, and a royalty in Great Britain and perhaps in Germany."

Mr. Baird closed his remarks by suggesting two amendments to our domestic copyright laws that should be passed by Congress before extending the advantages of the copyright to non-residents.

First—That the author or proprietor of a book, &c., be first required to prove the originality—in whole or in part—of the proposed publication, or at least state wherein he claims proprietorship, and that examiners be provided by law, whose duty it shall be to make examination before a copyright be issued, and that the fee be increased sufficiently to cover the additional expense; or

Second—That some easy and inexpensive legal means be provided for testing the validity of a copyright—or both.

Until these laws are amended it will be neither right, proper nor safe to extend the privileges of their provisions to foreigners, for we can accept no guarantee of their amendment short of the actual amendment itself.

Mr. Baird was followed by Colonel McClure, of the Philadelphia Times, who responded to the toast of "Franklin." Colonel McClure

threw some humorous light on the philosopher's life.

"He was a reformer," said the speaker, "like some at the present time. His method was to pick out the best office and reform it by himself. I have yet to learn of the period in his life when he was out of office, except when the Quakers turned him out once. Even then he kept his son in." Mr. McClure did not think that the printer's art owed much to Franklin. Most of its advancement had been during the present generation. It was as the strongest typical American of his time in Philadelphia that Franklin was chiefly remarkable. Mr. McClure spoke strongly for the tariff, but said that he had found to his sorrow in the course of a legislative investigation that there was not a single American mechanic in the State who stood in the front rank of his calling.

Joseph Hoover spoke for the lithographers.

Hector Orr, the oldest printer of this city, responded with some interesting reminiscences of *Fraser's Magazine*, the first copy of which he printed.

Charles Emory Smith, editor of the Philadelphia Press, replied to the toast of "the Press."

M. P. Handy and R. E. Hastings also made some very good speeches.

A. G. Elliott, the able secretary of the association, to whom great praise is due for his very good arrangements of the dinner, closed the speech-making by the following interesting account of the association :

Fortunately for the present occasion, your secretary has no elaborate report of dry statistics to make, but, nevertheless, the past year has been one of interest to the association.

We have had the pleasure of seeing it increase in importance, till now it comprises on its list of membership every industry that pertains to the making of a book.

As our president has stated, the lithographers of our city have cast their lot with us; and we now number some eighty firms, representing all trades and employing more than ten million dollars of capital and thousands of skilled hands.

The spirit of our association is eminently catholic. The history of its acts and growth attest this.

That we may have errors of judgment would be more than human to deny, but that we fail to boldly defend the rights of the American capitalist and workman as against his foreign competitor, we do deny. We do not expect to meet with the approval of all. Difference of views should not estrange, when the common good is the object to be attained, but, like Miss McFlinn, who, when she said to young Quill-driver, "it must be nice to be connected with a

newspaper; to glory in the power, liberty and privileges of the press, and that she would be delighted to feel that the press embraced her," compelled him to exclaim, "You would, would you? Great Scott! Wait till I turn down the gas;" so we say to all who come properly accredited, we will embrace you, but not ask you to wait till we turn down the gas. Oh, no, that would be rough on some of the boys—they could not whistle.

During the past year we have been called to mourn the loss of three associates, two of whom were with us on the last anniversary. As we recall the names of Collins, Holman and Doyle, let us bring forth from the treasury of the past the good works they did, and take hope that, when others may, perhaps, cite our names, the tribute may be given, "Well done, good and faithful servants."

The following named gentlemen were present: President Henry Carey Baird, Col. A. K. McClure, Charles Emory Smith, W. W. Harding, Wm. Rutter, A. G. Elliott, R. S. Menamin, Owen Shoemaker, Calvin Wells, H. S. Ridgway, E. S. Talmage, H. S. Garsed, M. P. Handy, F. W. McDowell, W. A. Holman, Wm. Hart, F. Bourquin, G. Thomsou, H. E. Garsed, Jules Viennot, A. C. Farley, James McConnell, T. M. Jackson, Sol. Foster, A. H. Hoeckley, George Rogers, J. R. Jones, J. L. Weatherly, H. L. Warren, E. J. Buckley, G. S. Ferguson, Thomas Hunter, J. L. Sinclair, J. Hoover, Roger Sherman, R. E. Hastings, W. L. Stiles, C. J. Shoemaker, Dr. E. Bedloe, C. R. Deacon, H. S. Savan, A. S. Rudolph, F. A. Burr, H. T. Coates, R. G. Oellers, G. A. Fagan, H. N. Claxton, W. H. H. Cline, L. N. Megargee, W. C. Thomas, C. H. Woodruff, Charles S. Smith, J. M. Ferguson and Charles Haskell, of Baltimore; J. C. McCurdy, J. D. Carson, J. B. Mitchell, H. S. Reddings, J. E. Gaskell, Jas. N. Mohr, F. M. Laughlin, Hector Orr. JULES VIENNOT.

BOSTON PHASES.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., Boston, February 27, 1884.

"But the darkness is passed,
And it's daylight at last—
Thank goodness, they're both of them over!"
—*Iolanthe*.

And nature smiles again. The long distressing gloomy clouds are dispelled, the rains have ceased, and the mud has disappeared from the streets. How delightful the change! All mankind rejoices and womankind likewise. Trade generally is feeling the effect of the "merry, merry sunshine," and stationers appear more cheerful.

In connection with the matter to which I referred last week concerning the policy of manufacturers of stationers' supplies and art publishers in underselling their own trade, a jobber remarked to me that he thought the point well taken. "But," said he, "the troubles we are obliged to contend with are not entirely confined to the manufacturers. Some of the jobbers themselves are responsible for the small margins realized on sales. The object of some dealers seems to be how near cost they can sell goods. They don't seem to consider that the object of trade is to make a profit. Now, on certain lines of goods, when bought in certain quantities, the jobber gets so much per cent. off; on larger orders the same discounts, with an extra per cent. off, and some dealers order largely to get the bigger discounts, and then to sell the goods give what they have made to the consumer. They sell more goods possibly by this

means, but the profits of the business are no larger, and they have had extra labor for nothing. If their object is to run others out of the business by underselling others' trade without any regard for their own bank account, they should think a moment of the boomerang."

Another dealer with whom I talked on this subject said that the trade needed protection from each other, and, instead of trying to force prices down, dealers should act in harmony and endeavor to keep them up. "In most lines of trade," said he, "there is organization, and the members thereof frequently meet together to discuss trade topics, and to devise ways and means for the protection of their mutual interests. Organizations of this kind have proven very beneficial to other trades, and I would join any movement that would tend to harmonize the interests of the stationery trade in this city. Whether or not the prominent jobbers and dealers would favor a trade organization of this kind I can't say, but I think it would be to their mutual interests. I have no objections to your noting this matter, for it may meet with favor." What do the Boston trade think of this idea? Is it practical, gentlemen?

Knight, Adams & Co. report trade very fair for the season, considering the bad weather of the past three weeks. This house is entering a little more extensively into the importation of fancy stationers' goods, such as Bohemian glass goods, Vienna and Berlin fancy wares and photograph albums. One consignment has just arrived and another is on the water. These goods are for the fall trade, and travelers representing the house will take the road in a few days with some rich and elegant samples.

Charles H. Whiting is very hopeful concerning trade for the coming months, while the amount of business now doing is not such as can be complained of. Something new in the line of blank-books has been lately added to his stock. The book is elegantly bound in half-red cloth with raised bands, and specially ruled for bank and legislative uses. Orders from the trade are being quite numerous filled. Mr. Whiting is engaged on some other novelties which he will shortly present to the trade. Business in Easter goods is improving and his travelers are now on the road with an extensive line of samples.

Samuel Hubbs & Co. are among those of the trade who "dare and fear not." Business here is reported as very good, with "great expectations." In the pen line this firm is pushing the Hubbard pens, for which the house is the sole agent, and a very large trade is being developed in this line of goods. Manifold copying books, which are becoming so popular among commercial men, are shipped in large lots to the trade everywhere. In Shanon's letter-files and cases the house is doing a good local business.

Curtis & Mitchell, type founders and manufacturers of printing presses, card cutters, &c., are engaged upon a new series of presses, which they will perfect in time for the fall trade. The Columbian press, which the house is now offering, is well and strongly built, has perfect rest for platen to allow time for feeding sheets; an extra large ink disk, insuring perfect distribution; grippers that can be thrown down on the platen at any point; impression screws in front of operator, and is in every respect a first-class jobber. The house is doing a very large foreign business besides its extensive home trade. This is the oldest house of its kind in the city, and its long years of business operations have earned for it the confidence of the trade throughout the

country. One feature about this house is that it sends out no drummers to solicit trade, but depends entirely upon its well-displayed advertisements. Mr. Curtis, the senior member of the firm, is a firm believer in advertising, and attributes his success to the medium of presenting his business, together with the fact that his house buys for cash, and sells for cash at the lowest possible figures—but always with a profit, however, for that is a business rule of the house.

Gilman's "Challenge" letter file shows evidence of a long life. This device, like all new inventions, was first looked upon by the trade as an unneeded invention, but in less than three months its merits have become recognized. Among the numerous counting-rooms I visit I find the "Challenge" letter file occupying a place upon the wall. For simplicity and for the quickness with which letters are filed away I hear most flattering endorsements from the users. Orders for this file are received from all parts of the country and very many of these buyers must be connected with the stationery trade, as THE STATIONER is most frequently mentioned as the medium by which their attention was called to the device. Mr. Gilman, the inventor of the "Challenge" letter file, is a veritable genius, having several inventions of his own that he is perfecting. One of these, a game which he calls "complex dominoes," is a very interesting and absorbing amusement for social circles. Negotiations are now pending with a large manufacturer for placing the game on the market.

Since the removal of the Bay State Electrotype Foundry into its new quarters on Devonshire street, business has been steadily increasing. Nothing like being in the right location for trade.

Before closing, I must mention the fact that the clerk of the weather has got back to his post and is again tampering with the elements. He has worked up a big snow-storm for a change, and so spoiled the beauty of my opening quotation. A. L. D.

CINCINNATI OVERFLOW.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, February 26, 1884.

There is not a word of record that people here know of about the effect on business by that flood upon which Noah floated his ark. There is a record that wine was to be had after it, and there the story ends, as far as business is concerned. We hear not a word about relief funds, and not much about the destruction of property, but it must have been great. People in Cincinnati, Ohio; Covington, Ky., and especially in Newport, in that State, know how to sympathize with the anxiety which must have prevailed in that family while it was tossed on the wild waves before its final stranding on Ararat.

There is something very pleasant to be said about the ease of business since the subsidence of our flood, whether it is consequent upon the flood or merely sequent to it. First, let us look at one beautiful concomitant of certain effects of this recent event, a calamity to so many.

It drove the poor out of homes which had cost the hard savings of a lifetime. When it subsided and the exiles returned, they saw only a few scattered foundation-stones in the place where they left the cottage that had cost them so much and which they loved so dearly. But a modern virtue was developed. One of those beautiful exhibitions of the feeling of hu-

(Continued on page 268.)

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest

INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

(Continued from page 266.)

man brotherhood, so rare before Gethsemane and Calvary and so frequent since, has restored smiles to many a sad face and hope to many a downcast heart. The stationers of the nation, as a class, are opening their purses—their hearts must have been open all the time. Now you shan't wait any longer. Here are their names, as far as heard from:

Boorum & Pease, New York city.....	\$50
Liebenroth, Van Auv & Co., New York city.....	50
Daniel Slote & Co., New York city.....	25
Alexander Agar, New York city.....	25
The Kiggins & Tooker Co., New York city.....	25
The National Blank-Book Co., New York city.....	25
J. Q. Preble, New York city.....	25
Acme Stationery and Paper Co., New York city.....	25
S. E. & M. Vernon, New York city.....	10
Henry Bainbridge & Co., New York city.....	25
The Saugerties Blank-Book Co., Saugerties, N. Y.....	25

Total.....\$310

This is what has already been contributed. "Billy Carpenter," of the firm of W. B. Carpenter & Co., wrote to them and told them the story. He lives over in Covington, the city that was insulated, and saw, just across the Licking River, the city of Newport, which was overwhelmed. He knows all about it. Carpenter does. He was there. The first letters were addressed to the blank-book manufacturers. Don't you see how they responded? Since then letters have been sent to the stationers, the envelope manufacturers, the paper makers and the steel pen makers. There has not been time yet to get their responses. Cincinnati is to receive none of this, as Cincinnati is taking care of her own sufferers. There are plenty of needy upon whom to bestow it, and small or large there is no doubt about the money helping where help is most deserved.

Now for business. Traveling men have not given Cincinnati up as drowned. Large as the deluged portion was, it was but a fringe of the city and one that can stand drowning without a murmur and with very little loss. Here is a list of the trade visitors who saw the raging flood or got in soon after it: J. W. Sinclair, Morgan Envelope Company, Springfield, Mass.; Mr. Ancker, J. B. Lippincott & Co., Philadelphia; Wm. Blogston, Powers Paper Company, Springfield, Mass.; Jas. T. Watkins, American Pencil Company; Mr. Nutt, W. H. Hasbrouck; Mr. Horn, Koch, Sons & Co.; Mr. Pike, M. A. Reay & Co.; Mr. James, Daniel Slote & Co., and R. L. Brown, Kiggins & Tooker Company, of New York.

Now, the fact is that the houses and the streets where the flood was deepest have a brightened-up look. The goods look fresh and clean and all the places have a tidy appearance.

The streets are full—actually crowded with drays and transfer wagons, and there is an unusual air of briskness in business. Nor is it all looks. There is briskness. Business men are doing well. Their flooded-out customers up and down the river are not asking extensions, as they did last year. In the stationery trade there is notable activity. This isn't because goods were damaged or destroyed by water at up and down river points. They were not, and it is one of the remarkable facts connected with this flood that they were not. Do you want to know how they happened to escape? Well, the owners removed them to places of safety before the waters came. In fact, the saving was the maximum possible, and the loss was the minimum possible. This is true all along the Ohio Valley as well as at this point. These facts explain the quick return of briskness in business, and warrant the confidence felt here that the effect of

the flood on business this time will be very slight. The young, the well-to-do and the rich will scarcely feel it. The saving poor who have lost their homes feel it the most severely. The

outlook for business now is good. Everybody was expecting a brisk spring trade, and the harbingers of it appear to have arrived.

L. PRANG & CO.'S

1884. EASTER CARDS. 1884.

FOR THE COMING EASTER SEASON we have prepared a line of Cards and Silk Novelties, which we are confident will compare favorably with our previous efforts, and will meet with a ready sale. The following Artists are among the contributors to our line:

Miss FIDELIA BRIDGES,
Miss L. B. HUMPHREY,
Mrs. O. E. WHITNEY,

Miss L. B. COMINS,
Mrs. E. T. FISHER,
Miss ALICE C. SWAN,
Etc., Etc.

W. HAMILTON GIBSON,
WALTER SATTERLEE,
F. SCHUYLER MATHEWS,

Among the Cards of the regular line we would mention the following series as of special merit and attractiveness:

- No. 705.—TRIANGULAR FLOWER CARDS, by MRS. O. E. WHITNEY.
- No. 711.—MOVABLE SHAPED CROSS (figure design), by MISS L. B. HUMPHREY.
- No. 712.—BIRDS, by MISS FIDELIA BRIDGES. A very attractive series.
- No. 713.—FLOWERS ON PURPLE GROUND, by MRS. O. E. WHITNEY. A gorgeous series.
- No. 714.—FIGURE DESIGNS, by WALTER SATTERLEE.
- No. 715.—BUTTERFLY DESIGN, by W. HAMILTON GIBSON. This is emblematic of the Resurrection, and we think one of the most Striking Easter Cards ever published.
- No. 716.—EASTER LILIES, by MRS. E. T. FISHER. A very chaste and appropriate card.
- No. 717F.—WISTERIA EASTER CROSS. A fitting companion card to our last year's Water-Lily Cross, which proved so popular.

— BESIDES THESE, SPECIAL ATTENTION IS CALLED TO OUR —

SATIN ART PRINTS FOR EASTER,

Consisting of appropriate Flower and Figure designs. Our Satin Art Prints are put up in the following styles:

- "A" STYLE.—A richly fringed tinted Mount, with cord and tassels for hanging.
- PLUSH MOUNTS.—Fine mounts, made of rich plush of various appropriate colors, with easel back.
- "B" MOUNT.—An exquisite Satin Mount of various colors, with extra fine quality shaded triple fringe, satin ribbons and bow, cord and tassels for hanging.
- "C" MOUNT is a fine combination of rich plush and satin in contrasting colors, with cord and ribbon, easel back.
- "D" MOUNT is similar to the "C" Mount, with the addition of extra fine quality scalloped silk fringe trimming and satin bow, easel back.

EASTER SPECIALTIES.

EASTER CAROL CARDS.—Peculiarly appropriate to the season, being printed in mediæval style in red and black upon hand-made paper

SERIES I., EASTER CAROL CARDS.—Printed in red and black.

SERIES II., BOOKLETS of four pages, with mediæval carols and cover of hand-made paper printed in red and black.

Our extensive line of BIRTHDAY CARDS has received several attractive additions, and we have also issued SEVERAL new series of SCRIPTURE TEXT-CARDS.

 PRICE LISTS OF EASTER CARDS ARE NOW READY.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 292,484. Extension-File.—John Gross, Ottawa, Ill.

No. 292,516. Staple or Fastener.—Franklin A. Smith, Jr., Providence, R. I.

The fastener is stamped out of sheet metal, with a curved shoulder projecting at each end.

No. 292,533. Letter-Box.—Joseph B. Broome, Oswego, N. Y.

No. 292,563. Game Apparatus.—Gustavus A. Lillien-dahl, Greenville, assignor to Henry T. Lillien-dahl, Jersey City, N. J.

Blocks having a geometric form either plain or inscribed on the facets thereof, provided with knobs or points at the apices, and adapted to be used as a game.

No. 292,569. Artificial Slate.—Andrew M. Murray, Richmond, Ind.

A composition composed of two parts of lamp-black or dropblack, one part of rotten-stone, one part flour of emery, one part mineral-brown, one part ultramarine blue, mixed with oil-shellac to the consistency of a stiff paste.

No. 292,581. Paper or Pamphlet Holder.—John O. Poor and Rufus E. Bean, Franklin, N. H.

A paper or pamphlet holder composed of two wires or springs connected together at one side at the centre, each wire being bent and joined so as to form two parallel wires.

No. 292,584. Coin Counter for Money Drawers.—Charles Gottlieb Raber, Washington, Ind.

In a money-drawer, the combination, with the coin-receiving chambers, of shanks provided with necks with shoes attached thereto, communicating with the coin-chambers, springs secured at one end to the shanks and free at the other end, so as to form a bearing, the springs encircling the shanks and necks, a bar adapted to engage with the shanks at their junction with the necks, and a rod attached at the rear end of the shanks.

No. 292,598. Sliced Picture.—Walter Stranders, New York, assignor to Edward I. Horseman, Brooklyn, N. Y.

No. 292,606. Paper Box.—Arthur G. Wilson, New York, N. Y.

A paper box or lid of a box having two turned-in portions, a part of one overlapping a part of the other, and forming a single space or opening between the two, and an end-piece provided with a tongue folded over the upper edges of the turned-in portions, down through the opening and in rear of the lower lip like portion.

No. 292,645. Musical Toy.—William Alfred Gay, Tonawanda, N. Y.

In a musical toy, the combination of a circular series of sound-emitting devices, an axle arranged centrally within the series, and mechanism mounted on the axle and adapted to come in contact successively with the sound-emitting devices, whereby they are caused to vibrate.

No. 292,650. Shading-Pencil.—Geo. Baptiste Hecklinger, Streator, Ill., assignor of one-half to Charles Hecklinger, New York, N. Y.

In a shading-pencil, the combination, with the handle of two or more leads of different colors, placed side by side, whereby a mark shaded in different colors can be made at a single stroke.

No. 292,652. Toy Target.—A. H. Hoffman, East New York, N. Y.

Cheerfulness is the daughter of employment.

OBITUARY.

E. A. PERRY.

E. A. Perry died at Winnipeg, Man., February 20. The deceased resided in his early days in Valleyfield, Que., where he was foreman for Mr. Buntin in the paper manufactory there. He subsequently removed to Ottawa, where he opened in the stationery and bookstore line, and conducted business for nine years. He was afterward induced to remove to Winnipeg, where he took the position of accountant in the real estate business of A. W. Ross, M. P., his brother-in-law. The deceased was a son-in-law of the late Donald Cattanauch, of Glengarry, Ont., whose relict and four daughters are now residents of Winnipeg. For the last year the deceased was engaged in the store of his son, A. C. Perry, whom he assisted to conduct a business in which he had such large experience. The funeral was held on Thursday, 21st inst.

A fire broke out on the fifth floor of 64 Duane street at 2:30 o'clock last Friday morning, and the stocks of all of the occupants of the building were damaged by water. George W. Millar & Co., paper dealers, occupied the fourth floor for the storage of lithograph and plate papers, which are considerably damaged by water. Frank Williams, printer, occupied the third floor. The second floor was occupied by the Powers Paper Company, whose stock was damaged by water about \$5,000. George W. Millar & Co. occupied the first floor and basement, which are pretty well filled with manilla and print papers, all of which are more or less wet. The total losses are estimated at \$12,000 to \$15,000.

Self-preservation is the first law of nature, but too many in this world act as though it were the only one.

A wise man ought to hope for the best, be prepared for the worst, and bear with equanimity whatever may happen.

THE HARVARD FOUNTAIN PEN.—The Harvard is a flexible Gold Pen affixed to a fountain or reservoir holder. Having no air tubes, wires, springs, &c., which are the great obstacles to the efficient working of all fountain pens, These objections have been finally overcome in the construction of this Pen, and the utmost simplicity and adaptation for the purpose having been the objective points sought for, we take pleasure in offering it as one in which this result has been accomplished to the highest degree possible. Every Pen guaranteed to give satisfaction. Send for Price List.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE

NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

First.—The ONLY Quarto Bible containing the Contrasted Testaments, in which the Old King James and the Revised Versions are placed in parallel columns.*Second.*—Larger, better spaced, and more readable type in all cheap and medium grades.*Third.*—Latest and most attractive variety of side stamps.*Fourth.*—More Illuminated Plates and Illustrated and Descriptive features.

BINDINGS GUARANTEED EQUAL TO THE BEST. PRINTING SUPERIOR TO ANY. PRICES AS LOW OR LESS THAN OTHERS.

Luther's Illustrated German Bible,

Containing BIBLE DICTIONARY, History of the Books, Maps, Illuminated Plates and other beautiful features, making the most complete and best illustrated German Bible in the country at lower prices than any other edition.

Haydock's Approved Catholic Bible,

Containing a complete Catholic Dictionary, and embellished with hundreds of magnificent engravings and illuminated plates.

Illustrated Catalogue, containing full description, prices, &c., mailed on application.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Lowry & Brokaw, stationers, New York city, have dissolved partnership.

The Times Company, publishers, Columbus, Ohio, has sold out to J. H. Collins.

William Bennett, publisher of the Times, Verona, Pa., has made an assignment.

Stelzner & Hamburger have bought out the firm of Schmitt & Gebele, publishers, Celina, Ohio.

C. & A. Parkhurst have started the "Branch" paper mill at Westfield, N. J., manufacturing trunk board.

A. G. White, bookseller, stationer and news-dealer, Norwalk, Ohio, has sold out to B. (Mrs. A. C.) White.

The Terre Haute Paper Company, Terre Haute, Ind., is running the paper mill of M. T. Close & Son, which has been removed from Iowa City, Ia.

Geo. F. Wharton, bookseller and stationer, New Orleans, La., has taken his brother, Edward B. Wharton, into partnership under the style of Geo. F. Wharton & Brother.

Dealers in Easter novelties are invited to visit the store of Henry Levy & Son, 477 Broadway. This firm has displayed artistic taste in the various articles introduced for the coming season.

William G. Cooke and William Witte, proprietors of the New Haven Paper Box Company, New Haven, Conn., have dissolved partnership. William G. Cooke continues the business under the same style.

The firm of Ludden & Bates, music publishers, &c., Savannah, Ga., is soon to be converted into a joint stock company, upon the co-operative order, in which the managers of all of the branch houses and many employes of the Savannah house, together with one or more Savannah capitalists, will be interested. The capital stock will be \$150,000.

The Beebe & Holbrook paper mill, Holyoke, Mass., was damaged by fire on Monday evening, February 26. The damage from fire, smoke and water, principally from the latter, will probably exceed \$10,000, which is covered by insurance in the five companies of the Manufacturers' Mutual of Boston and Providence. The mill will probably be idle for at least two months. It has one 76-inch machine and turns out three tons a day of fine writing paper, employing 115 hands.

The offices and composing rooms of the Cambridge Press and Real Estate Advertiser, Cambridge, Mass., were damaged \$3,000 by fire on Sunday evening last. James Cox, proprietor of the News, is the heaviest loser, great damage having been done to his presses. His files were entirely destroyed. A stock of white paper, which Mr. Cox had on hand, was also badly damaged. George Bird, owner of the building, suffers a loss of \$300, and other occupants of the building suffer small losses.

The West Newton Paper Company, West Newton, Pa., has succeeded C. P. Markle & Sons, paper and pulp manufacturers. The company, of which C. C. Markle is treasurer, will run the "A" and "B" mills.

R. Worthington, bookseller, New York city, has purchased the entire stock of books of J. W. Lovell & Co., except their paper library, and will hereafter supply the same to the trade.

The stock, &c., of the estate of Bennett Furnishing Company (incorporated), manufacturer of desks and fine art furniture, London, Ont., is advertised for sale by tender.

The liabilities of Carlton McCarthy & Co., booksellers and stationers, Richmond, Va., whose assignment was announced last week, are about \$12,000; assets, \$15,000.

Carmichael, booksellers and stationers, Davenport, Ia., have dissolved partnership. The business will be continued by Thomas Thompson.

McArdle & Hart, paper stock dealers, New York, have dissolved partnership. P. J. McArdle will continue and will settle the accounts of the late firm.

E. Bradley & Co., manufacturers of paper, Portneuf, Que., are out of business at that place, having been succeeded by Young, Walton & Co.

The Black Hawk Paper Company has bought the Milan Paper Mill, Milan, Ill., and is making an "extra" quality of straw wrapping.

J. & E. Hoch, dealers in frames and engraving, Boston, Mass., have dissolved partnership. John Hoch continues the business.

William Huefner, of the firm of Huefner & Kayser, publishers of the California Journal, San Francisco, Cal., is dead.

Fletcher & McEwan have succeeded Robert McEwan & Son, paper manufacturers, Southport, Conn.

O'Shea & Williams, bookbinders, Lincoln, Neb., have been succeeded by O'Shea & Richards.

The Three Rivers Paper Company (not incorporated), Three Rivers, Que., is out of business.

Zed. S. Hall, bookseller and stationer, Kansas City, Mo., is closing out his business.

James Power, dealer in paper stock, &c., Boston, Mass., is dead.

D. Ullman, paper-stock dealer, Buffalo, N. Y., is dead.

Colburn & Co., stationers, &c., Denver, Col., have sold out.

A. Barricklo, dealer in window shades, Brooklyn, N. Y., has sold out.

Worley & Hart, zinco-lithographers, Philadelphia, Pa., have dissolved partnership.

The mortgage against the Gazette Printing Company, Creston, Ia., has been foreclosed.

The American School Book Company, St. Louis, Mo., has increased its capital stock to \$40,000.

An attachment for \$7,000 has been issued against the Savannah Palm Paper Manufacturing Company, Savannah, Ga.

Sherman B. Markle, Jr., has succeeded C. P. Markle & Sons, in the control of the Mill Grove Paper Mill at West Newton, Pa.

Edward L. Bassett and Lewis G. Fowler have formed a partnership at New Haven, Conn., for carrying on a job-printing business.

A dissolution has taken place in the firm of Claridge & Allen, publishers of the Texas Stockman, San Antonio, Tex. The firm is now Claridge, McBride & Co.

Charles H. Barrister has been admitted to the firm of Putnam & Davis, booksellers and stationers, Worcester, Mass. The style of the firm has been changed to Putnam, Davis & Co.

White & Schermerhorn, 46 West Broadway, are doing a good business with their "White Star" medicated tar toilet papers. The package is in the form of an open-end book, and is provided with a thick pad saturated with tar and fastened on in the inside of the back cover.

James R. Lilley, secretary of the Cleveland Paper Company, Cleveland, Ohio, has been in the city this week, and has presented to the Eastern creditors of his company a full statement of its affairs. This statement shows liabilities of \$300,000 and assets of \$786,000. He has made a proposition to the creditors to pay in full, in eighteen monthly payments, the first payment to be made on June 1 next, and a payment to be made each month thereafter. This proposition is favorably received, and it is probable that a settlement will be made on this basis.

An assignment was made by Louis Hartman, dealer in picture frames, No. 8 East Eighteenth street, New York, on Saturday, February 23, to August Kohn, preferences being given for \$5,000. First preference is given to the Bowery National Bank for \$2,500, money advanced on a promissory note dated January 12, 1884, and payable four months after date of the same. The next preference is given to Charles Busch, New York,

BLOTTER

150 VARIETIES.

REVERSIBLE * BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES.

100 * SHEETS * IN * PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of Universal Blotter Tablet, at proportionately lower prices.

SEND FOR PRICE LISTS.

W. H. HASBROUCK, 91 Liberty Street, New York.

for \$2,500 and interest from May 1, 1883, this sum being due for borrowed money.

Clarke Brother & Co., printers, Louisville, Ky., have been attached.

S. N. Holmes, publisher of the *Daily Miner*, Prescott, Ariz., is dead.

S. R. Barnes & Co., booksellers and stationers, Lampasas, Tex., have sold out.

Charles A. Bricka, dealer in morocco cases, New York city, has made an assignment.

David Williams, dealer in picture-frames, &c., Philadelphia, Pa., is dead.

A. G. Brown, printer, Malden, Mass., has admitted D. G. Currier to membership in his firm.

A dissolution has taken place in the firm of Parrack & Parr, proprietors of the *Weekly Reporter*, Glen Ross, Tex.

J. B. Hall, formerly manager and secretary of the Fargo Publishing Company, Fargo, Dak., has retired from that concern.

O. G. Martin, jeweler and bookseller, Blyth, Province of Ontario, has been arrested for counterfeiting, by a patent photographic process, ten-dollar bills on Molson's banks.

A receiver has been applied for by some of the stockholders of the New York Paper and Felt Mills, having mills at 7 and 9 Elm street, New York city, and at Stanley and South Orange, N. J. This action has been taken, it is said, because of some dissatisfaction between the president of the concern and the stockholders. All of the mills are closed down pending a settlement of the difficulty. The liabilities, it is said, are between \$25,000 and \$50,000. A meeting of the creditors will be held at the company's office in New York to-day at 12 o'clock.

The New York Silicate Book Slate Company, 191 Fulton street, has made arrangements for the accommodation of its customers to supply them with free letter-boxes. Merchants visiting New York will find it convenient to have their letters and papers come direct to the company's office. The weekly papers from all of the large cities will be kept on file, which will be a convenience never before offered by any mercantile house. The company is doing good service in the public and private schools. Its goods are used extensively in all of the principal cities throughout the United States, by the Boards of Education of New York city and Philadelphia, Pa., the leading colleges, academies, Catholic institutions, exchanges and private schools. A single trial will convince the public of their superiority over all goods in their line in the world.

The schedule of liabilities and assets of the firm of F. Sibell & Co., stationers, of No. 206 Pearl street, was filed on Wednesday of this week. The liabilities are \$6,724.55; assets, \$5,052.26, of which \$2,979.30 is for outstanding claims, while \$2,132.96 represents the nominal value of the stock on hand. The preferred creditors are C. W. Barnes & Co., \$997.79; National Blank-Book Company, \$321.80; H. Bainbridge & Co., \$420.39; Sarah S. Sibell, \$3,500. Among the creditors to which preference is not given are Aiken, Lambert & Co., \$122.90; S. Raynor & Co., \$132.09; Clement & Stockwell, \$86.33; T. H. Livey & Co., \$64.42; Horace Taylor, \$71.17; Boorum & Pease, \$146.08; M. J. Anderson, \$64; B. J. Searing, \$85.57. There is a large number of other creditors in amounts under \$50. A meeting of the creditors will be held as soon as possible in order to effect some compromise. It is believed that the firm will pay at least seventy-five cents on the dollar.

Rosenbaum & Co., Philadelphia, have prepared a great many Easter novelties, exquisite in taste. Among them the following are to be noticed: No. 1, a card on satin, embossed and colored; No. 2, banner-shaped, surmounted by a cross on plush; No. 3, sachet card on pink satin, fringed; No. 4, banner-shape in white satin, with white egg in plush and "forget-me-nots;" No. 5, chapel-shape in plush, with a painted cross and flowers rising from the base, mounted on satin with fringe; No. 6, diamond-shape, full puffing of satin, colors assorted, fringed; No. 7, a very elegant design, gilded panel, fringed, with oval centre of satin and holly; No. 8, round shape in satin, in the centre a plush cross decorated with flowers, puffing and fringed; No. 9, Maltese cross, diamond-shape, card in centre, trimmed with fringe and cord; No. 10, plush bell, mounted in satin, with plush head; No. 11, handsome plush panel, combination of white and mouss-green plush, hand-painted circle and gold binding; No. 12, satin with chenille cord, with beautiful gilded cross, handsomely painted, suspended by a cord from a bunch of flowers; No. 13, gilded-edge panel, with plush bag from which a chicken is peeping; No. 14, combination of plush and white satin, with handsome gold cross in centre, trimmed with chenille, cords and swan-down.

Smith's book store, No. 118 Lincoln avenue, Fergus Falls, Minn., was destroyed by fire on February 19. The fire was caused by an imperfect flue. The stock and furniture had \$6,625 insurance. The loss on the goods is estimated at about \$700, while the loss on furniture and building will be between \$2,000 and \$3,000.

J. H. Bufford's Sons have recently added several new designs to their line of satin Easter cards. The firm is meeting with excellent results in the introduction not only of these goods but of their large line of cheaper cards and shape novelties.

J. S. Rockwell & Co. are offering a very fine and full line of all leathers for plain and fancy bindings, such as bark skivers, bark fleshers, law sheep, imitation alligator, seal and morocco. The prices are so very low as to encourage a very brisk trade, which the firm is having.

Baldwin & Linn, stationers, &c., Houston, Tex., have dissolved partnership.

J. J. Spalding & Co., job printers, Chicago, have made an assignment. Assets about \$16,000.

The Kansas City Press and Publishing Company, with a capital of \$10,000, has been organized.

Potter & Co., photographers, Philadelphia, Pa., have dissolved partnership. The business is continued by Joseph P. Silver.

Alphonso Bunnell, bookseller and stationer, Portland, Me., is reported in insolvency. Liabilities, \$3,500; nominal assets, \$2,300.

The Dennison Manufacturing Company has located a special agency for the sale of its shipping tags in Springfield, Mass., with L. H. Orr & Co.

Among the out-of-town trade in town during the past week were: Mr. Bossert, of the firm of Paul, Baker & Bossert, Philadelphia, Pa.; Jas. Dwyer, Salt Lake City, Utah.

Alfred P. Hayden has been appointed receiver of the National Printers' Warehouse Company, of No. 18 Vesey street, by Judge Donohue, of the Supreme Court. The annual report, filed January 17, showed debts of \$3,600. On February 1 the trustees covered all the property with a chattel mortgage for \$1,100.

Charles Beck reports trade as being very brisk, the unprecedented demand for Easter novelties keeping all hands busy filling and shipping orders. In addition to the large line of puffed satin and plush souvenirs, which comprises many entirely unique and novel designs, he has, owing to numerous inquiries made lately, brought out a fine line of plush and satin Easter novelties, designed to meet the demand of a large portion of the trade. This house has lately taken the agency for the Robinson Engraving Company's steel-plate folders. The line comprises over eighty of the latest and most attractive designs, suitable for menu cards, spring openings, advertisements, &c. All parties buying in lots of 1,000 or more will receive a sample book of all the designs gratis. In cards and scrap pictures the house is doing an immense business.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; E. H. Lowry, Pres. Nat'l Bank of the Republic; F. D. Tappan, Pres. Gallatin Nat'l Bank; C. F. Timpson, Cashier Continental Bank; J. G. Ogden, Cashier New York Co. Nat'l Bank; Chas. Dennis, Vice-Pres. DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, FEBRUARY 23, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE time for presenting applications for admission to the international section of the Hungarian General Exhibition, to be held at Budapest in 1885, has been prolonged until the end of April in the current year. Americans should take advantage of this opportunity.

It is not amiss sometimes to give illustrations of the estimation in which THE STATIONER is held by its readers, and we therefore submit one or two extracts from late communications addressed to us. One subscriber writes: "Never allow our subscription to run out. We need it; cannot do business without it; it grows better; we watch for its coming; it is a good teacher. May success always be to THE STATIONER, the only representative we have." And another writes: "We consider THE AMERICAN STATIONER the best publication that comes into our office, and find more useful and reliable information in it than in any other." These opinions are from different parts of the country, one from a city in the South on the Atlantic coast and the other from the Northwest. Like expressions from other sections frequently encourage us in our work of making THE STATIONER valuable to every person who uses or peruses its columns.

FOREIGN journals are beginning to be nervous about the extension of international railway lines on the American continent. A German contemporary, making note of the fact that by next month there will be all-rail communication with the City of Mexico from any point connected by rail in the United States, thinks that this will be of momentous consequence, not only to our own trade, but in its effect on the commerce of other countries, provided that we choose to avail ourselves of the opportunities likely to be presented. It adds: "How long will it be ere the enterprising American will have all rail communication with Valparaiso on the one hand and with Rio on the other?" This is something like one of those ordinary queries which generally call for the answer: "Give it up." But that it will not be longer than the united enterprise of the two divisions of this Western hemisphere will permit is quite probable, and with the proper infusion of energy into the slower-moving people of South America, it may take less time to accomplish than many are ready to admit. There are, of course, many obstacles to overcome, natural and otherwise, but the greatest, to our mind, is the "until to-morrow" procrastinating habits of the people living beyond the United States. "To-morrow never comes," and it is necessary to convince many of this fact. That financial aid will be forthcoming in the proposed lines of international communication shall have been more defined, and when a definite plan or idea of what is to be done is suggested, we have no doubt. For this reason we favor the proposition of Senator Sherman to hold a

conference of delegates of the different governments whose interests are allied with the project. The natural obstacles referred to present engineering difficulties, which, in view of what the engineers of the century have accomplished, do not seem to be insurmountable, and yet they must be carefully considered, for they are great. The Cordilleras go down close to the Pacific coast of South America and the delta of the Amazon, intersected by numerous important streams, begirt by thick virgin forests, will have to be traversed. Henry Meigs spent \$60,000,000 in constructing the railway from Lima up into the Cordilleras, and the Maderia and Mamoré line, at the headwaters of the Amazon, proved to be a much more difficult undertaking than the Emperor of Brazil thought it would be. It is probable, however, that exploration will discover ways yet unknown, for it has only lately been stated a pass through the mountains has been found which will afford easy access, and admit of railway communication between Brazil and the Pacific coast somewhere near the northern boundary of Peru. Appreciating the fact that a stupendous piece of work is to be accomplished, we believe that it can be performed and that the sooner we set about the construction of the international railway with the South American countries extending the new line from Mexico southwardly, first into Guatemala, and as much farther as speedily as possible, just so much the sooner shall we accomplish destiny.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

The school-book publishers having got tired (*pro tem*) of cutting each other's throats and of printing and giving away school-books for nothing, are trying to harmonize. It is proposed that they shall let each other severely alone, and not try to run one another out; to give up viewing and interviewing school-boards and teachers, and to shut down generally on the practices which have debauched the school-book trade. It is not at all improbable that they will make such an agreement, and then perhaps there will be a race to see who will get ahead in breaking it. This is only another chance for the "old, old story to be told again."

Playing-cards are being exported from this country to London. Probably this is to fill orders outside of the United Kingdom. American manufacturers are making excellent playing-cards nowadays, and, what is more, they have all of the best features about them. Foreign cards stick closely to old models, although there are some which are made on American types. By the way, do you notice how cheap playing-cards are going these days? Even the street-peddlers are hawking them, and you can buy some styles as low as ten cents per pack.

Shape novelties continue to be in favor. The latest thing in this line has figures which are moved in a life-like manner by means of a simple arrangement on the back of the card. There is one manufacturer who is quite active usually in getting out new lines, but who seems to have

quieted down lately. I am looking forward to some surprises from that source, as he has probably been doing a great deal of thinking, and when his thoughts develop—just look out.

There was a bit of a fire in Duane street last week. J. L. St. John, agent for the Powers Paper Company, lives in Brooklyn and was unceremoniously called up at 2 A. M., the burglar alarm in his office having been fired off by the firemen. When he got across the river and found five steamers doing their best to pump croton water all over his stock, he thought that there was no use in adding to the flood and therefore did not weep. He had another good reason: *i. e.*, fully insured—all except that rubber coat which he left in his office when he went home and which mysteriously disappeared. Washed away, perhaps.

I have been handed a recipe for making ink for type-writer ribbons. It is as follows: Aniline black, $\frac{1}{2}$ oz.; pure alcohol, 15 oz.; concentrated glycerine, 15 oz. Dissolve the aniline black and add the glycerine. What is the best way to apply the ink to the ribbon?

That represser of the mucilage trade yclept El Mahdi is said to allow nobody to approach him who does not come on all-fours. This is a sort of high-low-jack-and-the-game, the knave in his case being the winning card.

Barnum's sacred elephant is said to be very fond of rum. This is a great blow to the renowned showman's temperance principles. Will he be able to institute a reform? I am afraid not.

What a forcible speech General Woodford made at the dinner the other night! Have the gentlemen to whom he spoke reflected upon it? To them, as representative men, is confided the duty of opposing and defeating shams in trade and frauds in manufacture. It doesn't do to go to church and then fight on the other side, nor will it answer to applaud and assent to vigorous arguments in favor of commercial morality, business honesty and national honor, and then wink at short weights, counts, &c. No! No!! No!!!

ANSWERS TO CORRESPONDENTS.

D. wants addresses of a few manufacturers of programme tassels.

Ans.—Hempshill & Holliday, Philadelphia, Pa.; Paul Mende, New York; J. Reshon & Co., New York; Samuel Bernstein, 91 Bleecker street, New York.

G. G. M. would like to get a list of stationers.

Ans.—You will find a very full list in Lockwood's Directory, of which the 1884 edition is now in press.

M. A. S. wants address of parties making paper-bag machinery.

Ans.—You have a large paper-bag concern in your own city. The machines are all covered by patents, which are controlled by the paper-bag manufacturers, to whom you must apply.

K. B. wants to know where to get card albums without a back, the pages being reversible, in the form of a leaflet 9x12.

Ans.—Daniel Slote & Co., New York, are the manufacturers.

M. M. & Co. wish to know who manufactures the Bailey Victor copying-press.

Ans.—L. Bailey & Co., Hartford, Conn.

W. P. & Co. want to know who makes the best translucent boards for printing or lithography.

Ans.—We do not like to make distinctions.

If you will send to the different well-known manufacturers for samples you can form your own opinion. Consult Lockwood's Directory.

A. B. asks for names of houses which are headquarters for Japanese napkins.

Ans.—The Cleveland Paper Company, Cleveland, Ohio, makes domestic goods of that character, and the Nippon Mercantile Company, 310 Broadway, New York, imports them.

E. M. asks for the addresses of parties who manufacture a cheap, coarse, waterproof wrapping paper, with a sort of tar coating.

Ans.—The New York Coal Tar Chemical Company, whose factory is located at Greenpoint (Brooklyn, E. D.), N. Y., and having an office at 10 Warren street, New York city, makes such a paper, and White & Schermerhorn, 48 West Broadway, New York, can supply it.

H. lately asked for manufacturers of corrugated straw-boards for bottle wrappers.

Ans.—Since our former reply we have learned that Thompson & Norris, Concord street, Brooklyn, N. Y., are extensively engaged in this line of manufacture.

The Garrison-Chappell-Price Paper Company has been incorporated at St. Louis, Mo., with a capital stock of \$50,000. The incorporators are O. L. Garrison and W. G. Chappell, of St. Louis, and A. H. Price, of Chicago, Ill.

The creditors of Myers Brothers met at 55 Liberty street, the office of the assignee, on Wednesday, and agreed to accept fifty cents cash on the dollar, provided that payments should be made within ninety days, and also on the condition that Charles D. Myers should continue to carry on the business alone. The preferred creditors are paid in full to about \$10,400, and the general creditors get 50 per cent. of \$4,200.

The operatives of Althof, Bergmann & Co., manufacturers of toys at No. 142 and 144 Mulberry street, had not been gone from their work more than half an hour on Tuesday evening when smoke was discovered issuing from the windows of the fifth floor. An alarm called the firemen to the scene and the fire was promptly quenched. Damage to the extent of \$15,000 was, however, wrought, mostly by water.

Fowler & Wells have just published "Tea and Coffee: Their Physical, Intellectual and Moral Effects on the Human System." By Dr. A. Alcott, with notes and additions by Nelson Sizer, author of "Forty Years in Phrenology," "How to Teach," "Choice of Pursuits," &c. 16mo., 118 pages. Dr. Alcott's work on the use of tea and coffee, first published many years ago, has done much to call attention to the effects of the use of these articles. In the new edition Mr. Sizer has presented in the form of notes many additional facts brought out by the increased knowledge of the subject.

James A. Ratley is the New York manager of the firm of Fred. Bergner & Co., of Baltimore, Md., which is establishing a first-class reputation for its superior line of albums, picture-frames and plush goods. The firm is at present showing a new line of goods in albums and picture-frames, which deserve the inspection of buyers. The line of picture-frames is made up of numerous very handsome designs in ebony, gold, plush, bamboo, &c. Some of the leading styles are arch, oval, cabinet and panel. The variety of albums is almost unlimited. It embraces many in elegant, fancy leather bindings

and plush. A double album has an embossed alligator leather cover, with the corners beautifully ornamented with a raised floral design. There are albums also with easel backs and polished and padded bindings in calf and alligator leather. Some very handsome albums are ornamented with white and red roses and buds in raised plush. The firm also has a full line of leatherette albums in quarto, victoria and cabinet styles. In the line of plush boxes it has a complete assortment made up in the freshest and most attractive forms.

Pleasant service is where one knows how to render it skillfully; and still pleasanter when one can improve upon skillful work.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, February 27, 1884.

THE MONEY MARKET.—In the loan market, there is no change from the prevailing extreme ease, the general rate on call transactions being 2 per cent., with increasing exceptions at $\frac{1}{4}$ per cent., Good to first-class double-named sixty day and four-months paper is $4\frac{1}{2}$ to 5 per cent., and good to first-class single named do. is $4\frac{1}{2}$ to 7 per cent. The stock market, if we except a "bear" raid on Lackawanna which caused a momentary weakness, has been subject to little change. Stocks may go lower, or higher, on reactions, but there is reason to believe that the worst of the despondent feeling is over, and that the demand for investment will increase. Railway mortgages are in good demand and higher prices have generally prevailed. Governments are firm. Bankers' sterling exchange continues scarce and rates have further advanced. French francs and German reichmarks are also a shade firmer.

THE PAPER MARKET.—The situation has been subject to very little change during the week. An improvement in the weather has given an impetus to some branches of business that have lately been inert. On the whole, the outlook is improving, and such as would lead us to expect a season of moderate activity and of somewhat more satisfactory results in the way of profits, concerning which we are inclined to believe that the results of the trade of the present year will be more satisfactory than last year, for the reason that the shrinkage in values has probably reached its utmost limit, so that any change as the season advances is likely to be for the better. Although there is a decrease in the number of mercantile failures, the number is still abnormally large, but the weeding out of the unsound and weak concerns will eventually have a salutary effect upon those who are solvent. The attitude of Congress on the tariff question may be said to be without much influence on trade, since there is a general impression that the present tariff law will remain substantially untouched. No changes have been made in the prices of any grade of paper during the week and with one or two well-known exceptions values are fairly steady throughout. Some manufacturers have complained of a drawback to their mills running on full time on account of back-water, but we presume the freshets have everywhere subsided ere this.

THE STATIONERY MARKET.—Business is about the same as usual, there being more or less depression in consequence of the uncertain state of the weather, which tends to keep dealers from town and interferes very much with the shipment of goods. Many dealers complain that collections are hard to make at this time, a large number of bills being overdue. A better condition of trade, it is believed, will be developed when the spring business fairly opens up. Dealers state that the trade in Easter cards has been unexpectedly good, and still continues fair. There seems to be a very good demand for some classes of fine stationery, especially writing tablets. The blank-book trade is holding its own, if anything, but is quiet. The ink trade has picked up somewhat and is said to be quite fair for this season. The envelope trade continues about the same as usual, with no indications of falling off.

A RASCALLY SWINDLER.

For some time past numerous complaints have been made to Inspector Byrnes by business firms of this city, that a man representing himself as C. F. Keppler, a brother of Joseph Keppler, the artist of *Puck*, had obtained large quantities of goods from them on false pretenses. The inspector assigned Detective Fink on the case, and after several days' hard work he located the swindler in Philadelphia, where he arrested him a few days ago. Among the many firms that have been victimized are Wyckoff, Seaman & Benedict, the Remington Company, the Appleton Publishing Company; the Bolton Silver Company, of Boston; F. G. Gurney, of Boston, and Martin, Garrison & Co., of Boston. The accused is still locked up in Philadelphia awaiting the execution of extradition papers. The prisoner, of course, is no relative of Joseph Keppler. His right name is believed to be Karl Keller.

The March number of *The Manhattan* sustains the reputation which this magazine has achieved. In point of illustration, contributed matter and editorial management, *The Manhattan* stands in the front rank. It is well styled "the pearl of the monthlies."

TRADE ITEMS.

E. & S. May, Lee, Mass., are manufacturing a very nice plate paper. Samples will be sent to the trade if asked for.

J. L. Shoemaker & Co., Philadelphia, have taken the agency for the "Acme" composition, a tablet gum which they offer as an excellent article for putting up pads.

L. Prang & Co. will bring out a large number of new designs in Easter cards in a few days. Intending purchasers would do well to wait until they have inspected these goods before ordering.

Obpacher Brothers have a very full line of Easter cards, which is very popular with buyers. The goods are very artistic and will compare favorably with those of other dealers, both in respect to price and quality.

Chas. D. Whitall & Co., Minneapolis, Minn., have published "Tom's Experience," which is a very interesting presentation of farming life and opportunities in Dakota from a farmer's point of view. People who contemplate going West will be interested and instructed by this work. The same firm keeps in stock a line of souvenir albums of views of leading points of scenery in the country.

Palliser, Palliser & Co., Bridgeport, Conn., have published a set of "Useful Details" for carpenters, builders and architects. There are forty plates, each 20x26 inches, which constitute a large array of practical designs for mechanics.

The attention of the readers of THE AMERICAN STATIONER is invited to the new advertisement of Langfeld, Turner & Andrews. This firm has a very interesting line of new goods in leather. Since last season it has added a great many novelties to the numerous articles which it manufactures. It reports a good spring trade, and is very busy in preparing samples for the next season.

Geo. Uibel, 142 Fulton street, New York, manufactures sea-bean and alligator teeth jewelry, watch charms and other novelties which ought to find a ready market with the trade. The mammoth sea-bean engraved in various forms is mounted on an easel. Mr. Uibel makes a specialty of all kinds of engraving for the trade, particularly monograms, &c.

One of the most complete assortments of rubber stamps to be found in the city is that of Robert H. Ingersoll, of No. 92 Fulton street. Mr. Ingersoll has everything from an ordinary rubber stamp to a complete printing outfit, with dating combinations, noiseless self-inker and patent round and square and self-inking pocket-stamps. His stamps are perfect in operation and made of the best material.

A new jet-black marking ink of a superior quality has just been introduced by John B. Davids & Co. It is intended to be used with the stencil or brush and is warranted to be a first-class article for marking boxes, bales, bundles, &c. It contains no turpentine or lamp-black, emits no offensive odor and will not fade or rub off. It is also made very heavy, and may be diluted with water, if desired.

M. J. Anderson is showing a new line of school cards. The designs are fresh and tasteful and are appropriate for both day and Sunday school. Mr. Anderson has also a large variety of marriage certificates, lithographed in black and gold and put up in beautifully embossed envelopes. The goods are made of heavy paper and Bristol board, with medallion border. Mr. Anderson also carries a full line of tags, gum labels and law seals, which he is offering to the trade at a heavy discount.

WOULD CALL THE ATTENTION OF THE TRADE TO THEIR LATEST IMPORTATION,

HAND-MADE ROYAL IRISH LINEN PAPER.

Every sheet of this paper is made separately, by hand, in the old-fashioned way, and it is, without doubt, THE MOST ELEGANT PAPER for fashionable correspondence ever offered. This paper may be distinguished by the water-mark in every sheet:

"MARCUS WARD & CO.,
ROYAL IRISH
HAND-MADE LINEN,"

And may be had in Commercial and Octavo Note sizes, with Envelopes to match, and in either Heavy or Medium weights. Sample Books of all our papers may be had on application to

MARCUS WARD & CO., Limited, 734 Broadway, New York.

THE KERNER PEN.

\$1.00.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel, agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platinum alloyed with iridium. Price, \$1 and upward, according to mounting. Send for Circulars.

THE KERNER STYLOGRAPHIC PEN CO., 25 Bond St., NEW YORK.

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size book manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

Ashes or Attendance.

STARTED INSTANTLY BY A MATCH, IT GIVES
FULL POWER IMMEDIATELY.

WHEN STOPPED, ALL EXPENSE CEASES.

No explosions; no fires nor cinders; no gauges; no pumps; no engineer or other attendant while running. Unsurpassed in every respect for hoisting in ware-houses, printing, ventilating and running small shops.

SIZES: 1, 2, 4, 7, 10, 15 and 25 horse-power.

SCHLEICHER, SCHUMM & CO.
PHILADELPHIA, PA.

A SCHOOL-BOY'S VISIT TO A WOOD-PULP MILL.

Last summer, a few days after the close of school, I received an invitation to visit a wood-pulp mill in Readsboro, Vt.

We started, my friend and I, from Holyoke about ten o'clock in the morning, and arrived at Hoosac, a small village at the southern opening of the great Hoosac tunnel, at about three o'clock in the afternoon. There we took stage for Readsboro, Vt., and had one of the most delightful rides I ever enjoyed. The road was comparatively new, and in some places very steep, but as the horses were strong and sure-footed, everything went well. On one side of us dashed the Deerfield River, at that point little more than a small mountain stream, filled with fantastically-shaped rocks and tumbling from one to another of them, causing the prettiest little cataracts and whirlpools imaginable. The sound of the dashing water was especially pleasant after the incessant rattling and banging of the cars which we had just left, for we all know that the New Haven and Northampton Railroad is very rough.

On the other side of us was one of the numerous peaks of the Hoosac Mountain, covered almost to its crest with beautiful foliage and trees which the axe of the woodman or "logger," as he is now more commonly called, had as yet left undisturbed. As we gradually ascended and the afternoon wore away, the slowly setting sun cast its rays upon the foliage, making the leaves appear to be of the many beautiful tints of the rainbow which our most famous artists are unable to reproduce on canvas. With the music of the water dashing along, the songs of the birds and the beautiful scenery, it was a ride which I never shall forget.

It was quite dark when we reached Readsboro, and we saw very little of the "city," as it is sarcastically called by its residents. We retired early, having decided to visit the mill in the morning.

Early the next morning, after partaking of a good old-fashioned breakfast, we accompanied my friend's uncle to the mill, which is situated a short distance from the hotel. On our way we passed the large double dam which holds the water back, and crossed the canal which supplies the mill. On entering the first of the two large rooms which the mill contains, we were informed that "this" was the cutting and splitting room. On either side of the room were enormous machines which cut and split the spruce logs into pieces a foot and a half in length, and about half a foot in diameter. We were then conducted into the other, and much larger, room, where the pulp is manufactured. The before-mentioned pieces are first put into large self-feeding "grinders," each of which contains a revolving emery-wheel which grinds the wood into fine pulp. The pulp is conducted by means of pipes into large vats, where it is thoroughly washed by means of machines which are rapidly moving backward and forward.

After being washed, the pulp has somewhat the appearance of boiled starch and is of a bluish-white color. It is then run over wet felts and through enormous presses and heated rollers, in machines whose mechanism, I, not being of a mechanical turn of mind, am hardly able to explain, but at any rate it comes out at one end in large sheets and resembles thick pliable cardboard of a sort of pink color. Being now made, the pulp is put up in fifty-pound packages, and shipped to Holyoke, where it

forms the principal material for making certain grades of paper.

After seeing the pulp made, we descended a number of ladders to the wheel-pit and saw the enormous iron water-wheel which is turned by the water from the Deerfield River. This wheel revolving turns the one-hundred foot shaft which runs all of the machinery in the mill. We were glad to get out of doors once more where things were more quiet, for the clanking of the machines and the buzzing of quickly revolving wheels almost made one's head swim.

The situation of the mill is a fine one, for the water-power is excellent, and, besides, the wood, the only material for making the pulp, is floated down the river to the very door of the mill.

After a few days' sojourn in Readsboro, during which time we had some fine sport—trout-fishing, gunning, &c.—for the region around there is very wild, we returned to Easthampton, delighted with our trip.

CHAS. L. BOORUM.

SCHOOL-BOOK PUBLISHERS' CONFERENCE.

Several meetings of the leading school-book publishers throughout the country have been held in this city during the past two weeks, for the purpose of taking concerted action to break up certain practices which it is claimed are injuring the book trade. Among the firms represented were Van Amberg, Bragg & Co., Cincinnati, Ohio; Cowperthwait & Co., E. H. Butler & Co., J. H. Butler & Co., and Porter & Coates, of Philadelphia, and Ginn & Heath, of Boston. A committee, of which William W. Appleton is chairman, has been appointed by the houses interested, to take further action toward carrying into effect the object desired. A. C. Barnes of the firm of A. S. Barnes & Co., in an interview with a reporter of THE STATIONER in reference to the matter, said: "The object of the publishers is to prevent illegitimate methods of introducing school-books, that is, agitation among school boards and teachers with a view to changing books for no other reason than to transfer the patronage from one publisher to another, we to agree not to create dissatisfaction with the books in use. Every book is to be allowed to stand on its own merits. Changes, if made at all, must be made spontaneously on the part of the school boards and teachers. There is to be no agreement about prices. Every publisher will sell his books as cheaply as he can afford to. The tendency of the movement will be to reduce prices by saving expense to the publishers. Certain houses have already agreed to the arrangement, and it is believed that all will come into it, as it will be mutually advantageous.

Another representative of a leading school-book firm said: "The object to be attained is not at all in the nature of a monopoly. The object is more particularly to come to a mutual agreement as to certain methods of doing business, which have a tendency to demoralize trade. As the case stands now many firms will give a line of school books away in order to have their works introduced. Eventually another firm, perhaps, will come along and do the same thing, and hence its books will be substituted. So the thing is kept up thus, not only injuring trade but the cause of education. Hence, you see, there is need of some concerted action to put a stop to the evil.

A new song by John P. Dougherty and called "Rosa Darling" has been received. It is of a popular character.

NOTE.—Two chattel mortgages reported on February 7 and 14, as having been given by D. H. Gilder-sleeve, New York, are, it appears, identical. A mortgage for \$3,350 was given, on which the amount due and unpaid is \$2,750.—Ed.

The firm of A. Weidmann, No. 306 Broadway, has added a new feature to its already large establishment by arranging one of its lofts with a complete assortment of samples of staple lines as well as the latest novelties in the toy business. This firm has taken this step in order to give its patrons and friends all the facilities possible to obtain their wants from foreign markets, by placing their orders timely, at lowest import rates, and to enable the middle-class dealer to compete with the larger houses. In giving import orders there are naturally many items of expense done away with to the importer, such as extra packing, cartages, handling, storage, insurance, interest, &c., which are all saved to the dealer by correspondingly low prices. With this in view, A. Weidmann has added this feature to his establishment and is now prepared to take import orders in toys, which are represented in all of their varied assortments, masks, gold and silver trimmings for fancy costumes; also games, such as dominoes, chess, dice, &c. Mr. Weidmann will continue to add new samples to his assortment as soon as they appear in the market. The experienced buyer of the firm, O. Janscher, is now in Europe and orders placed during spring will receive his personal attention. A visit to this establishment will well repay the trouble.

THE COUNTS OF PAPER.

The *Westliche Post*, St. Louis, takes up the subject of "counts of paper," reviewing it under the light of the presentation of trade opinion made by THE AMERICAN STATIONER of February 7, and says:

"Yet we labor, for example, in the paper trade still with 24 sheets to the quire and 480 sheets to the ream. Why is this? Why not 25 to the quire and 500 to the ream? In order to examine views on this subject the AMERICAN STATIONER sent out circulars with the request to give upon an inclosed voting ticket opinion as to the introduction of reams of 500 sheets and account books of 100 pages. Out of all the tickets sent out, 2,342 were returned unanswered, 2,322 from parts of the United States and 20 from Canada. The result was as follows:

	Yes	No
For 500 sheets.....	1,876	465
For 100 pages.....	1,912	346
Majority for 500 sheets.....	1,410	
Majority for 100 pages.....	1,566	

Majorities against 100 pages come from no State, and against 500 sheets from only Alabama and Colorado. Some voting no gave their reasons: That one could not exactly give a half quire with 500 sheets in retail trade; that the weight of a ream would be greater, &c. Other reasons against the innovation were: People are now used to prices on 480-sheet reams; the present division of books is good enough—"let well enough alone," &c.

But what are these arguments opposed to an idea which, if realized, can only bring advantage to trade and to the public, and quite considerably facilitates business? We know now that twelve inches *exactly* make a foot, and 5,280 feet *exactly* make a mile. We will get used to it just as easily as the Germans and the French to a kilometer, consisting of 1000 metres, and then can reckon much more comfortably.

Several large wholesale houses have for several years past sold reams at 500 sheets. Why is that approved? And we are called such a wonderfully practical people.

But we think if a change is once made, that a step farther shall be taken, and make the quire to consist of 100 sheets and the ream of 1,000 sheets, whereby the present bundle of two reams can be dropped.

Or let them call 10 reams a bundle. Then the ream could handily be divided into halves, quarters, &c., and the decimal system would be perfected and practical.

In spite of the 480-sheet ream, envelopes are sold by the 1,000. If we wish to send away 1,000 letters we must buy 2 reams and $1\frac{2}{3}$ quires paper and 1,000 envelopes, or for every 100 envelopes, 4 1-6 quires of paper.

Is there anything practical in that?

THE PNEUMATIC COPYING PRESS.

WE take pleasure in calling the attention of the trade to our improved Copying Press. It has many advantages over the "Screw Press." No separate stand is required. It can be operated on any desk, table or chair, being perfectly portable.

The rubber legs prevent its marring the finest table.

One-half the time and three-quarters of the labor saved.

The great beauty, together with the portability of the Pneumatic Press, especially adapts it for use in handsome offices and residences.

Send for Illustrated Catalogue.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double

Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

NEW YORK, MARCH 6, 1884.

WHOLE NO. 454.

Correspondence.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., BOSTON, March 5, 1884.

Business in general does not show much activity just at present, though enough is doing to prevent the blues, and this gives encouragement for the future. The spring trade has hardly opened up yet, but I find many importers and manufacturers of stationers' novelties are preparing for it in good earnest, and before the month is over Boston's leading houses will be well represented on the road.

From the number of samples examined in various lines I see that plush still holds its own in the general make-up of this season's goods. The bright colors seem to rule, and by the use of plush with other suitable materials some very tasty ornaments are produced. Bronze goods are also in fashion, or rather growing more fashionable. In some articles a combination of bronze and plush is shown which makes a very pleasing effect.

In bronze and brass goods the Forbes Lithograph Company is importing a rich line of plaques for home decoration. In design some are reproductions of mediæval heroes; others present the portraits of the celebrated artists of the middle ages. These plaques are very artistic in design and finish, and are well worthy a place upon the walls of the most fastidious housekeeper. Another line of plaques is shown in enameled iron, upon which is represented subjects of a modern age. These are in oval shapes, and the chance for pleasing effects in the blending of rich colors has not been neglected. For home decoration nothing is more suitable than these plaques, and they will certainly have a large sale. The success of the Forbes Company with its previous importations of artistic novelties has encouraged the house to introduce these goods for the spring and fall trade. Travelers will soon take the road with samples. Let the trade look out for them.

King's office pens are meeting with a remarkable demand. When I state that orders for these pens are being received from every State and Territory in the country, I give only solid facts, for I have seen the records, and there is no going back on the returns. The New York trade can be supplied with these pens by Henry Bainbridge & Co., of that city, with which firm Geo. F. King & Merrill have arranged to place them. In staple goods, this enterprising house has been doing a very good business, notwith-

standing the bad weather. Especially is this so in blank-books, which are extensively manufactured at this establishment. Mr. King informed me that for the past five years his better grades of blank books have been made up on the "100-page count" basis.

Stationers on the lookout for a stamping press might be interested in examining into the merits of those manufactured by A. G. Mead, of this city. In my travels I find that these presses are very generally in use among the manufacturing stationers here and are very highly indorsed. They are specially designed for illuminated work, embossing and the like. A neat device for reversing the die and counter, whereby a saving of time is effected, is but one of the merits of this press. For twelve years have these presses been on the market, and they have stood the test. Hundreds are in use, and hundreds more will be wanted. Descriptive circulars will be furnished upon application, as will be seen from Mr. Mead's business announcement in another column.

Another machine that will stand a mention is the wire-stitching machine for bookbinders, manufactured by Charles Carr, of South Boston. This machine is the simplest and the most efficient that I ever saw. It has neither springs, ratchets nor pawls, and is practically free from complication, and can be operated by power or by hand. It works equally well upon thin or thick work, with no waste of wire. A number of the large binderies of this city have these stitching machines in constant daily use, and they give entire satisfaction. A number of letters from different bookbinders in the large cities give added testimony to the value of these machines. For bookbinders' use, I know of nothing to equal them.

The Russell Paper Company is running the Lawrence Mill to its fullest capacity, and is turning out more blotting-paper than ever before. The sales for February were the largest ever booked for one month's business. In addition to its increasing home business the company is working up an extensive foreign trade for its blotting-papers, which are of the same high standard of quality as when first presented to the trade years ago. The Russell blotting-paper will stand all of the tests known—even the test of public opinion.

Lee & Shepard, the authorized publishers of Wendell Phillips' works, will at once issue two editions of the "Speeches, Lectures and Letters." One, a popular edition, will contain a brief biographical sketch, and will be sold for about \$1.50. A cheap (fifty-cent) edition will also be furnished (without abridgement). These publishers have also in press a new edition of

"Lord of Himself," a novel by Francis H. Underwood, a work which has long been out of print.

Unless I made some brief allusion to the weather your readers might suppose that we didn't have any here; but we have, and its in a state of considerable uncertainty. A. L. D

SCHENECTADY SCRAPS.

[FROM OUR REGULAR CORRESPONDENT.]

SCHENECTADY, February 29, 1884.

Always a dull business month, February has been more than usually quiet this year. The weather has been of the worst possible description. Rain, fog and clouds over head and slush and general nastiness underfoot, with only two or three pleasant days go to make up the weather record for the entire month. The roads are in a very bad condition and few farmers have been in town.

The shutting down of the Ellis Locomotive Works in the latter part of last month for the purpose of making much needed and quite extensive repairs and alterations threw some eight or nine hundred men out of employment. It is now thought that these works will start up again in a short time with a reduced force. Then the financial troubles of the Jones Car Manufacturing Company, cause things to look darker than ever for a time. These works employ about four hundred men and are now running under the control of a receiver.

The report of the assignee of Henry Swere shows liabilities amounting to \$5,837.27, with nominal assets of \$5,604.39, actual assets of \$4,803.95, and book accounts considered not good, \$208.15. As the preferences amount to some \$4,300 it is not probable that after the expenses of the assignment have been deducted the unpreferred creditors will get very much. A great deal depends upon what the stock will bring at the public auction, which commenced on Monday the 25th inst., and which will be continued until the entire stock is disposed of. So far the sale has been very satisfactory. A great portion of the stock, however, consists of fancy articles not in very great demand and on which it cannot be expected to realize much at a forced sale. It is not at all probable that anyone will take Mr. Swere's place, as there are already enough well-established bookstores here to supply the demands and needs of the city.

The very excellent system of public schools of the city, and the demand caused by the needs of the students of Union College, make Schenectady a very good book-town, but the people are conservative and not given to investing to any great extent beyond their necessities.

There are about sixty schools in the county, outside of the city, under the control of the county school commissioner. G.

PITTSBURG BRIEFS.

[FROM OUR REGULAR CORRESPONDENT.]

PITTSBURG, March 3, 1884.

The flood of the first part of last month was the largest and most damaging that the Ohio valley ever experienced. At this place the waters were higher than ever known. In 1832 the Monongahela was 33 feet $4\frac{1}{2}$ inches deep, and this time it was 34 feet $8\frac{1}{2}$ inches. The measurement was on the old Munholl brewery, situated near the point.

Our worthy citizens responded promptly and liberally in raising funds for the many poor who were driven from their homes. Our people sent out three heavily loaded steamboats and one barge with provisions and clothing for the relief of the flood sufferers between here and Cairo. I never want to witness such devastation again. The effects of the flood are left with us in the shape of damp cellars and weakened walls. Many retail dealers complain of a quietness in trade which can only be attributed to the flood. Saturday last a great many buyers were out and it is to be hoped that the throng will continue.

Thirty-two years ago the well-known retail and wholesale book and stationery store of J. R. Welden & Co. was established on Wood street in this city. Prosperity has been its guiding star and the fair name of the house has never been sullied. A small boy named Lee Mason was one of the necessary adjuncts to the new venture in 1852. Sweeping the store, wheeling the barrow and doing general errands was his duty. Twenty-one years later this boy became the surviving partner and to-day he is the firm of J. R. Welden & Co. Pluck and perseverance were his for all they were worth and to-day he has the largest book and stationery establishment in this city. His stand occupies two buildings and has four floors. The line of goods is strictly first-class, choice and elegant. A new feature is having a separate department for a complete set of samples of every kind of penholders, pencils, inks, ink-bottles, paper, cards, &c. The purchaser takes anything he desires right there and twice a day the samples are re-filled or replaced. Mr. Mason carries a stock of goods worth from \$100,000 to \$125,000 and has a gentlemanly force of clerks at the counters. Lately no traveling men have been sent out from this house and Mr. Mason thinks that he is ahead because of such a fact.

W. W. Edgar reports an excellent valentine trade, especially with the finer grades. A recent New York traveling man said that Edgar had the largest and most complete periodical and news counter west of New York, which in "our" judgment is a deserved compliment.

G. W. Reed & Co. will move farther up Wood street on April 1. They will have commodious and convenient quarters. Their old stand will be occupied by a former partner, Harry Watt. Mr. Watt will associate with him Charles Graham, who has been a teller in the Bank of Pittsburgh for a number of years. Both of these young gentlemen have a host of friends in the two cities, and they express great confidence in the success of their venture. They will begin with the newest and best stock of stationery and books. Mr. Watt's experience is sufficient to enable him to select only the choicest and most salable of his line of goods. He is now in the East making his purchases, and I can recommend him to the jobbers as thoroughly reliable

and honest. He has a reputation to be envied by any young business man in any community.

Joseph Eichbaum & Co. had a fine trade in the expensive and rich valentines, James Wilkinson, who attends to this branch of the business, has good taste, and it has become well known to our people. This firm has been sending out some of the largest and finest sets of account books I ever saw. Your correspondent thinks that no New York house can do any better work than Joseph Eichbaum & Co.

To-day we have a regular Western blizzard. Very cold, frosty, snow falling and a terrific wind roaring through the air. It is a good day to stay in the office. G. W. H.

CINCINNATI CIRCUMSTANCES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, March 4, 1884.

Winter holds on with a firm grip. March came blustering in like a roaring lion; the small streams are covered with ice; people go about in overcoats and furs; business is checked by the chilling weather. The month of the year and the day of the month for spring business are here, but spring weather is a lacking ingredient. Did you ever feel impressed with the special influence of the weather on certain kinds of business. Take, for instance, the sale of valentines here in Cincinnati last year and this year. Is was almost nothing. The flood was at its height on St. Valentine's day in 1884, and in 1883 it reached its topmost height on February 15, the day after that sacred to the lovers' saint. That did the business both years. This year one scarcely saw a valentine in a show-window anywhere. A few were sold, of course, but only a few. Yet there was no confusion, no panic—nothing of the kind. There seemed to be a feeling that at that time only serious things were appropriate; that the time for fun or play was not during a flood, attended with no one could tell how much suffering. Now the time for the sale of Easter novelties has come. The outlook for this is good. Never was there more skill and taste represented in the production of Easter cards than are shown in those now on sale by the leading stationers. The call for them in the country is good, and dealers are doing a fine jobbing trade in them. Some of the money that was spared from valentines will evidently be expended for these pretty luxuries.

The book trade here is enjoying an increase of business that is really gratifying as an evidence of the diffusion of culture in this region. This evidence pertains not only to the number of books sold, but to the character of them. Good standard literature, comprising history and belles-lettres, go into family and individual libraries, while the number of public circulating libraries in towns and small cities is increasing wonderfully. Scientific books, especially those on natural history, are selling wonderfully well. All classes of people are purchasers, but solid works sell best in manufacturing communities. Farmers, too, are selecting good libraries of standard books, and this is something new, or rather something different from what used to be the case when the farmer made up his library from the purchase of church publications or the subscription agent's stock. Furniture factories find an increased call for book cases, not only from the city but from the country, which bears out what has just been said about the increased diffusion of books among the whole people.

The news paper dealers are looking to the

canvass for the election of a president this year to cause a large use of this commodity. The sales of book paper average an increase each year. There is a growing use of this sort of paper for advertising purposes in the way of pamphlets, but the country is also growing and as it gets older runs more to books. The amount of book work outside of school books, religious books and law books printed here is a small item.

Trade visits have been very few this week. J. B. Gunn, of E. Faber, New York, was among the visitors.

The additional remittances of money for the benefit of sufferers from the flood, to those printed, in last week's letter, are:

Tower Manufacturing Company, New York.....	\$25
Eberhard Faber, New York.....	25
Edward Kimpton, New York.....	10
Esterbrook Steel Pen Company.....	50

These have been sent to William B. Carpenter. Many who have given through this medium had already contributed to funds raised in the East for the same purpose, and it is known that many whose names do not appear among these givers had contributed largely to home funds raised for the benefit of sufferers.

PRINCE WILLIAM.

RICHMOND ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

RICHMOND, Va., February 29, 1884.

The feature of the past month has been the disagreeable rainy weather, and, as a natural result, the stationery trade, as well as all other lines of business, has been affected thereby to a greater or less extent. Notably has this been the case with retailers. All in all, however, the volume of transactions for the month of February shows no diminution from that of the corresponding period for last year.

The announcement is made with regret of the failure of Carlton McCarthy & Co., stationers and booksellers. N. V. Randolph, of J. W. Randolph & English, who are the largest creditors, has been made trustee, and the stock is being closed out to the best advantage. The assets are reported to be \$15,000, with liabilities at \$12,000. Want of sufficient capital to conduct the business is the cause of the failure. It is thought that the stock will realize about fifty cents on the dollar. The firm surrendered everything, not even taking the benefit of the homestead exemption. It has the sympathy of the entire trade in its misfortune. A deed was executed for all creditors.

Everett Waddy, the youngest member of the stationery trade in the city, who succeeded to the business established by J. T. Ellyson, and more recently conducted by Yancey, Waddy & Co., reports a good trade. This house does a large commercial and railroad business in stationery, printing and blank-book manufacturing.

The Richmond Paper Manufacturing Company has got into its new quarters and now has the handsomest and best arranged paper house in this city.

Baughman Brothers are enlarging their stationery and paper warehouse, with a view of increasing their retail facilities.

The Randolph paper-box manufactory is now turning out 100,000 boxes every ten hours. Last week it made shipments to Canada, Mexico, Buenos Ayres and the Sandwich Islands.

SENTINEL.

THE HARVARD FOUNTAIN PEN.—The Harvard is a flexible Gold Pen affixed to a fountain or reservoir holder. Having no air tubes, wires, springs, &c., which are the great obstacles to the efficient working of all fountain pens. These objections have been finally overcome in the construction of this Pen, and the utmost simplicity and adaptation for the purpose having been the objective points sought for, we take pleasure in offering it as one in which this result has been accomplished to the highest degree possible. Every Pen guaranteed to give satisfaction. Send for Price List.

TWELFTH YEAR OF PUBLICATION.

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of
Typography, Lithography, Paper-Making,
and the Auxiliary Trades.

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high-class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, of WYMAN & SONS, 74 and 75 Great Queen Street, London, W. C., England.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

HANGING CLAMP.

Another of the simple and inexpensive devices which so frequently come before the trade is illustrated. It is known as Moore's Hanging Clamp, and is a clip cut from metal and turned to form a tube, with an open joint which forms a spring or clamp fastening for the papers which it is used to retain. The blank has one side cut

so as to form a suspension piece, which, having a perforation, permits the clamp, with the papers which it retains, to be hung up on the wall or other convenient place. This is a cheap, neat and easy device for keeping papers together, and hanging them out of the way while having them ready at hand. R. R. Watson handles it.

NEW PATENTS.

No. 292,553. Paper Box.—Gustav L. Jaeger, New York, N. Y.

A paper box having an end-piece bent inward upon itself and scored lengthwise on its inner part, side ears turned inward into the fold of the end-piece, and a tongue or tongues to engage the free edge of the end piece.

No. 292,654. Paper Box.—Gustav L. Jaeger, New York, N. Y.

A paper box having its opening at one end and at a portion of the top adjacent to that end, and provided with a closing flap constructed at its free edge to engage the box top, and having a tongue-piece at or near its central line, a cheek-piece attached to each of its sides, with an ear-piece forming part of each cheek-piece and lying back on the closing-flap, and both ear-pieces engaged by the tongue-piece, the cheek-pieces of the closing-flap embracing the sides of the box.

No. 292,658. Tax, Interest and Percentage Calculator.—William S. Kiser, Albion, Ind.

In a tax, interest and percentage calculator, the combination, with a tablet having a guide-strip at its left-hand edge, of a triple sliding indicator and a tabulated sheet, on which the per centum for one to one thousand has been calculated and arranged in columns of one hundred resultants, whereby the sliding indicator may be removed to expose the amount of tax, interest or percentage on a given principal.

No. 292,678. Folding Slate.—Conrad Pilgrim, assignor to C. Nelson, East New York, N. Y.

The combination, with two slates and slate-frames and muffling-strips forming the edges of the frames, of flexible band or bands extending from an aperture under the muffling-strip of one frame, over such strip, thence through an aperture under the muffling-strip of the second frame, over this strip, and finally into a second aperture under the muffling-strip of the first-named frame, the ends of the bands being fastened in the proper apertures.

No. 292,692. File-Box.—Fernando M. Senter, Columbus, Ohio.

No. 292,709. Checker and Base-Ball Combination Game.—Hiram S. Towner, Dutton, Mich.

No. 292,763. Combined Letter-Scale and Coin-Tester.—Edmund C. Furnelle, Seneca, Kan.

No. 292,782. Shading-Pen.—Robert H. Beazley, Fayette, Mo.

No. 292,789. Ticket Case.—Alvin R. Burdick, Aurora, Ill.

A ticket or card case composed of solid ends, bottom and sides, and a hinged cover, one end of the box being made narrower for withdrawing the cards, and the middle portions of the tops of the sides provided with narrow inwardly-turned flanges, with spaces between the flanges and the hinged end of the cover, whereby cards placed on the under side of the cover will at their ends pass between the sides of the box, and be forced past the flanges and lie flat in the box by the shutting of the cover.

No. 292,793. Toy.—Louis F. Fallon, St. Louis, Mo.

The combination of two sticks transversely joined in the shape of the letter T, with strings and loosely-depending roosters.

No. 292,802. Paper Box.—Edrick Gowdy and Charles B. Russell, Birmingham, Conn.

No. 292,854. Type-Writing Machine.—Henry B. Richardson, Amherst, Mass.

In a type-writing machine, a gimbal-frame pivotally supported therein, a letter-block hung in the frame and bearing a series of printing characters upon one or more surfaces thereof, and adapted to be rotated upon its bearings, a hammer to strike upon the block and operating mechanism, a movable letter-plate bearing a series of letters and characters upon its surface, a stylus and appliances connecting the gimbal-frame and stylus, whereby the latter is permitted to be moved to different positions over the surface of the letter-plate and to be pressed thereupon and moved downward with the latter.

No. 292,856. Stencil Ink or Color Fountain.—Levi R. Rockwood, Worcester, Mass., assignor to Mason M. Flint, same place.

A stencil ink or color fountain having a reservoir provided with a flexible top plate, in combination with a tube or column projecting therefrom, and adapted to be used as a lever for depressing the central portion of the top plate.

No. 292,894. Combined Toilet-Mirror and Photographic Album.—Leopold Wolf, New York, N. Y.

The combination, with an upright supporting-frame, of a centrally-pivoted and reversible panel having a mirror on one side and a photograph-album attached at the other side, the album being centrally-pivoted to the back of the mirror-panel.

No. 292,899. Call-Bell.—Abner W. Barton, East Hampton, Conn.

No. 292,899. Game Apparatus.—Thos. Davies, Poughkeepsie, N. Y.

No. 292,902. Map-Holder.—John W. H. Doubler, Rockford, assignor to A. H. Andrews & Co., Chicago, Ill.

No. 292,909. Case for Pencils.—John C. Haring, Jersey City, N. J.

The combination, with the receiver and a

carrier furnished with a pin or lateral projection, of a fixed guide within the receiver and a movable guide between the receiver and carrier, the two guides having between them a passage for the pin or projection on the carrier, and a spring and pressure-cap for operating the movable guide for opening and closing the passage.

No. 292,917. Pocket Knife.—Friedrich Wilhelm Kaldenbach, Solingen, Prussia, Germany, assignor to Alexander Coppel, same place.

No. 292,919. Manikin, Automation or Jointed Doll.—Carl Axel Kihlgren, Boston, Mass.

An automaton, manikin or doll, having any two of its parts jointed together, combined by means of a duplex ball-joint.

No. 292,934. Strap-Clamp.—Edmund R. Menzel, Jersey City, N. J.

No. 292,993. Sheet-Delivery Apparatus for Printing Machines.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

A cylinder or revolving carrier provided with means for gathering or collecting sheets and with pins for securing a proper register of the sheets.

No. 293,033. Coin-Holder.—Charles Carroll Johnston, Jackson, Miss.

No. 293,054. Album.—Stephen Meers, Brooklyn, N. Y.

An album, the leaves of which are each composed of two sheets of paper having openings, the edges of which openings are embossed and thereby raised to create a pocket for receiving the picture.

No. 293,061. Paper Box.—Harvey S. Munson, New Haven, Conn.

No. 293,069. Hypotenuse Calculator and Indicator.—Daniel Patten, Calistoga, Cal.

No. 293,120. Sheet-Delivery Apparatus for Printing Machines.—Stephen D. Tucker, New York, N. Y.

The combination, with a primary apparatus adapted to fold sheets, of a secondary apparatus adapted to fold the sheets delivered from the primary apparatus, means for rendering the folding mechanism of the primary apparatus inoperative, means for guiding the sheets therefrom, and means for varying the speed of the secondary apparatus.

DESIGNS.

No. 14,564. Font of Printing Type.—Charles H. Beeler, Jr., Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent, 7 years.

No. 14,570. Font of Type Ornaments.—George F. Giesecke, Leipsic, Saxony, Germany. Term of patent, 7 years.

No. 14,571. Font of Printing Type.—George F. Giesecke, Leipsic, Saxony, Germany. Term of patent, 7 years.

Nos. 14,576 and 14,577. Font of Printing Type.—Herman Ihlenburg, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patents, 14 years.

No. 14,578. Font of Printing Type.—William W. Jackson, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent, 14 years.

No. 14,582. Calendar.—Romaine Mace, New York, N. Y. Term of patent, 7 years.

No. 14,594. Group of Statuary.—John Rogers, New Canaan, Conn. Term of patent, 14 years.

Mfrs. of Bookbinders' Machinery and Tools.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.*SECOND.*—It has the best system for rapid and perfect feed.*THIRD.*—It has the best system for gauges, and can be more quickly adjusted.*FOURTH.*—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.*FIFTH.*—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.*SIXTH.*—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.*SEVENTH.*—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.*EIGHTH.*—Each machine has a scoring cutter attached.*NINTH.*—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

C. C. Vaughan has bought out S. J. Tomlinson, publisher of the *Clarion*, Napier, Mich.

A. E. Palmer, manufacturer of ink, &c., Reading, Mich., has removed to Hillsdale.

T. T. Wilson, publisher of the *Register*, Lincoln, Kan., has sold out to Pinkerton & Power.

Kelley & Morris have bought the business of S. M. Gardenshire, publisher of the *Journal*, Lyndon, Kan.

Edmund J. Lane, of the firm of Edmund J. Lane & Co., booksellers and stationers, Dover, N. H., is dead.

The John Burns Publishing Company, St. Louis, Mo., has been incorporated with a capital stock of \$10,000.

George D. Barnard & Co., stationers and printers, have discontinued their branch establishment at St. Paul, Minn.

Robinson & Smart, picture-frame manufacturers, Concord, N. H., have dissolved partnership. Robinson & Ballou continue the business.

Porter & Woods, publishers of the *Gazette*, Bowling Green, Ky., have dissolved partnership. The business is now conducted by Porter & Coombs.

An extensive fire occurred at Utica, N. Y., on Sunday, March 2. It originated in the rear of Holbrook's shoe factory, and in an incredibly short time spread to Newall & Son's wall-paper house, the *Daily Observer* building and H. Barnard's Son's wall-paper establishment and other buildings. N. C. Newall & Son carried stock amounting to \$55,000, which is a total loss; insured for \$40,000. The loss on the firm's building is estimated at \$16,000; insured for \$7,500. The *Observer* Company's loss is estimated at \$20,000; insured for \$13,500. H. Barnard's Son's wall-paper establishment was damaged \$500 by water.

A fire broke out in the building at 59 Beekman street running through the block and including 89 Ann street, New York, on Wednesday morning. Among the firms which incurred losses are: McKesson & Robbins, druggists, loss \$12,000. Clinton Wire Cloth Company, loss \$1,000; insured for \$10,200 in the Phoenix and Germania companies. George H. Adams & Son, map and book publishers, \$3,000; insured for \$21,650. William Sheppard, card and label cutter, \$2,000; insured for \$5,000, in the Mutual Fire Association. Winsor, Dormitzer & Co. printers and lithographers, \$1,000; insured for \$7,800 in the Park, Niagara, Williamsburg City, Concordia and New York companies. L. W. Starr, job printer, \$500; no insurance. O'Neil & Sullivan, bookbinders, \$500; insured for \$3,750 in the North American of Philadelphia. P. J. Kenny, book publisher, \$500; insured for \$2,000 in the Commercial and Citizens' companies. Ellis & McDonnell, manufacturers of copying-books, \$200; insured for \$2,000 in the Commercial Union Company. The building is owned by F. W. Whitridge, and is damaged to the amount of \$2,000.

E. Detrick & Co. (E. Detrick and J. H. Nicholson), dealers in bags and twine in San Francisco, assigned on Friday of last week, to Jacob E. Tabor, with liabilities amounting to \$380,000. The principal creditors are the Bank of California, \$36,500; Comptoir d'Escompte de Paris, \$120,500; Pacific Bank, \$11,000; White & Lessak, \$40,000; Lazard Frères, \$142,000. These are partly secured by merchandise and cash amounting to \$190,000. Lazard Frères hold \$115,000 in securities. The others hold securities in excess of their claims. Additional creditors are the Mount Vernon Company, Baltimore, \$10,000; Woodward, Baldwin & Co., New York, \$36,770; Lehman, Abrahams & Co., New Orleans, \$11,000. The value of the assets is \$90,000.

Haskell's book store, the United States Express Office and Western Union Telegraph Office, at Traverse City, Mich., were destroyed by fire February 29. Loss, \$10,000; partly insured.

A fire broke out in the office of the *Evening News*, Buffalo, N. Y., on Sunday, but was subdued after completely gutting the editorial room. The loss is about \$1,000; covered by insurance.

The stock-house of Russell Jarvis's paper mill at Claremont, N. H., was destroyed by fire on Saturday. Loss, \$3,000; no insurance.

The handsome residence of W. D. Griffith, at the paper mills, Athens, Ga., was consumed by fire on February 29.

Emil Poliwka & Co., dealers in glues, &c., Montreal, Can., have admitted David Henry Rennoldson to membership in their firm.

Wimbush, Powell & Co., Kansas City, Mo., have discharged a mortgage of \$650.

J. D. Chamberlain, bookseller, &c., Chicago, Ill., is dead.

M. R. Locke, publisher, Chesterfield, Ill., has been burned out.

A. Malcon, lithographer, San Francisco, Cal., has been attached.

F. W. Peyton, newsdealer, &c., Huntington, W. Va., has sold out to J. V. Davis.

R. Samuel & Co., dealers in toys, &c., Merced, Cal., have made an assignment.

A. S. Mercer, publisher of the *Shield*, Henrietta, Tex., has been burned out. Insured.

J. A. Garlick, bookseller and stationer, Brussels, Ont., has made an assignment in trust.

James H. Smith, dealer in photo supplies, Quincy, Ill., has sold out to Robert Dempster.

Joseph Tagg, dealer in wall-paper, Memphis, Tenn., has been damaged by water. Insured.

Executions amounting to \$2,300 have been issued against Peter Raeder, stationer, Pittston, Mass.

The stock of the estate of M. A. Clark, bookseller, &c., Paisley, Ont., is advertised to be sold at auction.

Daniel Flanigan & Co., publishers of the *Herald*, Delaware, Ohio, have sold out to J. K. Newcomer.

The business of John Kurz, dealer in shelf-paper, New York city, has been placed in the hands of a receiver.

John Tilley has been admitted as a special partner in the firm of Winn & Hammond, blank manufacturers, &c., Detroit, Mich., putting in \$2,000 to February 1, 1887.

Guttenberger & Paine, job printers, Evansville, Ind., have dissolved partnership. Guttenberger & Froleich succeed to the business.

The Woodruff Publishing Company, publisher of the *Herald*, Middletown, Conn., has sold out to the Middletown Publishing Company.

Caldwell & Brady, publishers of the *Enterprise*, Wytheville, Va., have dissolved partnership. M. M. Caldwell succeeds to the business.

Wolcott & Greenway, booksellers and stationers, Syracuse, N. Y., have dissolved partnership, Mr. Greenway retiring on account of ill-health. The remaining partner has associated with Orlando C. West under the style of Wolcott & West, and the new firm will continue business at the old stand.

Allaire & Co., manufacturers of Shultz's tie-envelope, are having a very good trade in that line of goods. The envelope is made of the best manilla paper and comes in fifteen different sizes. It is used largely by merchants in mailing samples of goods, catalogues, &c. After placing in the envelope the article to be sent, the envelope is sealed at one end by a gummed flap, the flap at the other end being tied with a ribbon, thus enabling the postal authorities to examine

BLOTTER

150 VARIETIES.

REVERSIBLE * BLOTTER.

(CAN BE USED BOTH SIDES.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c. &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of Universal Blotter Tablet, at proportionately lower prices.

(WARRANTED.)

W. H. HASBROUCK, 91 Liberty Street, New York.

the contents of the envelope, while saving the user the trouble of tying the flap.

John McGinness, stationer, Pottsville, Pa., is dead.

N. D. Popert, bookseller and stationer, Marysville, Cal., is dead.

McCarthy & Farley, printers, San Angelo, Tex., have sold out.

Frank K. Merritt, publisher of the *Sonoma Index*, Sonoma, Cal., has sold out.

Low, Marshall & Co. have bought out Elder, Orr & Co., job printers, Dayton, Pa.

A Baricklo, manufacturer of window shades, Brooklyn, N. Y., has been damaged by fire.

S. C. Bigford, dealer in picture-frames, &c., Toronto, Ont., has made an assignment in trust.

Cornell Brothers, dealers in paper hangings, &c., Attleboro, Mass., have been damaged by fire.

Torrass & Freeman, printers, San Francisco, Cal., have dissolved partnership. V. A. Torrass continues the business.

Lewis Baker & Co., publishers of the *Register*, Wheeling, W. Va., have been succeeded by the West Virginia Printing Company.

W. G. Baker & Co., dealers in window shades, Boston, Mass., have dissolved partnership. W. G. Baker continues under the same style.

Spitz & Frederick, manufacturers of blank-books, Newark, N. J., are advertised to be sold out under judgments recovered against them.

Theodore Schwerdtmann has succeeded to the business of Schwerdtmann & Co., wholesale and retail dealers in toys, &c., St. Louis, Mo. Style unchanged.

The fifth edition of the "Hygienic Home Cook-Book; or, Healthful and Palatable Food without Condiments," has been published by Fowler & Wells, 753 Broadway, New York.

The Globe Manufacturing Company, 44 Beekman street, New York, manufactures the "Peerless" and "Jewel" cutting machines and the "Clipper" and "Jewel" 3-roller job presses, to which it invites the attention of buyers.

The Sanderson newspaper file, made by the Sanderson Manufacturing Company, Chicago, is a very neat and convenient article for the purpose for which it is intended. It is easily handled, the papers can be quickly placed or removed from it. It comes in eleven sizes.

Ralph Trautmann, New York, has associated himself with Henry P. Baily and George S. Blampey under the firm name of Trautmann, Bailey & Blampey. This firm will continue the importation and manufacture of art productions and advertising novelties, at 312 Broadway.

The establishment of Powers & Weightman, proprietors of one of the oldest chemical works in the United States, was destroyed by fire on Friday morning of last week. The firm, in addition to the manufacture of drugs and medicines, manufactured on a large scale chemicals used in paper-making and in photography. The loss, it is thought, will be \$1,500,000, while the insurances are believed to be about \$290,000.

L. Maynz, the junior member of Edward Posen & Co., who has been taking orders for the fine art albums of his firm in the South and West during the past month, reports some very encouraging sales. The agency of the firm named was only established in this country on January 1 of this year, and considering this fact the firm is to be congratulated, notwithstanding that there is a great deal in having a popular line of goods to sell.

Louis Hartman, dealer in picture frames, New York city, whose assignment was announced last week, has settled with his creditors nominally at eighty cents on the dollar. August Kohn, the assignee of Mr. Hartman, made the following statement to a reporter of THE STATIONER: "Mr. Hartman had been in business only about four months, and during that time the running expenses of his business were so large that they consumed all of his capital, and when he assigned he had most of the goods that he received from his creditors. They agreed to take back 80 per cent. in merchandize in settlement of their claims. The goods were delivered last Friday and a release has been signed by all of the creditors, so that Mr. Hartman has made an honorable settlement. During the time that he was in business he sank \$5,000 to \$8,000, and rather than lose any more money he made the assignment. Now, all that remains to be done is for me to reassign the property to him, which will be done in a few days. Mr. Hartman will retire from business for the present."

Alles & Conant have the largest assortment of portable writing-desks to be found in the city. These desks are made up in fine woods, plush and leather. The firm keeps a full line in stock, and also manufactures largely to order. Its line comprises fifty different varieties. A very popular desk is of solid black walnut and has a roll top; another popular style is in the shape of a lady's work-box and writing-desk combined. It is made of fine leather and is a new thing to the trade. Alles & Conant also carry a full line of pocket and fishing books, ladies' side bags, plush and leather hand and pocket mirrors, &c.

J. H. Bufford's Sons have recently brought out some new designs in advertising cards. One number embraces four floral designs, and No. 555 embraces four landscape scenes. In addition to these there are four different numbers of six comic designs each in very pretty colors. There are so few publishers issuing anything new in advertising cards just now that it will pay intending purchasers to know just where they can get the latest novelties.

G. H. Haszard, dealer in stationery, &c., Charlottetown, Prince Edward Island, has been burnt out, and David Laird, printer, and S. T. Nemes, bookseller, &c., of the same place, were burnt out at the same time.

The schedules of Richard A. Saalfeld, music publisher, of No. 12 Bible House, New York, show liabilities, \$27,000; nominal assets, \$47,274; actual assets, \$8,692.

F. O. Dayton has succeeded to the business of F. O. & W. H. Dayton, paper hangers, &c., Chicopee, Mass., the firm having dissolved.

Brown & Wood, printers, bookbinders, &c., New York city, have dissolved partnership. Samuel J. Brown continues the business.

C. Farnhams, publisher of the *Chronicle*, Vallejo, Cal., has been succeeded by F. A. Leach and W. D. Pennycook.

An assignment has been made by the Chicago Dry Plate and Manufacturing Company, Chicago, Ill.

Daniel Duff was held for trial in Boston on February 28, on the charge of stealing stationery.

Rutson Brothers, newsdealers, &c., Jackson, Mich., have been burned out; partly insured.

J. W. Simpson, publisher of the *Globe*, Port Byron, Ill., has sold out to Hess & Owen.

J. J. Spalding & Co., printers, Chicago, Ill., have been closed out by the sheriff.

John Kirschner, printer, New Haven, Conn., has sold out to Price, Lee & Co.

The *Leader* Printing Company, Cheyenne, Wyo., has been incorporated with a capital of \$10,000.

J. & J. Hunter, printers, Hestonville, Pa., have been damaged \$30,000 to \$40,000 by fire. Fully insured.

Wm. H. Sears, of the Acme Paper and Stationery Company, has just returned from a very successful trip East.

Henri Bertrand has been admitted to the firm of Cadieux & Derome, wholesale stationers, &c., Montreal, Que. Style unchanged.

White & Schermerhorn have an illustrated price-list of improved styles of toilet papers which the trade will find very convenient.

Among the out-of-town dealers who have been in town during the past few days were: G. V. Johnson, of John Neafie, Freehold, N. J.; Mr. Bowne, Glen Cove, L. I.; Mr. Harmon, of J. V. Farwell & Co., Chicago, Ill.

H. Schleicher, the junior member of the firm of Liebenroth, Von Auw & Co., sailed on the Arizona on Tuesday of this week. He goes to Bonn, Germany, and his trip will combine both business and pleasure.

A new form of game register and trump indicator for card players has been brought out by George W. Hyatt, 114 Nassau street. It is arranged so that it will indicate points, games, and the trump. It is inexpensive.

The "Golden Rule" is the name of a new cheap pocket memorandum, $2\frac{1}{2}$ by 6 inches, made by S. & E. M. Vernon. One of its peculiarities is a flap folding lengthwise and inside of the back cover and divided into inches and fractions of inches, making, when opened out, a one-foot rule.

Charles J. Cohen, the well-known stationer and importer, Philadelphia, left for Europe in the Arizona on Tuesday of this week. It is hoped that he will have a safe and prosperous voyage. Mr. Cohen goes abroad for the selection of fancy goods for the autumn trade, in which he is one of the leaders, and the selection will undoubtedly be all that could be desired by the friends and patrons of the house.

The February number of the *American Journalist* is one of the most interesting numbers of that publication that has appeared. An illustrated article on "Book Publishing Centres" is a leading feature of the number, and its very title indicates its interesting character. An article entitled "The Chicago Times" will be read with the greatest interest by those who like to read the history of a great newspaper. The *Journal* improves with age, which is an evidence of its prosperity.

The Wilson Brothers Woodenware and Toy Company has issued its catalogue of children's carriages for 1884. This firm represents the largest manufacturers of these goods in the world. A variety of styles are shown both of the finer and cheaper grades, from the old style phaeton body with old fashioned carriage top, to the elegant mahogany and willow carriages, richly upholstered and provided with the new style in canopy tops. There are also shown several different styles in twin baby carriages, with willow and wooden bodies. All of these carriages have the patent reversible handle, elliptic springs and flat-spoked wheels, improvements not possessed by the carriages of other manufacturers. Every carriage sold by this firm is warranted and goods are furnished at the lowest manufacturers' prices.

T. M. SIMPSON, 21 S. 7th St., PHILADELPHIA, Pa.**SELF-SPACING TYPE.**

An improved style of type has been invented and patented by L. B. Benton, of the firm of Benton, Waldo & Co., type foundry, of Milwaukee, Wis. It is the object to so make the type that it will necessarily be self-spacing and thereby greatly lessen the labor of composition. The Milwaukee *Wisconsin* says:

Mr. Benton has simplified and facilitated the work of justifying by making the characters and spaces of his new type of widths which bear a definite and well-ordered relation to the width of the column in which they are to be set. The width of column most in vogue among Western newspapers is thirteen ems pica. Mr. Benton has chosen this as the standard width to which to adapt his stock type of the new style. Says the inventor: "You see I make the type units of such a size that 153 of nonpareil in a line will make thirteen ems pica, as will also 136 of minion. 128 of brevier, 120 of bourgeois, and so on. Scrutinize those numbers and you will see that every one can be divided by eight without a remainder.

"It follows that the type can be set in series to a measure that is one-eighth of thirteen ems pica. If, therefore, it will set in series to a measure of one-eighth of thirteen ems pica, it will also of necessity set in series to twice, three times, or any multiple of that measure. The capacity of any font in the set separately is any measure that is a multiple of the unit of the font. The unit of the nonpareil is 14-1000 of an inch. Consequently the nonpareil can be set up to any measure that is a multiple of 14-1000 of an inch. There is only one direction to be given to compositors for setting self-spacing type, and that is to set what looks like the old em quad with the nick outward. A printer has practically nothing to learn to gain all that there is to gain—in hand composition—with the new type. As an illustration of what there is to gain, I will give you the result of the first experiment which I made with the new type. I directed a compositor to set up 3,000 ems in old brevier in an alphabet which was only a three-em space shorter than the alphabet of the new type. He was to set as rapidly as possible, and to take no more trouble about his spacing than would be necessary in average newspaper work. Acting according to these directions, he set his first 1,000 in fifty-nine minutes, his second 1,000 in sixty minutes, and his third 1,000 in sixty-one minutes. I then set him to work on the new type. Of this he set the first 1,000 ems in forty-five minutes, the second in forty-five and a half minutes, and the third in forty-five and a third minutes.

"Before beginning to work upon the new type he had declared that he could not set it up, as it contained only two sizes of spaces, but when he had completed his task he exclaimed, 'The darned stuff spaces out itself!' Some printers consume more time justifying than others, and of course the gain by the use of the self-spacing type will not be so great in the case of those who are quick at justifying as with those who are slow at it; but I am convinced from repeated experiments that on an average the gain will be between twenty-five and thirty-three and a third per cent. on columns thirteen ems pica in width. On wider measures it will be less and on smaller measures greater." Many objections have been urged against the new type, but the inventor believes that he has met them all.

The bookbinders of Philadelphia employ about 5,000 persons, and produced last year \$5,200,000 worth of goods.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, MARCH 6, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE International Electrical Exhibition to be opened at Philadelphia in September, promises, it is said, to be one of the most interesting scientific events of the day, and is expected to excel all former exhibitions of electrical development. There will be six sections, with proper subdivisions or classifications, of which the programme has been prepared. While we think of it, we suggest that it would be well for some electrician to submit a device for conducting electricity from the paper used for printing purposes, and for thus divesting the press-rooms of the country of a cause of considerable annoyance.

ANOTHER presentation of opinion on the counts of paper, from a Western newspaper, is given in this issue. We have noticed also further consentient expressions in other journals, which do not discuss the merits of the question, but assent to the general proposition that the standard of counts should be maintained, and that 500 sheets should go to a ream. The consumers, it may be said, are practically unanimous, so that whatever objection may be urged or repugnance shown to strictly defining the number of pages to a blank-book, and of enlarging the ream by twenty sheets, comes from a portion of the trade, the great majority of whom, as shown by our report of the vote on the questions submitted, are in unison with the people whom they supply. Now, the question is: What is to be done about it? If any reform is to be instituted it must be done at the requirement of those who have the power to insist upon it. Negligence or indifference will not correct abuses if they exist, nor will they institute changes if advance becomes necessary. Inertia retards progress.

STILL another important exhibition claims the attention not only of the people of this country, but of the world at large. The "World's Industrial and Cotton Centennial Exposition" will open at New Orleans in December next and will continue until the end of May ensuing. This will admit of the exhibition of all products of art, manufacture, and soil or mine. It has received government sanction, and the progress of the preparatory work has been such as to warrant an assertion of its success. In fact, like other exhibitions which had reasonable ground for their institution, this one promises to exceed in extent and importance that first had in mind by its projectors, and arrangements are being made to enlarge it to accommodate the requirements of intending exhibitors. As this is to be a world's show, all people are invited to be present and represented by the best examples of their industrial skill, artistic productions and natural resources. America herself will come to the fore with her most attractive exhibits, and these alone will suffice to make a display which the people of other countries cannot afford to ignore.

ROUNDABOUTS

BY THE TRADE LOUNGER.

The "Lounger" feels desperate! You who read this will know why, and as for those who omit the perusal of this column—it doesn't matter.

There is one man who has earned, it is alleged, the title of a "Conscientious Stationer." From the way in which this remark has been put before me, one would imagine that this is a "rare bird," but I don't believe that he is isolated. How is it, Mr. President? If a man fails and returns 80 per cent. of the goods confided to him, is he eligible to a position on the platform at Madison Avenue Garden?

Scrap shell, cut to shapes for the manufacture of penholders, fancy articles, &c., must pay duty as manufactured shells and not as non-enumerated manufactured articles. Opera glasses covered with a veneer of shell must pay 45 per cent. ad valorem as manufactures of metal. The Treasury Department says so.

Another one of our friends has committed the inevitable. This time it is J. E. Linde, who was married about two weeks ago to Katie Thaddiken, of Hoboken. The "happy couple" have gone to Florida. The wedding was followed by a reception at the residence of the bride's parents. The presents were costly and numerous. May joy ever attend J. E. L. and family!

People importing photographic views, set in wooden frames, intended for use in stereopticons, must pay duty on the goods, on the theory that they assimilate to engravings. This is only one of the government customs in classification.

What is the matter with C. M. Ward? He looks careworn. I believe that it is ascribed to a two weeks' performance of jury duty in Brooklyn. If this is the fact, we can congratulate him on his nerve. Anyone who can stand two weeks of Brooklyn shortcomings as developed in a court-room, must be possessed of unusual staying quality. Most men would be killed off in a week.

"Academy board" must pay 15 per cent. duty as a manufacture of paper. The first thought was that this would involve some change in the rations of the boys who occupy "mine ancient place" at a boarding-school up the river, but it appears that "academy board" is only the other name for card board faced with material other than paper and intended for the use of artists.

W. B. Smith, at 27 Bond street, closed his place one evening last week, and on returning later found three youthful burglars getting away with his goods. The fact that the criminals took to literature might seem to some an evidence of culture. It would delight the Boston mind to be possessed of thieves of this character. The lads were about sixteen years of age, and were provided with a jimmy and other nefarious tools. I am glad to be able to report that they were all "scooped." Mr. Smith opposed their departure, and a detachment of "the finest" "took 'em in."

The paper-box makers are complaining of being underpaid. One of their number con-

tributes his opinions to the *Sun*, and says that there is need of organization among the hands in the paper-box factories. Organize by all means, but do it with discretion, and don't be led astray by blatant rogues, whose "chin music" is exerted to personal ends at the expense of thoughtless and easily beguiled victims.

ANSWERS TO CORRESPONDENTS.

E. B. R. wants to know who manufactures the daily memorandum calendar consisting of a block with a metal fixture.

Ans.—This is controlled, we believe, by Constantin Schmidt, the patentee, 33 Broad street, New York.

H. & Co. ask who manufactures plated-metal mottoes or greetings for Easter novelties, &c.

Ans.—J. Bernard, 161 Green street, New York; Riley, Osborne & Co., Newark, N. J.

LYMAN & CURTIS' FAILURE.

Lyman & Curtis, manufacturers and dealers in toys, of No. 23 Murray street, made an assignment on Wednesday to George P. Sheldon, with preferences as follows: Central National Bank, \$10,413.58; Farmers and Mechanics' National Bank of Hartford, Conn., \$2,500; Sprague National Bank of Brooklyn, \$5,000; Samuel Wyman, Jr., \$5,000; Aetna National Bank of Hartford, Conn., \$4,000; National Broadway Bank, \$5,000; Elizabeth W. Aldrich, \$25,000; Middletown National Bank, of Middletown, Conn., \$1,500; A. Oberg, \$2,500; L. S. Lawrence & Co., \$2,500, and unknown holders of notes representing \$17,803.89; total, \$81,217.47.

The total liabilities are estimated at \$150,000, and the nominal assets that consist of stock in trade, notes due and outstanding accounts have been estimated at between \$125,000 and \$140,000. On Mr. Lyman being asked to what he attributed the failure of the firm, he replied that the business had become unprofitable. The profits in the business had been small, but it was supposed that by an increased trade good profits might be made. It was found, however, that the expenses largely increased, and the firm concluded that the best thing to do would be to stop and make an honorable settlement with its creditors. Mr. Lyman had already seen several of the creditors, who expressed much sympathy with him and his partner, and he hoped that an arrangement would be made by which the firm could continue the business.

At Bradstreet's agency it was stated that the firm had made purchases mainly from small manufacturers out of town, and had given notes that were received by the banks of these manufacturers, and were also offered for sale on the Street. The firm had stood well and was extensively backed by the trade. It had the reputation of selling very close. On Feb. 24 the firm stated that its business was in good shape; that it had fewer liabilities than in the preceding year, and that it held \$25,000 more in 1883 than in 1882. The business was started with a capital of \$40,000 in March, 1880. Assignee Sheldon, when asked whether any of the assets consisted of real estate, replied that he believed they did not.

In conversation with a reporter of THE STATIONER, Mr. Lyman said that arrangements for a meeting of the creditors would be made as early as possible, but as the creditors nearly all resided at a distance from the city, it would be several days before a meeting of them could be had. A schedule of assets had not been prepared, and would not be until an inventory of the stock had been taken, and this would prob-

ably take a week. Steps would be taken to effect a compromise as speedily as possible, and many of the creditors were hopeful that the firm would pay up its liabilities in full and continue business.

The failure of the firm has created a great deal of excitement in trade circles, having been entirely unexpected. Mr. Lyman could not state on Thursday morning whether any of the creditors of the firm were connected with the stationery trade. None are mentioned among the preferred creditors and if there be any the amounts owing to them are very probably small.

MANGIN, THE PENCIL MAKER.

Mangin, the celebrated black-lead pencil maker of Paris, is dead. He drove every day in an open carriage, attended by a servant, to his stands either by the column of the Place Vendôme or on the Place de la Bourse. His servant handed him a case, from which he took large portraits of himself and medals with descriptions of his pencils, which he hung on either

side of him. He then replaced his round hat with a magnificent burnished helmet, mounted with brilliant plumes. For his overcoat he donned a costly velvet tunic with gold fringes. He then drew a pair of polished steel gauntlets upon his hands, covered his breast with a brilliant cuirass and placed a richly mounted sword at his side. His servant then put on a velvet robe and helmet, and struck up a tune on an organ mounted in gold. To the crowds gathered around he then exclaimed, "I am Mangin, the great charlatan of France! Years ago I hired a modest shop in the Rue Rivoli, but could not sell pencils enough to pay my rent. Now, attracted by my sweeping crest, my waving plumes, my din and glitter, I sell millions of pencils." This was true.

Market Review.

OFFICE OF THE AMERICAN STATIONER.
WEDNESDAY, March 5, 1884.

THE MONEY MARKET.—The discount rates for prime mercantile paper remain $4\frac{1}{2}$ @ 6 per cent. and call loans $2\frac{1}{2}$ @ 3 per cent. The stock market, after a brief relapse into a dull and weak condition last week, has shown a bracing tendency since our last, with quite a general advance in prices. Railroad bonds generally are strong, and governments steady. Sterling exchange continues in light supply and firm, with continued gold shipments to London. Continental bills are unchanged.

THE PAPER MARKET.—The condition of the general market has not changed materially during the week. The demand has made very little progress; as buyers are yet careful in making purchases, and confine their operations very closely to actual or early requirements. As regards prices, there is still an easy feeling, particularly on the low grades of print papers, and wrappings also share in this weak feeling. We hear of instances where manufacturers of manillas have been forced to realize, and in this way some considerable-sized lots have been thrown on the market and sold at prices, it is asserted, below cost, some manufacturers showing anxiety at the present condition of the trade and expressing a willingness to take orders at low figures rather than to close down their mills. Prices in general are abnormally low, and if the present rate of production is kept up for any length of time without increase in the demand, a further shrinkage may ensue before the supply and demand become more evenly adjusted. The straw-wrapping trade look for a better export business to Cuba, now that the Cuban import duty on paper has been reduced from 30 to 10 per cent., which took effect on March 1. The straw-board trade is very dull, and prices are quite irregular, No. 1 steam-dried selling among the city trade at \$30 @ 35.

THE STATIONERY MARKET.—There is a little better feeling among tradesmen this week. A greater number of dealers have been in town, and although the cold weather has a tendency to delay the spring trade somewhat, business is quite fair. In fine stationery there is no marked improvement, but business is very good considering the serious drawbacks and dealers are quite hopeful. The demand for Easter goods is also fair and it is expected that this will continue for the next three weeks, with a possible increase. There is not so much doing in fine art-albums as a week or two ago, but trade in these goods is by no means discouraging. Many dealers were somewhat overstocked with these goods last year, and are, therefore, cautious about buying. The cold weather is having a depressing effect on the spring toy trade, which had started up quite well, but there are no indications of the difficulty existing very long. The movement in advertising cards is quite brisk for this season, but the tendency is for new goods. Goods that have been running any length of time are a drag in the market. There is said also to be a good demand for writing desks, particularly those in plush, fine woods and fancy leathers. These goods are made up in a variety of artistic designs and generally sell well when there is little demand for other kinds of fancy articles.

DOES 960 MEAN A THOUSAND?

The Warsaw (Benton County, Mo.) *Times* remarks: Here is a sample of the advantages which work against the country printer, who places a value on his reputation. When asked to vote on the question recently of supplying 960 sheets and calling it a 1,000, or giving 1,000 sheets, honest count, to the men who pay for a 1,000, there were two votes cast directly opposite each other. One in favor of honest and fair dealing in this place explained his vote by saying, substantially, that it was the practice in his office to give full count, and breaking packages to satisfy it was inconvenient, expensive and annoying. On the other hand, a city house which has supplied more stationery to the officers and merchants of Benton County in one year than the home printer has in nearly two decades, explains its reasons for following the old plan of selling 960 sheets for the price of a 1,000, knowing that they never will be counted, and twelve, fifteen or eighteen sheets of blank-books, as the case may be, for the price of twenty-four, writes and covers the whole ground as follows: "Can get as much money for one ream of legal cap of 480 as we can for one ream of 500 sheets, and the ream of 480 sheets is used up sooner."

There it is in a nutshell. The people of Benton County have paid thousands of dollars to swell the receipts of a house which unblushingly, over its own signature, protests against reforming a cheating abuse in the stationery trade, and giving every man what he honestly pays for, because, forsooth, they can get as much money by cheating their customers out of it, and in that way break down the competition of those who are foolish enough to give a man what he pays for.

Now, let's hear from the grocery trade, the dry-goods houses, &c., on a similar question. The commercial integrity of the stationery business has practically put itself on record, by a large majority, in favor of honest count, and it is now in order to hear from other branches.

Shall a grocer have as much money for 960 eggs as he would get if he counted a full thousand; or for 1,920 pounds of ham, as he would if his scales were honest and registered a ton? Shall the dry goods merchant, when called upon for a thousand pins or a thousand buttons, be called an honest dealer if he hands out packages which contain only 960? It is not in issue that ninety-nine out of a hundred never stop to count in such cases; the matter rests upon the honesty of the transaction; the reforming an abuse that has existed for years, and giving as good a chance for competition to a man who is willing to try to be honest, as is allowed to a confessed swindler and a self-acknowledged rogue.

TRADE ITEMS

Clague, Wegman, Schlicht & Field, Rochester, N. Y., have got out a new descriptive catalogue and price list of the Shannon filing devices and Schlicht's indexes. The work is handsomely printed and should be in the hands of the trade generally.

The family Bibles recently issued by the National Publishing Company, Philadelphia, in fine morocco and Levant bindings, are said to be works of art not surpassed and equalled by few binding establishments in the United States. This company is fast securing a widespread reputation among the trade for artistic and beautiful workmanship at low prices.

One of the most complete catalogues of stationers' specialties that has yet appeared is that of Winkley, Thorp & Dresser, of Boston, Mass. This is an illustrated catalogue of 200 pages, in stiff paper covers. The engravings are printed on fine paper, and are very clear. The catalogue includes everything in the stationery line, both foreign and American. In addition to descriptive matter, a full list of prices is given, and nothing has been left undone in the arrangement of the catalogue that would add to the convenience of those ordering the goods. Much credit is due to J. E. Spears, who did the work of compilation.

James D. Whitmore & Co. have just brought a novelty in fine writing paper, with envelopes to match, and one which is expected to have a very large sale. They call the new pattern "Pomona." The design represents clusters of fruits and leaves, elegantly embossed, and though brought out very distinctly, the paper can be written upon as easily as on smooth paper. It is manufactured in all of the various tints of paper, and makes a very elegant addition to their already large variety of papers. Samples will be furnished and prices will be quoted on application to the house. Their line of Easter offerings has met with very general favor among the trade, and some very large orders have been placed for these goods.

WANTED.—SITUATION AS TRAVELER OR in the house; 11 years' experience in the wholesale and retail Book and Stationery business as salesman, buyer and manager. Address A. E. SIDDALL, Crawford House, Chicago, Ill.

WANTED.

A Partner with from \$30,000 to \$40,000 to engage in the Wholesale and Retail Book and Stationery business in one of the best cities in the country; population, 100,000; good trade already established. Address C. & C.,

Care of American Stationer.

WANTED.

Situation in a Wholesale Book and Stationery house; have had sixteen years' experience—six as buyer for the wholesale department; can control a good trade in my section; would travel; best of references and satisfactory reasons for changing from present house. Address C. & C., care of American Stationer.

A MAN

Thoroughly acquainted with the Commercial or Fine Stationery business, including Illuminating, Stamping, Engraving, Plate Printing, Bordering, Blank Book Making, and other order work in general, wishes a position as clerk, or to take charge of a Retail Department. Address P. W., office of American Stationer.

FOR SALE.

The Stock, Fixtures, Good Will and Lease of store of Carlton, McCarthy & Co., Richmond, Va. Stock inventories \$12,000. A bargain may be had by early application to

N. V. RANDOLPH, Trustee,
Richmond, Va

BARGAINS IN VALENTINES AND EASTER CARDS

100,000 Cards from all the Celebrated Publishers, PRANG, WARD and others

Plain, 1-2 Cent to 2 Cents Each. Fringed, \$5.00 per Hundred.
Extra Large, Fringed, \$10.00 per Hundred.

Send for \$5.00 Assorted Sample Lot.

H. H. CARTER, 3 Beacon St., Boston.

Contains 300 letters, figures, &c.—11 alphabets of Solid Rubber Type—3 line holder and inexhaustible Pad, in walnut box. Takes the place of nearly all 1, 2 and 3 line Rubber Stamps. Can be changed at will. Is the CHEAPEST and BEST outfit for hand printing. Price, \$2.50; per dozen, \$16.00.

For Marking Linen, Cards, Books, &c., and the amusement and instruction of young people. Contains 150 letters, &c., of Rubber Type, one line holder, and bottle of best Indelible Ink for marking linens. No other cheap outfit made will do as nice and large a variety of work as this. Price, \$1.00; per dozen, \$3.00. Send for Catalogue of New and Useful Goods.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, 3/4 x 4 1/2, 50 cents; 3 x 6, 75 cents; per doz., \$3 and \$5.

25c. A GENUINE STYLOGRAPHIC. This Pen is constructed of a drawn glass tube, which will never corrode, that contains the ink, one end of which is brought to a smooth point for writing, with an aperture finer than the point of a needle, through which the ink always flows freely, this being packed with filtering cotton to prevent stopping up the point, while the other end is fitted with a rubber air valve and caisson, giving it elasticity. This tube is fitted by means of a telescopic screw in a beautiful POLISHED NICKEL CASE, from which the pen point protrudes, and when not in use the point is protected by a nickel cap. But if by accident the point should break, it can be replaced the same as an ordinary pen. Net trade price, Nickel Plated, \$2.00 per dozen, \$22.00 per gross; Gold Plated, \$3.50 per dozen, \$36.00 per gross. Samples mailed, post-paid, on receipt of 25 cents Nickel Plate, and 50 cents Gold Plate. Address GOLLNER MFG. CO., 222 Centre St., New York.

OBITUARY.

NATHANIEL MITCHELL.

Nathaniel Mitchell, one of the oldest printers in the country, died at Grass Valley, Cal., on February 14, in his eighty-eighth year. Mr. Mitchell learned the "printer's art" in Baltimore, Md., and about the year 1824, became an editor and proprietor of a journal at Shepherdstown, Va., but subsequently returned to his native State, and for a number of years conducted the *Courier*, at Chestertown, Kent County, Md. Desiring a larger field he subsequently removed to Wilmington, Del., becoming a joint proprietor and editor of the *State Journal*, then a leading paper in the State. In 1837 he removed to New Lisbon, Ohio, and became proprietor of the *Western Palladium*, conducting it for many years. He finally disposed of the paper and for a few years remained out the newspaper business, but the journalistic instinct again induced him to go into editorial harness, when he purchased an interest in the *Republic*, of Springfield, Ohio.

In 1857 Mr. Mitchell withdrew from journalistic life, although never losing his interest in the profession, and to within ten years occasionally contributed editorial articles to the press.

JAMES F. R. HADDEN.

James F. R. Hadden, late bookkeeper and cashier, for the Acme Paper and Stationery Company, died at his residence, 254 Ozden avenue, Jersey City, on Tuesday of last week. Mr. Hadden had been connected with the company named about one year, having formerly been in the insurance business. He was a man of excellent ability and well-known integrity. He was thirty-seven years of age and leaves a widowed mother and two sisters.

TYPE-WRITING MACHINE ATTACHMENT.

An improved platen-shifting attachment for type-writing machines has been patented by a Pittsburg (Pa.) gentleman. The attachment is adapted for use on that class of type-writing machines which employ different kinds, sizes or styles of the same letters of type, having double types mounted on the type-bars, and shifting-cylinders or platens mounted on their carriages in such a manner as to admit of a limited forward and backward movement of the platen in order to adjust the latter into the proper relation to admit of an impression being made by which every kind or size of type that may from time to time be desired. In the use of double type-writers the platen shift-key must be depressed and held down until the capital or number of capitals are struck that the operator desires to print. This requires the use of one hand, and the operator is confined to the use of the other in striking the capitals. Consequently, a considerable loss of time is had, as many capitals are required for headings, &c., and as it is frequently necessary to print the entire body of the articles in capital or large letters.

The object of the invention is to allow the operator the use of both hands. It is so constructed that all lost motion is entirely taken up. A slight pressure of the knee acts immediately on the key, causing it to depress to its fullest depth. A strong spring adjusts it to its place again, thus overcoming all friction and enabling the attachment to act independently of the cylinder shift-spring. A stop-wire, which allows

the key to depress to its proper depth only, overcomes any strain on the machine.

It is simple, durable and can be attached in a few moments. It enables the operator to attain a greater degree of speed than in the usual way. Seven months of practical use is said to have demonstrated its utility as an economizer of time.

A FAMOUS BLUE ENVELOPE.

"The blue envelope has been the emblem of misery on the New York Central since 1868," said a conductor on that line whose service has extended over a period of twenty-five years. A train on which a journal reporter was going West the other day was in his charge. The story he told of the origin of the envelope beguiled the tedium of the journey.

"It was twenty five and thirty years ago," he said, reflectively, "when to be a conductor was to have a berth which was sure to land you safely into a competency. Of course I don't mean to say that the opportunities for what is called 'knocking down' made the difference, although there was dishonest men among us then as now. But the times for ten years preceding the war were flusher than they have been since. People were not so careful about the change. About half the travelers used to pay their fare on the trains, as it was not the rule then to have gate-keepers and door-tenders. That like the duplex coupon, is a modern innovation of railroad traffic. The old-timers have told me that many's the day that they have had over-pay to the extent of \$5 and \$10. Passengers were in the habit of handing the conductor a bill for their fare and asking no change. It was the custom and all conductors recognized it. Without robbing the company a picayune he could make nice wages off of these perquisites. And nothing was thought of accepting them. The conductors in the early days were a higher-toned lot of men than they are to-day. So there was no disgrace in accepting these little extras. The through trains to New York and back again were the best to have. I knew a conductor who used to run out of Albany south, before the Hudson River was consolidated, who got rich in seven years. He lives at Poughkeepsie now in elegant style, although an old man over eighty years. I don't believe he ever stole a cent. They tell me that along about 1860 the road was overrun, however, with fellows who used to divide with the company. From Albany to Buffalo their families are to-day living on the fat of the land. A good story is told of one of this crowd, now a resident of Rochester. He had been on the road about five years, when one day he received a dispatch saying his presence was urgently desired in New York. Proceeding there he found that Commodore Vanderbilt sought the interview. The old fellow was as cross as blazes that morning.

"So you are Conductor So and So?" he said, as he sized up his man.

"Yes, Commodore," was the reply.

"How long have you been running on my road?"

"Five years."

"Humph! And you carry a better watch than I do," the Commodore said, spying a ponderous chain on the vest of his employee.

"It isn't, is it?" said the Conductor, coolly removing it and exhibiting a timepiece that he said had cost him a round \$500.

"They tell me you have a farm just outside of Rochester?" said the Commodore quizzingly.

"So they say. It's a pretty fine piece of property, as you may guess, for I paid \$10,000 for it without a building on it a year ago."

"Keep any horses?"

"Nobody in Rochester can give me their dust when I'm up behind my pair," was the proud rejoinder.

"Five years on the railroad," meditated the railroad king, "and how much of this show did you have five years ago?"

"Nary a bit. Why, I borrowed money to get from Rochester to Syracuse to ask Superintendent Chittenden for a job."

"Don't you call that stealing?"

"No, sir," said our friend, knowing by this time that his days were numbered, and getting independent in consequence, "and, what is more, you don't. It will cost you as much again to tell me that it is."

"The next day he got a blue envelope. From that day to this the color has never varied. The company had several law-suits, I believe, for having discharged conductors under suspicion. The blue envelope was hit upon by Vanderbilt to avoid trouble. A line inside states that further services are not required. When the conductors first began to get them they used to demand an explanation. Never was one gratified. 'The blue envelope has its meaning,' was the only reply. They have been rather scarce for the past three years. I see that several have been distributed lately. No one can tell whose turn will come next."—*New York Sun*.

HOW THERMOMETERS ARE MADE.

"When a thermometer is to be made," says a manufacturer, "the glass-blower first blows a bulb on the end of a long tube. While this tube is hot the end of the tube is inserted in mercury, and as the bulb cools the mercury rises and fills the bulb. This process is repeated until the bulb and part of the tube are filled. The bulb is then immersed in snow or chipped ice, and the mercury settles to the freezing point, which is marked on the tube as 32°, if a Fahrenheit scale is to be followed. Next the bulb is put in boiling water, and the point to which the mercury rises is marked on the scale as 212°. Ten degrees of the mercury are now detached from the column by jarring, and the whole length of the tube is tested. The process is repeated with five degrees of the column being measured all the time by a standard thermometer to see if the tube is conical at any point. Common thermometers generally vary two or three degrees, owing to the irregularity of the opening in the tube, which causes the mercury to rise slowly where the opening is too large and too fast where the opening is too narrow. It requires great skill to blow a tube with a uniform opening the whole length. They should be allowed to stand not less than one month—one year is better—to allow the mercury to settle before the scale is made. The self-registering thermometer is used for marking the highest and lowest points reached within a given time. The bulb is filled with mercury, above which in due time is inserted a fine piece of steel spring, the remainder of the tube is filled with carbolic acid or creosote. The steel spring rests at the highest point it is pushed to by the mercury, and is afterward drawn down by a small magnet. By a duplex arrangement and reversing the scale the lowest or coldest point is indicated in the same way. The deep-sea thermometer is of the same pattern, and is encased in a heavy copper tube to preserve it against the pressure of water. It has, besides, a self-regulating attachment. The fever or clinical thermometers are made with great nicety, and are used for determining the temperature of the human body.

BABY CARRIAGES.

In conversing on the subject of baby carriages with a reporter of THE STATIONER a few days ago, a dealer said: "I have handled baby carriages for thirty years. They were in the market a number of years before my time, but were not used extensively, on account, I presume, of the price, which was at that time very high. I do not know anything in which there has been such a great change since its introduction as in baby carriages. The first carriages, I believe, were made in this country. Perambulators were made many years ago in England, and are undoubtedly manufactured in that country still, but they are turned out in this country in such large quantities and in such a state of perfection that there has been no attempt made on the part of any foreign country to compete with us in this line of manufacture. There are less than a dozen factories in the United States, but one concern alone turns out between thirty-five and forty thousand a year. I remember once seeing, some years ago, a baby carriage of English make, which was brought here by a private family. It compared with the American made carriages about the same as an old-fashioned, springless cart compared with a light and stylish buggy of that period. The wheels were very low and very heavy; the carriage was entirely springless; its body was very awkward, and, while it was substantial, it did not have the airy, graceful appearance which our carriages have.

"About twenty-eight years ago, soon after the introduction of baby carriages, you could get for \$24 a carriage that was about as good, though not as tasteful, as one we now sell for \$15.75. The original baby carriage was a willow body put on four ordinary wooden wheels, very low and clumsy; and there was also what we call the cab body, made of willow, and placed on two ordinary wheels with a wooden axle. There was no lining whatever in the body of either of these styles. Each year brought changes. The earlier styles were continually improved upon, until now we have the ideal baby carriage of modern times, which has a large, roomy body that will permit a child when it is weary to lie down at full length, and soft, easy springs which prevent jar to the child when the carriage is in motion; while on the other hand, when the carriage is not in motion, the springs being soft, the movement of the child gives it a gentle rock, as if it were in a cradle. The upholstery of baby carriages formerly was done mostly in enamel cloth and common rep goods. Now imitation and real raw silk, cretonne and coach cloth are used in upholstering the finer grades of carriages. We think that we have got the thing down to perfection, and I do not see how the present ideal baby carriage can be improved upon."

"Who was the original patentee of a baby carriage?" the reporter asked.

"I do not think that anybody ever obtained a patent on baby carriages, as a whole, any more than on babies. The idea never belonged exclusively to any one person. A great number of patents, however, have been obtained on the various minor parts, and many designs in the market are patented. We have patent reversible handles, patent springs, canopy joints, &c., which are used in the construction of the ideal carriage. I said there had been no patent obtained on a carriage as a whole. I was slightly mistaken. There are one or two patentees for a folding carriage, and this kind of carriage has been on the market for the past two or three

seasons, but owing to its high cost it is not as popular as the usual style of carriage. Its sale is confined solely to large cities, where house room is valuable. You can take a carriage of this kind, fold it up and hang it on a nail against the wall or shove it under the bed, or stow it away in the garret, or any other place where it is not likely to be stumbled over. But, as I said before, this carriage is mostly in demand in large cities, and even in these places its sale is very limited, because a much more elegant carriage of the old pattern can be had for the same cost, and most people are willing to be put to a little inconvenience for the sake of economy."

"Is there not a large export demand for baby carriages!"

"Yes. Every country that we do any trade with at all imports more or less American baby carriages all the time, and there is not a month in the year in which there are not some shipped. Those exported are mostly the cheaper grades, although some very fine ones have been sent out, but the largest number are those which range in price from \$6 to \$15. There is, of course, nothing particularly fancy about them. They are simply the more substantially made carriages, rather plainly upholstered, because finely-upholstered carriages are apt to be damaged on shipboard."

"What are the newest designs in baby carriages this season?"

"A very elegant design has a body of solid mahogany, nicely carved and gilded, turned

sides and dasher. The upholstery is of the finest quality of silk, except the arms, which are upholstered in plush. The floor is covered with velvet carpet. The carriage has a rich silk parasol-top, patent reversible handle, elliptic springs, nickel-plated wheels, &c. Another design has a body made of selected cane, artistically woven and wound, is richly upholstered with

the finest silk figured goods, with plush or satin rolls and a Wilton mat. The top is of figured silk and is heavily fringed. The newest design in tops consists of reeds with a cashmere lining, and a satin ribbon woven around the edge and artistically supported by standards wound with cane. Prices? Well, they run from \$20 to \$50. Some manufacturers go as high as \$150."

THE PNEUMATIC COPYING PRESS.

WE take pleasure in calling the attention of the trade to our improved Copying Press. It has many advantages over the "Screw Press."

No separate stand is required. It can be operated on any desk, table or chair, being perfectly portable.

The rubber legs prevent its marring the finest table.

One-half the time and three-quarters of the labor saved.

The great beauty, together with the portability of the Pneumatic Press, especially adapts it for use in handsome offices and residences.

Send for Illustrated Catalogue.

PAPER-MAKING IN EGYPT.

In the suburb of Boulak, the river-port of Cairo, is situated the Daira paper manufactory, which, before the late war broke out, used to employ regularly more than 200 hands, almost all natives. Most of the paper turned out is used for packing purposes in the khedival sugar factories; but there are also manufactured in the course of the year some 70,000 reams of very fair writing and printing paper, which more than supply the demand of the government offices of Cairo and Alexandria, and the requirements of the national press. The writing paper is manufactured specially for Arabic writing, and to suit the peculiar style of Oriental penmanship; and therefore what is produced of this sort in excess of the requirements of the country is exported eastward rather than westward, a good deal of it going to Arabia, and a few bales even to India for the use of our Moslem fellow-subjects. Linen and cotton rags are used to a certain extent in the Boulak factory; but the interior of the sugar-cane supplies the Cairene paper maker with an inexhaustible supply of very workable material; while, in the production of what is called "straw" paper in Europe, the hilfa grass plays a very important part. The Daira factory at Boulak enjoys a monopoly of this industry in Egypt; and in connection with it is the national printing office, also under the control of the same administration. The extraordinary turn for paper-making displayed by the Boulak Arabs is, it need hardly be said, a hereditary accomplishment. They can point to a long line of ancestors who educated the East and the West in successive stages of this useful art.—*London Globe*.

BROOKLYN BRIDGE STEREOSCOPE.

Quite a novel thing in the shape of stereoscopes, is shown in the accompanying engraving. It is, as may be seen, a miniature representation of the Brooklyn Bridge. A lens is in

the archway at one end of the bridge and a slide for pictures in the archway, at the other end. A half-dozen cards containing two views each, come with the bridge stereoscope, making a dozen pictures representing prominent public buildings, &c., in New York and Brooklyn. The stereoscope is made of fire-gilded brass, and is neat and durable.

CANFIELD "DIVIDED" (Formerly "Acme") ERASER, of Rubber as pure as can be profitably used, with brush-like ends; has surprising erasive quality; never soils paper or abrades its surface; improves by use. Postpaid, 15c. The trade supplied. CANFIELD RUBBER CO., Middletown, Conn.

A REWARD OF \$100.

WE are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. ABOUT BASE-BALLS.

The game of base-ball is as old as the hills—so old, in fact, that it is difficult to say when it originated. It has been a national game for the past twenty-five years. The primitive base-ball was very simple in its construction, the only material used being a few ounces of woolen yarn, with perhaps a simple covering of leather put on without regard to neatness, but for serviceability alone. In those days boys made their own balls. Players, however, when base-ball playing had become an art, developed a taste, so to speak, for balls constructed on scientific principles, hence the making of base-balls gave rise to a special branch of skilled labor, because, in order to have the necessary size and weight, a ball had to have also a corresponding degree of solidity, all of which developed a great deal of science in the manufacture of balls.

Nowadays base-ball is not only played from pure love of the game, but there are a large number of expert players who have adopted base-ball playing as a profession. Hence, from the simple match-games played by school-boys for mere sport, it has become a means of gambling, and, in this respect, is no better than horse-racing. At the present time there exist a number of stock companies, composed of the members of one or more professional clubs, who are paid so much per year for their services as expert players. It is not an uncommon thing for a good pitcher or catcher to receive as high as \$3,000 for eight or nine months' work. Yet, notwithstanding the lucrativeness of base-ball playing as a profession, it is one which few would care to adopt.

"From the numerous orders we have received," said a manufacturer of base-balls to a reporter of THE STATIONER, "the coming season will be a good one for the trade, much better than last, although that was good. Base-ball is a game that will always be popular. The interest in it grows, if anything, from year to year. I have made base-balls for the past twelve years, and I do not remember a year when the demand was less than the year which preceded it. Notwithstanding the many thousands of base-balls demanded by the trade, the base-ball industry is a small one compared with some others. I do not believe that there are more than a dozen factories in this country."

"Are any base-balls imported?"

"Not any that I am aware of. I am inclined to think there are not, for the American-made ball is the best in the world, and prices have been reduced so much that I don't see any chance for foreign competition. Good base-balls can now be bought for fifty cents a dozen, and a first-class base-ball, a ball at least good enough for anybody but a professional player, can be bought at retail for \$1.50. Ten or a dozen years ago, when a patent was taken out on base-balls, prices were fully 50 per cent. higher. Professional players, of course, have their balls made to order. They do not care so much about the price as the quality of material used to make a ball and the nearness with which it fills the bill as to size and weight. If it lacks a particle in any particular it is rejected. Yet a ball can be made to order for \$5.

"The art of base-ball making is about the same as it was about ten years ago. The same material is used, and if there has been any advance at all it has been in the *modus operandi* employed by the manufacturers. The materials used are woolen yarn, rubber and cork, and for the commoner balls, rags, pieces of leather, and almost any sort of refuse material are used as a

foundation. The better class of balls have a rubber or cork foundation. This is covered with a layer of greased wool, which is thoroughly stretched as it is being wound upon the foundation, and frequently pounded in a cup-shaped mold, so as to give it the required solidity and weight. During the process it is weighed repeatedly to see how the weight corresponds with the size. Sheepskin and horsehide are used to cover the balls, the former for the inferior and the latter for the better grades. The cover is cut by a die and is usually of two parts, each having an outline something like an elongated figure 8. The covering is sewed on sometimes by machinery, but more frequently by hand. The ball is then placed with others in a sort of wooden tray, with a circular trough around its inner edge, and a lid is used to knead them, and thus they come out with their seams neatly pressed and smoothed. The next operation is to stamp the ball with the name of some popular brand manufactured by the dealer. We make alone some thirty-four different varieties. The last operation is to put the balls into paper boxes containing a dozen each, when they are ready for the market."

WRITING TABLETS.

The growth of the manufacture of writing tablets in this country has been marvelous, to say the least; and, notwithstanding the magnitude it has reached, it continues to grow from year to year. The consumption, however, keeps pace with the growth of the industry, and hence there is no danger of an overstocking of the market.

W. H. Hasbrouck was one of the first men to engage in the making of writing tablets on a large scale. He now produces one of the most complete lines of tablets in the market. The "M. & H." blotter tablets and the "Universal" blotter tablets are remarkable for convenience and general excellence.

The "Universal" blotter tablet is put up in pads of eighty sheets each, ten pads being packed in a box. The pads come in commercial and packet note, letter, sermon, and in the shape of printed forms for memoranda, statements, bill-heads, legal cap, notes, drafts, receipts, &c. The M. & H. blotter tablets come in pads of one hundred sheets, six pads being packed in a handsome box. The various sizes are octavo, commercial and packet note, letter, sermon, memorandum, statements, bill-heads, &c., the same as the "Universal." Either variety of tablets can be had both ruled or plain. They are also made up with different qualities and styles of paper—namely, white superfine laid, cream laid, gild edge, grand quadrille, wove bank, &c. These tablets all have the blotter attachment, which adds to their economy, convenience and cleanliness.

Mr. Hasbrouck has lately introduced a pad for school purposes. It is made with a tinted cardboard cover, which keeps the blotter clean and preserves the whole pad and the edges of the paper. The blotting sheet is fastened to the pad by a silk ribbon so that it may be turned over and both sides may be used. It is put in boxes of ten pads each and comes in note, packet and letter sizes. It possesses all the advantages of a portfolio without extra cost. These pads are sold at an extremely low price.

A line of stub pads is stitched at the end like check and receipt books and perforated. It comprises notes, drafts, receipts and checks, elegantly lithographed in various handsome designs on first-class tub-sized, loft-dried paper. The name of the blank is also printed in a handsome design on the cover, which is of heavy board and of rich, dark color. This excellent line of goods also comes with the "M. & H."

SANBORN'S BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

Price, \$75.00. Boxing, \$2.50.

Price, \$75.00. Boxing, \$2.50.

THIS MACHINE WILL

Form different size backs without changing the Machine.

Form backs of any thickness of board.

Form the largest back as quickly and easily as the smallest.

Form a dozen bands in the same time as one.

Form backs of any size book manufactured.

Form backs harder and better in every respect than any made by hand.

Form backs that will retain their shape and will not split or break.

Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.

Saves gas, as it requires only a few moments to heat. Saves money, as a boy can form backs with this machine as well as a man.

Causes no inconvenience from working over hot fumes, as there are none.

Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.

Will pay for itself in a very short time.

We warrant the machine to do all that is claimed.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot
Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XV.---NO. 11.

NEW YORK, MARCH 13, 1884.

WHOLE NO. 455.

Correspondence.

BOSTON GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., Boston, March 12, 1884.

"Winter still lingers in the lap of spring," is the way the poet puts it. It's a soft thing for winter, but a cold day for poor spring. And while this frosty, wet, disagreeable, slushy weather holds on, the spring trade shows but very little activity. Kind of froze up like—waiting for a thaw. A good thaw will soon set in, and the channels of trade will then run freely, richly freighted with the novelties of the season. Manufacturers of stationers' specialties are already prepared with heavy stocks and descriptive circulars are being forwarded to the thousands of dealers throughout the country. Although the commercial clouds have been dark, the silver lining is beginning to show and a prosperous season is expected.

Among the novelties for commercial use to be soon presented, one which stationers will be called upon to handle is Gilman index-book. Now, indexes are so numerous, and some of them are so well adapted for counting-room uses, that another device of the kind seems unnecessary. But with Gilman's system the indexing of names is very much simplified, and for indexing ledger accounts or for use where a quick and ready reference to names is needed, this index-book is very valuable. The system is very simple, practical and cheap and cannot help meeting with a large demand.

Another new article just out is a clerk's sales-book, which is designed by J. L. McIntosh, of this city. In size the book is about 4x5 inches, containing two hundred leaves. Each leaf is perforated so as to leave a stub. The leaves are white and colored alternately, and the two leaves with their corresponding stubs are paged with the same number. By placing a carbon paper between the white and colored leaves, an entry of sales being recorded with the usual stub notes, gives an extra impression, so that four copies of the sale is made. One memorandum usually goes with the package or article sold, another to the cashier, a stub is filed on the sales-book, while the other stub remains in the book. By this system all disputes can be quickly settled between purchaser and salesman. Any additional figures upon the delivered memorandum can be easily detected by comparing it with the duplicate. Some of these new sales-books are in use in a large retail house in this city, and they are very highly indorsed. A

Western dry-goods firm has ordered a thousand of them, and Mr. McIntosh is prepared to supply the trade as ordered.

The Hub Card Company is presenting a new series of autograph and advertising cards. The lot embraces fifty new designs, all with embossed edges, and are offered the trade at bottom figures. These cards are very unique and just the thing for the spring trade.

Ward & Gay are giving considerable attention to blank-books and the general jobbing trade, and they report that business in their line of goods has been increasing. January business was very encouraging, and although the spring trade opens up later than last year, the outlook is very promising. In fine papers and envelopes this house carries an immense stock, which comprises all of the fashionable designs as well as the ordinary commercial and society paper. Wholesale price lists of paper and envelopes are now ready for the trade. In Easter goods the house is displaying some elegant samples and offering some good bargains to the trade.

J. H. Bufford's Sons report some improvement in trade generally. In their satin art novelties business has opened up very well, and their Easter goods are finding an extensive sale. Every season these publishers bring out something that is a leading feature in the trade, but, for this Eastertide, three elegant satin designs are presented—the "Dove," the "Angel" and the "Wreath." They are printed on satin in rich colors and are artistically finished, making beautiful Easter souvenirs. This house will shortly bring out a new series of comic advertising cards. These cards are square, with six to a set. Among the subjects presented are "Horse-car" scenes, "Musical," "Sporting" and scenes from "Everyday Life." These cards are printed in colors, and, although a little rough on the habits of mankind, are true to nature, and bring the laugh every time. They are cheap cards and everybody must have them.

In the autograph and scrap album line Winkley, Thorp & Dresser are engaged upon some new designs. These albums will be ready in May, and dealers whose trade calls for a choice selection of such goods should not fail to place themselves in correspondence with the house. The same care that has been given to the former productions of this house in the way of mechanical work and artistic designing will characterize this new series of albums. And I doubt if they will be excelled by any publisher in the country.

Stationers' rubber goods are having large sales, if I can judge the business from the extensive trade doing by the Davidson Rubber Company. In rubber bands, especially, does

this statement apply. The manner in which these bands are put up for the trade in two-ounce boxes with eight to the pound, in a carton, is quite convenient for handling. And then again this company sells all sizes at one uniform price. The quality of the Davidson rubber bands is fully guaranteed and the trade can count every time on getting the very best article whether ordered in small quantities or in great gross packages. When the United States Government invites bids for stationery supplies "Davidson bands" are specially named among the specialties. The best is good enough for "Uncle Sam."

The Cross Pen Company has enlarged its sales-room as well as increased its manufacturing facilities, and it is now well prepared for a heavy spring trade. The demand for the Cross pen has been steadily growing from year to year, and its present sales are very large. The company has just issued a very neat illustrated catalogue of its goods, which is being sent to the trade generally.

Another concern that is sending out thousands of catalogues to the trade is the Heath Letter File and Index Company. This company is doing a large business in letter files, and its agents, located in Raleigh, Chicago and Philadelphia, are developing quite a trade for the Heath file. This is the company which issued the "Forever Calendar" this year, which is so widely sought after by banking houses and accountants. It is a fine sample of the lithographic art, and the seasons are artistically presented in various colors. The arrangement of the years, days and dates is the work of Elroy N. Heath, and shows deep study. F. H. Hosmer has embellished the calendar with the following poetic lines:

My motto is "Forever on I go,"
From Spring to Autumn and through Winter's snow;
From age to age, a never-ending race,
And, like the planets, I revolve apace—
And so, it matters not what day or year,
Choose your own time, you'll find it here.

I should remark here that Mr. Hosmer's time is all filled—he is not open for any "spring" poems.

A. L. D.

WILMINGTON WISPS.

[FROM OUR REGULAR CORRESPONDENT.]

WILMINGTON, Del., March 6, 1884.

At present, there are but few items of interest to report. With our stationers it is the oft-repeated story—"dull times." The limitation to retail trade here is, as elsewhere, largely due to the continued stormy weather which has en-

circled the Eastern coast during the past few weeks.

People are not inclined to do much shopping when the mercury is at 10° above zero, or the streets almost impassable from snow and slush.

The large country trade is curtailed by the bad condition of the out-of-town roads, preventing many from reaching here without difficulty.

In spite of these many drawbacks there is a feeling of satisfaction with February's business, which will give a showing equal to, if not in excess of, the same period of last year.

Job and book work orders have been fair, with a healthful prospect of an increase this month.

The close of the valentine season verified my prediction of a dull one, and the trade here were not elated with the result. Some of the stationers are disposed to drop the line in future.

There is a general anticipation of a good Easter-card season, and our dealers have placed orders sufficient to meet the expected demand. These little gems of beauty,

"Reminding mankind in their simple way,
Of the holy marvel of Easter Day,"

are rapidly increasing in favor here. Neither is their popularity confined to any one denomination, but they are sought for by members of all creeds.

During the past few weeks, there has been quite a demand for "Notes on Ingersoll," by Lambert, one stationer having disposed of several hundred. I was recently shown a letter from the publishers, stating that the edition would reach 1,000,000 copies.

Hubert A. Roop, printer, has issued a neat thirty-six page pamphlet entitled, "Manual of the Wilmington Conference." It is for gratuitous distribution among the members of the M. E. Conference, in session here this week, and is to them a compendium of valuable information. Besides many interesting items relative to church matters, it contains a directory to the various places of accommodation assigned them. In making up the combination border for the cover, two chickens appear on the upper corners, singularly suggestive of the well-known taste of the gentlemen in whose interests the work is published. Typographically, it reflects much credit on Mr. Roop, and is an excellent specimen of his skill.

The recent disclosure in Philadelphia relative to the imitation of Arnold's writing fluid, has caused considerable comment here upon the subject. One of our prominent stationers, while making no specific charge, volunteers the assertion that the spurious article has long been knowingly sold as genuine by a number of the jobbing houses throughout the country. Such a state of affairs will certainly have a tendency to weaken the confidence of the trade, and their hesitation in placing orders for this article. Neither is this feeling confined to dealers, as a number of complaints have been received in this section from the consumers as well.

I note with pleasure the return to duty, after several weeks of illness, of George W. Heusted, the gentlemanly salesman with Porter & Co.

"Twenty Years in Congress," by Hon. J. G. Blaine, is being actively canvassed here by the agent, L. Barney, who anticipates a profitable sale of the work.

Stepping into the store of E. S. R. Butler, I was convinced that the wants of the reading public are faithfully supplied by this gentleman. On his counters are found the New York, Philadelphia and other popular dailies and

weeklies, and the standard magazines and periodicals of the day. In connection with the news department is kept a well-assorted stock of staple stationery. Commencing business in a small way, in 1849, Mr. Butler has, by untiring devotion to business, achieved success worthy of mention.

Wood & Bancroft, 604 Market street, carry a well-assorted line of souvenir novelties, bric-a-brac, decorative plaques and the fine grades of writing-papers. They also do some excellent printing.

TRACY.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS.
LONDON, E. C., March 2, 1884.

The Parliamentary life of the year is about to open. Next week the 650 right honorables and honorables who look after the interests of the nation by playing at the amusing game called legislation, will be hurrying away from their other employments to meet at the command of the Queen and transact those matters of grave importance that her majesty's responsible minister deems advisable. We are expecting a session of storm and strife, possibly also an appeal to the constituencies with all of the excitement of strong party politics. A feeling of great uneasiness prevails as regards coming changes. These may be unfounded but they are none the less potent in their influence. I am not a party politician, and if I were, the pages of THE AMERICAN STATIONER would not be the place to air my particular views on such subjects. I am concerned only with the probable results from a commercial point of view, and especially with the effects likely to be produced on the trades with which I am more immediately associated. Printers, of course, on the whole, benefit by the prevalence of popular excitement in political matters, and with them, to a great extent also, paper makers and some others. And stationers and fancy traders, in common with all those who cater for the less urgent requirements of the public undoubtedly suffer, in many cases severely, so they are quite content to wave the pleasures of excitement for a little solid benefit.

Up to the present there have been signs of improvement in the trades generally. The year has opened with promise. Let us hope it will be fulfilled. There are at present, however, no signs of higher prices, so that rapid fortunes are not yet the order of the day. It is very doubtful whether as high a rate of interest could not be obtained by investment in perfectly safe stocks and shares as is now got out of trade by many of the merchants of this country, and especially by those engaged in the trades associated with paper.

Some attention has been attracted here by the announcements in the daily papers that "A Company of Authors" has been projected for the purposes of promoting a literary copyright with the United States, of getting a bill passed by Parliament for the registration of titles, and of maintaining friendly relations between authors and publishers. Whether it is necessary to form a company for these purposes is very doubtful. The first of the objects is a matter for diplomatic action on the part of the government, and is likely to receive attention before long; the other matters do not seem to require the formation of a company to promote them. A little agitation would probably secure the passing of a bill dealing with the question of titles, while the relations of authors and publishers are matters not likely to be remedied by

the creation of go-betweens in the shape of the agents of a company. I think there is little probability of this scheme "going."

The stove ornaments prepared for the coming season by Raphael Tuck & Sons are a distinct improvement on the novel and artistic goods introduced by them last year. The fourfold screens now reach fifteen varieties; a series of threefold screens has been added as well as an easel series, and screens in the shape of horse-shoes, fans and shields. Of these several series it is difficult to know which to admire most. The threefold shape is perhaps best adapted to the requirements of the ordinary grate, fitting in as it does admirably. The easel series is particularly novel and taking in style, and complete in its adjuncts of palette, brushes and nicely-finished picture is remarkably effective and realistic. Altogether these productions are worthy of the high reputation of their introducers and of that glorious art of color printing that is making every home beautiful. To my mind the landscapes and sea views as reproduced on these screens equal anything yet seen. I ought not to forget the papier-maché series which will also, no doubt, find many admirers.

Speaking of color printing reminds one of some new text-cards just brought out by W. A. Mansell & Co., 271 and 273 Oxford street, London. They are 9 inches by 17 in size, and the designs consist of rustic crosses with flowers growing around about them. The printing is, as is usual with the publications of this firm, exquisitely perfect, the coloring being bright, true and harmonious. Nothing more pleasing and appropriate could be found for decorative purposes.

W. F. C.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, March 11, 1884.

Walnut street is a scene of activity these days in spite of rain and snow and sleet. It is the stationers' street from Fourth street to Pearl street. Wagons and drays jostle each other all day long. The sidewalks are covered with boxes, bales and packages. "Is it only a little spurt in business, to be followed by another season of dullness," is a question often asked. It would be employing time and using space unprofitably to go into a discussion of a question that only time can solve. Of one thing we can be reasonably sure, and that is, that trade is governed by laws, whose operation is as uniform and impartial as the laws that govern the world of nature. A great deal remains to be learned about both of these codes, and it is the part of modesty to not appear to be overwise on such abstruse subjects.

A close observer may, without asking a question, form a fair estimate of the state of business with individuals or with towns by noting the external evidences. By noting external evidences in Cincinnati to-day one would be forced to the conclusion business is good. But in corroboration of this judgment business men in a body confess that trade is good and is gradually improving every day. What they hope is that this improvement will be permanent. As a rule, they believe it will, and that is the end of that matter.

The Globe Files Company in its new quarters has more elbow room and is finding it necessary to meet the growing demands on it.

Van Antwerp, Bragg & Co. will raise their present immense factory to a ten-story building this summer, which will make it loom up above

(Continued on page 330.)

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:

FELLOWSKENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers.

For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

(Continued from page 326.)

the city housetops so as to be seen conspicuously from the hills.

W. B. Carpenter & Co. were to have added a couple of stories to their building last year—but they didn't. They are contemplating it again this year.

Architects are full of work suggesting plans and preparing them for buildings to be put up the coming season. An unusual call is made upon them for plans for factory buildings, some of which are to replace old factories, others are entirely new buildings, all are very large. The tendency in factories is toward larger buildings.

A stationer at my elbow suggests that this is the year for electing a President and that Congress has the tariff question up, and that in such a concurrence of drags on business there is not much reason for hope of a permanent revival of trade till the year is past and these questions are settled. "Prince William" listens to his words of wisdom, but keeps thinking "You'd better eat whatsoever is set before you, asking no questions, and so deport yourself in a manner more becoming that shortsightedness which you share in common with other mortals."

Manufacturing stationers have an increased call for blanks and blank-books, which indicates that the faith in the immediate improvement in trade is quite general.

Another gratifying sign of the times is a disposition to demand fair profits on sales and to give the go-by to the cut-throat system of reaching out after custom at the sacrifice of profits. Still customers, especially banking houses, adhere to the practice of inviting competition in furnishing their outfits and supplies of stationery and many manufacturers in their zeal for trade make bids so ridiculously low that they should be ashamed of themselves.

PRINCE WILLIAM.

TRANSFERRING OUTLINES ON GRAINED STONES.

In transferring outlines on grained stones, we see very often that bad results occur from uncleanliness. Making transfers from outline, from engraving or tracing, to a grained stone is always a process involving great risk; therefore the greatest cleanliness should be observed. First, the transfer paper itself is dangerous, as the starch or glycerine remaining on the stone will always damage the succeeding drawing. Crayon will not hold to the stone if anything like starch or glycerine is left upon the stone. Sponges also generally are not clean enough. Therefore we advise transferers to observe the following: At first the outline impression should be made as strong as possible; then, after transferring this outline to the stone, no sponge or similar article whatever should be used, and the stone with the transfer should be taken to the hydrant or sink, and the water should float over it without touching it at all, until all starch and glycerine are removed. The stone should then be set down on the floor, and dried without any other help than the temperature of the house. A sheet of blotting paper may be laid under the stone.—*British and Colonial Printer and Stationer.*

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

LABELS.

No. 3,945. Title; "Whiting's Impervious Drafting Inks."—Frederic A. Whiting, Wellesley Hills, Mass.

POTTERY PAINTING.

If you can trust your eye, you may sketch on the design in Indian ink or carmine, both being vegetable colors which fire out in the kiln. In very important work it is necessary, in addition to transferring, to go over it with Indian ink, so as to make quite sure of the drawing. Recollect that when using china colors there must be no hesitation—you must go right on, and therefore, before beginning to paint make quite sure that you have a clear idea of what you intend to do.

Some of the reds and browns work with greater ease than the blues and greens, and the student cannot do better than commence his practical

study of pottery painting by trying some simple tile effects in monochrome. The following three colors of Lacroix's are all good reds, they fire well, and charming effects can be produced with them: Rouge orange (orange red), rouge capucine (capucine red), rouge laqueux (laky red). We should, therefore, advise the tyro to get these colors, ground in oil, in collapsible tubes.

There are three ways of transferring a design to pottery. If drawn full size, you can mark it over with a hard point, having previously, however, put a piece of transfer-paper between the pottery and the design. Transfer-paper, both black and red, can be obtained at any of the artists' colormen who sell pottery requisites. If the design is only a rough one, I prefer rubbing a little ordinary stove blacklead thinly over its back. A fainter impression is thus secured, which is an advantage, since the black transfer-paper makes a heavy line, which works into the color, and is thus apt to mislead one. The transfer lines will burn away if transfer-paper be used. Blacklead being a mineral will burn on if at all thickly applied, but if used very thinly on the back of the design and well rubbed in, the quantity that comes off is so infinitesimal that it will not affect the work, especially in such colors as red and brown. Charcoal will also answer for transferring, but it makes a thicker impression. Where the same design has to be used many times, as in the case in tile painting, it is better to outline it on tracing paper, and make what is called a pounce. Prick the design with a needle on the back, following carefully every line. The advantage of pricking the design on the back is that when turned the right way up, the charcoal (which for use is wrapped up in muslin or coarse canvas) passes more readily through the holes. I prefer putting some waste pieces of charcoal, such as collect when drawing in that most agreeable of vehicles, into a few thicknesses of fine muslin, and I only crush it when I find the powder does not come out freely enough. If powdered charcoal be used, it is apt to come out too freely, leaving so much on the china as to impede the working of the color. It is only by careful attention to these and other minutiae of the craft that the student can hope to be at all successful in his early attempts.

If you employ powder colors, you must mix them with fat oil and turpentine, and use fat oil in working them, as much as is required to make the color go on easily; but I think you will find the colors in tubes that I have mentioned easier to work. Where you use a background, you must outline the work with the rigger previously referred to, and allow it to dry. This outline should be traced with great feeling, otherwise it will look wooden and mechanical. It should also be done as carefully as the outline in a drawing from the "round," since it is, so to speak, the boundary of your work. The background color, which might be a different tone to the rest, should be mixed up with turpentine until the consistency of gum is obtained; and in order to facilitate its working, add some oil of lavender instead of more fat oil. The former does not dry as quickly as the latter, and you can therefore cover a larger space before the color dries. In floating in backgrounds, be careful to get the color on in a liquid-running state, so that, although you may make some portions darker than others, no brush-marks shall be visible. This can only be done by getting the color of the right consistency and sufficiently fat. If the color be of the right degree of "fatness" it will run "flat" when on the tile.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Robert M. Slack, engraver, Philadelphia, Pa., is dead.

George W. Baillie, printer, Halifax, N. S., has removed to Pictou.

Burt Green, bookseller and stationer, Middleport, Ohio, has sold out.

George Fairfax, dealer in paper hangings, Geneva, N. Y., has sold out.

Graham & Co., publishers of *Star*, Montreal, Can., have dissolved partnership.

J. T. Wells, dealer in wall-paper, Plain City, Ohio, has been closed out by the sheriff.

Hugh Smith, stationer, &c., Campbellford, Ont., has been succeeded by J. M. Nichol.

Sherman & Thompson, leather board manufacturers, Belfast, Me., have dissolved partnership.

James McCall, of the firm of James McCall & Co., dealers in paper patterns, New York city, is dead.

Graham & O'Flanagan, publishers of the *Express*, St. Mary's, Kan., have sold out to J. L. Hoffman.

James Lee & Co., proprietors of the Montreal Novelty Company, Montreal, Can., have made an assignment in trust.

Darling & Coates, dealers in rubber stamps, Topeka, Kan., have dissolved partnership, John C. Darling succeeding to the business.

The building at No. 172 Fulton street, this city, the three upper stories of which are occupied by William A. Force, die and rubber stamp manufacturer, and the two lower floors by the American Net and Twine Company, was noticed to be on fire Tuesday evening last. The flames were soon extinguished, and only slight damage was done, the loss being only about \$1,000. The cause of the fire is unknown.

Schwalbach & Obrig, manufacturers of baby carriages, at No. 131 First street, Brooklyn, N. Y., made an assignment, Thursday, 6th inst., to James D. Bell, with preferences for \$10,220. They were involved with Lyman & Curtiss, of New York, who made an assignment Wednesday, giving preferences for \$83,713, of which \$17,800 were to unknown holders of their notes made to the order of Schwalbach & Obrig. Lyman & Curtiss were their selling agents. Schwalbach & Obrig have a large four-story factory on First street, and had just taken large warehouses on Fourth street. The business was commenced in September, 1882, by Alexander Schwalbach, with \$5,000 cash capital. Theodore Obrig became a partner in April last, the latter having previously been in the firm of James McCormick & Co., brokers, of Wall street. They extended their business, selling through Lyman & Curtiss, whose paper they took and had discounted at their bank. In January they claimed assets of \$29,700 in stock, fixtures and accounts, and liabilities of \$9,000. The firm filed a chattel mortgage on stock, fixtures, &c., on its factory, Thursday, for \$17,500 in favor of Lyman & Curtiss.

The Home Publishing Company, doing business at No. 239 St. Clair street, Cleveland, Ohio, and owned by H. C. Brainard, E. B. Harvey and J. H. Wenman, made an assignment on Saturday to John F. Weh. It is thought the liabilities will reach \$15,000, and the assets much less than that sum.

T. O'Donnell & Co., stationers and printers, New York city, doing business under the style of the Tyler Rubber Company and Monroe Printing Company, have dissolved partnership. C. Lynch continues the business.

Russell & Curtiss, printers and publishers of the *Railroad Record and Investors' Guide*, Philadelphia, Pa., have dissolved partnership by the withdrawal from the firm of Charles A. Curtiss.

F. P. Hays & Co., dealers in picture frames, &c., Baltimore, Md., have dissolved partnership. H. Cronhardt & Son have succeeded to the business.

A receiver has been appointed for the Typograph Manufacturing Company, Chicago, Ill.

James Dewitt, publisher, Brookville, Kan., has sold out to Harry Swift.

T. Brady, newsdealer and stationer, Danbury, Conn., has sold out to Frederick Barlow.

Lincoln Abbott, dealer in stationery, &c., Watertown, Conn., has sold out to Atwood & Wilson.

Carmean & Co., booksellers, &c., Salida, Cal., have dissolved partnership. W. G. Westfall continues the business.

A dissolution has taken place in the firm of Lewis, Decker & Co., book-binders, Quincy, Ill. George A. Burrows succeeds to the business.

A. L. (Mrs. Alex.) Weir, bookseller and stationer, Stratford, Ont., has removed to St. Thomas.

Hazlitt & Ervin, dealers in paper-hangings, Philadelphia, Pa., have dissolved partnership. Jas. W. Hazlitt continues the business.

The Consolidated Paper Company, of Chicago, made an assignment on Saturday, March 8, to Norton P. Tracy. The officers were: C. M. Smith, President; H. P. Tracy, Treasurer, and R. P. Dart, Manager. The business was established about five years ago, with \$10,000 capital, which was too small, and the concern gradually closed out. Last summer it was re-organized under an old charter of the State of Illinois with a subscribed capital of \$40,000, of which \$20,000 was paid in. The parties interested formed a syndicate to control the wrapping-paper trade of the country, as the officers and stockholders owned or controlled thirty mills, which produced three-fifths of all the wrapping-paper made in the United States. The company bought the entire product of these thirty mills, and the idea was reported in the trade to be to corner the market, run up the price and make a large amount of money, but the late failures in the paper trade spoilt the plan. R. P. Dart, the manager, was also secretary of the Milan Paper Company, which failed a few months ago. The liabilities are \$97,000 and the assets consist of bills receivable and open accounts to the amount of \$25,000 and wrapping-paper stock valued at \$100,000. The directors of the company were leading paper

BLOTTER

150 VARIETIES.

REVERSIBLE BLOTTER.

(CAN BE USED BOTH SIDES.)

TABLETS

PACKED IN BOXES

100 SHEETS IN PAD.

(WARRANTED.)

THE LARGEST AND FINEST LINE OF BLOTTER TABLETS IN THE COUNTRY, including Octavo, Commercial, Packet and Letter in White, Cream, Linen, Plated, Gilt Edge, Quadrille, Wove Bank, &c., &c.; Sermon Paper; fourteen varieties of Legal and Foolscaps; eight varieties of Printed Memorandum, Statement and Bill-Heads; also Blank Package, Shipping and Rent Receipts, Orders, Acknowledgments, Remittances, Wash Lists, Salesmen's Orders, Notes, Drafts, Receipts, Checks, &c.

Notwithstanding their many advantages, these goods will be found by comparison to be 5 to 10 per cent. CHEAPER than any others. All other manufacturers put 80 sheets (or less) in their pads—the M & H contains 100. The Dealer who offers his customer the most for his money is the one who will increase his business.

We also make these goods with 80 sheets, under the name of **UNIVERSAL BLOTTER TABLET**, at lowest prices ever made

manufacturers and the company was considered perfectly good.

C. S. Dodge, bookseller, &c., Reading, Mich., is dead.

W. J. Robinson & Co., printers, Boston, Mass., have gone into insolvency.

George W. Shillaber, dealer in paper hangings, Worcester, Mass., is dead.

F. J. Mead, publisher of *The Mint*, Denver, Col., has sold out to Antone Tremp.

Mrs. A. (C.) Schneider, dealer in toys, fancy goods, &c., Michigan City, Ind., has sold out.

Mrs. M. E. Ferris, bookseller and stationer, Brownstown, Ind., is closing out her business.

B. F. Ashley, publisher of the *Stamford Herald*, Stamford, Conn., has sold out to George Baker.

W. F. Monteith, stationer and bookseller, Topeka, Kan., has sold out to C. (Mrs. Charles B.) Phillips.

An attachment has been issued against the Davenport *Gazette* Company, Davenport, Ia., for \$2,368.

N. C. Newell & Son, wholesale and retail dealers in wall-paper, &c., Utica, N. Y., have dissolved partnership.

Paul Mende, dealer in card fringes, &c., New York, has removed from 16 Howard street to 43 and 45 Lisenard street.

C. M. Cott & Co., printers, Columbus, Ohio, have dissolved partnership. W. S. Carlile having retired from the firm.

A. & C. Boehmer, paper box manufacturers, Berlin, Ont., have dissolved partnership. C. Boehmer continues the business.

S. & J. J. Hoover, publishers of the *American*, Massillon, Ohio, have dissolved partnership. The firm is now James J. Hoover.

Johnson & Mansfield, publishers, Corralis, Ore., have dissolved partnership. The business is continued by William H. Mansfield.

Willetts Brothers, booksellers, stationers, &c., Columbia City, Ind., have dissolved partnership. J. A. Willetts continues the business.

Douglass Brothers, publishers, Philadelphia and Cincinnati, have made an assignment to Robert H. Hinckley, in Philadelphia. It is said that they lost considerable money in their Western business. They started in Cincinnati and opened a branch in Philadelphia about four years ago.

The arrangements for the settlement of the claims of Meyers Brothers, who made an assignment some two or three weeks ago, have been completed and all that remains to be done is to re-assign the property to Charles D. Meyers, who will continue the business at the old stand, No. 62 John street, under the old style of Meyers Brothers.

The controlling interest in the stock of the New York *Commercial Advertiser* Publishing Company, bequeathed by the late Hugh J. Hastings to his widow, was on Saturday last sold by the latter for the sum of \$200,000. The purchasers are Park Godwin, Henry G. Marquand, Henry Sedley and Robert Sewell, each of whom has an equal interest in the venture. The stock bought consists of seventy-three and one-half shares, the total capital being 145 shares. John Hastings, the managing editor of the paper; Hugh Hastings, the financial editor; Mrs. Beverly Ward, the wife of the business manager and daughter of the late proprietor, and Jenkins Van Schaick, the banker, own the greater part of the stock, aside from that transferred by Mrs. Hastings.

The Case, Lockwood & Brainard Company, Hartford, Conn., is publishing two styles of record and account books, known as the "Office Record" and "Household Record." The last is for family use, with pages for addresses and reference, record of employes and their accounts, cash and expense blanks, general memoranda and tables for the ready reckoning of wages, all of which are reached by a general index, together with a subject index for reference to any special entry. The first is intended for the private use of persons having limited or occasional business transactions, of which a record is desirable. It is also so arranged that it can be used as a record and private account of any partnership interest. It is provided with convenient blanks for recording addresses with memoranda relating thereto; cash and expense blanks; blanks for general memoranda or general entries; ledger accounts; property or life insurance, showing the name of company and agent; amount insured; on what, and date of expiration; also for record of investments, with blanks for a description of the investments; date of purchase; cost of same; and other memoranda relating thereto; with proper blanks for entering the amount of dividends received on such, with the date; it has an index like the other book, and is provided with a lock and key.

C. F. Rump, Philadelphia, had on exhibition this week an extensive line of goods, prior to sending them on the road for the purpose of soliciting import orders. Among the articles particularly worth mentioning were a well-selected line of card and letter-cases and purses, in a dozen different designs of antique leather; a large assortment of work-boxes and odor-cases, some in very novel designs and elaborately finished. One of the specialties of the house is the line of musical boxes, which have had such large sales during the last few years being neater and finer, and from 25 to 30 per cent. cheaper than the imported ones. The assortment also comprises some very pretty and cheap Vienna bronze goods, paper-knives, inkstands, &c. The line of cigar-cases numbers about 180 different patterns; other lines, such as nail-sets, gentlemen's and ladies' companions, traveling and writing-cases, are equally well represented.

All the old envelopes, newspapers, wrappings and scraps of paper which accumulate in the Treasury Department at Washington are carefully saved in what is called the waste paper room. All this refuse is sorted out by men and women, and sold to one firm in New York. The receipts amount to quite a handsome little sum.

J. M. Crane, of Crane & Co., Dalton, Mass., has not been in his mills for eight or ten years, but leaves the entire management to his son, W. Murray Crane, who deserves great credit for conducting so important a business successfully.

The schedules of George Parsons, dealer in toys and fireworks, at No. 12 Park place, New York, have been filed, showing liabilities, \$41,636; nominal assets, \$36,931; actual assets, \$15,608.

Holmes, Booth & Haydens will change their present location, at No. 49 Chambers street, on May 1, to the building at No. 25 Park place and 22 Murray street.

F. B. Clement, stationer, New York, has removed from 128 Duane street to No. 102 in the same street, on the ground floor.

The Valley Book and Stationery Company, of St. Louis, has made an assignment to John E. McKinney. The assets are valued at \$3,000.

M. C. Oberholtzer, printer, Boyertown, Pa., is dead.

A. H. Elliott, stationer, Aurora, Ont., has been burned out.

Dunn & White, ink manufacturers, Rochester, N. Y., have sold out.

C. B. McCarthy, bookseller, Paris, Ky., has sold out to M. A. McCarthy.

J. T. Stubbs, dealer in picture frames, Portland, Me., has been burned out.

Myron E. Haskell, bookseller, &c., Traverse City, Mich., has been burned out.

The West Virginia Fibre Company, Parkersburg, W. Va., has been dissolved.

J. M. Fisher & Co., booksellers, &c., Little Rock, Ark., have dissolved partnership.

R. M. Rea & Co., booksellers, &c., Laporte, Ind., are selling out to C. P. Bartlett.

An assignment has been made by Douglass Brothers, publishers, Philadelphia, Pa.

M. C. Harris, publisher, Hot Springs, Ark., has been closed out under an execution.

Renshaw & Ingram, publishers, Springfield, Mo., have sold out to Tracey & McClain.

George H. Adams & Son, dealers in maps, New York city, have been damaged by fire.

Wannie V. Wollner, stationer, &c., Hannibal, Mo., was burned out last week. Not insured.

William McFatridge, paper-stock dealer, &c., Halifax, N. S., has been burned out. Insured.

N. Cole, Sr., has bought out the *Northwest News Printing and Publishing Company*, Portland, Ore.

A. E. Simons is now associated with the firm of Baker, Pratt & Co. in its stationery department.

The establishment of R. Kuschewsky & Son, manufacturers of picture frames, New York city, has been damaged by fire.

Execution has been issued against Wise & Van Horn, printers, Philadelphia, Pa., to recover judgments amounting to \$1,000.

The Powers Paper Company is offering a bargain in foolscap paper, 10 and 12 lbs., adapted to school use. Samples can be had from the New York office. J. L. St. John, agent.

A weekly trade journal, devoted "to the trade interests of distilled and fermented beverages, tobacco and cigars," has been started in Boston. It is called the *New England Trader*. S. & I. Wolffsohn are the publishers.

The Randolph Paper Box Company, Richmond, Va., has extended its fame and business so greatly that it has been obliged to erect a factory of its own, which is said to be the largest paper box factory in America. There are 34,350 square feet of working space in the building, and the trade of the company is extending all over the world.

The Harvard fountain shading-pen is a flexible gold pen affixed to a fountain or reservoir holder, a feeding-tube conducting the ink to the pen-point. It has the combined feature of an ordinary pen which preserves the characteristics of handwriting, and a continuous supply of ink, which avoids the use of an inkstand. It is made by the Harvard Pen Company.

E. O. Steves, formerly of the firm of Nugent & Steves, has formed a copartnership with Edward W. Storms and Jesse S. Keys, under the style of E. O. Steves & Co., for the manufacture of printed wrapping papers, folding paper boxes, and for dealing in manilla, tissue and tea papers. The firm has located at the corner of Grand and Centre streets, New York.

T. M. SIMPSON, 21 S. 7th St., PHILADELPHIA, Pa.**CEMENTING BRASS ON GLASS.**

Puscher recommends a resin soap for this purpose, made by boiling one part of caustic soda, 3 parts of colophonium (resin) in 5 parts of water, and kneading into it half the quantity of plaster-of-paris. This cement is useful for fastening the brass top on glass lamps, as it is very strong, is not acted upon by petroleum, bears heat very well, and hardens in one-half or three-quarters of an hour.

By substituting zinc white, white lead or air-slaked lime for plaster of Paris, it hardens more slowly. Water only attacks the surface of this cement.

Wiederhold recommends, for the same purpose, a fusible metal, composed of 4 parts lead, 2 parts tin and $2\frac{1}{2}$ parts bismuth, which melts at 212° Fahr. The melted metal is poured into the cupsule, the glass pressed into it, and then allowed to cool slowly in a warm place.—*Polyt. Notiz-blatt.*

TWO NEW PROCESSES FOR MAKING ARTIFICIAL IVORY.

The *Chronique Industrielle* gives the following description of a new process for making artificial ivory from the bones of sheep and goats and the waste of white skins, such as kid, deer, &c.:

The bones are macerated for ten or fifteen hours in a solution of chloride of lime, and afterward washed in clean water and allowed to dry. Then they are put with all the scraps of hide, &c., into a specially constructed boiler and dissolved by steam so as to form a fluid mass, to which is added $2\frac{1}{2}$ per cent. of alum. The foam is skimmed off as it rises, until the mass is clear and transparent. Any convenient coloring material is then added, and while the mass is still warm, it is strained through cloth of appropriate coarseness and received in a cooler, and allowed to cool until it has acquired a certain consistency so that it can be spread out on the canvas without passing through it. It is dried on frames in the air, and forms sheets of convenient thickness. It is then necessary to harden it, which is accomplished by keeping it for eight or ten hours in an alum bath that has not been used before. The quantity of alum necessary for this operation amounts to 50 per cent. by weight of the gelatine sheets. When they have acquired sufficient hardness, they are washed in cold water and let dry on frames, as at first. This material works more easily and takes as fine a polish as real ivory.

Another method of making a dutiable artificial ivory is described in the *Zeitschrift des Apothekervereins*: A solution of caseine is made first with 200 parts of caseine in 50 parts of ammonia and 400 parts of water, or of 450 parts of albumen in 400 parts of water. To either of these solutions of water are added 420 parts of quicklime, 150 parts of acetate of alumina, 50 parts of alum, 1,200 parts of gypsum, and 100 parts of oil. The oil must be added last of all. If dark colored articles are to be made of it, 75 to 100 parts of tannin may be substituted for the acetate of alumina.

After the ingredients are thoroughly kneaded together to form a homogeneous paste, it is passed through rollers to form tablets of any desired size. These are dried and then pressed into molds that have been heated, or they may be finely pulverized and then put in hot molds and exposed to powerful pressure.

When the articles are finished they are put in a bath made by dissolving 1 part of white glue and 10 parts of phosphoric acid in 100 parts of water. The object is then dried, polished and varnished with shellac.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, MARCH 13, 1884.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

How is the law of supply and demand affected by speculation? Business depression is the result of some fundamental evil, abnormal in all well-regulated communities and the source of gangrene which permeates the commercial body. Is not speculation the poison? The gambling in futures, the chances on the advance or decline in stocks are not all of speculation. The merchant who buys more than he can reasonably afford to take, the lavish concession of credits and the dating of bills ahead are all indications of speculation forced and unhealthy. The abuse of trust is become alarmingly frequent. Should these evils continue, where shall we turn for hope?

By a vote of 41 to 20, the United States Senate, in executive session on Tuesday, reversed its former action rejecting the treaty of commerce with Mexico. This convention, therefore, stands approved, but with a proviso that it shall only go into effect when Congress shall have passed the necessary laws to make it operative. The doubtfulness of this proviso is the one drawback to the congratulation which would be extended to the act of the Senate. What laws, specially applicable to the treaty, are necessary? Have we to wait for a revision of the tariff, or shall the extension of trade between the two republics depend on the settlement of existing differences between the advocates of free-trade on the one hand and of protection on the other? If this is the meaning of the Senatorial proviso, the ratification of the treaty is only an avoidance, and the prospect of a wider commerce with Mexico is but a hope deferred. One of the daily papers thinks that, with the treaty in operation, all of the advantages will be on one side, and that of the United States. This we do not believe, for there are always many changes consequent upon the adoption of new trade relations which are apt to bring about the unexpected. But, whatever may ensue, the probability is that this country will derive a fair share of benefit from the better intercourse, socially and commercially, that will obtain. More than a righteous share we neither seek nor want.

THE law of demand and supply is beautifully exemplified at the present day, particularly by the Japanese and Germans, to whom we are indebted for the principal supply of veritable antiques modeled by nineteenth century artists. We do not, however, impose upon the two peoples mentioned the entire responsibility for the numerous counterfeits of old specimens of art and industrial production, for there are others who have proved themselves apt in imitation. Perhaps it would be better for the present generation to discard old models, to reject the ancient forms and to strive for creations which shall illustrate the alleged advance of the age. We have been moved to this thought by the fact that the Japanese have regularly established factories for the manufacture of

bronzes, porcelains, &c., while the German provides us with new violins made by the old masters, with other things too numerous to mention. There is one town in Germany the inhabitants of which subsist by the production of musical instruments, chiefly violins seemingly centuries old. England, too, is not without her imitations, but these are chiefly designed for the heathen. In France they dabble in bric-a-brac, and also maintain the semblance of pure wines, which are, however, decocted from raisins, old boots and various other delectable sources of antiquity. Why should the world—why should America chase after the false products of Europe and the East? If we must have these antiques let us produce them ourselves; but it would be better to seek to develop domestic standards of art, to encourage the production of things which will reflect glory upon our own civilization. We ought not to be known in years to come as simple-minded people, who preferred shams and foreign imitations to the exclusion of honest products of home origin, and the neglect of our great advantages for making ourselves famous in art and industrial science.

ROUNDAABOUTS.

BY THE TRADE LOUNGER.

Some one sends in a suggestion which might apply to a number of cities. He says: "Washington has adopted standard time. Now adopt standard morals."

It will be seen that the last sentence is of indefinite application. Presumably, the party making the suggestion refers to Washington. Yet it might mean, as it reads, the "Lounge." Well, be it Washington, Chicago, Boston, Philadelphia, St. Louis, or New Orleans, or even I—let us adopt.

The same satirist says: "A Western chap has found a perpetual motion. The machine," he says, "will certainly keep running until it wears out. It is the tongue of his wife." This is shameful! Such a man doesn't deserve to have a wife. He certainly does not know, nor has he experienced, that depth of feeling which is deeper than the tongue, and is ready to overflow from the heart to him who renders himself worthy of it.

Gen. A. C. Barnes has accepted the colonelcy of the Thirteenth Regiment, N. G., S. N. Y., vice Col. David E. Austen, resigned. I should say, General, that this is taking a promotion backward. If you keep on in this way you'll find yourself in time "a high private in the rear rank." I've been there.

T. E. Dodge, head bookkeeper at Berlin & Jones' envelope factory, was run down at the corner of Broadway and John street by a Madison avenue stage on Tuesday. Matthew Coughlin, the driver of the stage, said, when arrested, that he did not see Mr. Dodge until the pole of his vehicle struck him. Such excuses are not permissible. Anyone who knows a 'bus-driver cannot but be aware that he is most indifferent as to whom he runs over. It is matter of notoriety that the "Broadway squad" has its *raison d'être* in the recklessness of the people who

drive horses on our great thoroughfare, and not the least of these reckless people are those who drive omnibuses. * * * *

Dr. Stainer, in a recent lecture, said: "In teaching music, as in teaching every other subject, there are two ways, the mean and the noble; the mean, which looks upon work as a nuisance, and the money reward as a necessary but insufficient reward; the noble which looks upon work as a privilege, the reward as a blessing." * * * *

The suggestion as to "every other subject" is one which I want to bring forward here. The idea is not limited to teaching, but it further extends to learning, and in fact to all work. Perfunctory service, no matter what form it takes, is mean. The teacher, the merchant, the manufacturer, who looks only to his business and its management for the money reward, belittles his avocation, and the workman, clerk or servant possessed of a like spirit is as mean as the master. There is something in life beyond its dross, and business is a part of life and need not accumulate the scum if it is conducted on pure principles. * * * *

Here is a bit of a story which reads pretty good: Col. Percy Yerger is one of the most popular criminal lawyers in Austin, says *Texas Siftings*. Last Sunday the Colonel's little boy Tommy was asked by his Sunday-school teacher: "Tommy, the man who is good in this world goes to heaven; now, what becomes of the bad men who disobey the laws of God?" "Papa clears them," was the response.

ANSWERS TO CORRESPONDENTS.

W. W. B. wants to know where to buy white wax in sheets for making wax flowers.

Ans.—A. H. Abbott & Co., 50 Madison street, Chicago, Ill.; Janentzky & Weber, 1125 Chestnut street, Philadelphia, Pa., and C. T. Raynolds & Co., 106 Fulton street, New York.

J. A. S. requests addresses of good houses selling artists' materials, paints, plaques, &c.

Ans.—We refer you to the parties named in our answer to "W. W. B." above, and also to F. W. Devoe & Co., 101 Fulton street, New York.

J. S. H. wants to know who makes or controls "Argyle" linen paper.

Ans.—Powers Paper Company, J. L. St. John, agent, 62 Duane street, New York.

Subscriber inquires for the manufacturer of Pierce's files.

Ans.—We are told that the factory burned out some time ago and that the manufacturer discontinued business.

G. W. C. inquires what firm or person does the marbling of book-edges for the trade.

Ans.—L. Heitkamp, Nos. 6 to 12 Reade street, New York, makes a specialty of edge-gilding and marbling for the trade.

R. wants a "manifold paper from which the oil does not 'set off.'"

Ans.—You will scarcely find it. We have advised you of the names of several manufacturers by mail.

S. C. W. asks where he can buy eye-shades.

Ans.—There is a manufacturer of eye-shades in New York named Rickets, but we don't know his address. French & Choate, 4 Bond street, New York, and John Scheidig & Co., 43 Maiden lane, supply the trade.

Eberhard Faber has gone on a business trip to Europe, and is not expected to return inside of three months.

MORTGAGES, ETC.

OBITUARY.

GEORGE FOOS.

Mr. George Foos, of the firm of Richardson & Foos, theatrical printers and engravers, of 112 Fourth avenue, New York, died at his residence in Mount Vernon on Thursday 6th inst. after a brief illness. A week before his death, while pulling off his boot, he fractured the bone of his left thigh. His death, however, was due to paralysis of the brain, aggravated by the suffering caused by the fractured leg. He was forty-five years old, and a native of Brooklyn. He began life as a printer's boy in the *Herald* office, and rose to the position of superintendent of the job department. His partner, Mr. Richardson, who died eleven months ago, was a foreman in the same department. Nine years ago they began business for themselves. Mr. Foos was a member of Manhattan Lodge, F. and A. M., and of the New York Lodge, B. P. O. Elks.

The following proposals were publicly opened on March 6 and announced for furnishing stationery, blanks, blank-books, &c., for the several departments of the city government and justices' courts of Brooklyn: James P. Rappelyea, class A, \$6,177; class B, \$984; class C, \$168;

class D, \$935—sureties, Charles F. Rappelyea and Thomas Purcell, Grogan & Martin, class A, \$6,075, class B, \$1,235.60, class C, \$165, class D, \$874.50—sureties, W. H. Murtha and T. W. Heynes. Jordan Stationery Company, class A, \$5,890; class B, \$1,350; class C, \$150; class D, \$1,120—sureties, John J. Keenan and Dominick H. Roach. John M. Bulwinkle, class A, \$5,694; class C, \$129.38.

John C. Stockwell, the well-known dealer in paper stock, has bloomed forth as a publisher. He has just issued a little compilation known as "What Shall We Name It?" a dictionary of baptismal names for children containing 2,000 names, with their meanings.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, March 12, 1884. }

THE MONEY MARKET.—With so large a supply of loanable funds and a comparatively light mercantile demand, incident to a dull condition of trade, the money market remains easy at 4@5½ to 6 per cent. discount of prime paper and 2@2½ per cent. on call. The stock market is extremely dull and the tone on the whole "bearish," without any apparent reason, beyond rumors that some of the trunk line railways have again resorted to the cutting of rates. Railway mortgages are irregular and governments dull. The market for sterling exchange was somewhat heavy in tone, owing to an increased supply of bankers' bills; but there being no pressure to sell, rates have not materially declined.

THE PAPER MARKET.—Business in the paper trade has been a little brighter this week, although this is only by comparison with its unsatisfactory condition during February. The unpleasant weather last month served to materially retard the distribution of merchandise of all kinds, and stocks, in consequence, became considerably reduced in some sections, but an increased movement is looked for during this month and to the end of the spring season. Business is hardly equal to the earlier expectations of the year, and the reasons assigned for this continued dullness are bad weather, the tariff agitation and the lack of confidence. We shall probably have more settled weather than last month, and there is very little probability of any change in the tariff during this session of Congress, so that these causes are not likely to operate as further drawbacks to business. The lack of confidence, being the result of long-continued depression, is much more difficult to overcome than if it resulted from a sudden shock, the same as acute diseases, which can be more easily cured than those which have become chronic. Lack of confidence, in the view of many, is the chief cause of the depression, and it must be some time yet before this is fully restored. The situation of the manufacturers is unchanged, and prices all through are quoted just about the same as a week ago.

THE STATIONERY MARKET.—There is no movement, as yet, sufficient to indicate that the spring trade has fairly set in. Business is about the same as last week. Out-of-town tradesmen are backward in coming to town, and comparatively few orders are received by mail. The outlook for an immediate brisking up of the Southern and Western trade is on the whole quite gloomy. A few orders have been taken in strictly spring goods, but with much difficulty. There is little doing in fine stationery. Many buyers give as an excuse for not placing their orders that they have a large stock on hand and cannot sell that, and hence do not care to order new goods. The same feeling prevails regarding pencils, pens and ink. In stationers' specialties there is some activity, but business is not as good as it was a few weeks ago. The movement in Easter cards remains quite steady. The use of these goods has largely increased and attractive goods are always in demand. The general stagnation of trade is attributed to the backward and inclement weather, which has depressed all branches of business, and it is believed that as soon as the causes named have been removed there will be a grand rush. Thus dealers live in hope.

PAPER TRADE REVIEW.

Consists of Sixteen pages, size of this Newspaper.

EVERY THURSDAY, Post Free, \$3 a Year

Remit Greenbacks or Post-Office Order. EDITOR AND PROPRIETOR **W. JOHN STONHILL.**

PAPER MARKETS:—Mill News—Trade Gossip—Samples of Paper—Technical Articles—Record and Illustrations of New Patents—Descriptions of Factories—Letters every week from Paris, Berlin, Vienna and other countries—Market Prices—Gazette.

STATIONERY:—Novelties Illustrated and Described—Technical Articles—Stationery in the Provinces—American Notes—Colonial Reports—Industries of the Trade—Reviews—Gazette.

PRINTING:—Doings of the Craft—Printing in the Provinces—Colonial Intelligence—Foreign News—Criticisms on Specimens—New Machinery—Type Specimens—Original Trade Technical Articles—Descriptions and Illustrations of British Establishments—Letters from our Correspondents, and every item of news concerning the trade during the preceding seven days.

The B. and C. P. and S. has corresponding representatives in North and South America, Canada, East and West Indies, Australia, New Zealand, Tasmania, India, China, Japan, Constantinople, Turkey in Europe and Asia, Russia, Austria, Germany, Italy, Spain, Holland, Belgium, and France; letters from whom appear periodically.

"The amazing industry and excellent tact of the conductor, Mr. Stonhill, is apparent even on a superficial glance over its pages."—*Mackellar, Smiths & Jordan (Phila.)*.

"The recognized organ of the Paper and Printing Trades."—*Belfast News-Letter*.

"It has features of enterprise unusual to European Trade journalism."—*American Stationer*.

"The notes upon Trade cover the entire country and the Colonies."—*London Figaro*.

"There is an American touch about the paper."—*Leigh Chronicle (Eng.)*.

"In the matter of printing it is PERFECT."—*W. and A. K. Johnston (Edinburgh)*.

"The very best journal of its class that finds its way to our table."—*James D. Whitmore & Co. (N.Y.)*.

Advertisers will see that it is better for them pay fair charges to a Journal which covers the whole of the commercial world, than to pay less sums for advertisements in journals whose circulation is limited to one country, one town, or possibly one parish.

UNIVERSAL CIRCULATION.

Address, **W. JOHN STONHILL,**

IMPERIAL BUILDINGS, LUDGATE CIRCUS,

LONDON, E. C., ENGLAND.

OLD MANUSCRIPT INK.

The following formula is said to have been in use in 1654, and to have produced an ink of great permanency, if one may judge from manuscripts written by the person who is authority for the formula: One and one-half drams of coarsely powdered galls, 6 drams of sulphate of iron, 10 drams of gum arabic, and 1 pint of soft water, are to be placed in a bottle, which is to be securely stoppered and placed in the light (sunlight if possible). Stir occasionally until the gum and copperas are dissolved, after which the bottle should be shaken daily. In the course of four to six weeks the ink will be fit for use. The addition of 10 drops of carbolic acid will prevent the formation of mould.

WANTED.—SITUATION AS TRAVELER OR in the house: 11 years' experience in the wholesale and retail Book and Stationery business as salesman, buyer and manager. Address H. E. SIDDALL, Crawford House, Chicago, Ill.

A REWARD OF \$100.

We are informed that some unscrupulous persons are using and branding Pens with our Trade Mark, the word "MOHETA." We again caution all persons against using the same on Writing Pens, it being adopted by the undersigned, and registered in the Patent Office at Washington, D. C., March 25, 1879, and re-registered June 6, 1882. We therefore offer a Reward of \$100 (One Hundred Dollars) to any person that will give us such information as will lead to the detection of any person or persons infringing on the word "MOHETA," as above stated. December 13, 1883.

TRADE ITEMS

The trade are asked if they have seen the new "Rose" shade, adapted to any gas or lamp globe. This shade comes in four handsome colors, and is quite attractive. Francis H. Loss, Jr., 46 Murray street, New York, will supply the trade.

The "Parisian Wonder" compound microscope is the latest of the taking things in the market. It magnifies 1,000 times, and can be sold on any counter. The price is only twenty-five cents, and the article seems to be worth more than the money.

S. A. Jenkins has bought the book and stationery business of the late Samuel Ebert, Zanesville, Ohio, and will continue it at the old location, 14 Opera Block. The remainder of the stock, consisting of notions, toys and fancy goods, is yet in the hands of the administrator.

The Hastings, Mich., ball, bat, croquet, fish-rod and Indian club factory will make this year 228,000 bats, 38,000 to 45,000 croquet sets, 3,500 to 5,000 dozen fish-rods. These works give employment to ninety persons, and consume 1,000,000 feet of lumber annually.

A new philosophical and scientific paper has just been started in this city. The title of the publication is *The Problems of Nature*. It is to be devoted to the discussion of scientific subjects. The first issue has a number of original articles, and gives evidence of being ably edited.

The *Phrenological Journal* for March contains portraits of Theodore Parker and Signor Mario, the distinguished singer; an illustrated article on the "Territory of Alaska;" and articles entitled "The Poetess of Ancient Greece," "The Social Ideal;" besides a number of other interesting articles on scientific and social topics.

Marcus Ward & Co. are having a very brisk run on their new and attractive line of Easter cards, which come in numerous popular designs and can be had both plain and fringed. Quite a novel design is shown in a card which is in the form of an envelope with a bunch of primroses, violets and snowdrops printed in colors on the inside, the reverse side being reserved for the address of those to whom it is sent.

Hubert Frawley, of No. 109 Washington street, Brooklyn, N. Y., a buyer for Peter F. Collier, a publisher at No. 11 Vandewater street, this city, was taken to the Tombs Police Court on Tuesday on a charge of embezzling from his employer. He was held on a charge of taking \$60. It was said that although a discrepancy of \$3,000 had been discovered the exact amount of the peculations was not yet known. The prisoner was remanded pending a complete examination of Frawley's accounts.

H. N. Baumgarten is manufacturing a very superior article in self-inking pads for rubber stamps. This pad is known as the "Perfection" pad, and is furnished in all colors, except black, and as there is no necessity of re-inking, the liability of soiling the hands or clothing is obviated. The pads will last a year or more without re-inking. The stamp impressions are clearer than with the old-style pad, and the supply of ink is uniform at all times. This pad has been in use in the Eastern cities for several years, and has given satisfaction. The pad is put up in two sizes and in cases where stationers or stamp manufacturers do not have it, a sample can be had by addressing the manufacturer at 60 William street.

The Globe Files Company has recently introduced a new file called the "Lawyer's Filing

Case." It is made of black walnut, nicely oil-finished. The size of the frame is 36 inches high, 34 inches wide and 11 inches deep. It contains 36 Globe No. 1 file boxes and also two large cloth-covered boxes underneath of proper size for legal cap paper or legal blanks laid flat. C. M. Ward, the New York agent, will supply the box at manufacturer's prices.

Do you sell notes, drafts and receipts? Nos. 1,590, 1,600, 1,610, 1,059, 1,060 and 1,061 of the M. & H. blotter tablets contain some new and unique designs by a special artist and are put up in elegant style by W. H. Hasbrouck, 91 Liberty street. Send for samples.

The Iron Review is the name of a new trade journal, the first number of which has just been issued at Buffalo, N. Y. It is devoted to the iron, coal and various industrial interests of that city. It has a very creditable typographical appearance. Homer E. Dudley & Co. are the publishers.

The utility of C. H. Denison's reference index is shown by the popularity which it has acquired since its introduction. This index is applicable to dictionaries, directories, catalogues and all books of reference. It enables one to turn to one letter or subject with a single motion.

The Globe Files Company board clips are among the neatest and best things of the kind in the market. They are made of both walnut and tar-board and nickel and steel-bronze clips. C. M. Ward is the agent in New York, and he will furnish them to the trade at manufacturers' prices, including regular discounts in special cases.

Patrick Slatterly has been appointed to fill the position made vacant by the death of Jas. F. R. Fadden, late bookkeeper and cashier of the Acme Paper and Stationery Company. Mr. Slatterly was for a number of years connected with the firm of Oscar Strasbourger & Co., of New York, and, therefore, is well known to the stationery trade.

The Mediæval Easter cards of L. Prang & Co. are taking exceedingly well with the trade. They come in two series. Series 1 embraces a set of twelve cards of six different designs printed in red and black. Series 2 is a book of prints, and carols in Old English script on old hand-made paper encased in parchment paper printed in red and black. They are decidedly antique.

The March issue of the *Overland Monthly* has been received. This creditable representative of the Pacific Coast and its literature is published by Samuel Carson, who is well known to the trade. The contents of the current number include a variety of contributions from well-known essayists in which, as in its lighter reading, it is a fair specimen of literary effort and entertainment.

The April number of Cassell's *Family Magazine* is out. It contains the usual quantity of interesting matter of fiction, instruction and suggestion. The illustrations are full and satisfactory. This magazine is one of those publications which commend themselves to the attention of every household.

T. E. Dodge, the head bookkeeper of Berlin & Jones, was run down in Broadway on Tuesday by a Madison avenue stage, but was not injured as badly as at first believed, and is doing well. His ankle, which was thought to be broken is simply badly bruised and swollen, and it is thought that Mr. Dodge will be able to attend to business again soon. He has been removed to his home at No. 60 Munro street, Brooklyn.

SANBORNS' BACK-FORMING MACHINE

For BLANK-BOOK MANUFACTURERS.

THIS MACHINE WILL

Form different size backs without changing the Machine.
Form backs of any thickness of board.
Form the largest back as quickly and easily as the smallest.
Form a dozen bands in the same time as one.
Form backs of any size hook manufactured.
Form backs harder and better in every respect than any made by hand.
Form backs that will retain their shape and will not split or break.
Form backs in one-quarter the time required by hand.

Saves labor, as backs can be formed so much easier than by hand.
Saves gas, as it requires only a few moments to heat.
Saves money, as a boy can form backs with this machine as well as a man.
Causes no inconvenience from working over hot fumes, as there are none.
Will keep in order, as it is made entirely of iron and steel, and has no weak points to break.
Will pay for itself in a very short time.
We warrant the machine to do all that is claimed.

GEO. H. SANBORN & SONS, Book-Binders', Printers', and Paper-Box Makers' Machinery,
No. 51 BEEKMAN STREET, NEW YORK.

Manufactory: Standard Machinery Company, Mystic River, Conn.

L. L. BROWN PAPER COMPANY,

ADAMS, MASSACHUSETTS, U. S. A.

Manufacturers of First-Class

LINEN LEDGER AND RECORD PAPERS

WHICH WILL STAND THE SEVEREST TESTS OF ERASURE AND RE-WRITING

being double Sized and Loft Dried. These Papers possess unusual strength and beauty, and contain a sizing that resists the severest erasure and re-writing tests. Every ream is Water-Marked with Name, and put up with Binders' Boards, trimmed perfectly square, and ready for Ruling Machine.

"OTTO" GAS ENGINE.

OVER 10,000
IN USE.

Working without Boiler, Steam, Coal,
Ashes or Attendance.

STARTED INSTANTLY BY A MATCH, IT GIVES
FULL POWER IMMEDIATELY.

WHEN STOPPED, ALL EXPENSE CEASES.

No explosions; no fires nor cinders; no gauges; no pumps; no engineer or other attendant while running. Unsurpassed in every respect for hoisting in ware-houses, printing, ventilating and running small shops.

SIZES: 1, 2, 4, 7, 10, 15 and 25 horse-power.

R. H. INGERSOLL, 92 Fulton St., N. Y.

For every user of Rubber Stamps. Takes the place of the old cloth pads, and bottle of ink, at a saving of time, money and annoyance. It requires no inking, and will last from one to three years. Colors—red, violet and green. Prices, $2\frac{3}{4} \times 4\frac{1}{2}$, 60 cents; 3×6 , 75 cents; per doz., \$3 and \$5.

DECREASED DEMAND FOR POSTAL CARDS.

Since the introduction of two-cent letter postage there has been an unexpected reduction in the number of postal cards issued. For five years the average annual increase in the issue has been 14 per cent. Since July 1 last there has been an increase of 18 per cent. in the number of adhesive stamps, and 25 per cent. in the number of stamped envelopes issued. During those eight months the issue of postal cards only reached 256,552,750, as against 260,226,250 during the corresponding period in the preceding year. In consequence of the decreased demand for postal cards the Postmaster-General has sent a letter to the Speaker of the House of Representatives informing him that the estimates for the cost of manufacturing the cards during the next fiscal year may be reduced \$35,000. The reason assigned at the Department for the decreased issue of the cards is that many communications formerly made by that means are now made through letters.

AN ENDORSING INK which does not dry quickly on the pad and is quickly taken by the paper can be obtained by the following recipe: Aniline color in solid form—blue, red, &c.—16 parts; 80 parts boiling distilled water, 7 parts glycerine, and 3 parts syrup. The color is dissolved in hot water, and the other ingredients are added while agitating. This endorsing-ink is said to obtain its good quality by the addition of the syrup.

GILMAN'S

(Six Division)

CHALLENGE
Letter Files

Exhibiting a view of the File when open and affixed to the wall; also showing a view of the same when closed. As will be observed, this is an entirely new system of filing letters, from the fact that when the cover is raised immediate access is had to every one of the different filing divisions, thus obviating the necessity of pulling out drawers and raising springs or covers when wishing to file a letter or paper.

Our system saves time, and the price of our Files is from three-fourths to one-third less than other kinds. We place our

Cabinet Letter Files
ON THIRTY DAYS TRIAL.

— AND —

WHITE'S TAR,

SIZE 5x7,

\$11 per Case,

shown in the cut, which we claim to be the most perfect FORM or STYLE of package ever devised. It is superior to the ordinary Package of Sheets, because all litter of scraps is avoided; and it is superior to Rolls, because it is certain where the sheet will detach from the package, and this avoids waste. The disinfecting cover is as thorough a deodorizer as any costly apparatus, while the artistic design and printing gives the box a very neat appearance.

WHITE & SCHERMERHORN, Manufacturers, No. 46 West Broadway, NEW YORK.

TRICKS IN THE BOOK TRADE.

"That is a counterfeit," a down-town bookseller said, holding out what purported to be a reprint of a work by a popular English writer. "I would not tell everybody so; but I will wager any amount of money that that work was not written by the author whose name is attached to it. It is simply the production of some obscure penny-a-liner, published under the name of a well-known English writer to make it popular with a certain class of novel readers. This is one of the tricks of the publishing business, and not a very new one either. The deception has been practised so long that it is a wonder that it has not been exposed long ago. It is more frequently practised with cheap periodical literature than in bound books. Unscrupulous publishers of this class of literature use the names of many standard English story writers as a sort of stock in trade. They not only reprint their genuine productions almost as soon as they appear in England, but they make this dishonest use of their names. Many publishers are so bold in practising this deception that they boast of it in a sly way. There is no law against this practice, and so long as writers can be obtained who can so nearly imitate the style of standard English authors that the counterfeit can scarcely be told from the genuine, I do not suppose a novel reader cares whether he is humbugged or not.

"I have known cases in which persons who could not write a paragraph fit for publication have been credited with the authorship of literary productions. The fictitious author, you see, happened to be a person of some notoriety, and with his name attached the book became popular with a certain class of readers. Another trick resorted to by many publishers, and many, too, that stand well in the estimation of the public, is the publication of shoddy books. The competition in the book business is so great a certain sort of publishers practice deception even in regard to the quality of their products. Books are made with elegant covers and every appearance of serviceability, but they are things which must be handled with care. They are low-priced, to be sure, but they are bound in nearly the same style as more costly and more strongly made books, and the buyer congratulates himself that he has got a bargain. It is not long, however, before he discovers his mistake. After a few days' use the book tears loose at the back, and the leaves fall out. Here is a popular boys' story-book. You see, it has a red cloth cover, embossed with a pretty design in gilt and black. It is an octavo of 666 pages, and the price is \$1.25, seventy-five cents less than a work of this style and size usually brings. Of course it proves a tempting bait to the buyer, who does not give the character of the workmanship a thought. It is a cheat, because it is made to deceive, and if it were not for its binding, the buyer would pay more and get something that would be satisfactory."

"Do the booksellers have any tricks?"

"Tricks? There is no room for tricks. Book-selling is going to the dogs. Avaricious publishers are ruining the retail book trade. Nearly all standard books are now sold by canvassers. The result is that the canvasser may make his \$10,000 a year while the retail bookseller has a hard job to live. Book canvassers are literally doing the bulk of the book trade. The cutting into the book trade by the dry-goods bazars is also having a bad effect on the business. These stores only use books to advertise their business, and of course sell them much lower than the retail dealer can. Regular dealers are forced to

cut down their prices in a feeble effort to compete with these dry-goods dealers. A certain Chicago publishing firm have a branch store in a dry-goods establishment in this city. They offer their own productions at a discount of 30 to 50 per cent., and those of other publishers at proportionate reduction. With these drawbacks to contend with, it is no wonder that the retail bookseller has to struggle for a livelihood."—*N. Y. Sun.*

TYPOGRAPHIC ETCHING ON GLASS.

A Sydney paper is illustrated by typographic etchings on glass plates, made by the process of H. S. Crocker. The writing or drawing is executed with a resist crayon made of a waxy material, and it need scarcely be said that hydro-fluoric acid is used as the etching fluid. It has been noticed that the tendency to undercutting is remarkably small, so that no precautions are required but an occasional stopping out of the finer parts. The glass plates are cemented down on metal blocks for use in the printing machine, but it is not stated how the clearing out of large whites and the turning of the blocks is effected. It is said that the inventor originally intended to print from electrotypes taken off the glass; but this was found unnecessary in practice, as no inconvenience is caused by the use of the glass itself in the printing press.

The "new porcelain" of Sèvres has lately been described by M. Ph. Burty. The creaminess of the paste and the depth and brilliance of the enamels are referred to in glowing terms. M. Lauth and M. Voght have between them, it is said, discovered the secrets of the Chinese, and can produce colors rivaling the finest specimens of Oriental turquoise and *foie de mulet*, not only now and then, but with certainty. The first public appearance of the "new porcelain" will be at next year's exhibition of the Union Centrale at the Palace of the Champs Elysées, where special rooms will be reserved for the national manufacture of Sèvres.

Max Meyer, of the firm of Max Meyer & Co., Omaha, Neb., and Mr. Cowperthwaite, of the firm of John Wanamaker & Co., Philadelphia, Pa., were among the out-of-town tradesmen in town during the past few days.

THE USE OF TERRA-COTTA.

Instead of stone carving for the external decoration of buildings, terra-cotta has been much on the increase during the last few years, and with good reason, for while equally fine effects can be obtained in terra-cotta, as compared with stone, the former material has the great advantage of not being liable to become affected by weather, as regards color or durability. Indeed, while stone breaks or chips in frosty weather, and suffers greatly from smoke and rain, terra-cotta becomes harder and firmer the longer it is exposed. Properly prepared it is, to use a familiar phrase, as hard as iron.

There are certain difficulties of preparation arising chiefly from a tendency to shrink or to crack in drying or baking, which have interposed obstacles to the general use of terra-cotta; but these are now successfully overcome, and the material bids fair to re-establish itself (we say re-establish, for its use is almost as old as the art of pottery) as a formidable rival to stone carving. Hitherto the panels employed have been chiefly of a purely decorative kind, geometrical designs, or foliage in different stages of relief.—*Pottery Gazette.*

The name of apthite, or unalterable, is given to a valuable alloy made at Marseilles, and which closely resembles gold in color and appearance. Its production is accomplished by placing in a crucible copper as pure as possible, platinum and tungstic acid, in certain proportions, and when the metals are completely melted they are stirred and granulated by running them into water containing five hundred grams of slaked lime and the same of carbonate of potash for every cubic metre of water; this mixture, dissolved in water, renders the alloy still purer. The granulated metal is collected, dried, remelted and a definite proportion of fine gold added. For jewelry the material is almost unsurpassed.

A new building has been erected by Carter & Co., at Niagara Falls, N. Y., for the manufacture of a patent check book. The machinery is mostly covered by patents of the firm and designed especially for the work, one machine in particular, for splitting and numbering the paper, being the only one of its kind in America. The industry will give employment to twenty-five hands.

Foley's Patent Improved Stylographic Pen.

Great reduction in price: No. 1, \$1.50; No. 2, \$2.00; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

ARTISTIC EFFECTS OF BLUE.

In decoration many happy effects are produced by a wise use of blue. It contrasts with white or buff or orange, when deep with pink or maroon or golden brown, and when bright with chocolate. A light blue pattern on a dark blue ground subdued, lightened, or relieved with fanciful devices in the various tints just enumerated may be made to result in a very handsome ornamentation to a wall, ceiling or soffit, where there is a redundancy of light, but being cold and retiring blue requires the adroit and kindly help of the artist to extract from it its intrinsic qualities. Many varieties of blue are used by the decorator. Blue verditer is a beautiful light blue pigment, supposed to be a carbonate of copper, and very useful in distemper painting. Oxide of cobalt communicates a magnificent blue color to glass, and smalt, which is used as a pigment, consists of glass colored by cobalt. Blue ochre is an earthy phosphate of iron, producing a deep blue pigment of considerable use, and not affected by mixture of foul gases. Prussian blue and indigo are almost too well known to require naming. By means of these and similar pigments, not only is decoration in its loftiest sense carried to a successful climax, but the clever marbler is able to compensate in some degree for the dearth of the valuable stones he often imitates on wood, plaster, glass, or slate, with much truthfulness as to figure, color, curl and vein.

From the fantastic and ever-varying pattern displayed by the original mineral, however, there is always a fine field for the imagination to revel in when counterfeiting it, and accordingly, in marbling a blue variety, little else is needed but to skillfully overspread on light blue-and-white ground yellow, brown, ruby, white or blue in dabs, blotches, spots and veinings. Blue and gold marble requires in addition a touch or two of gold paint. The paper-hanger ably supplements the efforts of the painter and marbler in hiding the nakedness of walls by covering annually acres of surface with pretty blue-veined "siennas" and blue "granites" often jointed in ways more picturesque than possible, to say nothing of the satin, pulp and flock papers, which, in their inexhaustible diversity of coloring, necessarily exhibit every conceivable depth and tint of blue. Thus it is seen that, although in the decorator's craft blue merely stands on an equality with the other principal colors, most kinds of materials are, as it were, figuratively connected by a "thread of blue" that has no parallelism in point of continuity in any other color.

AN IMPROVED TRICYCLE.

A well-known manufacturer of tricycles in Massachusetts will introduce this season a greatly improved machine, giving greater strength, durability and speed. The most noticeable change is in the steering contrivance, the rack and pinion arrangement with its too free play and lack of sensitiveness having given place to a device in which a couple of phosphor-bronze ribbons play the principal part, one end of each ribbon being attached to the steering rod, the other to the little drum of the handle, which replaces the pinion. The slightest movement of the handle works the steering rod back and forth, one of the ribbons being rolled over the drum as the other is unrolled, and the direction of the steering wheel, to which every motion of the hand is communicated, can be determined in this way within the 1000th part of an inch. The special advantage of the new arrangement

is that it avoids all noise and rattle, requires no lubrication, is thoroughly adjustable and prevents any lost motion in steering. Every wheel, pedal and crank-end is fitted with one of Bown's *Æolus* ball-bearings, which the company now manufactures for themselves, having made special arrangements with the proprietors. One of these bearings has been tested in the shop under the same conditions as when it is in actual use, a 50-pound weight being attached. Revolving at a rate of two miles a minute it ran 4,000 miles with a single application of plum-bago lubrication without showing the slightest heat or wear as measured by the micrometer.

Another feature of the tricycle which has been successfully tested is a device by which the right wheel may easily be detached from the axle, leaving the machine only twenty-nine inches wide and small enough to roll in at any ordinary door the trail rod bearing up the side of the machine from which the wheel has been detached. The arrangement is very simple, and the wheel can be taken off or put on easily in the dark in ten seconds by simply loosening or tightening a sleeve-nut. The end of the short division of the axle is covered and fits into a covered hole bored in the main division, thus giving a true centre for the wheel's revolution when in use, while the parts are kept from slipping by a shouldered joint, and the sleeve-nut slipping over the point of division makes that part of the axle stouter than any other. The new features include a square rubber pedal which prevents slipping by adapting itself to the curve of the foot, and a self-acting pawl-and-ratchet brake, which it takes no strength to operate and which stays where it is put, the pawl being regulated by a spring button on the top of the handle, an arrangement which is likely to prove popular in comparison with the old brake, which had to be held firmly in the hand all the way down-hill. Climbing hills is made easier by an ingenious two-speed gear by which through dropping a cog in the wheel some of the speed may be converted into power. The frame of the machine is constructed of weldless steel tubing, manufactured at Birmingham, England, which is lighter and stiffer than the ordinary make. The wheels are fitted with double butt-ended direct spokes; the larger wheel containing 64, the smaller ones 24, although the usual allowance has been 50 and 20, the spokes being flattened only at one end. There are 1,000 machines now being made, and there are facilities for turning out 2,000 year, the time required for the manufacture of one machine being about five months. The greatest care is shown in finishing every part of the tricycle. All the plans are draughted with extraordinary nicety by a draughtsman kept constantly employed by the company in the shops, and every piece is put to the severest practical test in order to determine its breaking limit.

CANFIELD "DIVIDED" ERASER. (Formerly "Acme") ERASER. of Rubber as pure as can be profitably used, with brush-like ends: has surprising erasive quality; never soils paper or abrades its surface; Improves by use. Postpaid, 15c. The trade supplied. CANFIELD RUBBER CO., Middletown, Conn.

ELECTRO-PLATING WITH NICKEL.¹

BY WILLIAM H. WAHL.*

Nickel-plating is an American industry, in the sense that it was first successfully practised on the commercial scale in the United States, and here received that practical demonstration of its usefulness that has since made it the most successful and most widely practised branch of the art of electro-plating. Coming first into prominence and popularity about ten years ago, it has since that time rapidly grown, until today it has developed into an industry of great magnitude. The almost silvery whiteness and admirable brilliancy of electro-deposited nickel; its cheapness as compared with silver; the hardness of the electro-deposited metal, which gives the coating great power to resist wear and abrasion; the fact that it is not blackened by the action of sulphurous vapors which rapidly tarnish silver; and the circumstance that it exhibits but little tendency to oxidize even in the presence of moisture, are sufficient to explain the great popularity which nickel-plating enjoys.

The industrial development of the art, however, which has been surprising both in respect to its rapidity and extent, may be attributed in a large measure to certain favoring circumstances, quite independent of the excellent adaptability of the metal for electro-plating purposes. These circumstances are: first, the great advances that have been made within the period above named, in the production of nickel on the commercial scale, by which the cost of the metal has been greatly reduced, and its purity greatly increased, for which we are indebted largely to the American Nickel Works, of Camden, N. J., under the scientific management of Joseph Wharton; and second, the introduction and great improvement within this period, of the dynamo-electric machine, which placed at the disposal of electro-platers a constant, powerful and cheap source of electricity, in the place of the uncertain, troublesome, and comparatively expensive voltaic battery, to the use of which they had of necessity been hitherto confined. Alex. Watt was among the first, I believe, to call attention to these facts. He states, for example, that "the difficulty in obtaining pure nickel anodes of large surface, for many years checked the progress of this useful art, while the slow and uncertain action of the ordinary battery rendered it ill-suited to the desposition of this peculiar metal on the large scale;" again, "it is doubtful whether nickel-plating would ever have held a really high position in the arts, if the dynamo-electric machine had not been introduced;" and in another place: "Indeed, as we have said, it is doubtful if this branch of the art (*i. e.*, nickel-plating) could even have been extensively pursued with advantage on a large scale, if battery-power alone were available." In considering the subject of the present very extensive application of nickel-plating, therefore, the above facts and explanations should not be lost sight of. So general has the demand for nickel plating grown to be, and so universally is it employed, that, for the sake of economy, hundreds of establishments throughout the United States engaged in the manufacture of the most miscellaneous articles of brass, copper, iron and steel, have introduced the nickel-plating plant, and do their own plating. Furthermore, innumerable small articles of metal of trifling value are nickel-plated, after a fashion, by the manufacturers, not to protect them from the action of corro-

sive agents, but simply to catch the eye of the purchaser and to make them sell. As may readily be imagined, this state of things has produced a severe competition among those engaged in the business of nickel-plating, which, while it has had the effect of bringing down prices to extremely low figures, has incidentally also had the effect of causing a very general deterioration of its quality.

An enumeration of the great variety of products that are nickel-plated would be impossible. Among them may be named dental and surgical instruments of every description, harness and saddlery trimmings, carriage-fittings, spoons and forks, locksmith's work, brass cocks and faucets, and the decorative metal-work of plumbing and sanitary wares, scale and balance beams and weights, mountings of guns and pistols, the metal parts of lamps and lanterns, fire grates and fixtures, stove decorations, door plates, cuspadores, watch and clock cases, hand-rails of railway-cars and car-seats, &c., stair-rods, points of lightning-rods, show-cases, the external parts of sewing machines, steam and water valves, gauges and miscellaneous machinery accessories without number.

From the very brief account that M. Roseleur gives of this subject, it would appear that the art of nickel-plating had received little or no attention in France up to the year 1880; furthermore, from the somewhat contemptuous reference with which he dismisses it, it is apparent that at that time he had no knowledge of the remarkable progress and development of the art in this country, and no conception either of the perfection to which the processes had been brought, or the beauty and utility of the results obtained.

Although, however, it would appear from the remarks of the author, just referred to, that nickel-plating had received but little attention in France up to the year 1880, the art appears to have been transplanted to England with much success, as the following reference to the subject by Watt will testify: "The time has now arrived, however, when it may be fairly stated that the art of nickel-plating has become, in proper hands, one of the most successful and at the same time one of the most extensive branches of electro-deposition. For several years nickel-plating in this country (*i. e.*, England) had been principally confined to some three or four houses. Now, however (1880), the process has been most extensively adopted in London and throughout the kingdom, as also in many foreign countries. There is no doubt that its extensive application in the United States acted as a stimulus to our own manufacturers, who have steadily, though tardily, recognized in nickel a most useful coating for certain kinds of metal-work.

NICKEL SOLUTIONS.

One of the earliest allusions to the electro-deposition of nickel is that of M. Ruoltz, in the year 1841. The reference is as follows: "The same method—that is, the use of a solution of the double cyanide in water (prepared by dissolving the metallic oxides in cyanide of potassium)—may be employed for coating other metals with copper, tin, cobalt, nickel and zinc." In 1843 Smee states that "metals may be covered with nickel by proceeding as in former cases. The solution to be used is the chloride of nickel with a nickel positive pole. The single battery process is to be preferred, but pure nickel, though very brilliant, is apt to be rather brittle. . . . It is best reduced by the compound battery process, with a platinum positive pole, though a nickel positive pole may be employed.

When we employ either the nitrate or sulphate of nickel for electro-metallurgy, it is preferable to use the solution as strong as possible. Of the compounds of these salts with the alkalies, those with ammonia deserve the preference, and the ammonio-nitrate and the ammonio-sulphate may be used for the reduction of this rather troublesome metal." In the same year (1843), Dr. R. Boettger published an interesting account of his experiments in plating with nickel from which I take the following quotations: "No salt of nickel or of platinum has yet been found well adapted to plating baser metals with nickel or platinum. Experience has taught that a compound of cyanide of nickel with cyanide of potassium, according to the statement of Ruoltz, by no means attains the object, nor is the platinum salt recommended by him any better."

"From a long series of experiments expressly made on this point, I believe I have discovered, and can give the assurance that among all the salts of nickel none is so well adapted to plating, especially on copper or brass, as the ammonio-sulphate of nickel; at least, the cyanide of nickel and potassium recommended by Ruoltz is far inferior to it, even in a very long-continued, constant current. Sheet copper comes out of the solution of ammonio-sulphate of nickel almost *silver white* and *brilliant*. I have obtained in this manner, after the action of a moderately strong galvanic current for half an hour, a considerable deposit of nickel on copper, quite sufficient to deflect violently from the magnetic meridian, a magnetic needle suspended by a fibre of silk. A drop of common nitric acid on the nickel coating exhibited in a given time no sensible action on the subjacent metal, while sheet copper which had been allowed to remain in a gilding bath under the influence of the current for the same length of time, was almost instantly attacked by nitric acid. From this it may be inferred that the galvanically deposited nickel coats the copper more rapidly, adherently and uniformly than gold similarly deposited."

* * * * *

"To prepare the salt of nickel here referred to, the impure nickel of commerce suffices completely. To this end it is dissolved in nitric acid, a stream of sulphuretted hydrogen is passed through the solution for some time in order to precipitate all copper and arsenic, and the filtered solution is then precipitated by carbonate of soda. The well-washed carbonate of nickel is dissolved in dilute sulphuric acid, and the solution is placed beneath a bell-glass over concentrated sulphuric acid, in order to obtain it crystallized. These crystals are pulverized, transferred to a suitable flask, and ammonia gradually poured over them, until sufficient has been added to dissolve them. The resulting fine, dark-blue solution may be directly used for the purposes above named."

It may be proper to add, in this connection, that one of the uses suggested by Boettger for his solution is for the preparation of pure sheet nickel.

In the fourth edition of his work Roseleur affirms that as early as the year 1849 he had succeeded in the establishment of M. Kraitz, at Grenelle, in obtaining on table-ware an excellent deposit of nickel of considerable thickness, with the use of the double sulphite of nickel and ammonium as the depositing solution.

(To be Continued.)
